

Dear Students,

We were supposed to have lectures in March, however, due to the unexpected events of the pandemic our classes had to be made in an online form. I prepared for you 5 parts on different issues connected with environmental ethics. Because I need to evaluate you somehow, so your task is to choose any problem described in the course materials and present your personal opinion about it.

Please prepare the opinion of 2-3 pages, that include some summary of the idea that you analyze, your opinion about it and the answer to possible criticism of your standpoint (this part is not compulsory). Please send your opinions until the 5th of May to my e-mail: d.dzwonkowska@uksw.edu.pl.

If you have any questions please contact me,

Best

Dominika Dzwonkowska
