ANTERIOR HYPOTHALAMUS

Ncl. suprachiasmaticus – afferentation from retina - generator of circadian rhythms

Ncl. preopticus – different structure in female and male – control of individual sexual behavior, behavior associated with maternity; regulation of body temperature

Ncl. supraopticus and paraventricularis (magnocellular component) – tractus hypothalamo-hypophysialis – transport of hormones into neurohypophysis

Ncl. paraventricularis (parvocellular component) - capillary network in eminentia medialis – control of adenohypophysis - hypothalamo-hypophysial portal pathway

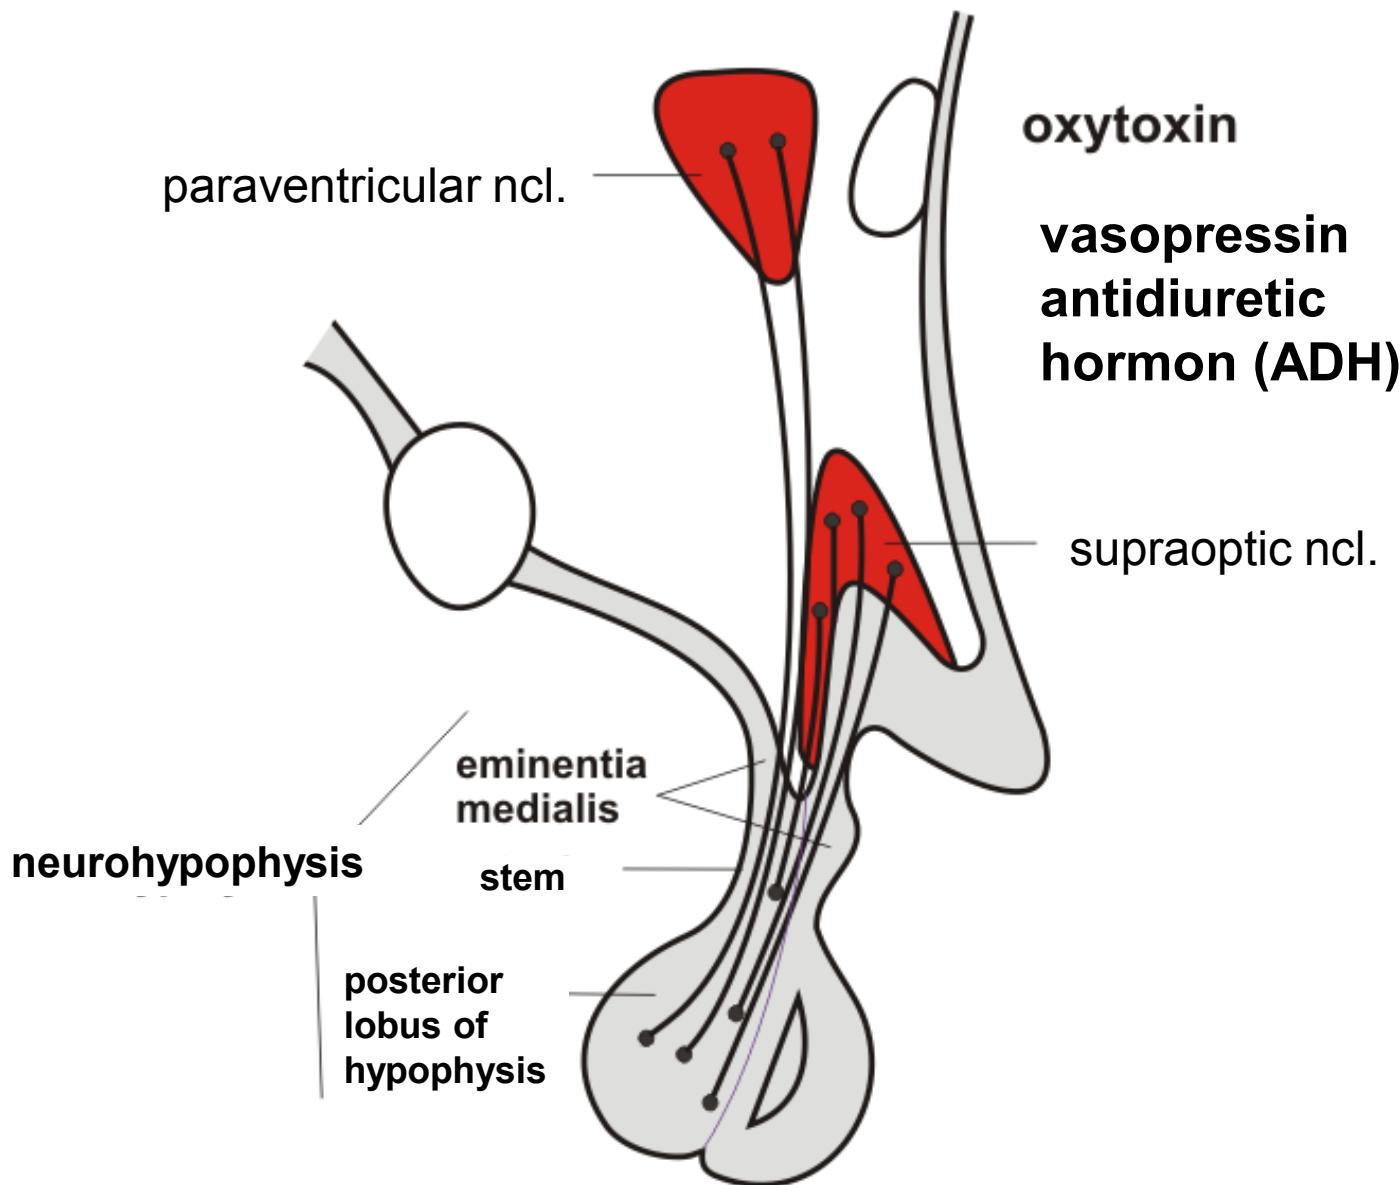

MIDDLE HYPOTHALAMUS

Ncl. arcuatus - capillary network in *eminentia medialis* – control of adenohypophysis - hypothalamo-hypophysial portal pathway

Ncl. ventromedialis – control of food intake (apetstat)

Ncl. tuberales - capillary network in *eminentia medialis* – control of adenohypophysis - hypothalamo-hypophysial portal pathway

Hypothalamo-hypophysial pathway
