UMI Publication Number:

Search Instructions

The fastest way to identify and validate a dissertation is to enter the last seven characters of the UMI order number. If you don't have this, enter a word or phrase into the search terms field or the author's last name and the first four words of the dissertation title.

Search terms - Enter a word or phrase related to the dissertation. Use "quotation marks" to search for exact phrases.

Order Number - Enter the last seven characters of the UMI order number. (Example: for citation DA9412718, you should enter "9412718")

Author - Enter the author's last name or the author's last name, first name. (Examples: "Smith" or "Smith, Jane")

Title - There's no need to enter the entire title. Usually, the first four or five words will be sufficient to identify the dissertation.

dufts

- Developed at the **Simon Fraser University Library**.
- CUFTS is a free, **open source (GPL)** OpenURL link resolver and electronic resource management system designed for use by library consortia.

- The CUFTS public tools provide **serials management services** to libraries and people everywhere:
 - **Journal Search** allows you to quickly find journal titles in over 475 different electronic collections listed in CUFTS.
 - Search by **journal title** or **ISSN** to find out which collections include a journal, and what coverage dates are available.

The screenshot shows the CUFTS Journal Search interface. At the top left is the CUFTS logo. At the top right is the text "Journal Search". Below this is a search form with a blue header "Search journals...". The form contains a search field with "titles" selected in a dropdown menu, followed by "for" and an empty search input box. Below the search field is a checkbox labeled "Limit to fulltext:" which is currently unchecked. At the bottom of the form is a "search" button.

The logo features the word "GENAMICS" in a bold, blue, sans-serif font. The letters are slightly 3D and have a textured appearance. Behind the letters, there is a stylized globe of the Earth with blue oceans and green/yellow landmasses. To the left of the globe is a smaller, reddish-orange planet with a ring system, resembling Saturn. The background is black.

European Journal of Psychological Assessment
Eur J Psychol Assess

Published/Hosted by Hogrefe & Huber Publishers. ISSN: 1015-5759.

The main purpose of the EJPA is to present important articles which provide seminal information on both theoretical and applied developments in this field. The journal is directed to practitioners as well as to academicians: The conviction of its editors is that the discipline of psychological assessment should, necessarily and firmly, be attached to the roots of psychological science, while going deeply into all the consequences of its applied, practice-oriented development. Psychological assessment is experiencing a period of renewal and expansion, attracting more and more attention from both academic and applied psychology, as well as from political, corporate, and social organizations. The EJPA provides a meeting point for this movement, contributing to the scientific development of psychological assessment and to communication between professionals and researchers in Europe and worldwide.

- Sexual Identity research in Univ. California L.A.

A screenshot of a Google search interface. The search bar contains the text "transgender or 'sexual identity' site:ucla.edu". Below the search bar, the "Web" tab is selected. The search results show "About 239 results (0.63 seconds)". The first result is highlighted with a yellow background and a red arrow pointing to it. The result title is "Information - ucla | lgbtn" and the URL is "lgbtnstudies.ucla.edu/information.html". The snippet below the URL reads: "The History of Lesbian, Gay, Bisexual, and Transgender Studies at UCLA ... the study of popular culture to investigations into the development of sexual identity." The word "sexual identity" is bolded in the snippet.

Abstract: Apart from some general issues related to the Gender Identity Disorder (GID) diagnosis, such as whether it should stay in the DSM-V or not, a number of problems specifically relate to the current criteria of the GID diagnosis for adolescents and adults. These problems concern the confusion caused by similarities and differences of the terms transsexualism and GID, the inability of the current criteria to capture the whole spectrum of gender variance phenomena, the potential risk of unnecessary physically invasive examinations to rule out intersex conditions (disorders of sex development), the necessity of the D criterion (distress and impairment), and the fact that the diagnosis still applies to those who already had hormonal and surgical treatment. If the diagnosis should not be deleted from the DSM, most of the criticism could be addressed in the DSM-V if the diagnosis would be renamed, the criteria would be adjusted in wording, and made more stringent. However, this would imply that the diagnosis would still be dichotomous and similar to earlier DSM versions. Another option is to follow a more dimensional approach, allowing for different degrees of gender dysphoria depending on the number of indicators. Considering the strong resistance against sexuality related specifiers, and the relative difficulty assessing sexual orientation in individuals pursuing hormonal and surgical interventions to change physical sex characteristics,
