## Research paper (max 20 points)

Your paper is a delivery of a stance for and against humanitarian intervention in particular case. The most efficient way how to write the paper is to do a research together and then decide who will take stance for and who will take stance against intervention and then coordinate the arguments accordingly. The complementarity of the papers is going to be evaluated, but do not use the same text for the first part of the paper (description of the crisis), write your own.
