- Cloud

INTERNSHIP PROGRAM

Feedback

I am so grateful for the great learning resources. I took a chance and got access to learn quite a couple courses on Udemy. This is all thanks to how thoughtful the team of Kyndryl thinks about the development of the employee.

I would recommend this internship to everyone. It is a great way to learn new things and meet new people.

The best thing on internship was that I was allowed to try part of the job as it is. This was very important for me as a cybersecurity student because I got good overview how everything works together to provide safety to customers.

When I had some trouble, there was always someone who responded very quickly and helped me.
