

# Data Visualization

# My background

- Geography and Cartography
- Statistical analysis
- Political Science
  
- It has serious consequences for the course
  - Visualization of spatial data will be included
  - The basic statistics will be necessary
    - It may seem to be a bit complicated
    - Issue of „design“ will be almost neglected
    - I am not familiar with up to date journalist practices

# Overview of course

- Several blocs:
  - Data preparation
  - Univariate visualization
  - Visualization of relationship
  - Visualization of time data
  - Visualization of spatial data
  - Visualization of text data
  - Presentation of visualizations
- ASSIGNEMENTS!!! (8 for 60 points)
- Final assignement

# Final assignement

- Goal is to provide to vizualize some (important) topic
- Preferably using somethnig from content of course
- It is important for final grade
- 40 points (total is 100)

# Used software

# Introduction

- Visualization as academic discipline
  - Theories
  - Methods
- Visualization as daily practise
  - How to make a chart from some data

# Visualization as communication tool

- Way how to communicate
  - Who is talking?
  - Who is listening?
  - What is the message?
    - Issue
    - Time
    - Space
    - Kind of data
  - What is a channel?
    - Internet
      - Static
      - Dynamic
    - Paper

# How visualization works?

- Data > „**some work**“ > picture
- Something important is missing!
  - STORY TO TELL!!!
- Visual abstraction
  - Selection of „telling“ characteristic of data
- Comparison
  - To give a meaning to certain value

# Data

- Information
- In form of table
- Metadata: information about data

- Row = case

- Column = variable

- Name
- Order
- Number

Position	Club	Played	Won	Drawn	Lost	GF	GA	GD	Points	Form
1	 Manchester City	6	6	0	0	16	3	13	<b>18</b>	W W W W W
2	 Liverpool	6	5	1	0	15	5	10	<b>16</b>	W W W W W
3	 Brighton And Hove Albion	6	5	0	1	18	8	10	<b>15</b>	W L W W W

# Data

- Individual
  - Data are measured on given level
  - Citizens in opinion polls
  - MPs
  - Books, movies, ...
- Aggregated
  - Census
  - Registers
- It is not characteristics of unit
  - Year of establishing of municipality (individual)
  - Unemployment in municipality (aggregate)

# Most important typology

- Sample
  - Selection from population
  - Surveys
  - There is some **uncertainty!**
- Population
  - All cases are covered
  - Selection is not „random“
