Guessing the cuisine of recipes according to their ingredients

Project "pattern recognition" - Pre-presentation

Michael Jobst

October 26, 2015

Task description

- guessing the cuisine a recipe belongs to from the list of its ingredients
- example data: {'ingredients': ['romaine lettuce', 'black olives', 'grape tomatoes', 'garlic', 'pepper', 'purple onion', 'seasoning', 'garbanzo beans', 'feta cheese crumbles'], 'cuisine': 'greek', 'id': 10259}

Task description

- guessing the cuisine a recipe belongs to from the list of its ingredients
- example data: {'ingredients': ['romaine lettuce', 'black olives', 'grape tomatoes', 'garlic', 'pepper', 'purple onion', 'seasoning', 'garbanzo beans', 'feta cheese crumbles'], 'cuisine': 'greek', 'id': 10259}
- task size:
 - 39774 recipes in the whole dataset
 - ▶ 20 cuisines (→ classes)
 - ▶ 6081 unique ingredients (→ features)
 - ▶ on average 10.8 ingredients per recipe

- 1. convert data (simple import from JSON)
- 2. feature extraction

- 1. convert data (simple import from JSON)
- feature extraction
 - 2.1 building sparse feature vectors
 - 2.2 feature selection (χ^2 -test...)

- 1. convert data (simple import from JSON)
- 2. feature extraction
 - 2.1 building sparse feature vectors
 - 2.2 feature selection (χ^2 -test...)
- 3. selecting and tuning a good classifier

- 1. convert data (simple import from JSON)
- 2. feature extraction
 - 2.1 building sparse feature vectors
 - 2.2 feature selection (χ^2 -test...)
- 3. selecting and tuning a good classifier
 - SVM
 - Random tree forests

- 2. feature extraction
 - 2.1 building sparse feature vectors
 - 2.2 feature selection (χ^2 -test...)
- 3. selecting and tuning a good classifier
 - SVM
 - Random tree forests
- 4. evaluation

- 1. convert data (simple import from JSON)
- 2. feature extraction
 - 2.1 building sparse feature vectors
 - 2.2 feature selection (χ^2 -test...)
- 3. selecting and tuning a good classifier
 - SVM
 - Random tree forests
- 4. evaluation

Questions to evaluate

- Which classifier yields the best results and how to train it efficiently?
- Is there some interesting statistical information?
