#### Strategy

### **Mission = purpose**

# Vision = direction

#### In theory:

**Mission:** lasting broader purpose beyond just making money, generally abstract and cannot be achieved, only pursued

**Vision:** compelling picture of the future that supports the mission, specific destination that is concrete and achievable

#### In practice:

#### The NASA's Vision:

We reach for new heights and reveal the unknown for the benefit of humankind.

#### The mission of The Walt Disney Company

... is to be one of the world's leading producers and providers of entertainment and information. Using our portfolio of brands to differentiate our content, services and consumer products, we seek to develop the most creative, innovative and profitable entertainment experiences and related products in the world.

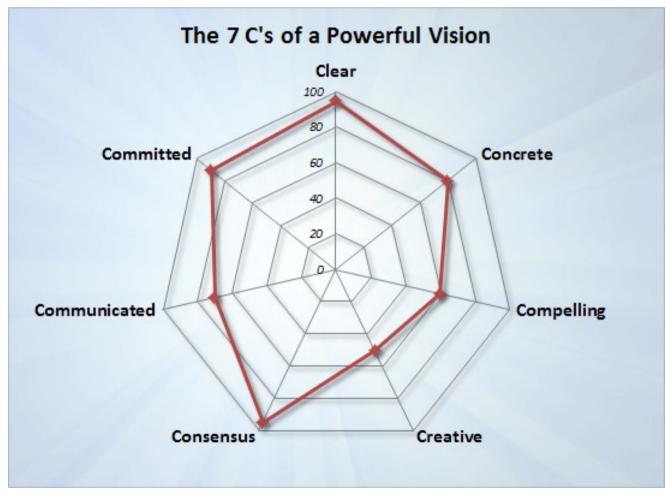

In practice, companies often go for either Vision or Mission and don't necessarily make that distinction.

#### **Brainstorming:**

# What are the characteristics of a good vision and mission statement.

Work in groups, get wild, brainstorm, choose 4 to 8 you'd evaluate yours against.

### Breaking abstract to concrete Spider net visual tool

# Values - behavior standards that help set company culture

#### **Exercise:**

Write down the ones that come to your mind – if it were your company, what would be important?

Put it together in groups, indicate number there where a particular value appeared repeatedly.

Put it on whiteboard as a class, create a wordle as homework – you will need it for final presentation

### Assignment 1

- Carefully study the Globus strategic game simulation overview you can find in Study Materials
- Develop Mission and Vision statement for your company tested against the characteristics you came up with using the spider net tool
- Create a wordle with Values for your company
