

The IBM Delivery Center Central Europe – Brno is one of the biggest and most diverse IBM centers of its kind worldwide. Its core activities focus on providing strategic outsourcing services – remote server and application support, networking services and end customer support.

Command Center Project

Character of the project

business (five months)

Description of the project

Scope of project is to simplify internal tools used in Command Center team and make a transition from Domino to Semaphore application. This application should eliminate human error or breach of procedure.

This project could have up to 4 goals. First goal is design web based applications which is compliant and allows tuning only specific items which are needed to be changed time to time. Second of them is transfer some of internal tools from Domino Database to intranet server. Write new web based application from scratch which satisfy the required conditions of currently used one. Third goal is creation of new web based application which is very similar to previous ones for procedures where this application doesn't exist. Fourth goal could be work in cooperation with z/OS programmer on interlink between new applications and IBM tools used for activity execution. Vision of this idea is already prepared. Application will be based on pre-filled templates.

Work activities

- ✓ Student will get familiar with internal tools used in department, consulting work with team leader and other specialists.
- ✓ Student will come up with his suggestion of design.
- ✓ After consultations and design proposal student will have meeting with one of senior administrator of application portal. They will discuss details of compliance and rules. Student will get familiar with intranet server background.
- ✓ After creation tool will be tested with one of operators from command center and customized if needed.
