## Introduction to MS Dynamics NAV XXVII.

Ing.J.Skorkovský,CSc.

MASARYK UNIVERSITY BRNO, Czech Republic Faculty of economics and business administration Department of corporate economy

## **Requisition worksheet**

(tool for automatic replenishment suggestion)

#### Impacts of using RW tool

- Lower inventory level
- It balances supply and demand across locations
- Lower inventory and handling cost
- Higher liquidity
- Sufficient service level is maintained-Service level represents the expected probability of not hitting a stockout. This percentage is required to compute the Safety Stock. Intuitively, the service level represents a trade-off between the cost of inventory and the cost of stock-outs (which incur missed sales, lost opportunities and client frustration among others).

#### Parameters controlling RW functions

(you can find them on the Item card, Tab =Planning)

- Reorder Policy It uses the reordering policy to calculate the lot size per planning period, which you define in the Reorder Cycle field
- Reorder Cycle In this field, you enter a date formula that sets the planning time frame for the item.
- Safety Stock
- Reorder Point Replenishment is typically triggered when the inventory level hits the Reorder Point, which is also called Reorder Trigger Level.
- Reorder Quantity See Excel file example (resource mentioned there)
- Min and Max Order Quantity
- Order Multiple

#### **Reorder Policy**

(see F1 to get detailed Help concerning Reorder Policy)

- Fixed Reorder Qty
- Maxium Quantity
- Order
- Lot-for-Lot

#### Examples for different setups

(see related Excel file Analýzy sešitu požadavků)

#### Only for Czech students !!!

## Model-test

- Creation of the new item card XX1
  - Use presented principles from TS 4 (slides 3-5)
  - The method and some tiny modification of the this procedure is presented in the next few slides
- Create new Sales Order with 100 pcs of XX1
   Do not post it !!
- Create new Purchase Order with 30 pcs of XX1
   Do not post it !!

#### How to create a new Item card

• Open chosen card (e.g. 1964-W) by use of keyboard shortcut **Shift-F5** and from the menu Edit use Select function and you will get

Undo	Ctrl+Z					3		<i>5</i> 7	0			2			<u> </u>	<u>4</u>

#### How to create a new Item card

- Ctrl-C (Item card picture is cut into clipboard)
- F3 in order to create new card
- Ctrl-V (Item picture is pasted from clipboard into new Item card)
- You will get message Item card 1964-W already exists
- You push OK
- You will get another error message Item card could not be pasted . Do not care and make Ok again
- Change original number 1964-W to XX1 (for instance)
- Change name to Component 1 (for instance)
- In Unit of Measure field make a choice by use of F6 to Pcs and OK and then ENTER to confirm your choice
- **Tab** Invoice->and change by **F6** to Costing method FIFO and confirm by ENTER
- **Tab** Replenishment ->make a choice of you principal Vendor (by use of F6)
- **Tab** Planning ->**Reorded Policy**= Fixed Order Quantity
