

Endodontics II. questions

1. Differential diagnosis of pulp diseases
2. Apical periodontitis – pathology, clinical symptoms, possible complications
3. Therapy of pulpitis
4. Therapy of apical periodontitis
5. Radiography in endodontics
6. Working length of the root canal
7. Dry operating field in endodontics
8. Access to the pulp chamber – instruments, description of the procedure
9. Hand instruments for the RCT
10. ISO norm in endodontics
11. Canal shaping – hand instrumentation
12. Canal shaping - power driven root canal instrumentation – systems and basic rules
13. Reendodontic treatment
14. Root canal irrigation
15. Root canal filling - materials
16. Root canal filling - methods
17. Calcium hydroxide in endodontology
18. Medicaments in endodontology
19. Endodontic surgery
20. RCT – indications and contraindications
