

Introduction to MS Dynamics

NAV XXXIII-Expected Costs

Ing.J.Skorkovský,CSc.

MASARYK UNIVERSITY BRNO, Czech Republic
Faculty of economics and business administration
Department of corporate economy

Expected costs initial setup

- Expected costs are the estimate that you make of the cost of, for example, purchasing an item before you actually receive the invoice for the item
- You can post expected cost to both inventory and to G/L. Whenever you post a document, such as an order or a journal, as received or shipped, a value entry line will be created with the expected cost. This expected cost **will affect inventory value, but it will not be posted to G/L unless you have set the program up to do that**
- Expected costs are posted to interim accounts in the general ledger. If you want to post expected cost, you must set up interim accounts for the relevant posting groups in the [General Posting Setup](#) table.

See setup later in this show

Expected costs initial setup I

If there is a check mark in the field, the program will post expected costs to interim accounts.

Expected costs initial setup II.

Purchase order (original cost=190)

The screenshot shows a 'Purchase Order' form for '106027 London Postmaster'. The 'General' tab is active, displaying various fields for order details. A table below the form lists the items in the order.

Type	No.	Description	Location Code	Quantity	Reserved Quantity	Unit of Measure	Direct Unit Cost Excl. VAT	Line Amount Excl. VAT	Line Disc...	Qty. to Receive
Item	EXP_C...	Expected costs O1	BLUE	1		PCS	170,00	170,00		1

An arrow points to the 'Line Amount Excl. VAT' value of 170,00 in the table, with the text 'Expected cost' written below it.

Posting : Only shipping !!!

The dialog box is titled 'Microsoft Dynamics NA...' and contains three radio button options: 'Receive', 'Invoice', and 'Receive and Invoice'. The 'Receive' option is selected and highlighted with a red rectangle. Below the options are 'OK' and 'Cancel' buttons.
