- Reordering Policy (we will go over it later in this course in section Requisition worksheet and netting calculation)
- Safety Stock Quantity and Reordering point (we will go over it later in this course in section Requisition worksheet and netting calculation)
- Item Tracking Code

Costing methods concisely

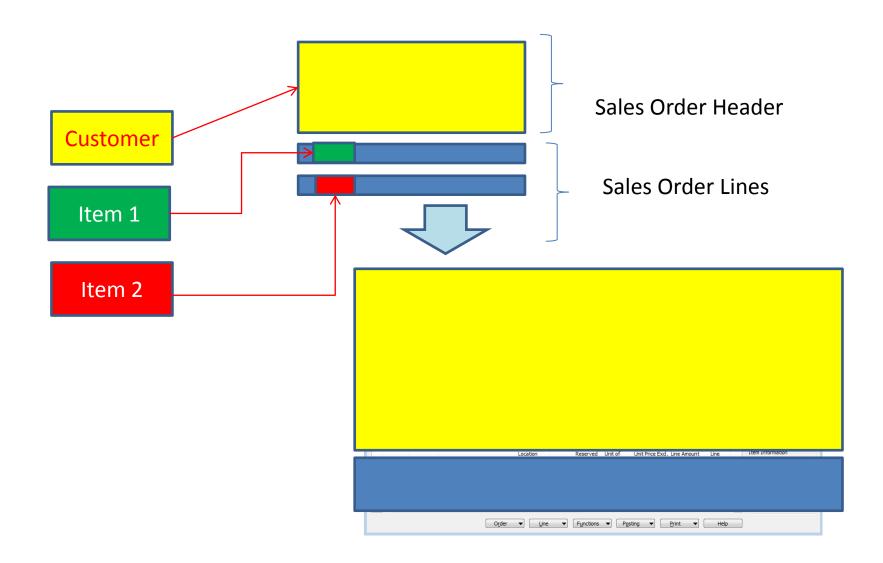

- **FIFO**: An item's unit cost is the actual value of any receipt of the item, selected by the FIFO rule. In inventory valuation, it is assumed that the first items placed in inventory are sold first.
- Used when business environments where product cost is stable.
- Average: An item's unit cost is calculated as the average unit cost at each point in time after a purchase.
- Used in business environments where product cost is unstable. When inventories are piled or mixed together and cannot be differentiated, such as chemicals.

Creation of the brand new customer

- Manually only for NAV expert
- By use of Customer template easier way

Creation of the new template

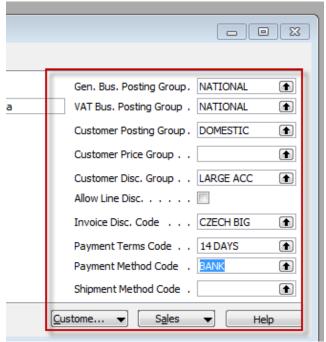

F3- enter Name and Description of the template and by **F6** (look-up) we will Choose Country, Currency and Territory code (if territory code for Brno is not there, please simply enter by use of keyboard and confirm by Enter. See partly created template below.

Creation of the new template

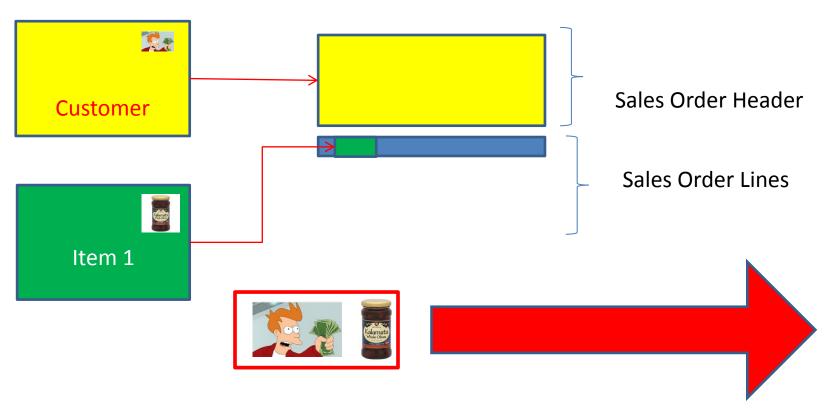

The next step is the setup of the template by entering :

- General Business Posting Group
- VAT Posting Group
- Customer Posting Group
- Payment condition and other fields
- Teacher will explain basics about
 Posting groups (see next slide)

Right part of the template window

Posting Groups

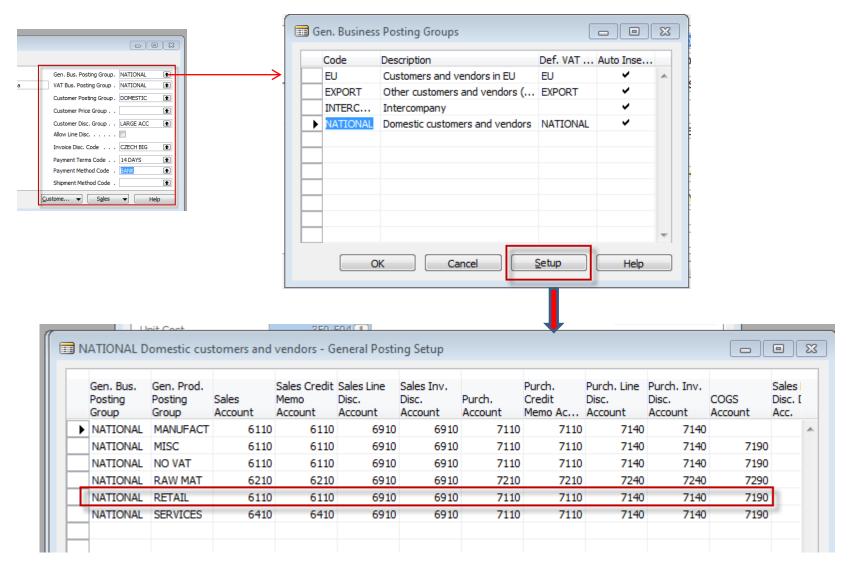

= General Business Posting Group (chosen code=NATIONAL)

= General Product Posting Group (chosen code=Retail)

Posting Groups

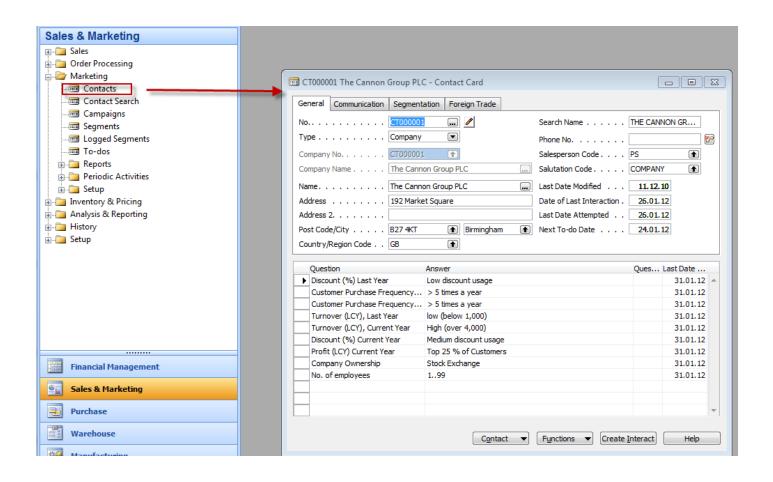

Let's go to international Brno Fair

- We are Greek Olive supplier and you are trying to find new customers in the Czech Republic
- Contacts visit your booth (stand) and taste your olives a lot
- Some of them will offer a visit card

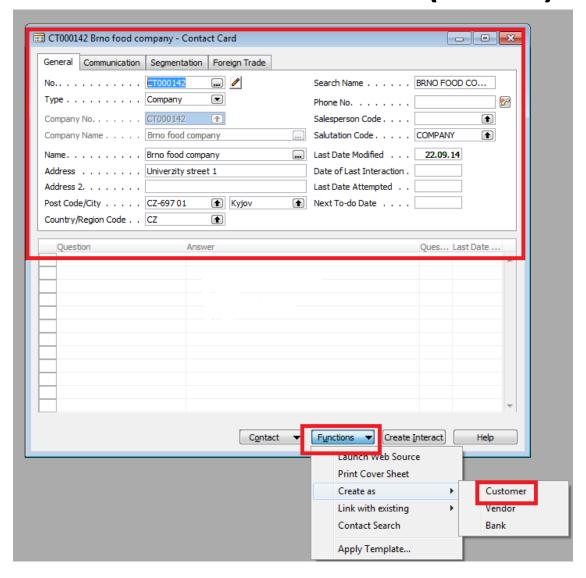

Data used by marketing department New Contact Cards are created in MS Dynamics NAV
