Collaborative Research & Development with Industry

Johanna Holldack, MD

13 October 2021 | 4 – 5 pm (CET) | Online Webinar

Planning a research collaboration with industry?

Collaborations with industry are often crucial for translational life-science projects to succeed.

However, they have to be taken with caution.

In this **SPARK Europe Webinar**, **Johanna Holldack, MD** by training specialized in pediatric oncology with 30 years of experience in academia (university of Essen, Harvard, Freiburg) and the pharmaceutical industry (Behringwerke, Chiron, Medigene, etc), will illustrate with examples from her own experience the potential and the risk behind partnerships between academia and industry.

After this online lecture, you will have gained insight into the following questions:

- What are the advantages and disadvantages of such an endeavor?
- How do you get industry contacts and identify the right partner?
- What are the pit falls?
- What are possible funding sources?

Online via **GoToMeeting** | Please register [here!](#)

Registration to the webinar is required in advance. Please register no later than 12 October 2021. Please note that you will receive the GoToMeeting link and access code the evening before the lecture and that access to last minute registrations, cannot be guaranteed.
