MSS Network Security Associate Engineer Tier 2

Location: Brno

Working hours: EMEA central shift

MSS is looking for candidates for the position of Network Security Engineer, Tier 2, to provide Service Assurance for our EMEA-Restricted and International customers. The team handles incident management and change implementation on firewalls and proxies. This is a complex job in a dynamic and demanding environment.

Roles and Responsibilities:

The team handles incident management and change implementation on firewalls and proxies in a dynamic environment.

Key Competencies and Skills:

- Mandatory experience in network environment.
- Knowledge of at least one firewall vendor is preferred.
- Genuine interest and natural curiosity towards network security field.
- Highly motivated and reliable individuals with effective problem solving skills.
- Positive stress tolerance and high energy.
- Advanced English language level.

Education and Qualifications:

- Background in IT networks or network security.
- Minimum CCNA knowledge level or equivalent.
- CCNA Security (or equivalent) is preferable and an advantage.

Additional Information:

- Central shifts of 8 hours with occasional weekend shifts.
- We have a wonderful team atmosphere with frequent team buildings and events.
- Internal trainings and mentoring are provided to newcomers.
- Our team gets vendor trainings every year on technologies we support.
- Certifications are reimbursed.
- You will become part of the MSS Family!
