Guidelines for the peer-to-peer feedback on the draft of the final paper

Prepare a short commentary on the draft of your colleague (300-400 words). The goal of the peer-to-peer feedback is to improve the quality of your papers.

The peer-to-peer feedback should include:

1. Evaluation of the topic of the paper – Is the topic/aim of the paper clear enough? Is there a clear research question/problem articulated?
2. Evaluation of the theoretical background – Is the topic framed by adequate theoretical concepts?
3. Is the main argument/answer to the research question clearly outlined?
4. Potential strengths and weaknesses - What are the strengths of the draft? What are the weaknesses? What do you suggest to improve the quality of the paper?
