

SPARK EUROPE INNOVATOR CAFÉ 2023

Wednesdays
at 16.00 CET

SPARK Europe
Innovator Café

Scientists Turned Entrepreneurs

Panel discussion:

"Hidden tips for success in healthcare"

10 May 2023 | 16 to 17 (CET) | Online Webinar

Paola Occhetta, PhD
CEO of BiomimX

Giovanni Manfredi, PhD
CEO of Novavido

Fabio Boi, PhD
CTO at Corticale

Gian Nicola Angotzi, PhD
CSO at Corticale

From BENCH to ... BUSINESS!

In **SPARK Europe Innovator Café** our panellists, who have been bench-scientists not too long ago, will reveal what it is like when a scientist turns into an entrepreneur and give insights on valuable lessons learned and pitfalls they came across along the way.

Please register [here](#)

In unforeseen cases the organizers may change and update topics and speakers.

SPARK EUROPE INNOVATOR CAFÉ 2023

Wednesdays
at 16.00 CET

SPARK Europe Innovator Cafe Scientists Turned Entrepreneurs

About the „Hidden tips for success in healthcare” will talk:

- ☉ **Paola Occhetta**, PhD - the CEO of BiomimX S.r.l. Their technology, Beating Organs-on-Chip, unlocks human pre-clinical models reflecting clinical complexity, towards the design of effective treatments tailored for patients.
- ☉ **Giovanni Manfredi** who holds a PhD in materials science and is the CEO of Novavido S.r.l., developing and commercializing a medical device which can substitute photoreceptors damaged by retina degenerations and bring new light in the life of people who lost their sight.

And two gentlemen from Corticale - first OEM neurotech company dedicated to the development and production of implantable neuroelectronic CMOS devices brain research instrumentation and bioelectronic medical device:

- ☉ **Fabio Boi** - CTO, a robotic engineer who holds a PhD in brain machine interfaces. In Corticale he deals with the development of business production processes and the quality control of products.

and

- ☉ **Gian Nicola Angotzi** - CSO, an electrical and electronic engineer, who holds a PhD in electronic and computer science. In Corticale deals with electronic development and the creation of new concepts that will drive the technological evolution of the company.
