Survey Figures on What Causes Rioting?

What causes rioling? The following tables are arranged to abow it a glance how the proportion of rioters varies within key categories. To interpret it, make comparisons across the rows. For example, 25 Berceni di those born in Detroit were rioters—more than twice as many as in any other residence category. Response in the don't-know categories and no-answer categories have been left out, so that all columns total 100 percent.

1. How long ha	ive you liv Less than I One year	ess than	More tha	n Born in 5. Detroit	9. Are i police

Clinton Supporters

Hillary Clinton supporters in this user group are not as cohesive as Trump supporters and they interact more frequently with users who follow both or neither candidate. They have few mutual follower networks in common with the far-right conservative cluster.

> This large cluster of Trump supporters on Twitter have little mutual follower overlap with other users and are a remarkably cohesive group. They exist in their own information bubble.

ANARCHISTICKÝ MĚSÍČNÍK

číslo 99. **PROSINEC 2016**

vydává Nakladatelství Anarchistické federace www.afed.cz // afed@afed.cz

Analýza dokázala hovno

Prosincové Česko má nejnižší nezaměstnanost v EU, a to 3,8 procenta. Přišli na to experti. Analyzovali, dokazovali, rozpitvávali a preparovali, zapisovali, ale i škrtali, všechny svoje síly na to obětovali, a když to skončilo, pochopili, co dokázala jejich analýza. Státní správa vypočítala, že nezaměstnanost už narazila na svou "přirozenou" hranici, nižší už být nemůže. Zaračstnavatelé vypočítali, že už nemůžou další pracanty mezi zdejšími občany schnat a že řešením by byli jen ještě povotnější otroci zveně. Odbor statistiky pro trh otročiny spočítal, že klesl počet zaměstnavatelů a příznivé počty vznikají díky malým podnikatelům, kteří vykořisťují jen sami sebe. Mediální odborníci oprašili starši výpočty a vědi, že "na přelomu roku dojde – jako

již tradičně – k mírnému zvýšení nezaměstnanosti". Zbývá otázka, co s těmi 366 244 evidovanými nezaměst-

nanými. Řešení přišlo shåry: dotace z evropských fondů. Budou využity na vyřešení situace těch, co tvoří to skvělé nejnižší evrogské procento: budou za ně totiž přijati noví úředníci na úřady práce. Už se odtud nebudou propoušičt ani svačinářky. Vie FU penez pro stav naží zaměstnanosti znamená, že bude větěr dohied na nezaměstnané, posítí se jejich kontrolování, a bude se jim vyplácet míň dávek (na což je právě potřeba víc Gředníků). wijimmen realistický přístup a lze u něj očekával do-

A opravdu je dostatečnou záplatou chlest, čekání na odchod do dischodo, plné rogáły hypermarkető nego výběr a nepřeberného množství pr.-gramů v televizi prešpikovaný reklamními pauzami?

K čemu jsou nám údaje o poklesu nezaměstnanosti, když víme, žo ta jedece sama o sobě stojí aktorát tak za dvě věcí? Mime z ní snad takovou radost, že bychom se huždý den nedočkavostí probouzeli, kdy už zazvoní budík? Možná těch pár šťasiných mezi námi. Jak to, že nás tedy tak sere něco, z čeho se dělá cthor? Součástí moderní morálky se totiž stala víra, žo veškerá práce je dobrá sama o sobě. O tom nás přesvědčují především ti, kleží těží z práce ostatních. A nenechme se mýlit, nejsou to ti ubožáci, kteří si se studem jdou pro almužnu v nezeměstnaposti. Jsou to ti údajní dobrodinci, kteří nám práci blahoskionuš čávají. Vždyť naše posnaný životy ivoří jejich

Hlavně že analyticí přinesli dobrou zprávu. Račujíne se. Jen zarytý škarchlíd, co potřebuje zaplatit nájem, elektřinu, topení, zisky. jídlo, boty a kabát, odpoví popravdě na otázku, co dokázala jejich analýza: Analýza dokázala hovno.

OTROCINA NEBO HLADOVENI? TO NENI VOLEA. ALE VYDIRANI!

80 tiş

"What makes it data journalism isn't the form, it's the starting point in a data. The result can take many forms: it might be a text article, or a data visualization, or a video, or something else entirely."

onditional point of reference for calculating the c longitude. Mercator assumed that the Prime is not determined arbitrarily, but could be l by drawing a line through two poles — the cal one, in other words, the one found by the , and the magnetic one that any compass points emish cartographer did not know that the pole shifts.

The Magnetic Pole (according to Mercator)

Mercator pointed to two likely spots where the lines towards both poles meet. He found the arguments in favor of the group of the Cape Verde (*Cabo Verde*) islands (*Sal, Boa Vista and Maio*) more reasonable. However, just in case, he pointed to another magnetic pole, taking into account the fact that the zero meridian could pass off the island of Corvo in the Azores archipelago, and he hoped that sailors would eventually clarify this information.

The Prime Meridian
