Who we are

Three Dragons is a software development company mainly focused on augmented and virtual reality (AR/VR) software and mobile applications. We specialize on mobile AR (iOS/Android applications & WebAR) for B2B and entertainment and from 2018 we keep improving our own AR asset management system that allows our clients to effortlessly integrate 2D and 3D pictures, videos and objects without additional development in a quick, easy and cost effective way.

Please visit our sites www.augfie.com, www.augfiephotobox.com and our latest Web AR product www.saferselfies.com for more information.

In addition we do custom development in Unity for industrial clients and develop highly sophisticated 3D virtual product presentations.

Internship offer

Three Dragons is offering an internship to students of game development study programs. We have ongoing projects in Unity for various customers. During your internship you will gain experience in Unity development. You will have a chance to work on long term commercial projects in cooperation with international customers.

We offer:
- Extending your knowledge of Unity game engine
- Experience development of commercial applications
- Working from the office in the city center of Brno with the possibility to work from home up to 2 days per week
- Flexible working hours
- Work in an international team with international clients
- Development with modern technologies (e.g.: VR, AR, photogrammetry,...)
- Paid internship

We require:
- Knowledge of the Unity editor
- Past Unity projects in portfolio (could be semestral work, personal projects or both :))
- Conversational English (German would be also a plus)
- Basic knowledge of Agile Development

Nice to have:
- Love for Unity
- Curiosity
- Experience with Metal Gear Solid :)

Feel free to contact us directly via email contact@threedragons.net or through our website if you want to know more.
