

ERP Project Activities

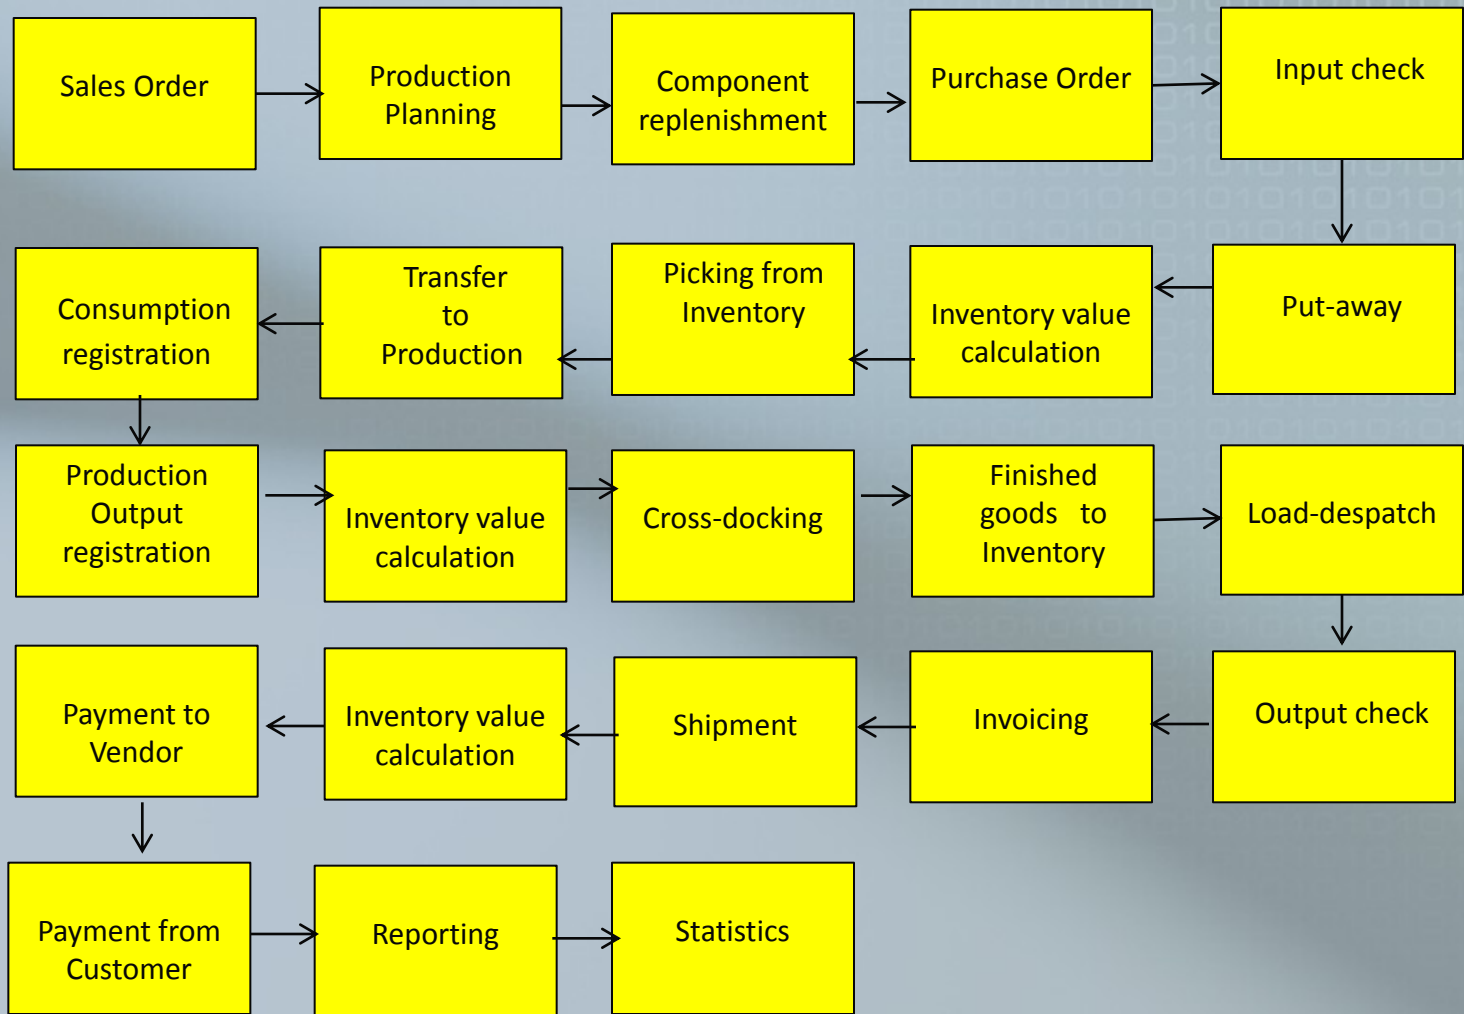

Skorkovský, ESF MU, Department of Business Economics , version 20120919

Your main task (not organised set of processes)

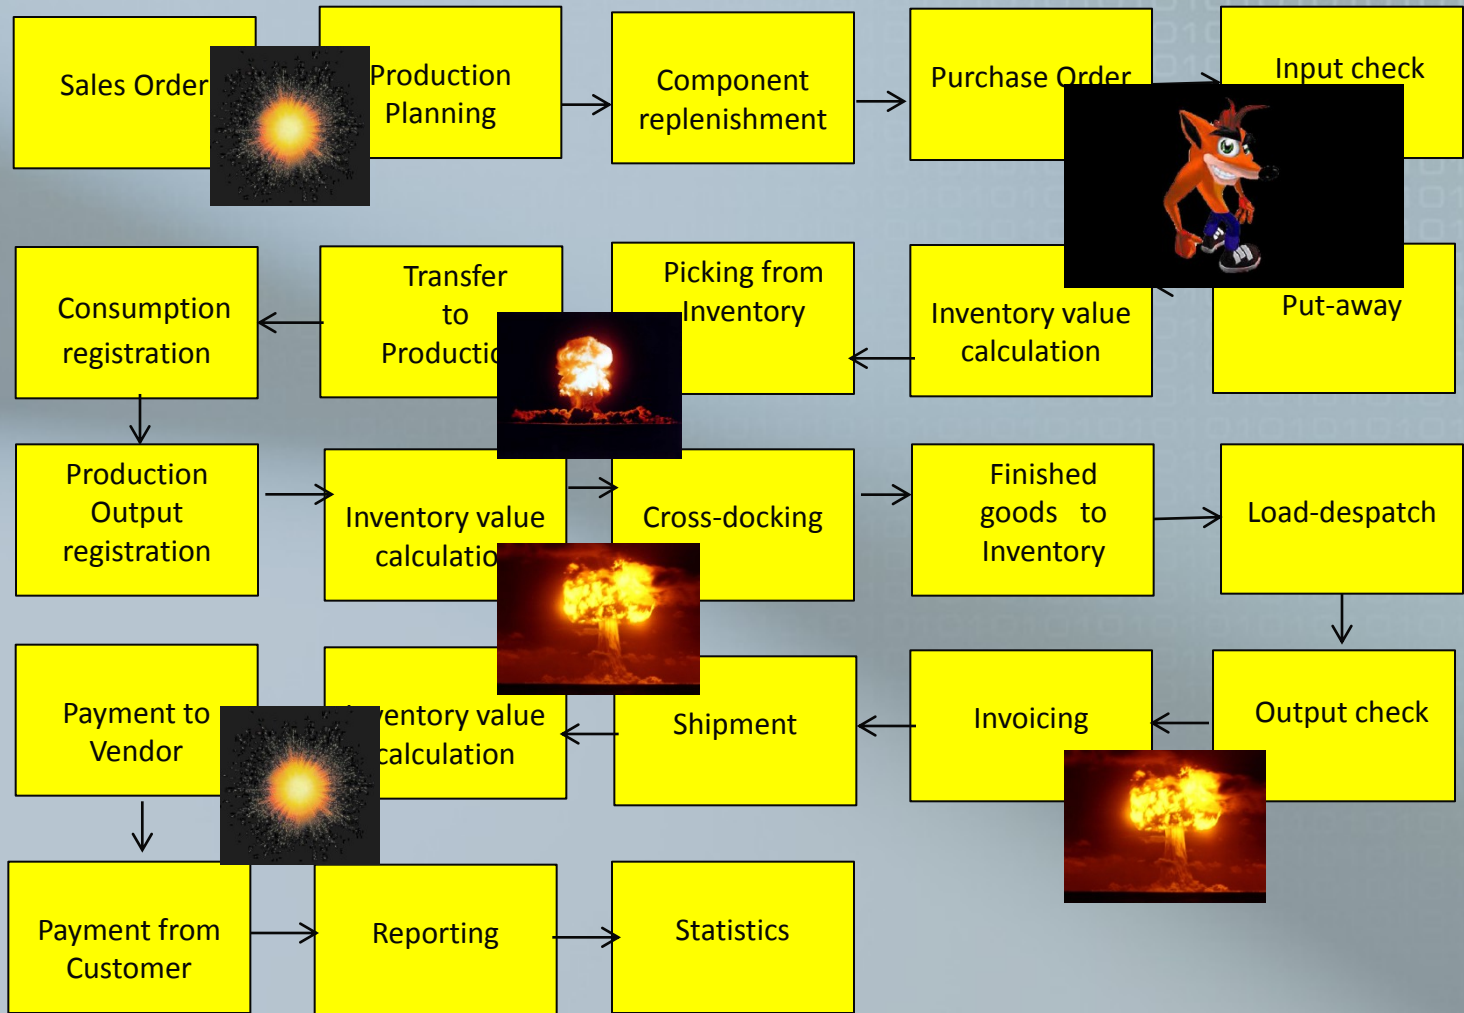

Load-despatch	Purchase Order	Reporting	Statistics
Consumption registration	Production Output registration	Inventory value calculation	Output check
Delivery	Production Planning	Sales Order	Component replenishment
Transfer to Production	Put-away	Cross-docking	Input check
Finished goods to Inventory	Picking from Inventory	Invoicing	Payment

Your main task (organised set of processes)

Your main task (possible problems, bottlenecks,..)

Your main task

(Search - **HOW** ??? Measure impacts - **HOW** ??? and Destroy - **HOW** ???)

Methods (not sorted so far)

- Theory of Constraints
- Critical Chain
- Ishikawa Fishbone Diagram
- Pareto Analysis
- OLAP (On-Line Analytic Processing)
- Kepner –Tregoe method
- MaxMax and MaxMin (Hurwitz)
- SWOT
- ERP Statistics and reporting
- Balanced Scorecard
- And many, many more.....

Purchase

Sales

Processes

- Quotes->Net change calculation->
- >Order->Vendor batch tracking e->
- >Input Quality check->Receive, Put-away->
- >Invoicing

- Orders->Sub-Load and Load->
- >Batch tracking
- >Output Quality check->Picking ->Shipment
- > Invoicing -> Applying payments

ERP

Main problem (one of many)

Main problem II (need of reliable data)

We need finite capacity scheduling (APS)

$$T1 + T2 = X$$

$$Opt = \text{Min}(X)$$

Why we cannot manage it ?

Unclear priorities, bad = **SOP** ,...

(**SOP** = Standard Operation Procedures)

Level production

Level production strategy

Period	Sales Forecast (kg)	Production plan (kg)	Inventory (kg)
Spring	80 000,00	100 000,00	20 000,00
Summer	50 000,00	100 000,00	70 000,00
Fall	120 000,00	100 000,00	50 000,00
Winter	150 000,00	100 000,00	0,00
		400 000,00	140 000,00

Hiring cost/worker	100,00
Firing cost/worker	500,00
Production cost/kg	2,00
Inventory carrying cost /kg	0,50
Production cost/kg/worker/quarter	1000,00
Beginning work force (workers)	100,00

Cost of Level Production Strategy
 $(400,000 \times \$2.00) + (140,000 \times \$0.50) = \$870,000$

Chase demand

Chase demand strategy

Period	Sales Forecast (kg)	Workers needed	Workers hired	Workers fired
Spring	80 000,00	80,00	0,00	20
Summer	50 000,00	50,00	0,00	30
Fall	120 000,00	120,00	70,00	0
Winter	150 000,00	150,00	30,00	
			100,00	50,00

Cost of Chase Demand Strategy

$$(400,000 \times \$2.00) + (100 \times \$100) + (50 \times \$500) = \$835,000$$

Aggregate planning

Planning involves decision hierarchy...

A simple business case....(example)

- Printing Company in Upper Lower Corner village somewhere in backwoods has a small problem :
- They use for managing printing procedures :
 - a very basic economic system **Sunshine** written by Six grade student (a son of the owner) – written in Pascal
 - another different systems for quotes calculation, logistics, production planning and control written in :
 - v obsolete FOX PRO
 - by 3 different programmers from 3 different companies
 - MS Office

Solution fully integrated to standard ERP package

Zástupci

Actual situation (example)

Effects

- difficult upgrades of applications
- difficult communication between different applications
- reduplicated data (redundant)
- non actual data->bad decisions
- etc.

A simple business case (printing industry)...example

Competitive market could requires for instance :

- **fast reaction** to quotes
- variable quotes and their immediate costing (calculation)
- **shortening of delivery times**
- shortening lead times and flow times
- reduction of inventory values (paper, colors)->higher liquidity
- quality improvement ->**8D reports should be used**
- processes driven by flexible **workflow**
- exact evaluation of finished jobs (production orders) in order to know real costs
- feed backs to external and internal signals such as :
 - reasons of quotes dismissals (**why ????????**)
 - reason of unexpected costs

A simple business case....

- Competitive market also requires :
 - Modern and efficient SW tools to control these processes :
 - **prepress**: desktop publishing, computer to plate, ...
 - **purchase** of material (paper, colors,..)
 - **imposition** (how to put locate texts on the paper)
 - printing using different technologies (sheets, rotary press,..)
 - production planning and shop floor control
 - finishing operations such as
 - cutting
 - gathering
 - stitching
 - flexible invoicing
 - on-line accounting and so on and so on

} special printing operations

Printing machine

A simple business case....

- **Bottlenecks (TOC) – Threats (SWOT) :**
 - obsolete information system, which requires all time some changes, patches,...
 - all parts of information system form an heterogeneous is IT tools heterogeneous hydra :finance management, costing, production, inventory, HR,... ,which **never provides user with real picture of the business**
 - inaccurate data from one application is inherited by another one, so the picture of the business always late
 - Costing depends on human failing factors
 - one author of every single subsystem
 - these authors **never meet each other** to coordinate their efforts...

A simple business case....

■ Bottlenecks (TOC) – Threats (SWOT) :

- internet auctions favour competitors which are cheaper and faster
- the size of paper and colour purchase orders are based on inexact assessment of purchasers (if we have a lot of orders, types of papers, various machines and so on, the optimum assignment of the purchase batches sizes is beyond ability of human being with paper and pencil)

Gaza gate →

A simple business case....

- Messiah arrives and says : “ I have for you this :“
 - modern and flexible and **standard** ERP system
 - background of IT company with tradition and experience
 - background of global IT vendor
- On the other hand an arriving messiah did not offer:
 - the knowledge of printing industry
 - printing application fully integrated with **standard** ERP
- Arriving applicant must :
 - understand processes in printing industry (or any other base on chosen branch)
 - be able to write printing application using development tools (languages) of standard ERP system
 - implement the solution
 - **OR** instead of **these three blue marked points** to find already existing vertical solution for printing industry, which is used all over the globe

A simple business case....

Finding a vertical is right !

- Let say, that we have found a foreign company with **Print SOLUTION** ,which was implemented 100-times and in different languages

One database only

A simple business case....

- Some reasons which persuaded ERP vendor to sign a contract with vendor of vertical solution PRINT:
 - local market analysis (SWOT, GAP Analysis, BPM, BSC, Pareto, Ishikawa Fish Bone diagram, TOC, CC....)
 - expectation of repetitive sales – promising market segment -> CRM application (pains and benefits)
 - analysis of the competitors-> CRM
 - possible co-operation with other PRINT experts abroad (sales of services)

Project entries..

■ Activities

- acquire necessary printing industry knowledge
- introduction training provided by supplier of PRINT application (vertical solution)
- team building
- budget (costs „business plan“- revenues)
- language localization ENG->CZE
- modification ERP and a **Print** for Czech conditions (market specifications and legislation)
- cope with inner application

Project entries..

■ Activities

- translation of marketing material (fact sheet) and its printing in compliance with predefined templates
- creation of PWP presentation for selling
- prospect prediction – segments of market
- naming of benefits „selling against“
- presentation to chosen prospects and reaction to questions- use of feedbacks to improve knowledge of printing industry
- **Print** price list generation

Project entries..

■ Activities

- „Kick-Off“ meeting
 - when, who, what and why (Kick-Off)
 - PWP presentation
 - invitation, graphic design
 - selling invitation and follow-up
 - Kick-Off
 - mapping of interests, business strategy modification and resource planning

Project entries...

■ Activities

- contract signature with pilot customer
- System implementation (only some important activities are mentioned here..)
 - feasibility study, analysis, target solution draft
 - introduction training
 - system customization
 - tests of introduced modifications
 - data transfers and setup of technological „**master data**“
 - generation and selling licences and HW tools such as servers, ...
 - change management

Project entries...

■ Activities

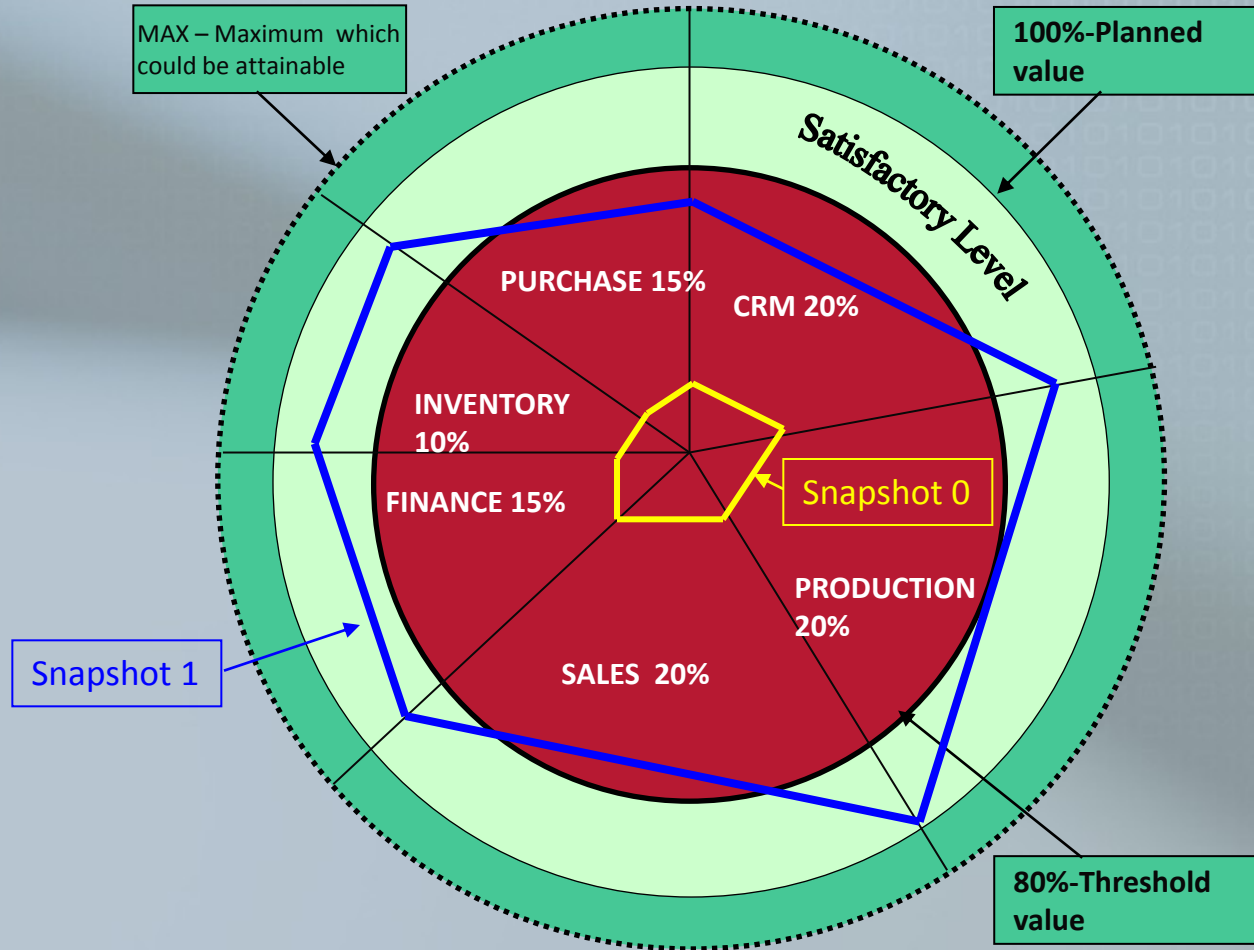

System implementation (only some important activities are mentioned here..)

- training with real data in the ERP system
- stock taking and transfer of balances on accounts
- sharp start
- support and surveillance

Necessary knowledge for project management

Project successful ? (from Snapshot 0 ->Snapshot 1)

Another possible project.

- Hotel chain Rocco Forte * * * * *
- Where? (Great Britain 2x, Scotland 1x, Germany 2x, Prague 1x, Rome, Florence, CH, Russia)
- SW choice (chosen company for delivery standard accounting package of ERP and cooperation with author of hotel vertical solution : Serenissima Informatica, Padova)
- Choice of local partner (CZ MS Dynamics NAV partner X : requirements -> stability, knowledge of international business, languages, references- testimonial abroad, ..)
- Milano (server farm for all hotels)
- All hotels using same chart of account (USoA=Uniform System of Accounts) – simple consolidation (IFRS)
- Choice of hotel SW and accounting SW

Accrued Revenues (revenues generated in the future periods)

Income (still not created)

General Ledger

Customer

Accrued and Deferrals... (one of many helping letters)

Ciao amico,

For Deferred Costs (In Italian “**Risconti**”) it means when You receive an Invoice for Service; Service provided partially in one Fiscal Year, and Partially for the following Fiscal Year.

Es. : In November You receive an Invoice for IT Service provided from November 2007 until June 2008.

You have to charge 2 Months for 2007 and 6 Months for 2008 Fiscal Year.

In other words Deferred Costs happens when You receive in advance an Invoice for Services provided in the future.

It's possible to have the same also for **Revenues**

The opposite is called Accrued (In Italian **Ratei**).

Es. : In May 2008 You receive an invoice for Services provided from November 2007 until May 2008. Normally You have to charge in advance, Cost for Services for November and December 2007 without any Invoice,

and You balance this Cost with special Accounts.

This happens very often in Hotel management because, for management control, they have to produce every month Profit & loss report. It's more or less like a Year close done on every Month.

In other words **Accrued Costs** happens when You receive an Invoice for Services after the Service was provided.

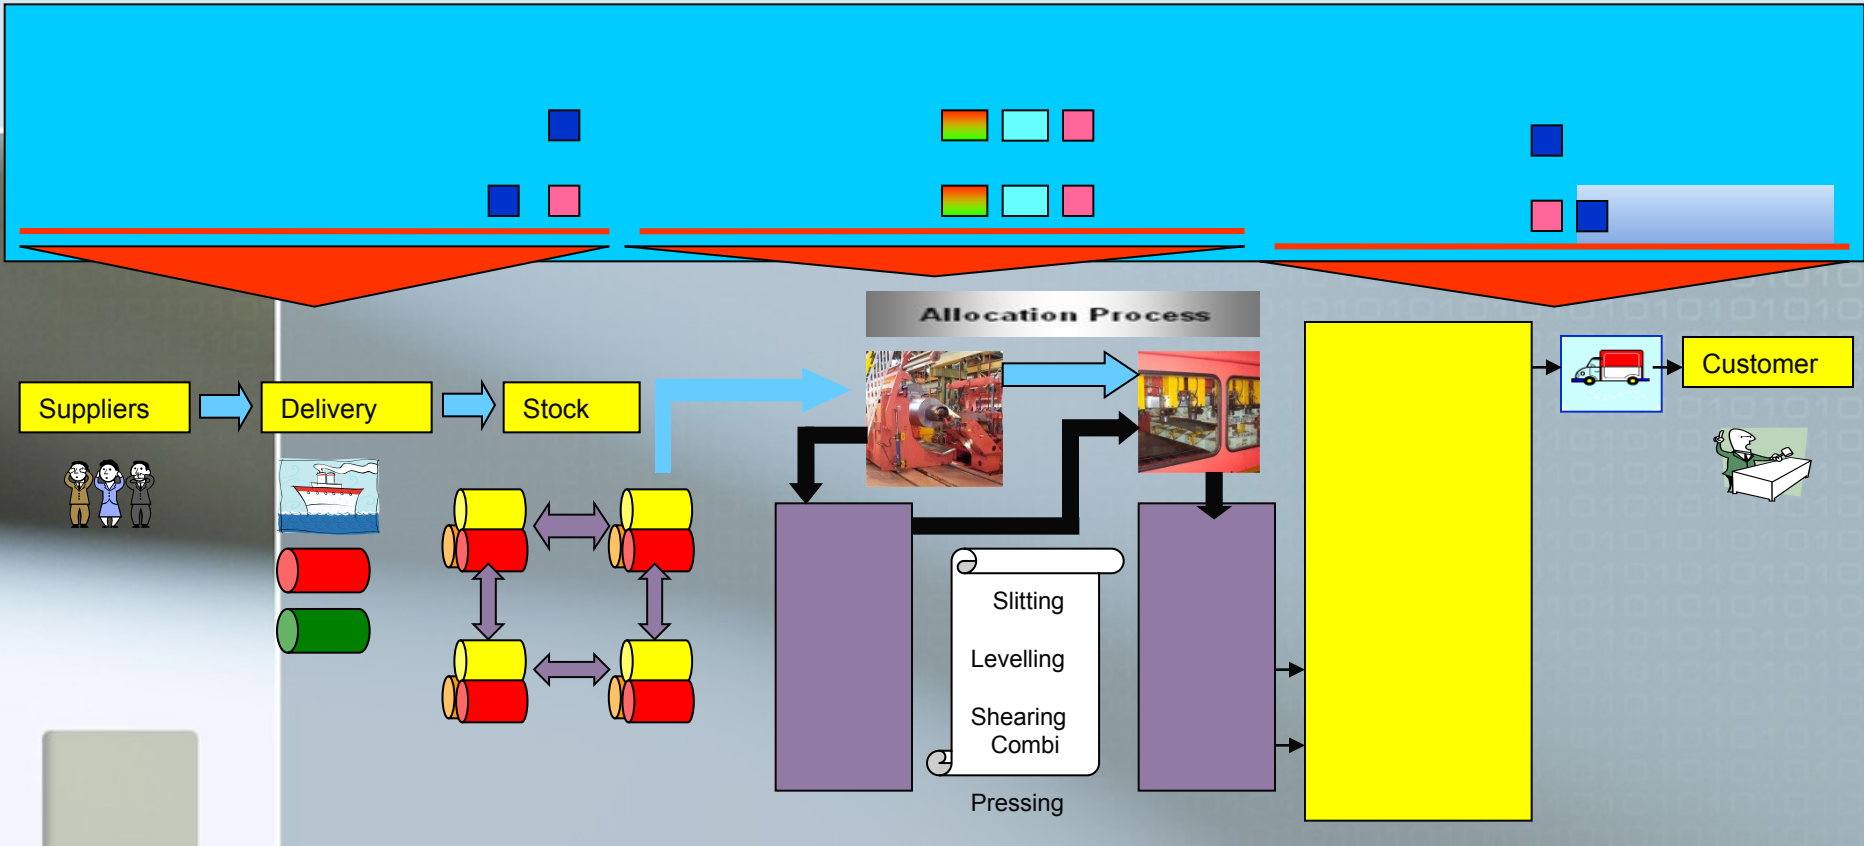

The same can happen also for revenues.

I hope this explanation can be clear enough.

Regards.

- **Finance Management and Controlling**
- **Production Management (MRP, MRP-II, JIT and DBR)**
- **Market Analysis**

Knowledge of methods, which are necessary for project management and process management

- **Yield Management –YM** (billing different rates for same service to different customers in order to reach maximum revenue)
- Knowledge of the condition necessary for use of **YM tool** :
 - relatively high % of the fixed costs to complete company costs
 - predictable demand
 - ephemeral product (passing, fleeting,
 - selling before service is provided
- Some Yield management methods
 - e.g. Thres Hold method– see next slide

Threshold curves (booking)

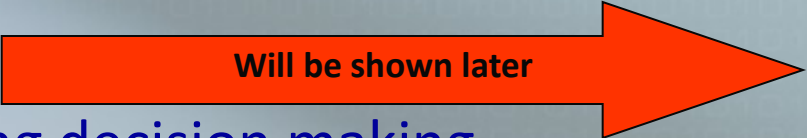

Threshold curves (booking)

Discounts granted

Knowledge of methods, which are necessary for project management and process management

- Legal aspects of contracts
- Cost management
- Foreign languages
- Basic knowledge of IT architecture **will be introduced**
- Methods used for project management
- Business Analytics  **Will be shown later**
- Methods supporting decision making
- Risk management
- Basics of marketing

Business Analytics – some reason why to discuss

- The data is not all in the ERP
- The tools are rigid and hard to learn
- The tools don't reflect how we work today
- They don't span the continuum of needs

Information Overload

IM/c

What Users Need

CEO

“I need to know that the people in my organization have the right goals in place to understand and **execute on the strategic initiatives** of the company.”

VP, Operations

“I need better visibility into my cost of operations so I can **target specific cost reduction opportunities** that won't have a negative impact.”

CFO

“I need to improve our analytics capabilities so we can understand our current business performance and **do a better job of planning** for the future.”

VP, Sales and Marketing

“I need better visibility into our pipeline performance so I can **focus on deals** that help me grow business with my most profitable customers.”

Sales Rep

“I need to have the right demographic information so I can **better target my opportunity prospecting**.”

Customer Support Rep

“I need better access to information to **make better decisions** on cross-sell and up-sell opportunities.”

Managing Through the profit valley

- Initially, most partners business are run by one or two founders, who manage every part of the business : sales and marketing, project management, service delivery management, accounting, sub-load and load, collection, HR and many many more....

Those guys are responsible for performing all day-to-day functions of their business

Managing Through the profit valley

- As their business grows over 10 employees, it is impossible to perform all their role properly.
 - Cash flow becomes erratic (chaos)
 - Projects go offside,
 - Filling pipeline is a struggle
 - Revenue stays still strong but profitability drops
- Company is trapped in the „Profit Valley“

Managing Through the profit valley

- How to escape the profit valley?
- How to avoid it ?
- First key
 - Maintain revenue velocity and the momentum of the new customer adds. You cannot afford to take the foot of the gas if you want to climb out of the valley
 - The portfolio of the customers must be some smaller and some larger
- Second key
 - Maintain high level of service quality to avoid discounting and efficiency factor
 - Sure Step methodology of project Management
 - Help desk
 - Right tools and right people

Managing Through the profit valley

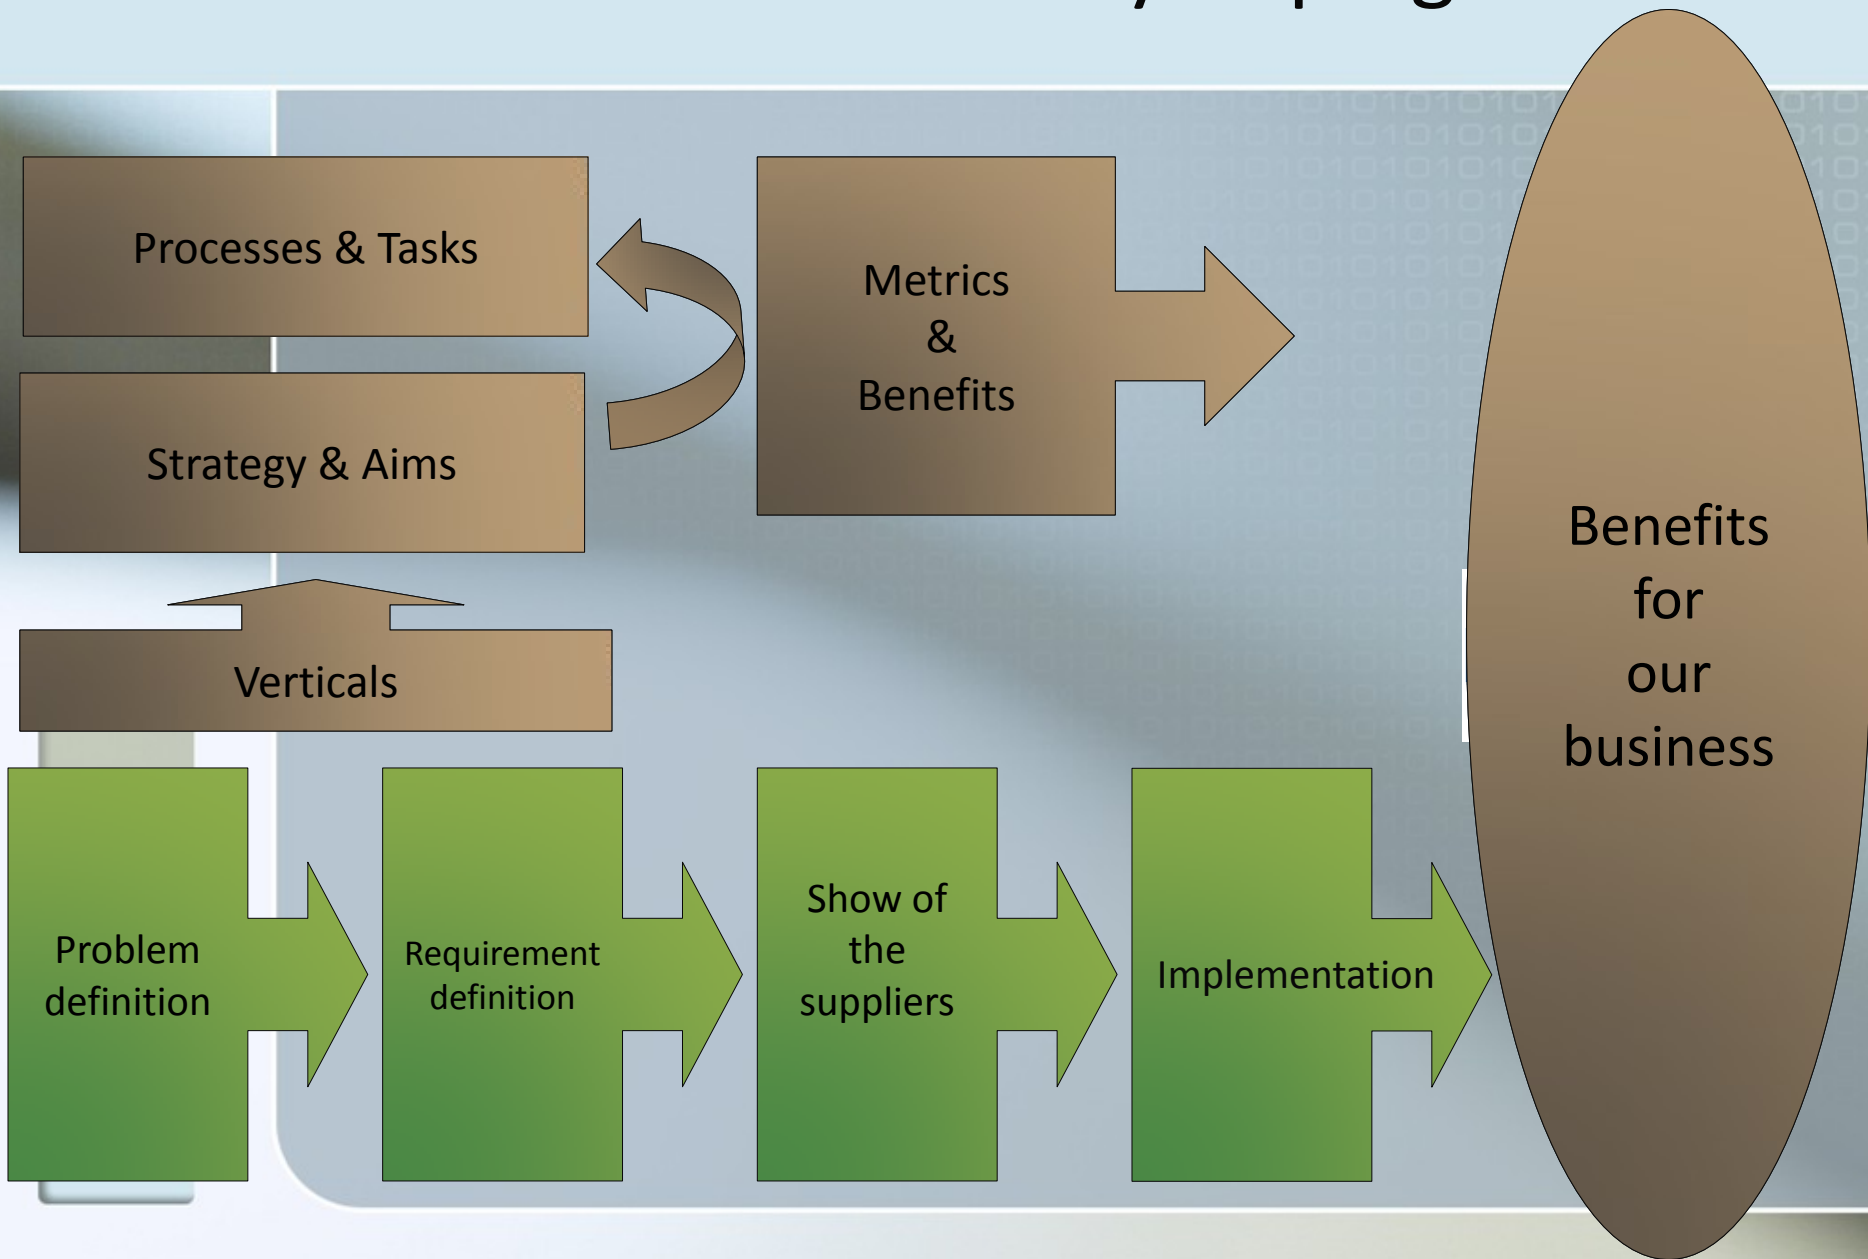

- Third key
 - Financial management control and cash flow is the king
 - Invoice quickly and pay consistently (but not early !!!)
 - To maintaining Cash- to-Cash cycle as short as possible
- Fourth key
 - Software package handling all aspects of financial customer relationship and project management
- Cash-to-Cash Cycle will be shown during TOC and Critical chain chapters

Managing Through the profit valley

		Business control needs		
		Financials	General Management	Project
Specific Structural requirement	Driving Business Objectives	Max cash flow, Collecting early, paying not early	Maintaining revenue velocity, good Marketing machine	Reduce scope creep Efficiency factor Utilisation
	Personnel required	Full time CFO with excellent knowledge	Key staff (no job hopping)	Mixed team (juniors and seniors)
	Processes required	Rigorous FM driven by Key business objective above	Continuous Recruiting and training	Application of the Good project Methodology (Sure Step)
	Systems required	Dynamics NAV	Dynamics CRM	Project Management Software

Do we know or we are only hoping?

Thanks for Your Attention

Will be placed on IS.MUNI.CZ in
the study materials

If everyone pulls at
the different end of the rope,
than your project results
will be a mess...
