Lean Development with Reader-Centric Iterations

Petr Sojka: DPRPO-Poster Tech HowTo

Take care! "God is in the details." (Mies van der Rohe)

Petr Sojka: DPRPO-Poster Tech HowTo

Masaryk University, Faculty of Informatics, Brno, Spring 2016

How to DIY? Some thoughts first!

① Waterfall or Lean-Agile?

Intro/Specifics

- Try the whole workflow ASAP!
- Put yourself in the reader's place and iterate!
- ② Poster as standalone scientific paper or puff add/cheat sheet for you?
 - Proportion of text and graphics, references, acknowledgements?
 - Conservative or not?
 - Attentive reading or not?
- ③ Batch or Interactive preparation?
 - Extremes suck (long iteration vs. inconsistencies, no precision).
 - *Try* several workflow possibilities on *examples*, choose what suits best.

From idea to the poster on paper

① Content (Marked) – What?

- Text, data, graphics (?accepted paper)
- ② Form (Design) How?
 - How to visualize, present content?
 - Size (travel), time or money (?color) constraints.
 - Attentive reading or not?
- ③ Typesetting (application of design on marked content): batch/algorithmic vs. WYSIWYG?
- ④ Print (paper size and type).
- ^⑤ Delivery and presentation to the Reader(s).

Content	and De	esign			

- "No, Watson, this was not done by accident, but by *design*."
 Sherlock Holmes
- ② Having what, how?
- ③ Not to be absent!
- ④ Has to serve to *convey message*.
- ⑤ Some typography and design rules has been covered in the previous lecture by Malíková.

Typesetting — different engines

Masaryk University, Faculty of Informatics, Brno, Spring 2016

Intro/Specifics	U U	· · · · ·	PDF 00	 Presentation	 Examples 000000
Typesetti	ng eng	vine			

- ① programmable graphics: PostScript, APIs, cairographics.org
- ⁽²⁾ TEX et al., with frontends: Lyx, writelatex.com
- 3 3B2, InDesign
- ④ Inkscape, Scribus
- ⑤ QuarkXpress, CorelDraw
- 6 [PowerPoint, Word]
- Engine comparison, pros and cons (layout, text, math, graphics, level of control)

The Engine makes the difference

DIFFL DIFZ DIFF3 DIFF! DIFF \cap (o

Petr Sojka: DPRPO-Poster Tech HowTo

The TEX way, with front ends or directly

Typesetting

- ① writelatex.com, Lyx, AucTeX, TeXlive
- ② <http://dexy.it>, <http://dexy.it/docs/examples#newspaper>.

3

<http://tex.stackexchange.com/questions/341/how-to-crea beamerposter, a0poster, tikz graphics (cf. printed examples).

- ④ baposter class relative positioning, templates (not yet in TeXlive 2013).
- ⑤ sciposter class classics, many examples, font scaling options.
- ⑥ Overview documentation by: 'texdoc jmeno_baliku'

Intro/Specifics	U U	· · · · ·	Ŭ	Presentation	
Tips and	tricks				

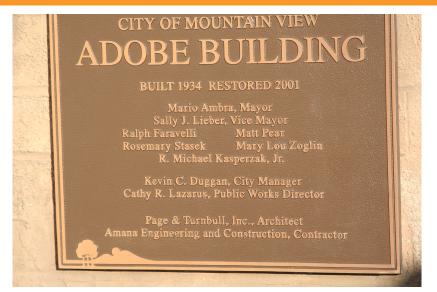

- ① Positioning by picture environment in the footer.
- ^② The same fonts, color models (CMYK) in text and picture.
- ③ Pictures by various tools but finally in the [transparent] PDF.
- ④ The same fonts, color models (CMYK) in text and picture. Fonts *embedded* in picture PDFs.
- ⑤ Use make, prepare Makefile, with options stored/shared, share via svn

Prepress: Adobe's building

Petr Sojka: DPRPO-Poster Tech HowTo

Intro/Specifics	U U		0	Presentation	
Prepress					

- ① PostScript vs. PDF (language vs. format).
- O PostScript \rightarrow PDF Distiller's joboptions, ghostscript's ps2pdf.
- 3 PDF \rightarrow PostScript acroread <code>-toPostScript</code> plus psutils.
- ④ PDF/X, PDF/X3.
- ⑤ Preflight (Adobe Acrobat Pro XI (Eur 82 in Level-3 discount), Distiller profiles).
- [®] If everything fails: *very high* resolution JPEG as fallback.

Printing – on the spot services

Petr Sojka: DPRPO-Poster Tech HowTo

Intro/Specifics	Design 00	Typesetting 00000	PDF 00	Printing 00●	Presentation	 Examples 000000
Printing						

- 1 Paper types (plain, glossy) and weight considerations.
- ② Laser printers up to A3 (copy5c, lj5b,...). Tip: print a few A3 'poster as paper' copies as gift to interested parties.
- ③ Plotters@FI: loc:C4 (AGDAMM, A0plus) bought from [my] FRVŠ grant, controlled access and printing secured for free.
- ④ or loc:B204 (NLP, A0).
- ⑤ Plotters@UVT: loc:C111 (<http://www.muni.cz/plotter>), wide range of papers, cost pre-calculation by Inet.
- Print by organizers not recommended (possible surprise on the spot).

Possibilites on the spot

Petr Sojka: DPRPO-Poster Tech HowTo

Intro/Specifics	<u> </u>		U U	Presentation	Summary	Examples 000000
Transport	t, Post	ing				

- ① Tube transport by airplane, check with airlines.
- ⁽²⁾ Size check in advance, A4/A3 sheets as fallback.
- ③ Digital delivery not recommended.
- ④ Hint: Posting poster PDF on the web with hypertext DOI of original papers.
- (5) Hint: Prepare electronic poster version as standalone with PDF metadata properly set up (cf. this PDF in Acrobat, File \rightarrow Properties)
