INTERDISCIPLINARY RESEARCH PROJECTS

GAMU – Research support programme

Proposal title:

Duration	from:	to:
Applicant		
contacts (phone, e-mail)		

Co-investigators: <i>(Key persons from each workplace. CVs of co-investigators must be attached to the proposal.)</i>		Faculty

Abstract (max. 300 words)

--

Description of the project (max. 3000 words)

The basic concept and objective of the project.

--

Methodology (max. 500 words)

Description of individual steps in the project (timing, their link to the expected outputs), description of used methodical approaches and involvement of teams / individuals in specific activities (organizational structure)

Interdisciplinary nature of the project (max. 200 words)

The importance of interdisciplinary solution of the project, the perspective of long-term cooperation after the end of the project.

Outputs of the project**Comment on the budget**

Short justification of the project budget. The personal cost of team members or other necessary costs don't have to be planned in the project if they are covered by other sources. In that case please describe shortly the cofinanced costs.

Comment to the extra budgeted for a woman returning from parental leave

The total cost of the project may be increased by CZK 500 000 if a female researcher who is on the parental leave or returns from the parental leave (with a minimum of 0,5 workload) will be included in the team.

The goal is to help female scientists to return from parental leave and to start their independent scientific career.
