

# **Kyberterrorismus**

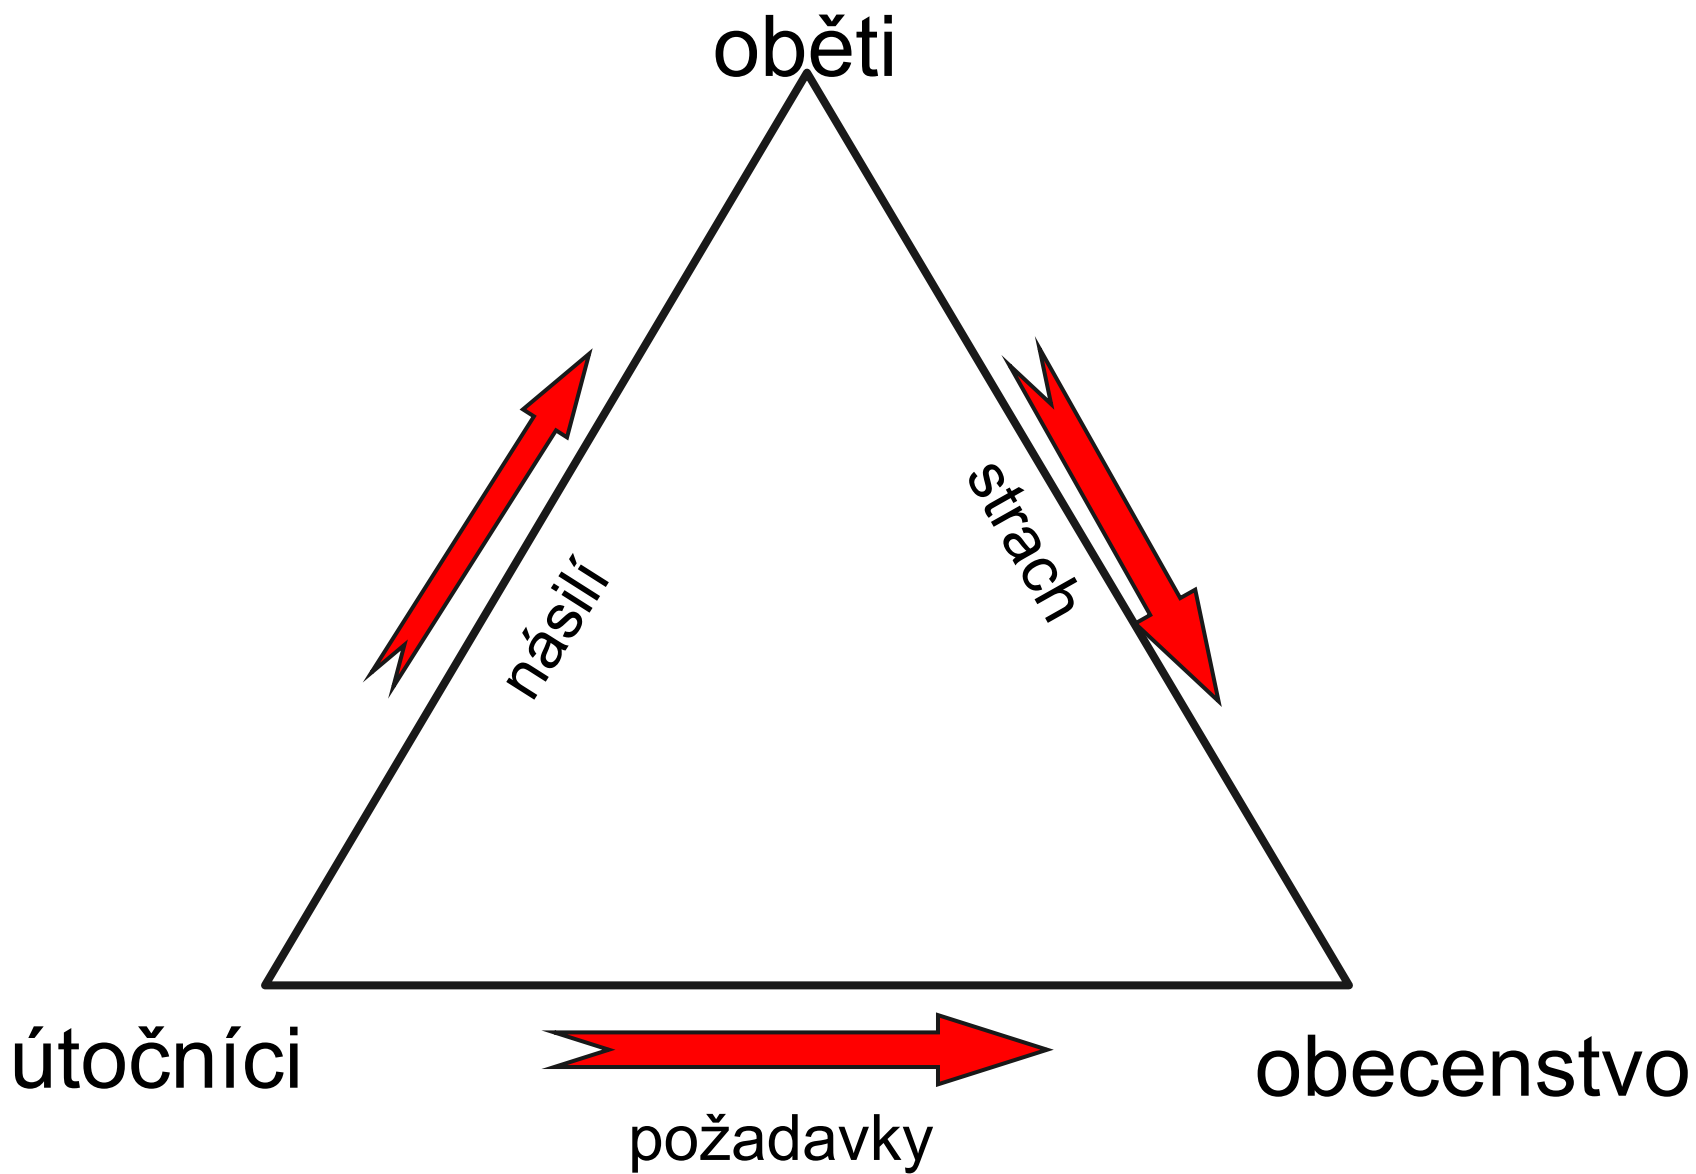

**Jakub Drmola, BSS152, 26.10.2017**

Art by Mike Werner

# Teroristické minimum

- “zastařování”
- teroristický kalkul  
a teroristický trojúhelník

# Znaky terorismu

- násilí, škody a strach
- cíl a reprezentace
- publicita
- opakovatelnost, souvislost
- symbolismus a dramatičnost

# Stav poznání

## Kyberterrorismus roste závratným tempem

Podle společnosti IBM vzrostlo v prvním pololetí roku 2005 množství zavirovaných e-mailů a útoků na počítačové systémy o 50 procent. Nové vlně kybernetického terorismu čelily hlavně státní úřady, finanční instituce a společnosti v odvětví výroby a zdravotnictví. Hackeři kradou citlivé informace jako jsou například osobní údaje či výrobní postupy, které dále prodávají nebo jim slouží k vydírání.

- nebo i “pirátské útoky”

# Stav poznání

co mnozí terorismus ukazuje obr. 5. 1.

Oficiální definice kyberterorismu vyřčená D.E.Denningem zní následovně:  
*„Kyberterorismus je konvergencí terorismu a kyberprostoru obecně chápaný jako nezákonný útok nebo nebezpečí útoku proti počítačům, počítačovým sítím a informacím v nich skladovaným v případě, že útok je konán za účelem zastrašit nebo donutit vládu, nebo obyvatele k podporování sociálních nebo politických cílů.“ [3]*

**prof. Dorothy Elizabeth Denning**

# Stav poznání

I když se autorka pokusila o velmi přesnou definici kyberterorismu, opomněla jeden důležitý fakt, který doprovází veškeré teroristické aktivity v kyberprostoru – psychologický moment napadení protivníkovy sítě jakýmkoli způsobem. Tento efekt, dostatečně znásobený hrozbami a jinými metodami psychologické války, může být postačující k tomu, aby uvnitř protistrany vyvolal takovou míru strachu, jež sekundárně povede k významným fyzickým, ekonomickým nebo jiným škodám značného rozsahu. A právě na tento sekundární efekt mnohé kyberteroristické skupiny sázejí.

# Výzvy

- tragická úroveň porozumění mezí politiky, médií a lidmi obecně
- zlepšuje se jen velmi pomalu
- vzácný překryv IT a politiky

# Pojetí kyberterorismu

- velké rozdíly
- teroristé na internetu
- rekrutace, návody, propaganda, komunikace
- fyzické útoky na datovou infrastrukturu

# The internet's undersea world

The vast majority of the world's communications are not carried by satellites but an altogether older technology: cables under the earth's oceans. As a ship accidentally wipes out Asia's net access, this map shows how we rely on collections of wires of less than 1cm diameter to link us all together

## Fibre-optic submarine cable systems

- In-service
  - Planned
  - Damaged
- Circle size is a relative capacity of 5 gbps (grey) or several orders of magnitude less (orange, yellow, red) (Nov-07)

### Alexandria, Wednesday

A ship's anchor accidentally cuts two cables, SeaMeWe4 and FLAG Europe-Asia, reducing internet capacity in Asia by 25%

### Taiwan, 2006

Site of the previous biggest cable disaster, when under-ocean landslide cut nine cables between Taiwan and the Philippines, disabling net access for weeks

## Internet users affected by the Alexandria accident

The main countries affected in Wednesday's event

## World cable capacity

Submarine cable operators light (turn on) capacity on their systems to sell bandwidth to other carriers. Carriers buy extra capacity, mainly to hold in reserve. On the trans-Atlantic route 80% of the bandwidth is purchased, but only 25% is used

## The longest submarine cables

The SeaMeWe-3 system from Norden in Germany to Keeloo, South Korea connects 22 different countries with 39 landing points

SeaMeWe-3	39,000 km
Southern Cross	30,500 km
China-US	30,476 km
FLAG Europe-Asia	28,000 km
South America-1	25,000 km

## The world's cables in bandwidth

The first intercontinental telephony submarine cable system, TAT-1, connected North America to Europe in 1958 and had an initial capacity of 640,000 bytes per second. Since then, total trans-Atlantic cable capacity has soared to over 7 trillion bps

## Cross-section of a cable

Cables of this strength are typically 69 mm in diameter and weigh over 10,000 kilograms a kilometer. In deeper waters, lighter and less insulated cables are used

**Anti-sec.** We're a movement dedicated to the eradication of full-disclosure. We wanted to give everyone an *image* of what we're all about.

Full-disclosure is the disclosure of exploits publicly – anywhere. The security industry uses full-disclosure to profit and develop scare-tactics to convince people into buying their firewalls, anti-virus software, and auditing services.

Meanwhile, script kiddies copy and paste these exploits and compile them, ready to strike any and all vulnerable servers they can get a hold of. If whitehats were truly about security this stuff would not be published, not even exploits with silly edits to make them slightly unusable.

As an added bonus, if publication wasn't enough, these exploits are mirrored and distributed widely across the Internet with a nice little advertisement embedded in them for the crew or website which first exposed the vulnerability to the public.

It's about money. While the world is difficult to change, and money will certainly continue to be very important in the eyes of many, our battle is that of the removal of full-disclosure for the purpose of making it harder for the security industry to exploit its consequences.

It is our goal that, through mayhem and the destruction of all exploitive and detrimental communities, companies, and individuals, full-disclosure will be abandoned and the security industry will be forced to reform.

How do we plan to achieve this? Through the full and unrelenting, unmerciful elimination of all supporters of full-disclosure and the security industry in its present form. If you own a security blog, an exploit publication website or you distribute any exploits... "you are a target and you will be rm'd. Only a matter of time."

This isn't like before. This time *everyone* and *everything* is getting owned.

**Signed: The Anti-sec Movement**

## Anonymous - #opSyria

More than 100,000 people have been killed in the conflict in Syria  
Anonymous has been actively involved and contributed towards the uprisings in  
Egypt, Lebanon and Tunisia.

For far too long, we have witnessed the barbaric, unjust and brutal treatment of the Syrian people. Time and time again we have observed these war crimes. From the chemical weapons and scud missile attacks employed by Bashar al-Assad, to the growing number of questionable and violent actions taken by some of the opposing groups, it is clear that whoever the citizens may rally behind, their safety and security is ultimately transient and not guaranteed. The accumulation of war crimes has irritated our nest and the time has now come for us to take action.

Dictator Assad and elements within the Syrian Opposition, you now have the undivided attention of Anonymous. You are failing your country, you are failing your people, your country faces following the examples of your Egyptian, Lebanese and Tunisian counterparts. Our request is a simple one; cease fire immediately and stop the violence towards the innocent or you will feel our wrath.

**To the people of Syria, know that Anonymous stands with you in this war against terror.**

We vow to do everything we can to hinder war crimes played against you. We will raise awareness in every manner we can. We will assist you in putting an end to this carnage. We have put together the Anonymous Syria Care Package which contains instructions in Arabic and English that will aid you in areas of conflict. We encourage you to download this information, keep it on your person and share it with your fellow Syrians to the best of your ability.

We are with you in this war. No matter how alone and abandoned you feel, no matter how many atrocities you face - know that there are many of us working around the clock, concerned and attempting everything we can to catalyse change. We are oceans far from you, but closer than the jugular vein. We, together, can conquer adversity.

We are Anonymous.  
We are Legion.  
We do not Forgive.  
We do not Forget.

Dictator Assad, oppressors of the Syrian people,  
EXPECT US!

ACTA staví zájmy vybraných mediálních korporací nad práva člověka. Kvůli ochraně duševního vlastnictví vybraných subjektů se my všichni musíme vzdát části svých práv.

ACTA předjímá, že každý z nás je zlodějem. Schválením ACTA nás námi volení zástupci zbavují soukromí ve jméno ekonomických zájmů kasty privilegovaných. Budeme monitorováni a kontrolováni v reálném i virtuálním světě.

ACTA legalizuje privilegované postavení úzké skupiny subjektů na trhu. ACTA klade všem lidem za povinnost chránit cizí duševní vlastnictví a to na vlastní náklady, ale prostředky, které určí ACTA. Budeme to tedy my, spotřebitelé, kteří zaplatí za ochranu duševního vlastnictví jiných.

Budeme to tedy my, kteří budeme okrádeni pod záminkou podpoření, že my sami jsme kradli! Budeme okrádeni o svá práva, majetek i důstojnost.

### » Vzkaz politikům

Naši příští drazí politici, sde nebudou volit někoho, kdo nemá jejich zájmy.

### » Vzkaz médiím

Nejme teroristé. Neubíjejme nevinnými a bezbrannými. Naším úmyslem není vyvolávat chaos bez příčiny, ale bránit svět před tyraní, kterou mu nyní chystá vrstvá podnikatelské lobby.

### Vzkaz pro prezidenta

Vážený pane prezidente, dne 9. 11. 2011 se usnese vláda na tom, že Vám doporučí zmocnění zástupce naší republiky k podpisu smlouvy veřejně známé jako ACTA.

Již v minulosti jste určil, že se řídíte vlastním úsudkem i svědomím. Zmocněním zástupce ČR k podpisu smlouvy ACTA vyjadřujete svůj souhlas s omezením práv a svobod občanů České republiky.

Budoucnost našich dětí ještě není ztracena, a proto Vás vyzýváme k vyústění Vašeho víru a nápravě. Předovzte, aby práva našich životů dítivat ekonomická zájmy jiných.

"Náš web je standardně dobře zabezpečen. Už jsme šli i na Facebook." Tomáš Bartovský, mluvčí ODS
