**PA193 – Secure coding**

Petr Švenda

Zdeněk Říha

Faculty of Informatics, Masaryk University, Brno, CZ

**CRCS**

Centre for Research on  
Cryptography and Security

# Projects – first part

- Writing code
  - Group work (!)
  - Maximum: 10 points
  - Deadline: 11 Nov 2015, 24:00 (code in IS)
  - Presentation: 12 Nov 2015 in seminar groups
    - Presented by a random team member
  - Parser/input for a particular data type

## Project (first part) – presentation

- In seminar groups
- 7 minutes net time per group
- Presented by a random team member
  - Fair dice is used :-)
- **NEW: PPT (or other slides in PDF) are allowed**
  - Upload in advance into IS (together with code)

# Code

- Must be submitted into IS
- Your code will be reviewed by another group
  - Document well your code
  - Document well what exactly you parse and the limitations of your code
- 1 page (A4) summary
  - What you implemented, including details (restrictions); your result (how many lines of code), what was difficult, ...
  - Submit into IS together with your code
