

Simple scenario Accounting Schedules MS NAV 2016

Created by	:	Jaromír Skorkovský
Date	:	14.11.2018
Reason	:	Orientation in the MS Dynamics NAV 2016. Material helping to understand basic discount principles and one basic type of financial reporting (accounting schedules)
For	:	MPH_AOMA, MPH_AOPR, PIS1, PIS2, EPS1 and MPH_RIOP BPH_PIS1 and MPH_RIOP for summer terms 2018
Used database	:	MS Dynamics NAV 2016/17 W1 (British one) – RTS MS Dynamics NAV 2016/17 Czech – RTS
Used abbreviations	:	Q=question, G/L=General Ledger, Simple Scenario = SS, PWP=Power-Point
Accompanying material:	:	PWP-Accounting Schedules

1. Useful tool to create new financial reports used for financial analysis without programming. This tool complements standard mighty reporting system (hundreds of reports)
2. Basic financial reporting is done by running user defined reports called Account Schedules. This is, beside hundreds of predefined and existing reports, basic tool to access data of vital importance. All these reports use as a resource data General Ledger Entries created automatically by posting various documents (e.g. Sales and Purchase orders) by key F9. You can also calculate different parameters such as **IRR, ROI** and many more.
3. IRR= Internal Rate of Return -> is the discount rate that makes the net present value (NPV) of a project zero. In other words, it is the expected rate of return that will be earned on a project or investment. When calculating IRR, expected cash flows for a project or investment are given, and the NPV equals zero.

$$0 = CF_0 + \frac{CF_1}{(1 + IRR)} + \frac{CF_2}{(1 + IRR)^2} + \frac{CF_3}{(1 + IRR)^3} + \dots + \frac{CF_n}{(1 + IRR)^n}$$

Or

$$0 = NPV = \sum_{n=0}^N \frac{CF_n}{(1 + IRR)^n}$$

Where:

CF_0 = Initial Investment / Outlay

$CF_1, CF_2, CF_3 \dots CF_n$ = Cash flows

n = Each Period

N = Holding Period

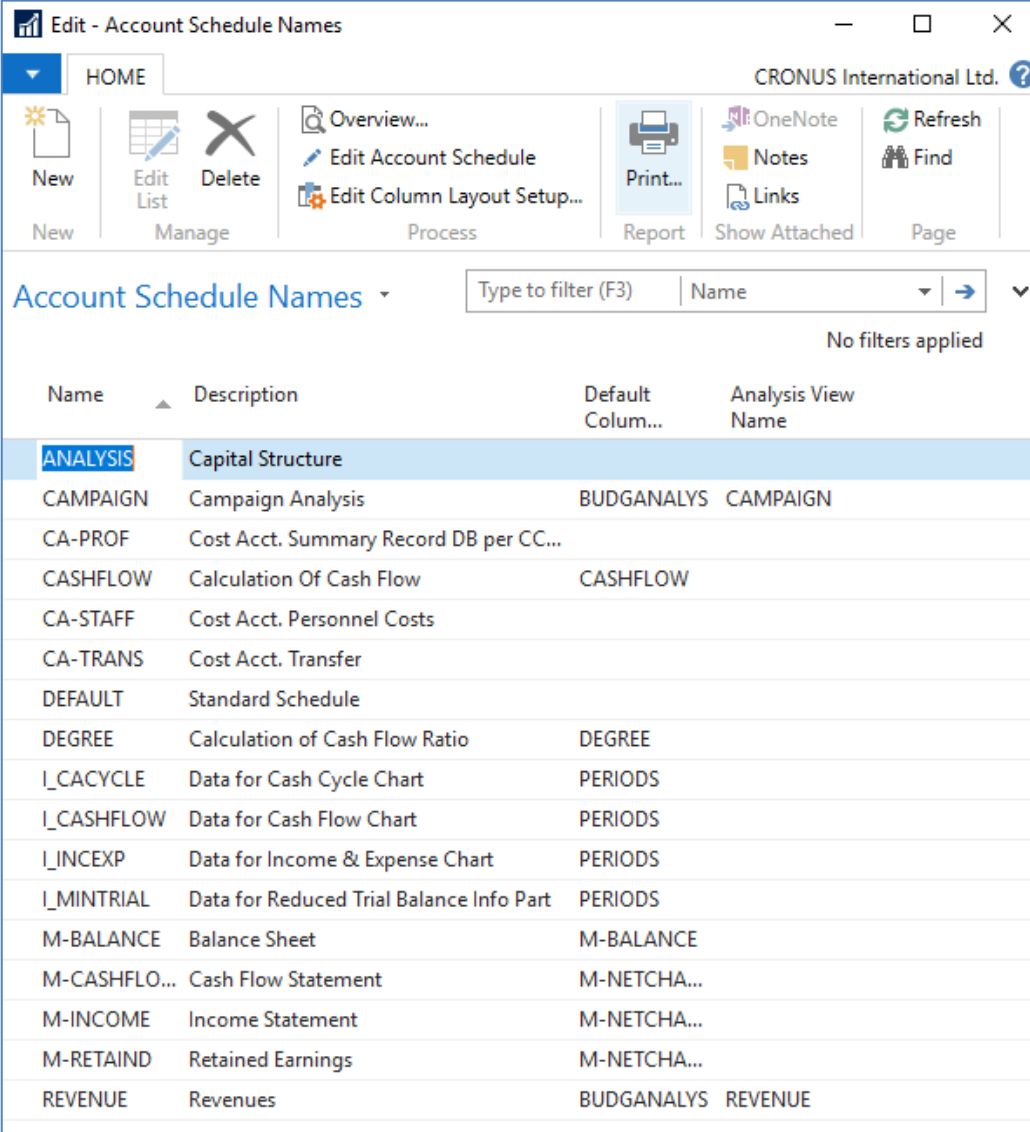

NPV = Net Present Value

IRR = Internal Rate of Return

4. Return on Investment (ROI) is a performance measure used to evaluate the efficiency of an investment or compare the efficiency of a number of different investments. ROI tries to directly measure the amount of return on an particular investment, relative to the investment's cost. To calculate ROI, the benefit (or return) of an investment is divided by the cost of the investment. The result is expressed as a percentage or a ratio.

$$\text{ROI} = (\text{Gain from Investment} - \text{Cost of Investment}) / \text{Cost of Investment}$$

5. Go to menu **Financial management ->General Ledger ->Reporting & Analysis ->Analysis & Reporting**. There you can see a list of the **Account Schedules**.

The screenshot shows a software window titled "Edit - Account Schedule Names" for "CRONUS International Ltd.". The window has a ribbon with tabs for "HOME", "Process", "Report", "Show Attached", and "Page". The "HOME" tab is active, showing options like "New", "Edit List", "Delete", "Overview...", "Edit Account Schedule", "Edit Column Layout Setup...", "Print...", "OneNote", "Notes", "Links", "Refresh", and "Find". Below the ribbon is a search bar with the text "Type to filter (F3)" and a dropdown menu set to "Name". The main area displays a table of account schedules.

6. In the form go to field Name in the header and find Analysis (one of many). There you see a template of the report created by somebody else who already created this Accounting schedule in our demo database. In order to see data go to the icon **Edit Account Schedule** and push this icon. There you see all G/L accounts used in this report. The structure will be explained by tutor. Then you push icon overview in order to see data. The next only possible option there data taken from G/L entries based on initial setup of matrix lines and columns:

The screenshot shows a software window titled "Edit - Account Schedule - ANALYSIS - Capital Structure". The interface includes a ribbon with tabs for "HOME", "ACTIONS", and "REPORT". Under the "ACTIONS" tab, there are several icons, with "Overview..." highlighted by a red box. Below the ribbon, the "Name" field is set to "ANALYSIS". The main area contains a table with the following columns: Row No., Description, Totaling Type, Totaling, Row Type, Amount Type, Show Opp..., Show, Bold, and Italic.

Finally you will get this and use layout of column=Default. Anyhow, this was already presented.

Go to Account Schedule Names, chose TEST and **Edit Account Schedule** icon. Then use icon create and enter two **VAT** account for purchase and two for sales and formulas as shown in the next form (use G/L account icon) and modify manually first column to chosen variable names IN 10, IN 25....). These are in fact variables which may be used in calculation.

To enter new lines with description use right click and New line!!!
