

Effectiveness and circumvention II

dr. Martin Chovančík

Departing debate

If you see this sign – it's your time to take over the conversation ©

- Rank 3 obstacles to sanctions working effectively you find the most impactful/relevant
 - Which actor do the impediments lie with?
 - Think of the difference between national and international sanctions.
- Is circumventing sanctions easier or harder now?

Effectiveness challenges

- built to succeed, prevent collateral damage, and foster peace
- is the lighter touch too light?
- creating transnational crime
 - not only in target, but also neighbors
 - fostering dependence of leader upon organized crime
- no forcing compliance
 - problematic actors black knights, not only Russia, China, proxies, and normbreakers
- need for overcoming non-compliance creates more complex systems
 - US, EU, and regional measures to replace UN inaction
- maintaining consistency with threats and imposition
 - building sender resolve to enforce codes of conduct
- targeting non-state actors as a novel challenge
- building institutions with lessons learned capabilities

Black knight support

external actors, be they democratic or authoritarian, great powers or regional powers, states or international organizations, that act as guardians of autocracy or challengers of democracy in specific contexts.
political ally that provides the sanctioned state with significant assistance

Effectiveness challenges

- Reporting fatigue
- **Reporting hindrance** on the part of member states lack of due process or judicial findings of transgressions amount to summary judgements of own citizens
- Opposite also true, when states were allowed to submit names of targets **without justification or provision of sufficient evidence**
- Inability of outright consensus vote still often leads to **impartiality at outset**
- Adverse impacts on population still present, most vulnerable segments of society still suffer steep price increases for basic goods, medicines, as well as safety concerns as target regimes shift costs (Iran, DPRK)
- Building dependence on specific foreign assistance
- Even **environmental impacts** when coping states attempt to hastily replace foreign imports by domestic production or refinement

National implementation

- remains the most complex challenge
 - willingness and support remain politicized
- targeted measures exacerbate the obstacles of implementation
- automatic "enabling" national legislation insufficient for targeted measures
 - months-long lag of even the EU behind UN SC financial measures
- administrative capacity
- legal competence
- frequency of updates, alterations, listings and de-listings
- determining scope
- **definition issues**: differing categories of "luxury goods", dual use, even military
- licensing issues, legal recourse and litigation in breaching require the enactment of separate legislation
- EU Court ruling means specific legislation must observe all potential rights

Impact on design

- Daily practice of implementation (2015)
- Burgeoning administration
- Shift of competencies to bureaucracy
- Huge enforcement spectrum
 - Decisions to litigate vary broadly
 - Rely on national follow-through
 - Demand further capacity
- Reputation costs increase in industry sectors
- High threshold for listing becoming even higher due to recourse litigation for national and international senders

Targeting as limitation?

- International law breached?
- "due process" including the right to a fair hearing, the right to judicial review, and the right to an effective remedy
- Delisting required unanimous vote in Sanctions Committee
- European Court of Justice EC vs. Kadi 2008 + 2010 + 2012
 - Case in Al-Qaeda sanctions implementation listing a SA businessman
- 2008 every listing contains "**narrative summary**" of reasons for listing
- 2009 UN establishes **Ombudsperson** weak at first
- 2011 Ombudsperson's delisting proposal becomes effective in 60 days unless blocked by consensus vote in the Sanctions Committee (9/15)
- **However!** Ombudsperson is only for the Al-Qaeda regime and no other listings of people or entities in UN (and thus EU) sanctions

Listings and delistings of entities

Sanctions effectiveness and circumvention

Circumventing sanctions

- Is circumventing sanctions easier or harder now?
- What factors do you consider when answering?

Offshore Survival Kit

The Complete Offshore Package for The International Man

- 1. Central American Citizenship excellent visa-free travel opportunities *(click here)* & Driving Permit (retail: US\$40,000).
- 2. Anonymous Panama Corporation with Nominee Directors (retail: US\$999).
- 3. Asset Protection Offshore Trust (retail: US\$150).
- 4. International Driving Permit 5 years validity (retail: US\$200).
- 5. Travel Agent ID Card lifetime validity (retail: US\$300).
- 6. Anonymized Visa Gold Credit Card with immediate US\$170 credit line (retail: US\$900).
- 7. Baltic Offshore Bank Account without banking reference (retail: US\$250).
- 8. 2 Czech Anonymous Savings Accounts (retail: US\$1,000).
- 9. Swiss Maildrop Service with street address, phone, fax and US\$250 deposit, 3 years (retail: US\$800).
- 10. Anonymized Mobile Phone with Card (GSM) and 1 year's basic fees paid in advance, plus US\$300 connect charges deposit (retail: US\$1,200).
- 11. The Offshore Manual & Directory (retail: US\$147).
- 12. Multiple DHL air courier deliveries: US\$250.

The above items do normally retail together for *US\$46,146*. Our price: US\$39,000.

Delivery Time: 3-4 weeks.

Circumventing sanctions

Illicit trade summer school, deadline in 2 months https://www.rug.nl/education/sum mer-winter-schools/illicit-trade/

- Apart from large scale illicit trade i.e. not smuggling (is permanent and illegal, illicit means temporary)
 - Smuggling entails all manners of circumventing taxes, tolls, local legislation and accounts for as much as 60% of world trade (Nordstrom 2007)
- Specifically designated items (arms, oil, finances, resources, etc.)
- crucial role of

1. volume

Inspection of cargo flowing even through most modern ports stays bellow 5% of the transported shipments

2. offshore banking

Ownership of banks or financial institutions abroad greatly decreases transparency, with obvious tax detriments and through self loans

3. covert ownership and laundering

Within-corporation transfers, shell corporations, holdings allow for easy laundering

4. brokering leniency

Complex networks make tracking nigh impossible, and prosecution even harder by requiring multinational investigations and crossborder information sharing with extradiction

- high profile brokers become employed by governments (or even the UN) and can virtually be granted immunity (**Babak Zanjani**...)

End user

- What would you expect and End User Cerfiticate to look like?
- Who is capable of verifying its authenticity?

Terms of the trade

- EUC End User Certificate
 - Document produced by the importing government to the exporting government certifying that the importing government has demanded the import and is in fact the last destination of cargo for which the export license is demanded
 - NOT STANDARDIZED
- PDD Point of Departure Diversion
 - The production of a fake EUC to domestic authorities in order to acquire an export license
 - Typically one legal shipment followed by EUC forgery, some countries do not verify EUC issuance by export destination
- PDOD Point of Delivery Onward Diversion
 - More frequent and easier in countries marred by corruption
 - EUC is original, but confirmed fraudulently, strong broker role
 - No enforcement or even monitoring of EUC observance
 - Diversion usually occurs instantly, but not necessarily
- C&C Circumvention and Concealment
 - Popular in the "Ant Trade"
 - Concealment generally involves hiding items in among other goods

How much responsibility or "due dilignence" should be observed by the seller?

Secondary sanctions, circumvention, and effectiveness

- Instrument of punishment for breaches of primary sanctions
- Measure far more efficient than "naming and shaming"
- Hard to achieve a consensus vote on in any IO due to multiple alliances
 - UN council membership (repeated Guinea blocking)
 - AU Panel of the wise authoritarian membership
 - EU member alliances and nature of CFSP no EU secondary sanctions on states so far
- First UN Liberia for supporting RUF fighters in neighboring Sierra Leone
- Second UN Eritrea for supplying arms to Somalia in breach of UN embargo
- Since no country has been subject, although entities are regularly being listed for breach of existing sanctions regimes
- US major secondary sanctions sender, shift around 2014 from minor fines to major fines, and then <u>ACCESS</u>
 - Loss of access to US markets
 - Prohibition of US citizens to trade with entity
 - Travel bans and in country asset freezes
 - Forfeitures and fines most often against banking houses

Secondary sanctions - extraterritoriality

- Primarily US
- Any activity that facilitates, approves, or supports transactions with sanctioned entities
- **Does not only concern US persons** i.e. US citizens anywhere in the world
 - This is still an issue with EU countries, which selectively apply their own measures to its citizens ONLY on its territory
 - Particular issue with **brokering**
- 1996 Libya and Iran acts first mentioned "persons"
- 2010 Iran (Cisada) Act introduced expansion to any subsidiaries controlled or participated in by US companies
- Promoting strict liability i.e. individual entities are responsible for their own transactions
 - States do not issue broader guidelines imposing heavy investigation burdens on fast altering sanctions regimes
 - Especially debatable with anti-terrorism sanctions
- Possibility for a **non-US bank to get sued in the US by non-US citizens** for breaching US sanctions by maintaining a terrorist affiliate account (NatWest, or Lloyd's 2009)

- 07/2017 Countering America's Adversaries Through Sanctions Act
- First bi-partisan act of Congress to curtail president
- President in turn cancelled the Office of Coordinator for Sanctions Policy in OFAC
- Russia, Iran, North Korea
- impose sanctions on persons in violation of UN or US sanctions
- impose sanctions on countries importing Russian arms (India, Indonesia, Turkey) S-400, Su-35
- Impose sanctions on support to Iran or DPRK export or import
- The Act converted the punitive measures previously imposed by Executive Orders into law to prevent the President the easing, suspending or ending of sanctions without the approval of Congress
- Lists get published, but not acted upon (famous 2018 Forbes oligarch fiasco)

Secondary sanctions extraterritoriality

- EU blocking regulation against US extraterritorial application
- The Regulation prohibits anyone bound by it from complying with any requirement or prohibition set out in a number of US sanctions
- No embargo on Cuba
