

ZUR 393k:

Effects of Mass Media

Robinson, "Mass Communication and Information Diffusion"
Tichenor *et al.*, "Mass Media Flow and Differential Growth in Knowledge"

Outline:

Information Diffusion

- a. definition & examples
- b. research origins
- c. refinements & criticisms

Knowledge Gap

- a. definition
- b. key hypotheses
- c. conclusions

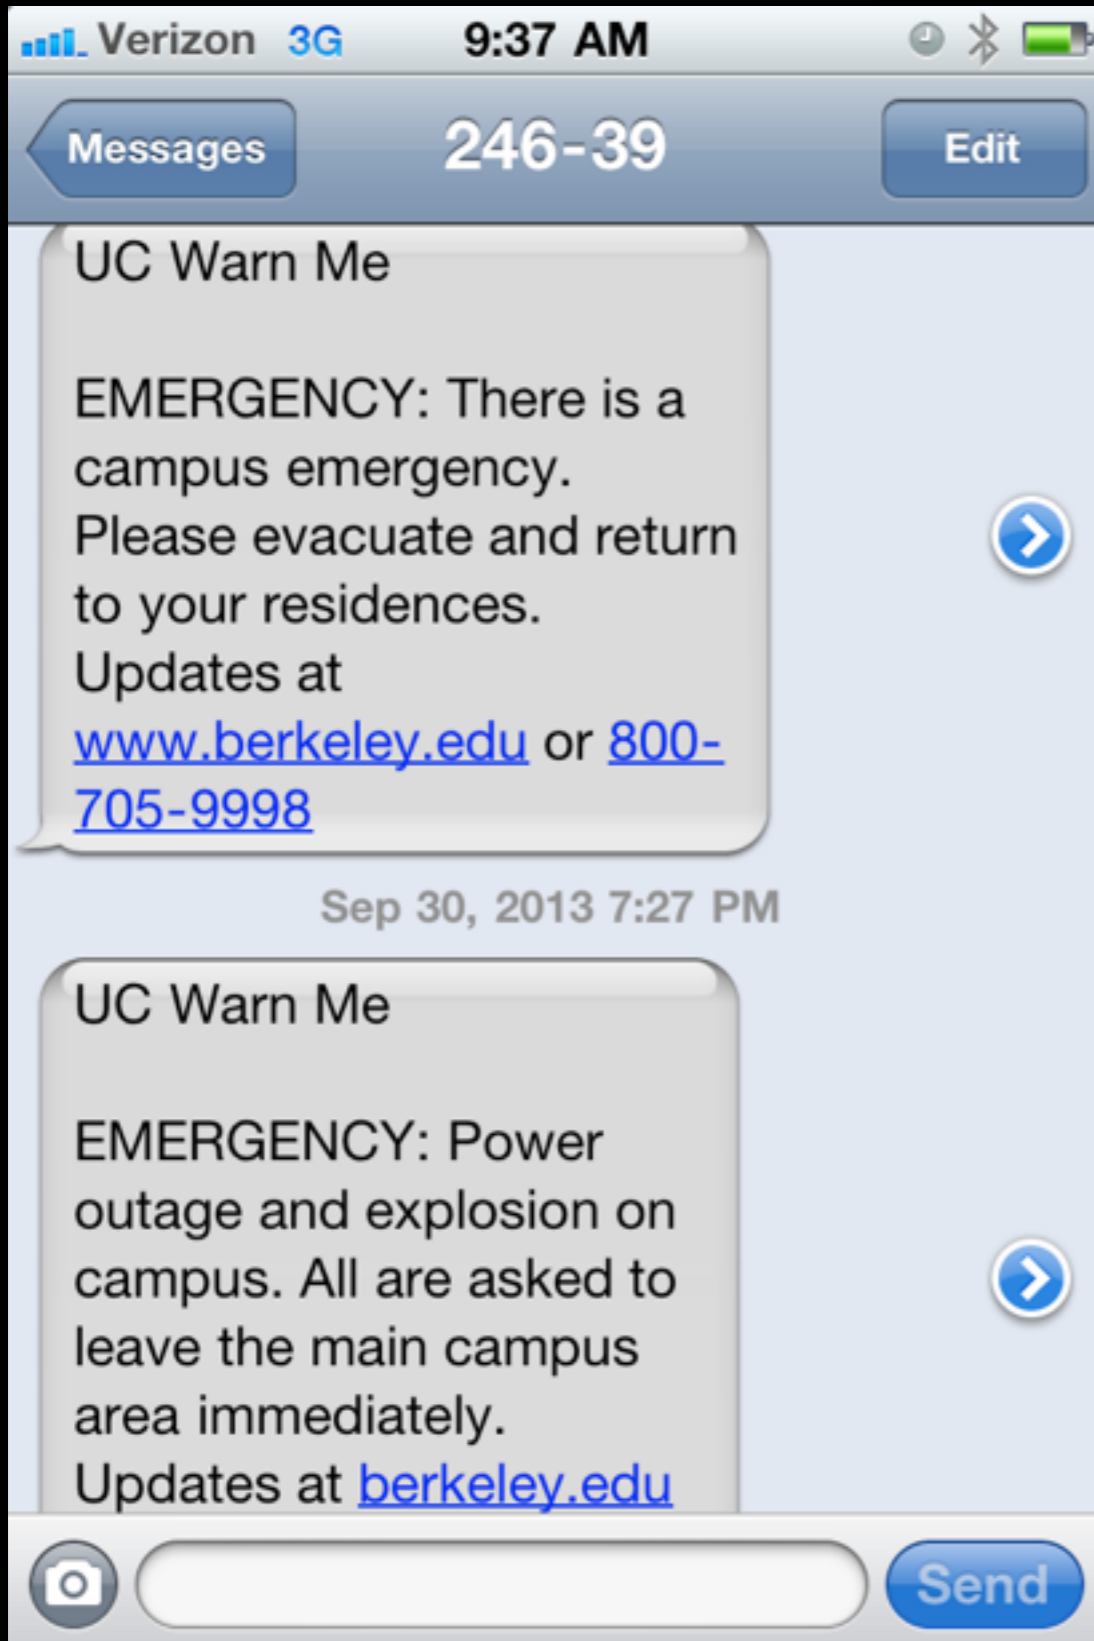

Information Diffusion

- the process by which innovations spread to the members of a social system over time
- primarily concerned with messages that contain new ideas

Information diffusion

- pragmatic area of investigation
- cuts across disciplinary boundaries

Regional Platforms for Disaster Risk Reduction take place from Africa to the Pacific.

cancer

IARC Monographs evaluate consumption of red meat and processed meat

Lyon, France, 26 October 2015 – The International Agency for Research on Cancer (IARC), the cancer agency of the World Health Organization, has evaluated the carcinogenicity of the consumption of red meat and processed meat.

Red meat

After thoroughly reviewing the accumulated scientific literature, a Working Group of 22 experts from 10 countries convened by the IARC Monographs Programme classified the consumption of red meat as *probably carcinogenic to humans* (Group 2A), based on *limited evidence* that the consumption of red meat causes cancer in humans and *strong mechanistic evidence* supporting a carcinogenic effect.

This association was observed mainly for colorectal cancer, but associations were also seen for pancreatic cancer and prostate cancer.

Processed meat

Processed meat was classified as *carcinogenic to humans* (Group 1), based on *sufficient evidence* in humans that the consumption of processed meat causes colorectal cancer.

Meat consumption and its effects

The consumption of meat varies greatly between countries, with from a few percent up to 100% of people eating red meat, depending on the country, and somewhat lower proportions eating processed meat.

The experts concluded that each 50 gram portion of processed meat eaten daily increases the risk of colorectal cancer by 18%.

Millions of people in the Philippines and beyond are taking pictures of themselves giving a cute little wave called the "Pabebe". But why?

Facebook

Models: Leila Lowfire & Matthias Weidenhöfer

A cropped image from German photographer Olli Waldhauer's Facebook post protesting Facebook's tolerance of hate speech (Photo courtesy of Olli Waldhauer)

The photo shows a topless woman wearing nothing but underwear. She's standing behind a chair where a man sits fully clothed holding a sign that translates to: "Don't Buy From Kanaken" (a racist slur for Middle Eastern immigrants)—a nod to a sign from Nazi-era Germany about Jewish shops.

The image included this caption: "One of these people is violating Facebook's policy" with the hashtag, #nippelstatthetze, which translates to, "nipples instead of hate speech."

<https://www.washingtonpost.com/news/inspired-life/wp/2015/11/03/facebook-removed-a-picture-with-a-naked-woman-and-a-man-with-a-racist-sign-guess-why-it-was-censored/>

Origins in Wartime

- WWI - US dropped 3 million leaflets
- WWII - US dropped 3 billion leaflets
- Korean Conflict - US dropped 5-6 billion leaflets
- by March 2003 - US dropped 28 million leaflets over Iraq

FIGURE 1

The S-curve of adoption of an innovation

Adoption (% of US Households)

The 5 Customer Segments of Technology Adoption

Google Glass annual sales forecast from 2014 to 2018

Additional Information

Source:
Business Insider
© Statista 2014

Types of Innovation

I. preventive innovation

- adopt now to avoid (potential) loss of desired value in the future
- e.g. seat belt, smoke alarm, contraceptive

Types of Innovation

2. incremental innovation

- adopt now to gain a *possible* increase in a desired value in the future
- new seed, new fashion

preventive innovations
usually follow a slower
rate of adoption

Criticisms of Information Diffusion Studies

1. most studies focus on adoption -- and ignore post-adoption use maintenance or modifications
2. studies in developing countries tend to accentuate rather than reduce unequal resources
3. most studies employ a linear and top-down model of communication

KNOWLEDGE GAP

- research sparked by a sense that new mass media were not really living up to their potential for information dissemination

KNOWLEDGE GAP

As the infusion of mass media information into a social system increases, segments of the population with higher socioeconomic status tend to acquire this information at a faster rate than the lower status segments, so that the gap in knowledge between these segments tends to increase rather than decrease.

underlying assumption

as people learn more, their interest increases, and as their interest increases, they are impelled to learn more

5 contributory factors

(Tichenor, Olien, & Donahue)

- communication skills
- stored information
- relevant social contacts
- selectivity
- nature of the mass media system

knowledge gap should be visible:

I. at any given point in time

- higher correlation between acquisition of knowledge and education for topics highly publicized in the media than for topics less highly publicized

The News IQ Quiz

What do you know about the news?

Test your knowledge of prominent people and major events in the news by taking our short 12-question quiz. Then see how you did in comparison with a nationally representative group of 3,147 randomly selected U.S. adults surveyed online and by mail between March 10-April 6 as members of the Pew Research Center's American Trends Panel.

When you finish, you will be able to compare your News IQ with the average American and compare responses across demographic groups.

Educational Differences in Knowledge Persist

As in the past, there are substantial differences in news awareness by levels of education. Still, half or more of those with no more than a high school education answered eight of 12 questions correctly.

The education gap is particularly wide in the question about Pope Francis' native country. Large majorities of both post-graduates (81%) and college graduates (71%) are able to correctly identify Argentina as the pope's home country, while only about four-in-ten of those with some college experience (43%) and a high school degree or less (38%) can do so.

By contrast, roughly nine-in-ten across educational categories are able to identify Martin Luther King Jr. It is the only question on which there are no significant differences by education.

Which gas makes up most of the Earth's atmosphere?

Hydrogen

Nitrogen

Carbon dioxide

Oxygen

Next Question →

About eight-in-ten Americans (83%) identify ultraviolet as the type of radiation that sunscreen protects against. Nearly as many (77%) know that the main concern about the overuse of antibiotics is that it can lead to antibiotic-resistant bacteria.

However, only about half (51%) of the public knows that “fracking” is a process that extracts natural gas, not coal, diamonds or silicon from the earth.

Similarly, knowledge of basic scientific concepts differs greatly across questions. While most Americans (78%) know that the basic function of red blood cells is to carry oxygen to all parts of the body, just 20% could identify nitrogen as the gas that makes up most of the atmosphere.

Knowledge of Science and Technology

Science in the news/daily life	% correct
Sunscreen protects from what radiation?	Ultraviolet 83
Major concern about overuse of antibiotics?	Resistant bacteria 77
Nanotechnology deals with?	Small things 65
Gas believed to cause rising temperatures?	Carbon dioxide 58
Resource extracted in “fracking”?	Natural gas 51
Textbook science	
What is the main function of red blood cells?	Carry oxygen 78
The continents have been moving over millions of years and will continue to move.	True 77
Better way to test a new drug’s effectiveness?	Control group 75

To test long term:

- (1954) Do you believe man will reach the moon in the next 50 years?
 - concern: are you testing belief/opinion or knowledge?

1954

Knowledge Gap Research Continues

- 1960s “War on Poverty”
 - *Sesame Street*
- late 1970s: long-term implications for knowledge gap within local communities

“Creation of greater differentials in knowledge across a society is itself a profound social effect, and may be a central factor in future social change”
(Tichenor, Olien, and Donahue, p. 170).

Tichenor, Olien, and Donahue (1982)

“The media systematically project definitions of issues which are conducive to the interests of the established power groups. By doing so they reinforce or increase the gaps in social power between established groups and other groups. **Media as social mirrors reflect perspectives not merely of power alone, but of power relationships in society.**”

VARIATIONS

in agenda-setting research

2. IYENGAR & KINDER (1987)

laboratory experiments

Note: This is not the actual book cover

AGGRESSION Its Causes, Consequences, and Control

Leonard Berkowitz

The “priming” effect:

The presentation of a certain stimulus with a particular meaning “primes” (or stimulates) related concepts or thoughts--and, in certain cases, related actions.

“cookie”

BERKOWITZ'S CONCLUSION

After viewing depictions of violence in the media, under certain circumstances and for a short period of time, there is an increased chance that viewers will:

1. have hostile thoughts that will color their interpretations of others
2. believe other forms of aggression are justified and/or will bring benefits
3. be aggressively inclined

“There is no longer a question as to whether the portrayal of violence in the mass media can increase the chances that some people in the audience will act aggressively themselves. Such an effect can occur and often does.”

(Berkowitz, 1994, p. 44)
