

Scientific HPC Infrastructures

Introduction

Boris Parák¹² Tomáš Rebok¹² Zdeněk Šustr²

¹Masaryk University

²CESNET

February 20, 2017

- ▶ Get a different perspective (academic/non-commercial)
- ▶ Introduce scientific computing environments
- ▶ Get an idea of what is available for researchers
- ▶ Briefly mention existing HPC infrastructures

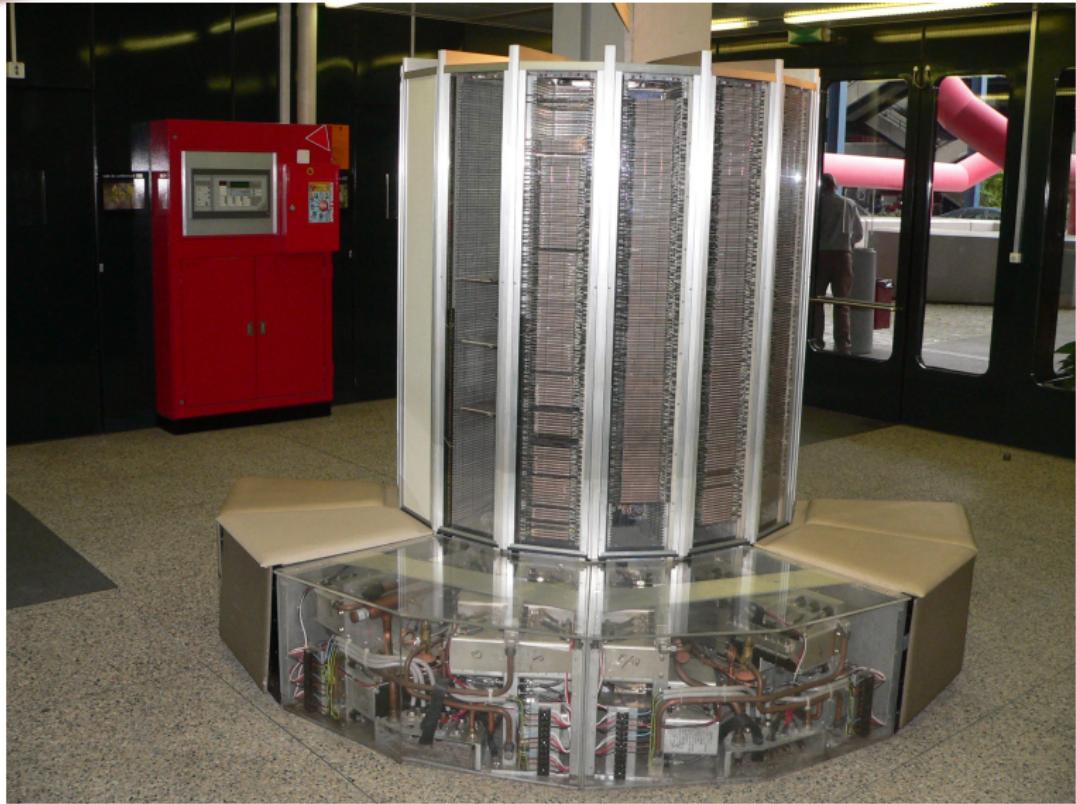

- ▶ For anyone doing any kind of research
- ▶ Widely ranging in scale and requirements
- ▶ Computing-intensive tasks
- ▶ Data-intensive tasks (“*Big Data*”)
- ▶ Reliably sharing open data & protecting sensitive data

- ▶ Computing with a particular set of requirements
- ▶ Working on demanding problems
 - ▶ performance (CPU, IO, bandwidth)
 - ▶ storage capacity (short-term, long-term)
 - ▶ scale (1k+ machines, distributed logically and geographically)
- ▶ Raw computing power and storage capacity, no “tricks”

- ▶ High-energy physics (Alice, Atlas, CMS, LHCb)
- ▶ Biology (genomics, protein analysis)
- ▶ Medicine (patient data analysis, drug development)
- ▶ Digital data preservation (truly long-term)
- ▶ Environmental sciences & Earth exploration
- ▶ Astronomy, ...

– HPC Infrastructures –

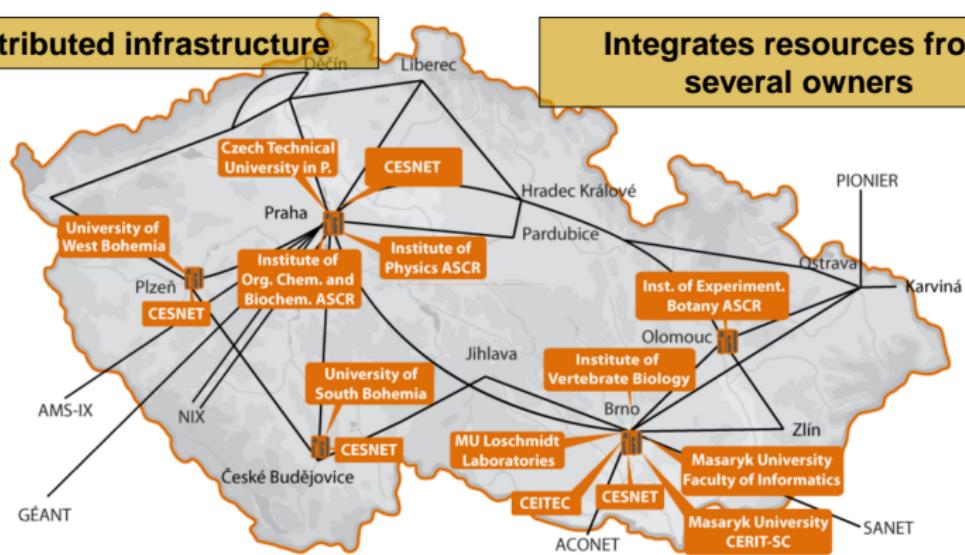

- ▶ Supercomputers (Cray, Deep Blue, ...)
- ▶ Local computing clusters (small scale)
- ▶ Grid (→ HEP) (large scale)
- ▶ *Cloud* (generic, structurally opaque)

- ▶ CESNET
 - ▶ MetaCentrum (→ NGI_CZ)
 - ▶ data, networking, identity management, research
 - ▶ see <http://www.metacentrum.cz/en/>
- ▶ CERIT-SC
 - ▶ transformation of Supercomputing Center Brno (SCB)
 - ▶ see <http://www.cerit-sc.cz/en/>
- ▶ IT4Innovations
 - ▶ National Supercomputing Center (academia + industry)
 - ▶ see <http://www.it4i.cz/?lang=en>

Distributed infrastructure**Integrates resources from several owners**

Computing services:

- ▶ grid computing
- ▶ cloud computing
- ▶ Hadoop
- ▶ specialized environments

Storage services:

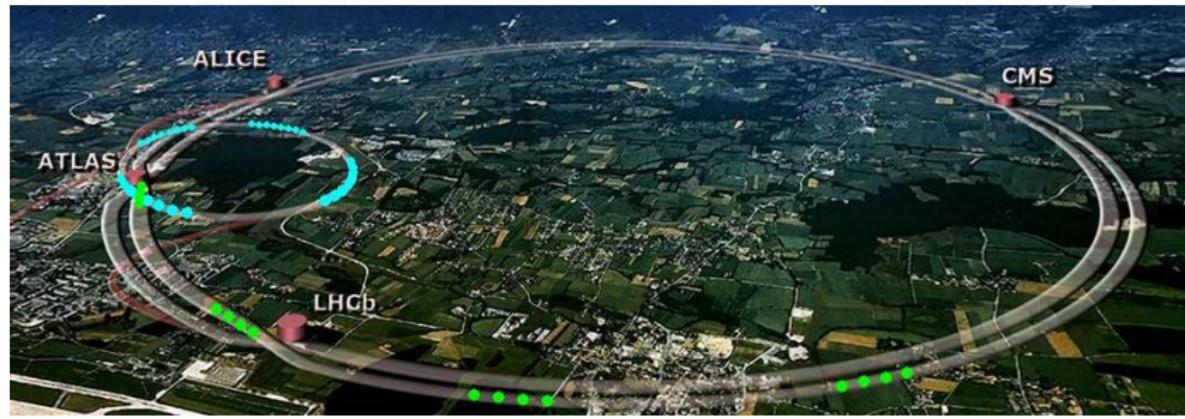

- ▶ NGI storage systems
- ▶ CESNET DU

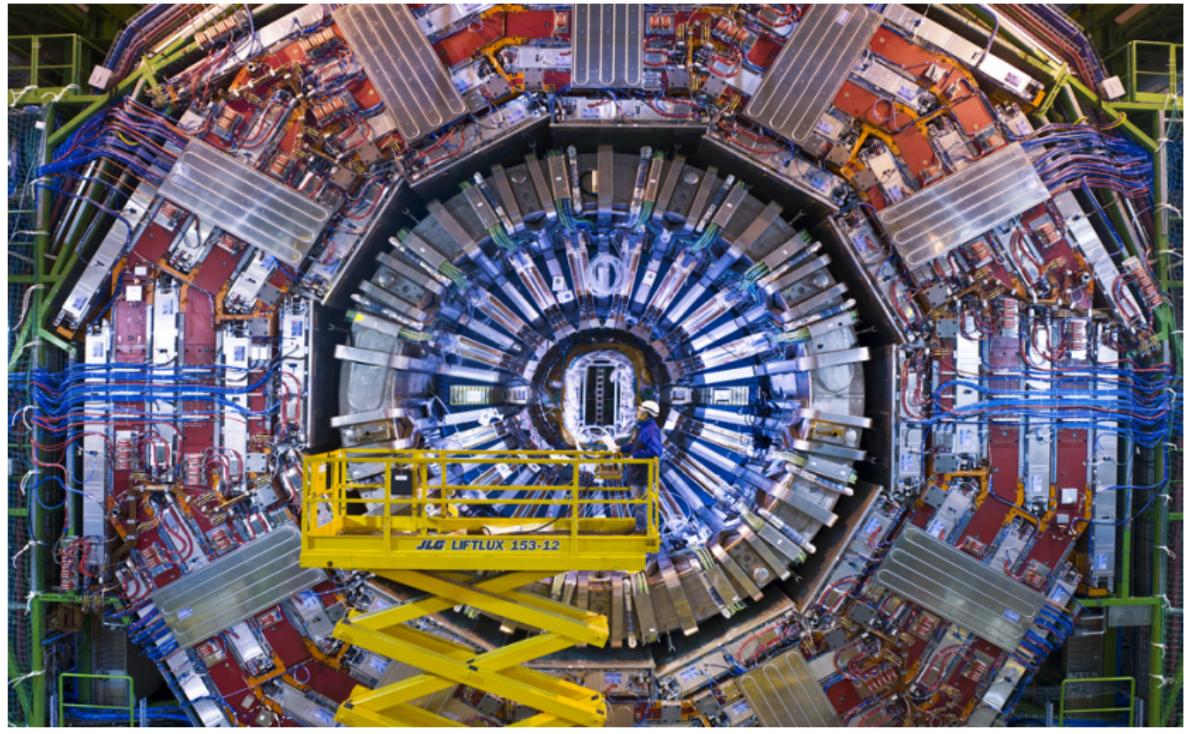

Collaboration & Support services:

- ▶ interdisciplinary and infrastructure research (CERIT-SC)
- ▶ user support activities

- ▶ EGI (formerly known as *European Grid Infrastructure*)
- ▶ WLCG (*The Worldwide LHC Computing Grid*)
 - ▶ High-energy physics community (*HEP*)
 - ▶ CERN (*The European Organization for Nuclear Research*)
- ▶ PRACE Research Infrastructure

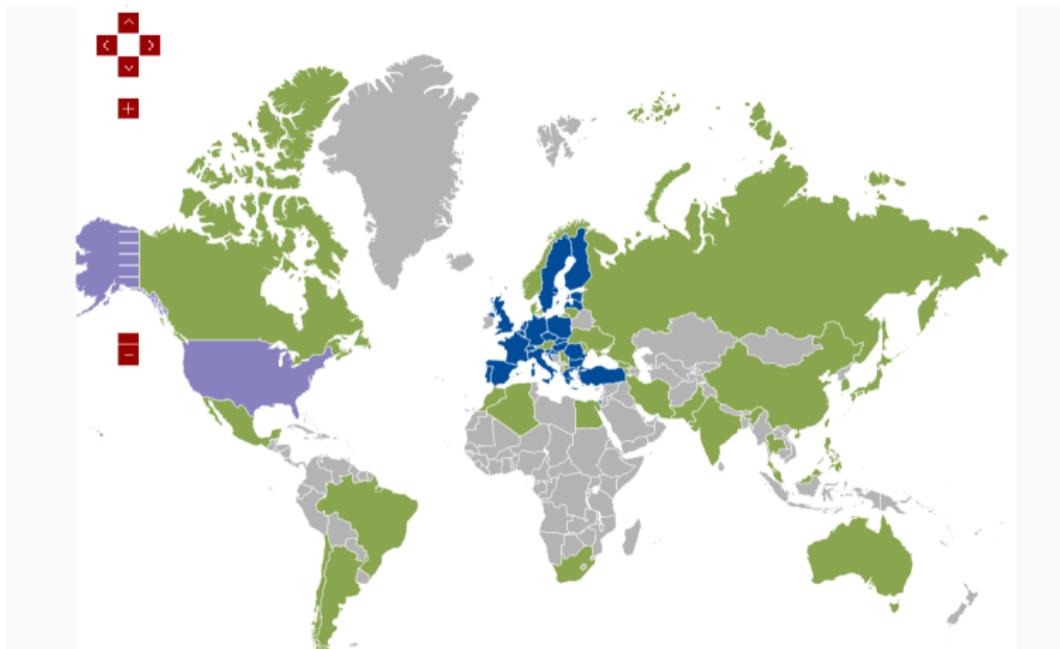

Data production rate (GB/s)	25
T0 Power capacity (MW)	3.5
T0 Logical CPUs (cores)	100,000
WLCG size (sites)	170+
WLCG Logical CPUs (cores)	627,964
WLCG Storage (GB)	333,002,607

EGI is a publicly-funded federation of over 300 data centers across the globe with:

- ▶ over 45,000 users from a wide range of fields
- ▶ access to over 650,000 logical CPUs and 500 PB of storage
- ▶ a wide range of services for compute, storage, and support

The federation is coordinated by the **EGI Foundation** created to govern on behalf of the participants of the **EGI Council**.

Caption (as of July 2015)

blue: EGI council members

green: integrated resource Infrastructure providers

purple: peer resource Infrastructure providers

- ▶ No longer just for high-energy physics science
- ▶ Bio-informatics, ecology, chemistry, geology, ...
- ▶ So-called “The Long Tail of Science” user communities
- ▶ Scientific gateways (DIRAC, Chipster, COMPSs, Catania Science Gateway)

Quick Quiz

– That's All Folks! –

...

Do you have any questions?

- ▶ ask **NOW!**
- ▶ ask directly at parak@cesnet.cz or sustr4@cesnet.cz
- ▶ send your questions to cloud@metacentrum.cz
