## **JKII Session III Presenting visual information**

#### **Graphs and charts**

Charts and graphs measure various statistics and are helpful when presenting large amounts of information that need to be understood quickly. This includes: facts and figures, statistical information, profit and loss, polling information, etc.

What are graphs used for in sports science? What information do we have to include when plotting a graph?

## 1. World population – describing trends

World population estimates from 1800 to 2100, based on "high", "medium" and "low" United Nations projections in 2010 (colored red, orange and green) and US Census Bureau historical estimates (in black). Actual recorded population figures are colored in blue.

#### a) Complete the gaps with the words below:

seen ran	ige	show	remain	experienced	stood	declined	increase	neaked
				experiencea	sioou	accinica	mereuse	peanea
Death in 1350 increases abouthe 1960s and by 2012. Tota	0, when ove 1.8% d 1970s. al annua ssentiall	it (2)6 per year The grownl births welly constant	wth rate (4) were highest at their 20	at around 370 m br in the late 1980	tillion. The iefly during at 2.2% in 1 s at about 1 million, when	highest rates g the 1950s, a 1963, then (5 38 million, a	of growth – nd for a long ) nd are now e	ine and the Black global population ger period during to below 1.1% xpected to (6) lion per year, and
Current UN projections (8) a continued increase in population in the near future (but a steady decline in the population growth rate), with the global population expected to reach between 8.3 and 10.9 billion by 2050. UN Population Division estimates for the year 2150 (9) between 3.2 and 24.8 billion; mathematical modeling supports the lower estimate. Some analysts have questioned the sustainability of further world population growth, highlighting the growing pressures on the environment, global food supplies, and energy resources.								
(http://en.wikipedia.org/wiki/World_population)								
b) Now fill in the missing prepositions:								
Toj	peak	17%	o o					
To i	increase	e	_ 2% / to i	ncrease	2%			
То	decline		_below 3 t	oillion				

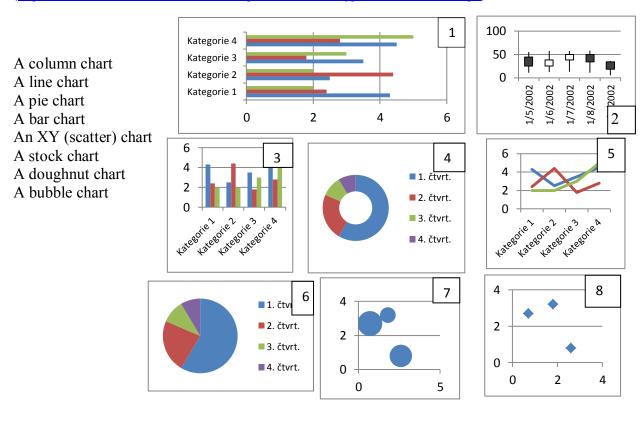

To range \_\_\_\_\_ A.5 and 5.3 billion / to range \_\_\_\_ A to Z

## c) Which of the verbs below can be used to refer to diagrams?

illustrates shows believes suggests indicates represents states demonstrates argues reflects

# 2. Types of graphs Match the types of graphs on the left below with their respective charts. Then complete the sentences below.

(http://office.microsoft.com/en-us/excel-help/available-chart-types-HA010342187.aspx)

- a) \_\_\_\_\_ are often a good choice to show comparisons among data.
  b) \_\_\_\_\_ are well suited to showing change over time.
  c) \_\_\_\_\_ are well suited for showing parts of a whole.
- d) Like a pie chart, a \_\_\_\_\_ shows the relationship of parts to a whole, but it can contain **more than one data series**.
- e) You could use a \_\_\_\_\_chart to indicate the **fluctuation** of daily or annual temperatures.

#### 3. Complete the following tables supplying the appropriate vocabulary.

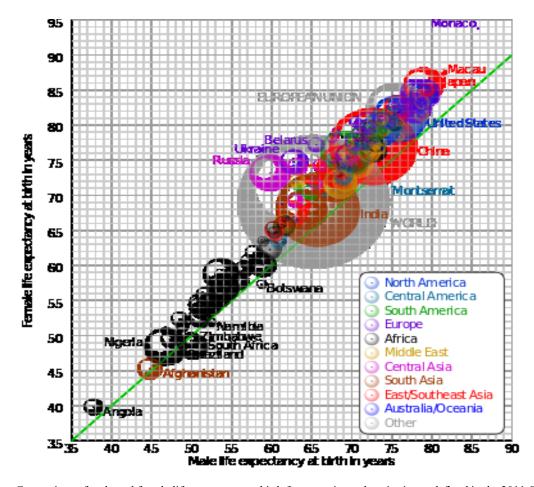

**VERB NOUN** to rise to increase to improve to fall to decrease to recover to decline to grow **ADJECTIVE ADVERB HOW MUCH CHANGE?** slight slightly very small

sharp

dramatic steady

#### 4. Examining graphic material

Study the graphs below. What information does it show?

Comparison of male and female life expectancy at birth for countries and territories as defined in the 2011 CIA Factbook, with selected bubbles labelled. The dotted line corresponds to equal female and male life expectancy. The apparent 3D volumes of the bubbles are linearly proportional to their population. (wikipedia.org)
