DACSE Course - Presentations

A) General Characteristics

A1. WHAT IS ACADEMIC PUBLIC SPEAKING?

Who?

Who is speaking? **Who** is the audience?

What?

What is the talking about?

Why?

Why is the speaking done?

A2. PRESENTATION AS A PROCESS

Read the parts of the presentation process below, order them according to how you would proceed from the first step to the last one.

- 1. preparing the presentation area
- 2. preparing written notes
- 3. delivering the presentation
- 4. structuring the presentation
- 5. choosing the main idea
- 6. handling questions
- 7. research of the topic
- 8. writing down the speech
- 9. choosing the topic
- 10. rehearsing the presentation
- 11. preparing any audio-visual aids
- 12. setting aims and objectives
- 13. audience analysis
- 14. developing main points and supporting arguments

B) PREPARATION

B1. TIME MANAGEMENT

B2. TOPIC

In general, people agree that it is wise to know **WHAT** you would like to talk about before you actually start talking. That is why the choice of a topic has usually a clear priority in one's preparation.

B3. AIMS and OBJECTIVES

Before speakers begin to prepare their presentations, they should decide not only WHAT they would like to talk about but also **WHY** they should talk about it. In other words, they should know what they want to achieve while paying special attention to the relevant and efficient aims and objectives of the speech.

B4. AUDIENCE ANALYSIS

Although most will agree that it is vital to know WHAT to talk about and many will support the idea that knowing WHY talking about something is also essential, fewer speakers are aware of the fact the **WHO** you are going to talk to is equally important. Therefore, it is critical that the preparation efforts include some degree of audience analysis where one should consider at least the following four points:

- 1. Who are they and how many will be there?
- 2. What is their knowledge of the subject?
- 3. Why are they there and what do they expect to learn from me?
- 4. What are my needs as the speaker? What are their needs as the audience?

B5. RESEARCH

Very often, the most difficult part of the presentation process is actually getting started. After presenters have thought about the presentation topic, the aims and objectives of the speech and about their audience, they have to make the first step - careful background research which consists of two main stages:

- 1) gathering material
- 2) selecting information

B6. REHEARSAL

Rehearsal is an essential process of each presentation preparation.

C) INTRODUCTIONS

C1. STRUCTURE

GREETING
POSITIVE COMMENT
NAME
POSITION
TOPIC / TITLE / SUBJECT
PURPOSE
OUTLINE
TIME
AUDIO-VISUAL AIDS
QUESTIONS

C2. Introductions can become repetitive. It is important to have a choice of words and expressions at your fingertips. Use one of the following expressions to replace each of the expressions in italics in this introduction.

don't hesitate a chance I take care I'm delighted sections divide go through in more depth my purpose is finally

Good morning, everyone. If I may have your attention, please? Thank you for coming. *It's a pleasure* to be with you today. My name is Ian Cottrell and *I'm in charge* of the research team communication. *We are here today* to *review* the key purposes of the project. So what I intend to do is to *break down* this presentation into three *parts*: first, a deeper understanding of the ideology and work practices of free and open source software development, second, the characterization of the free software movement as a new type of computerization movement and, *third*, a presentation of a conceptual diagram and framework with an analysis showing how the free software computerization movement has evolved into an occupational community. If you have any questions, please *feel free* to interrupt me, but I should also say there'll be *an opportunity* to discuss issues *at greater length* after my talk.

E) QUESTIONS

The after-presentation discussion is a social situation where the presenter's role is to encourage the audience to express their opinions and ask questions. Each answer should serve as an invitation for other questions and comments. A polite audience always reacts in some way to what has been said in the presentation.

analysis of a telehealth innovation, Journal of Information Technology, 22, pp. 24–35.

INVITE QUESTIONS - LISTEN CAREFULLY RIGHT TO THE END - WELCOME THE QUESTION - REPEAT, PARAPHRASE, OR CLARIFY IF NECESSARY - TAKE TIME TO THINK BEFORE — ANSWERING - ANSWER THE QUESTION RELEVANTLY - CHECK WHETHER THE QUESTIONER IS SATISFIED
