

CARDIOVASCULAR SYSTEM

Arteries

Veins

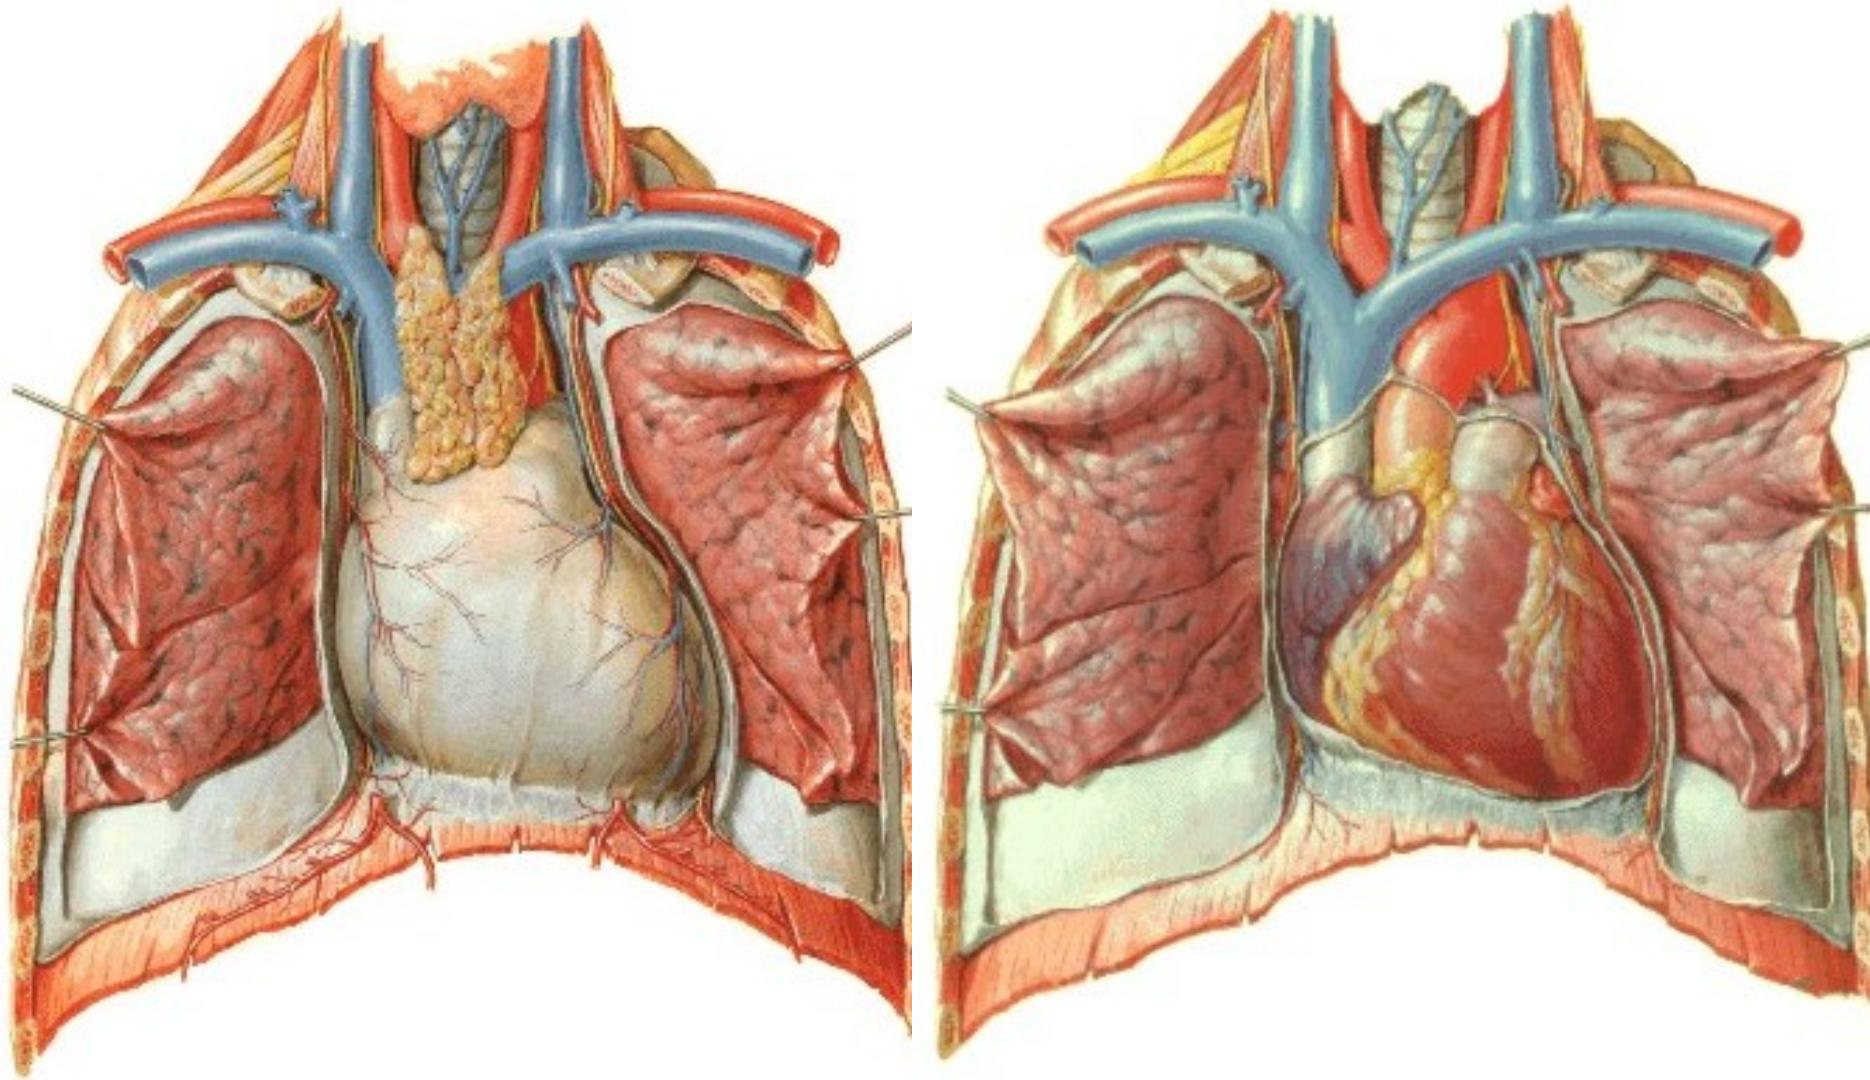

Capillaries

HEART

Adult 240 – 320 g

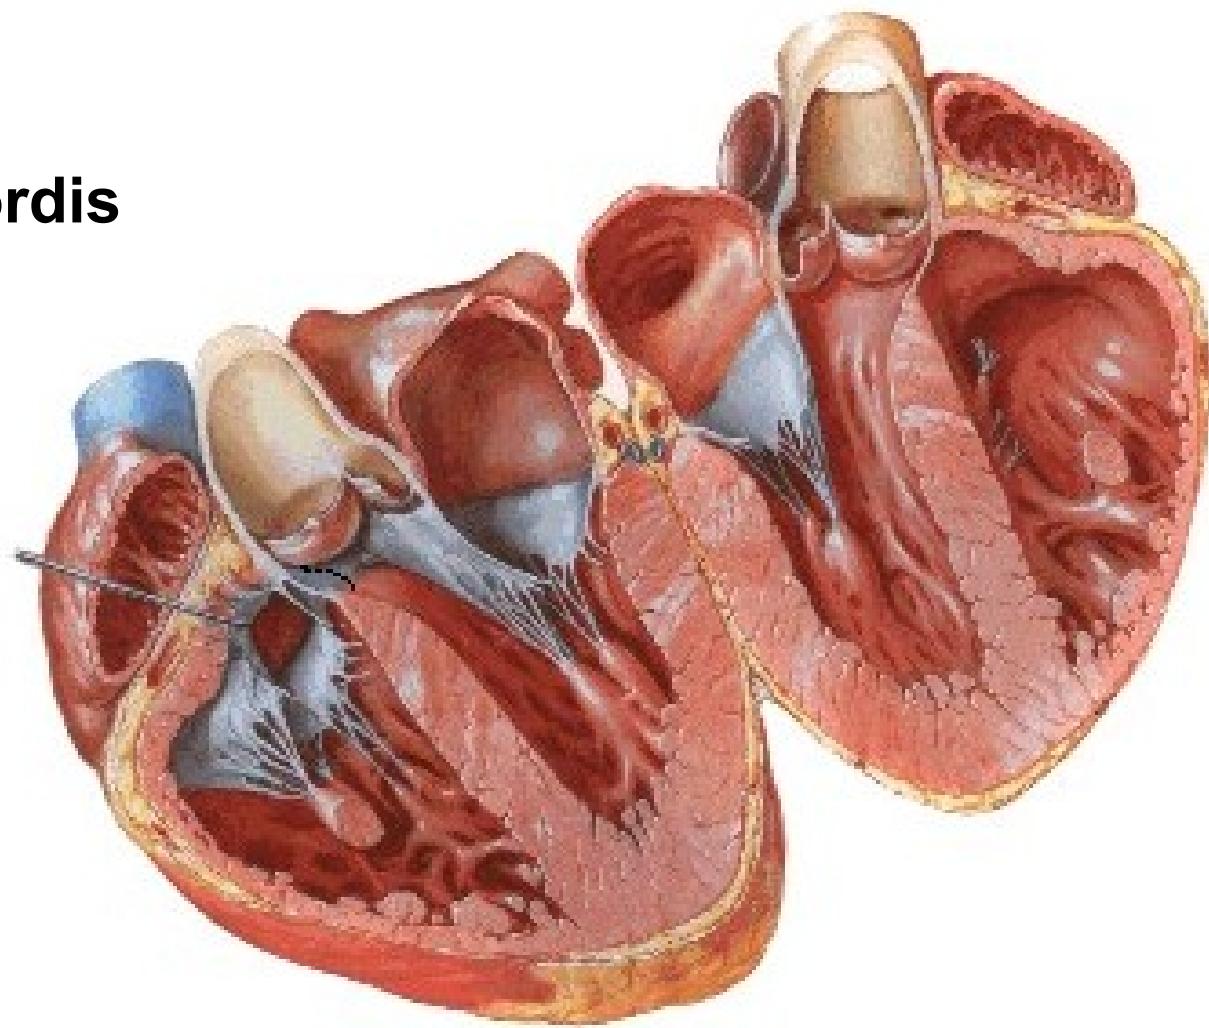

Newborn 20 – 30 g

COR

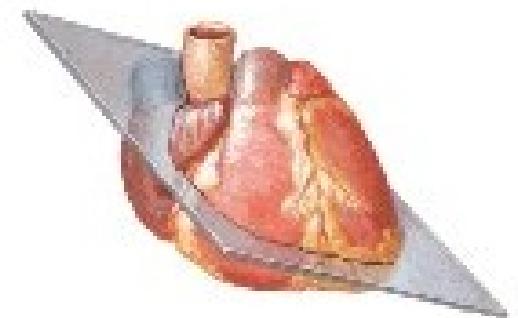

Atrium cordis

Ventriculus cordis

Septum interatriale
Septum interventriculare

•

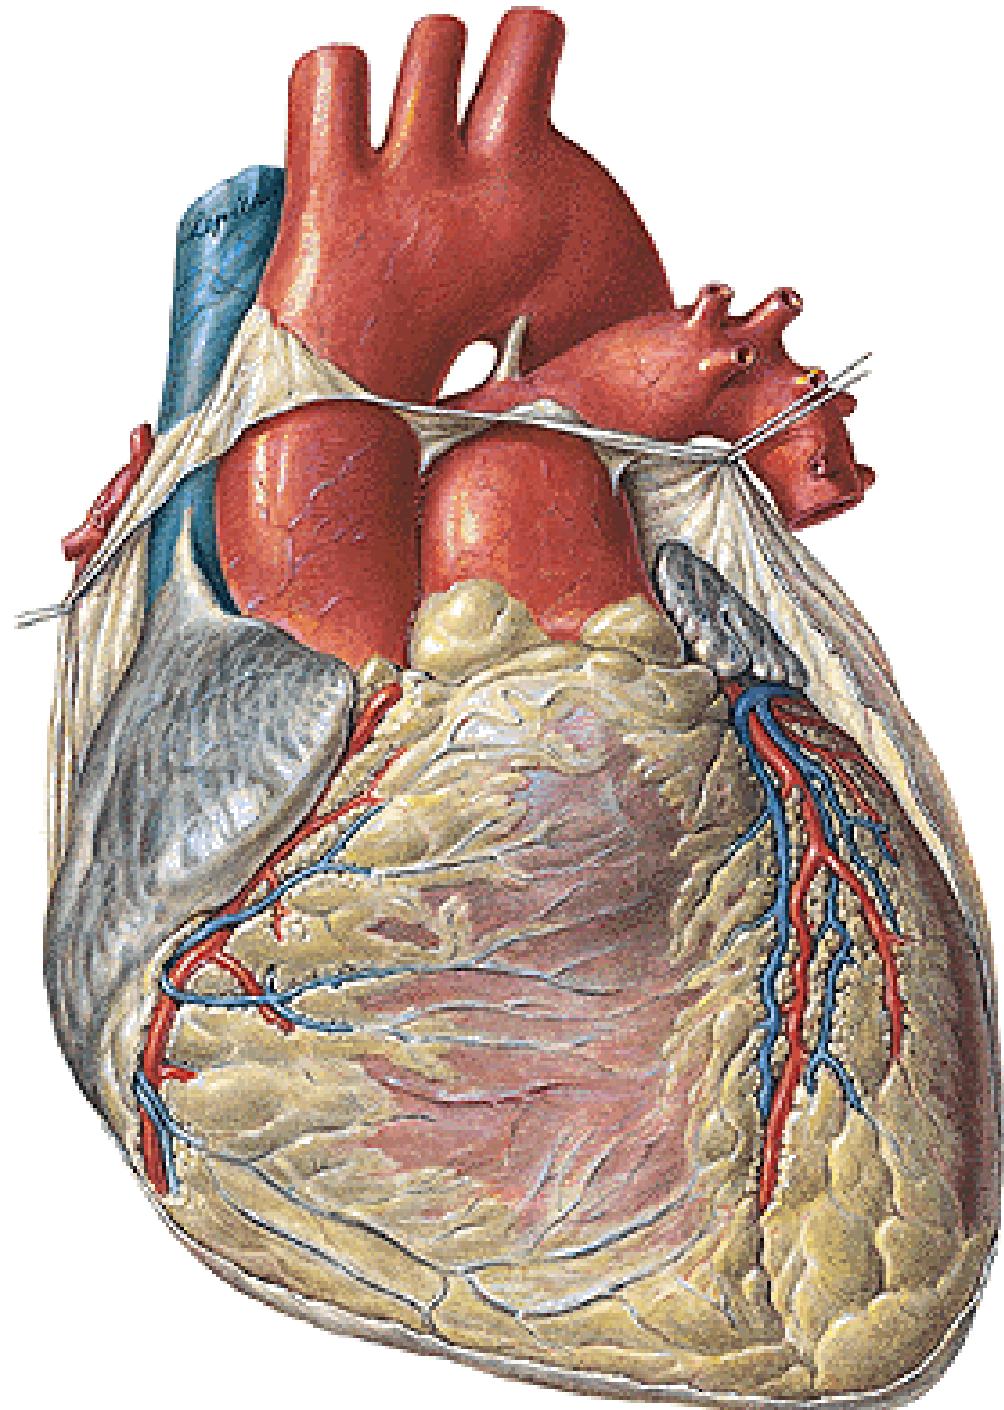

COR

Atrium dextrum

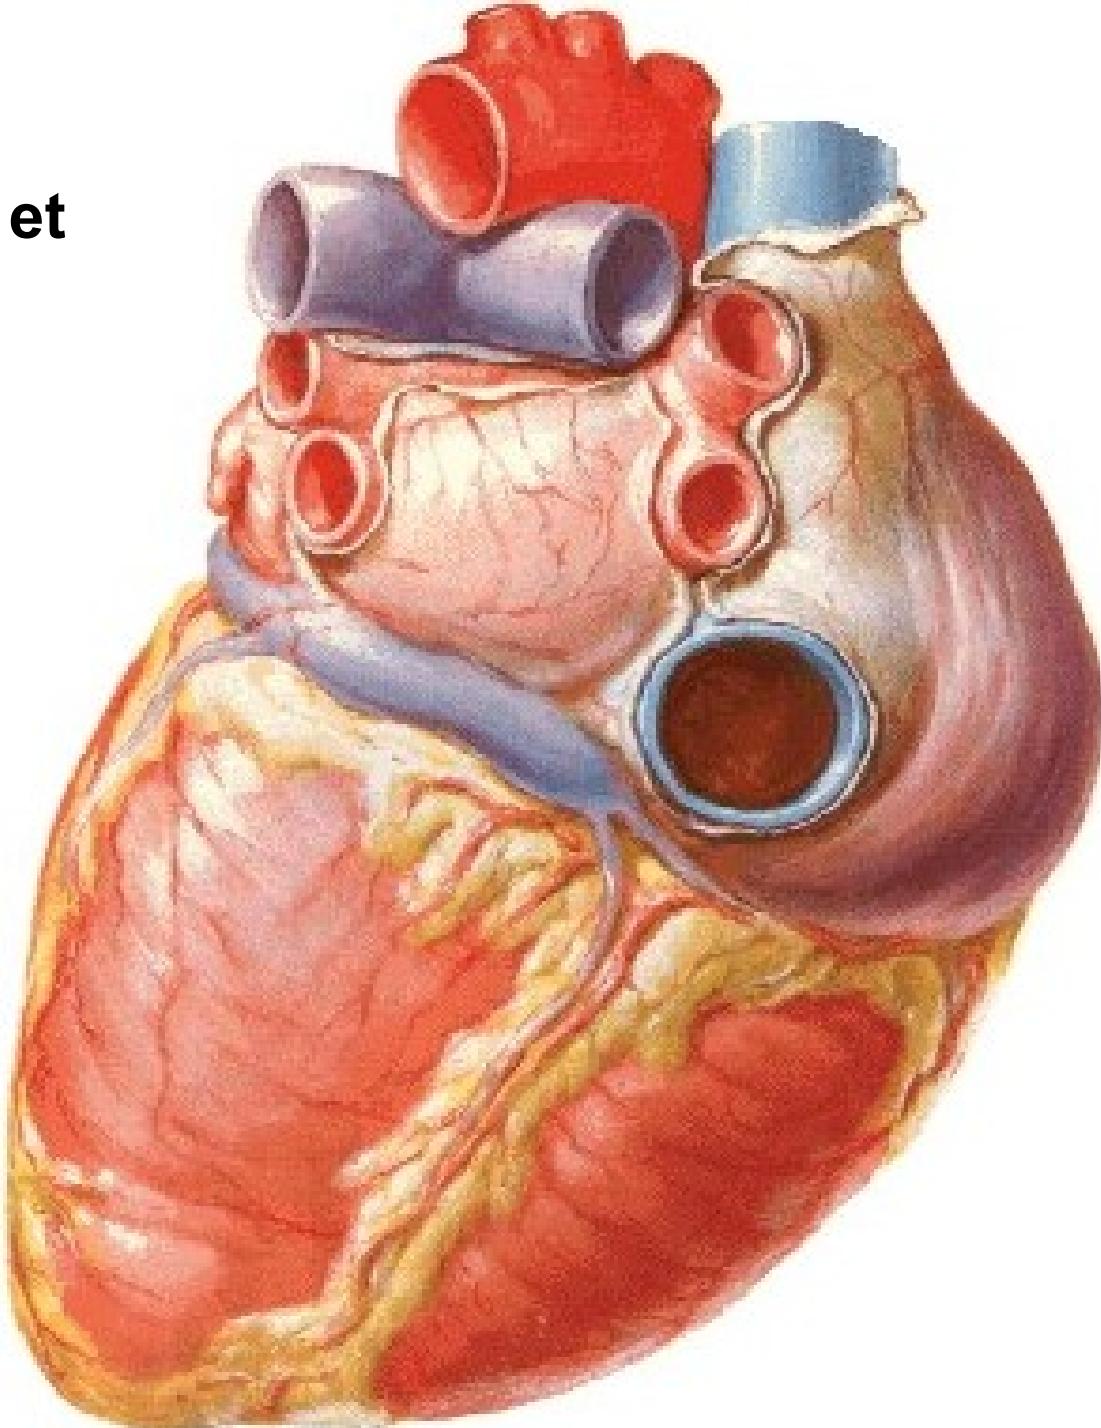

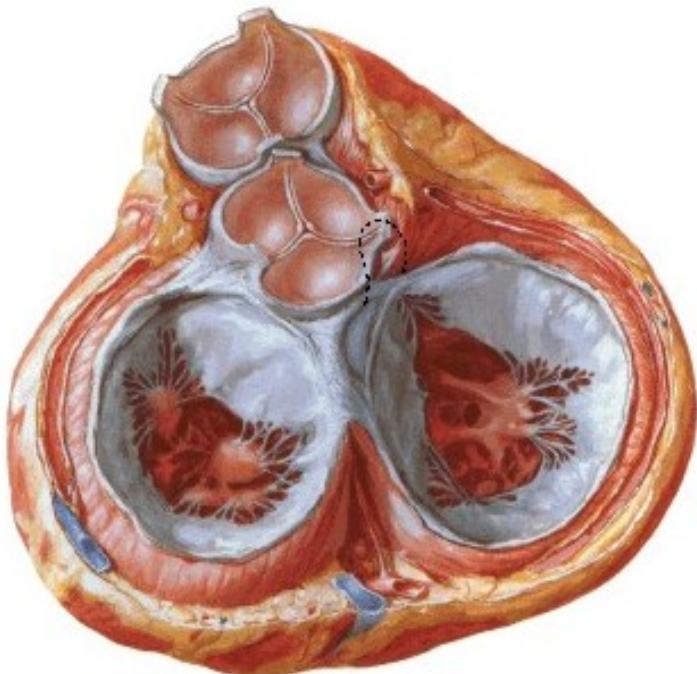

- **vena cava sup. et inf.**

Ventriculus dexter

- **truncus pulmonalis**

**Atrium sinistrum
vv. pulmonales dextrae et
sinistrale
Ventriculus sinister
- aorta**

Basis, apex

Facies sternocostalis (anterior)

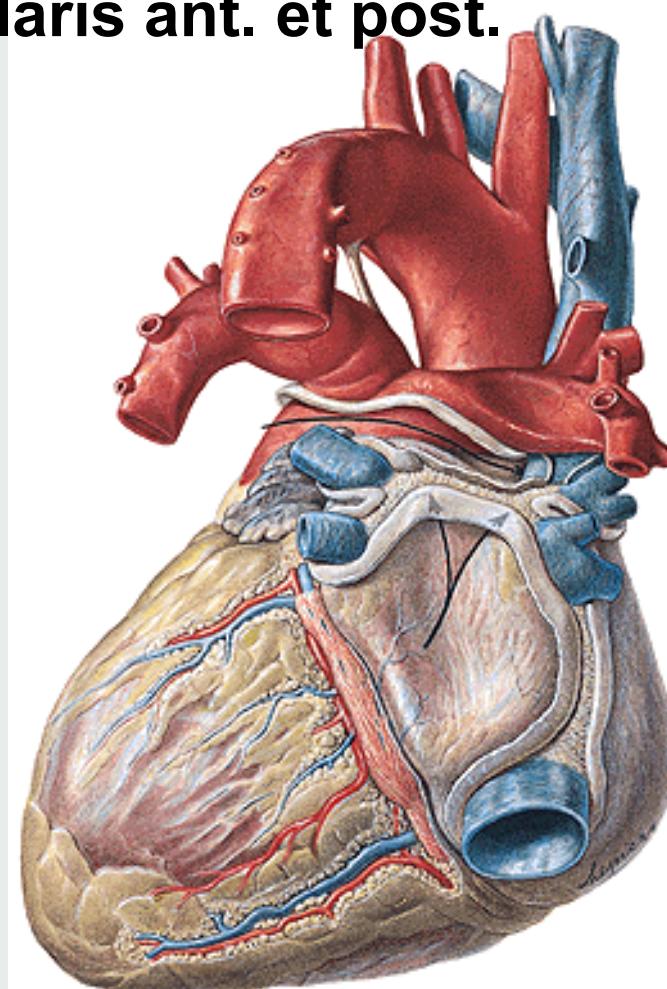

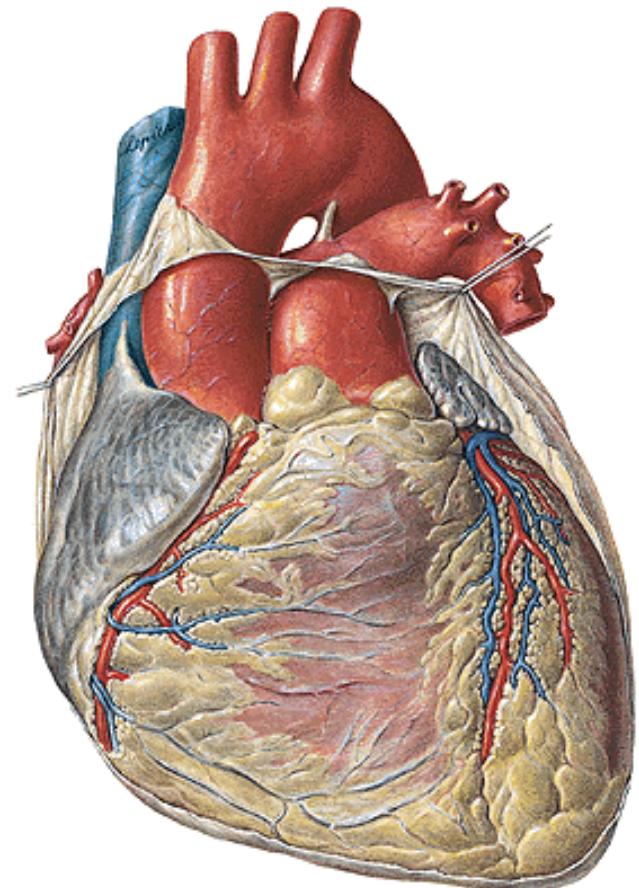

Facies diaphragmatica (inferior)

Facies pulmonalis dx. et sin.

Margo dexter (acus) et sinister (obtusus)

Sulcus coronarius, sulcus interventricularis ant. et post.

Auricula dextra et sinistra

ATRIUM DEXTRUM

Septum interatriale – fossa ovalis

Ostium v. cavae sup.

**Ostium v. cavae inf. –
valvula v. cavae inf.**

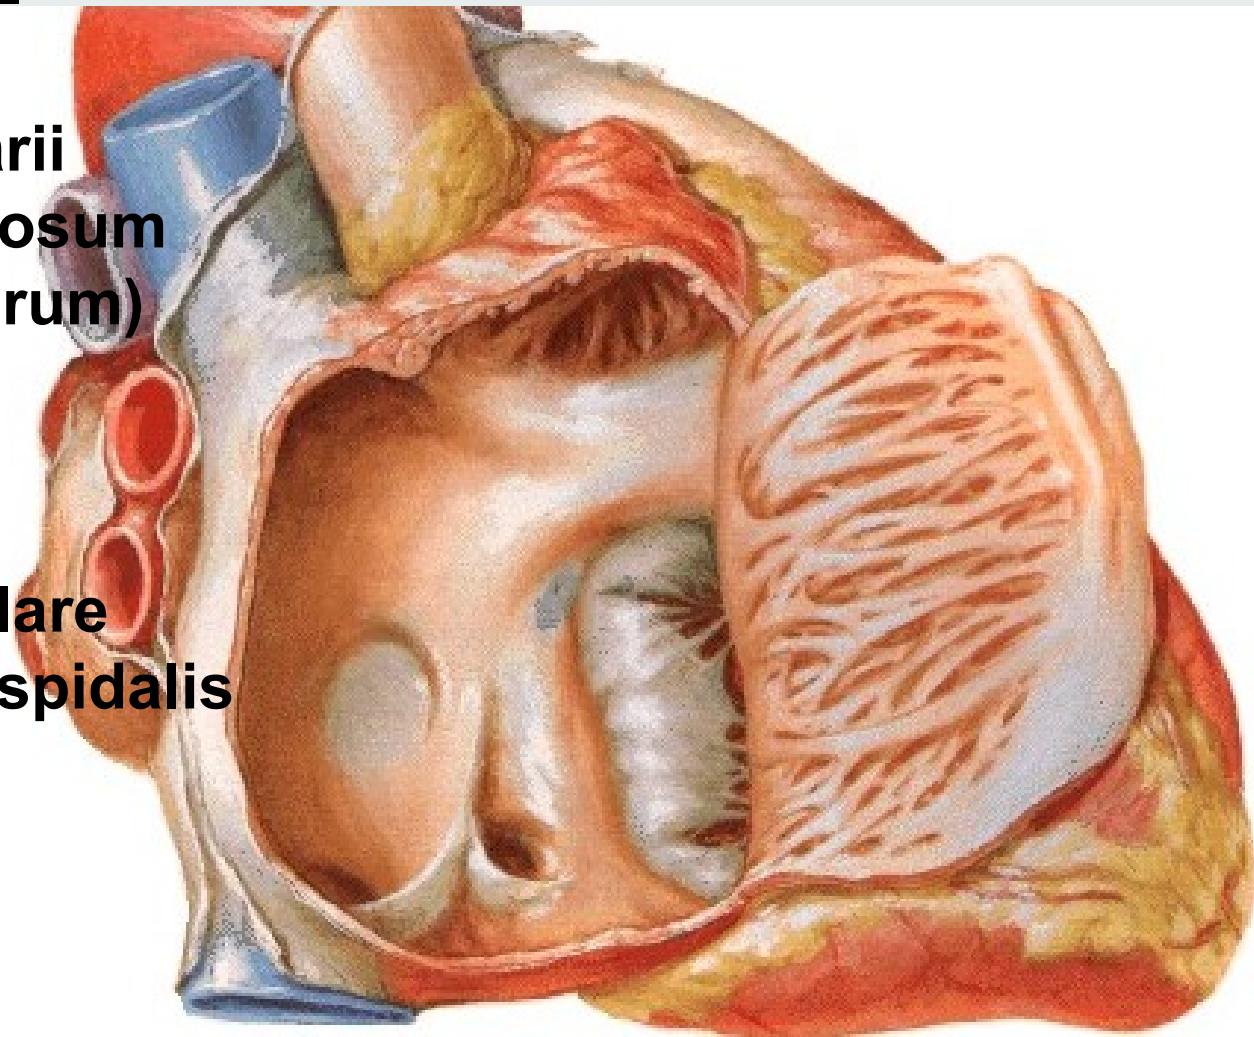

Ostium sinus coronarii

**Tuberculum intervenosum
(sinus venarum cavarum)**

Crista terminalis

**Auricula dextra –
musculi pectinati**

**Ostium atrioventriculare
dextrum - valva tricuspidalis**

VENTRICULUS DEXTER

Pars trabecularis - trabeculae carneae

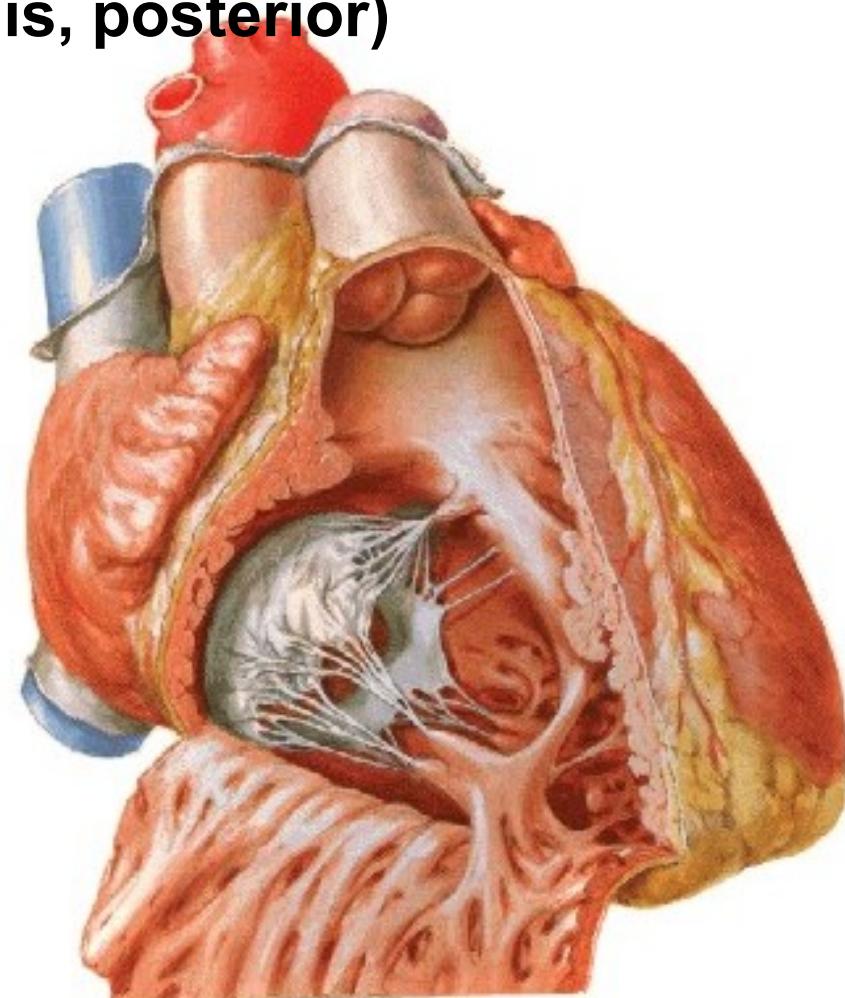

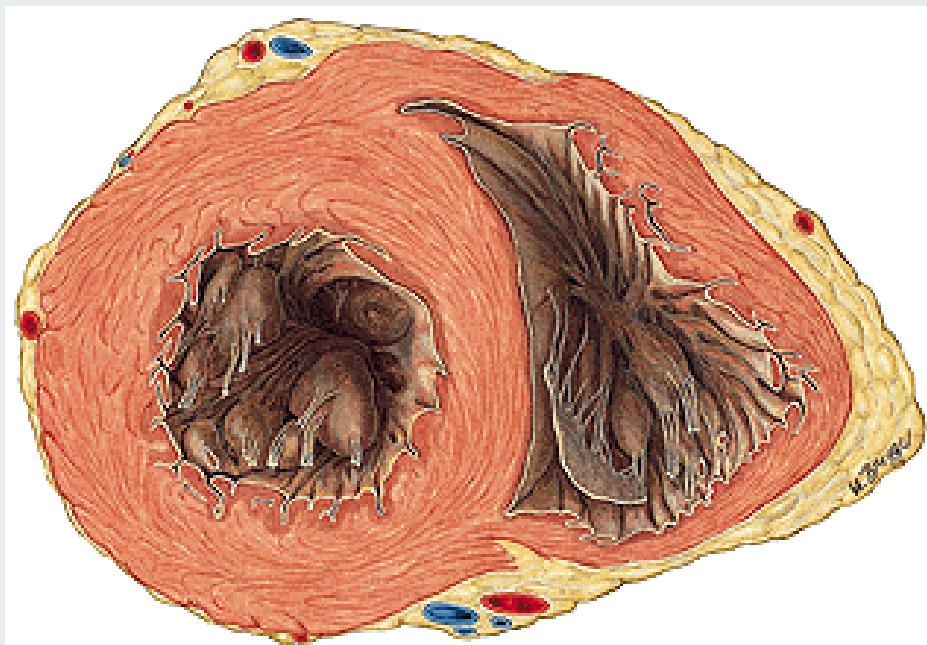

Crista supraventricularis, trabecula septomarginalis

Ostium atrioventriculare dextrum, valva tricuspidalis

- cuspis ant., septalis, post.

Musculi papillares (anterior, septalis, posterior)

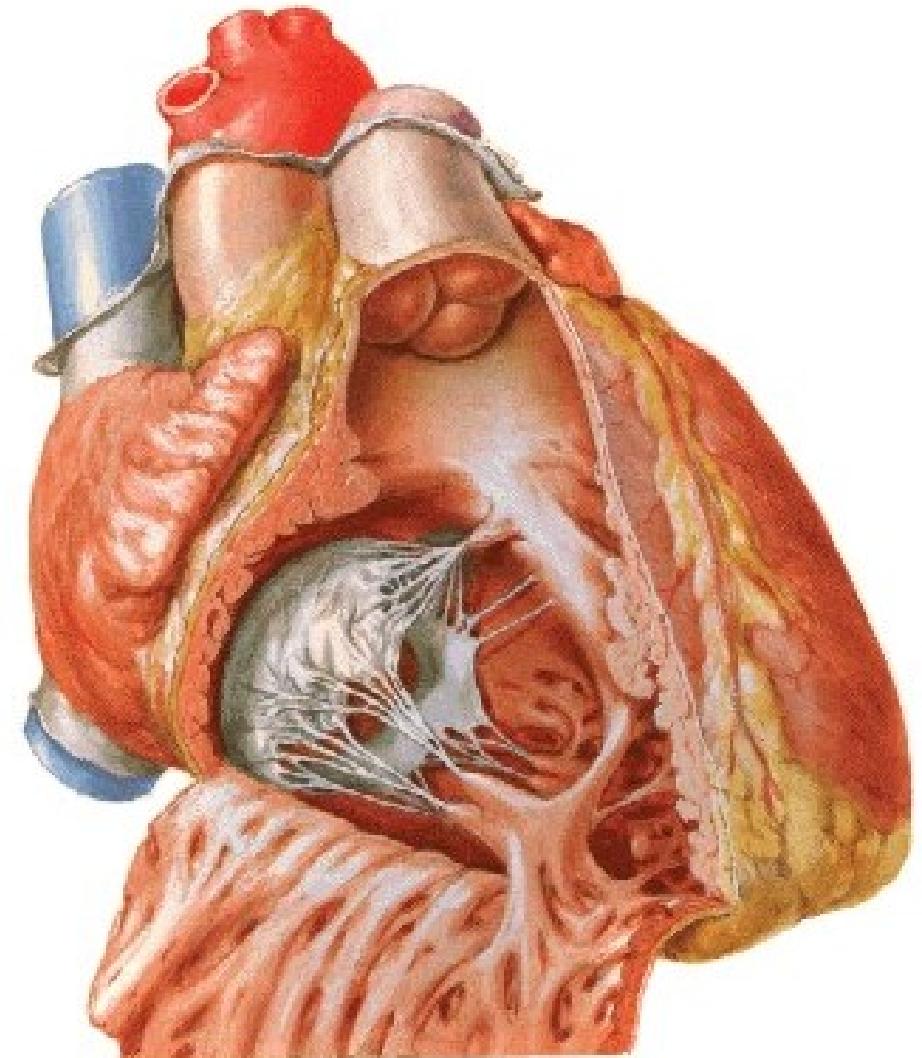

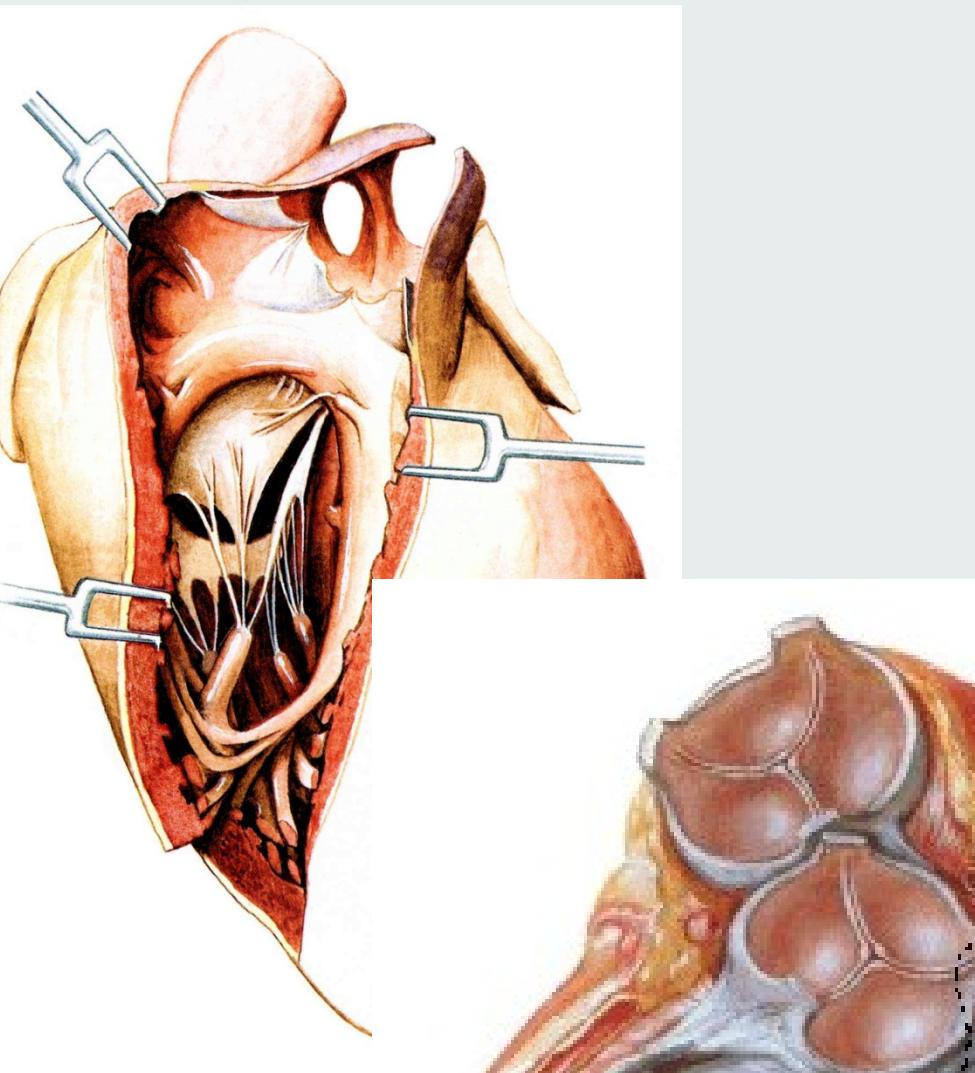

Chordae tendineae

VENTRICULUS DEXTER

Pars glabra – conus arteriosus

**Ostium trunci pulmonalis – valva trunci pulmonalis –
valvula semilunaris ant., dx., sin. – lunula, nodulus, sinus**

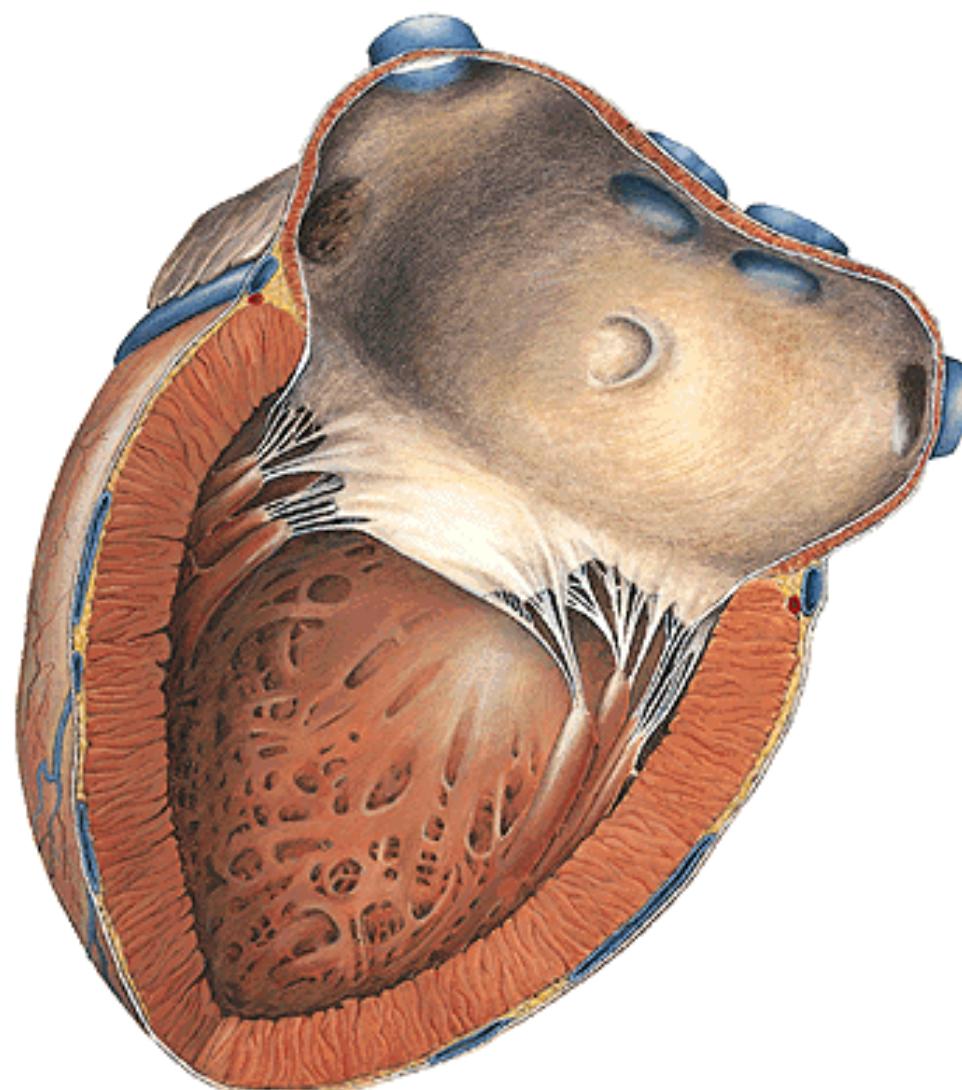

ATRIUM SINISTRUM

Ostia venarum pulmonalium

**Septum interatriale –
fossa ovalis**

**Auricula sinistra –
musculi pectinati**

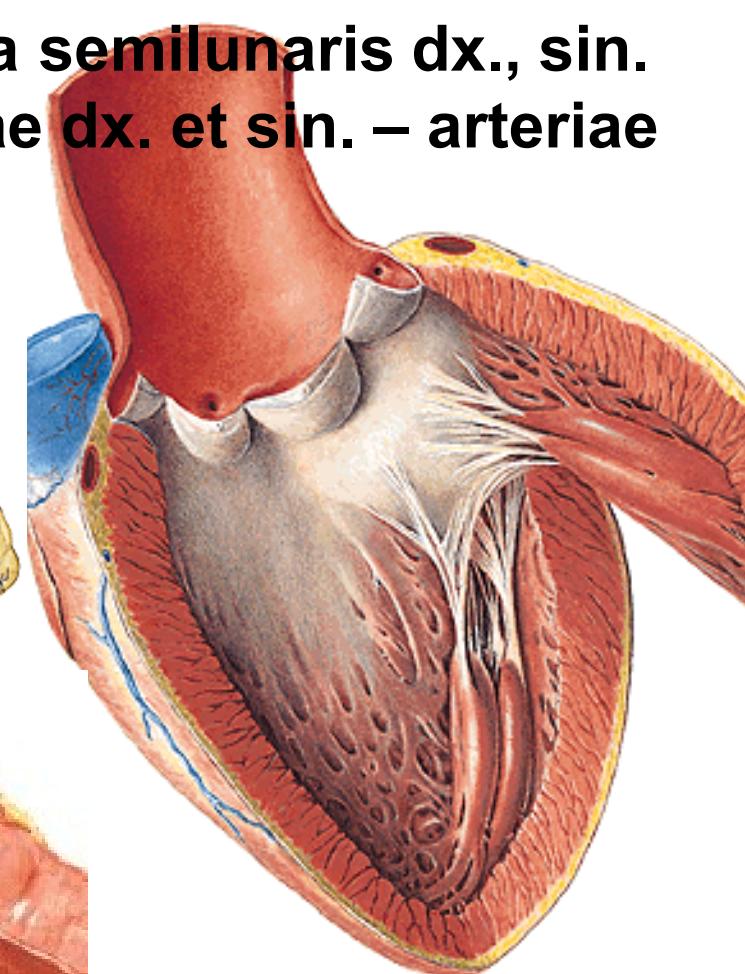

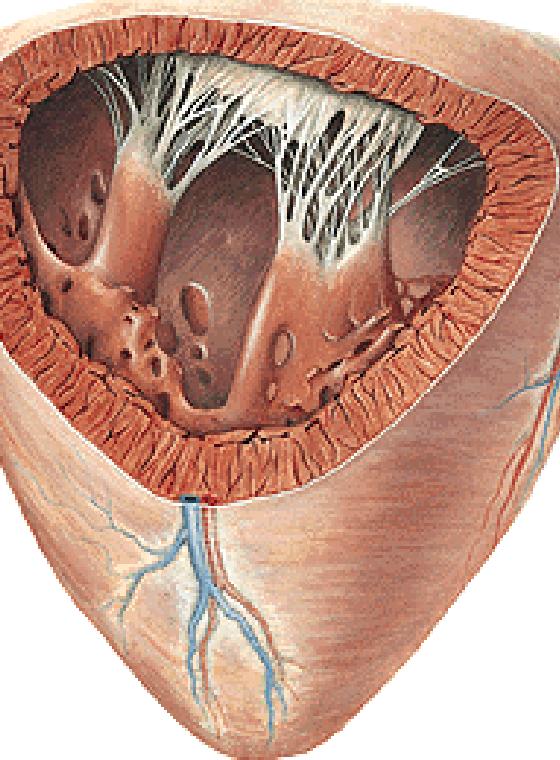

Ostium atrioventriculare sin.

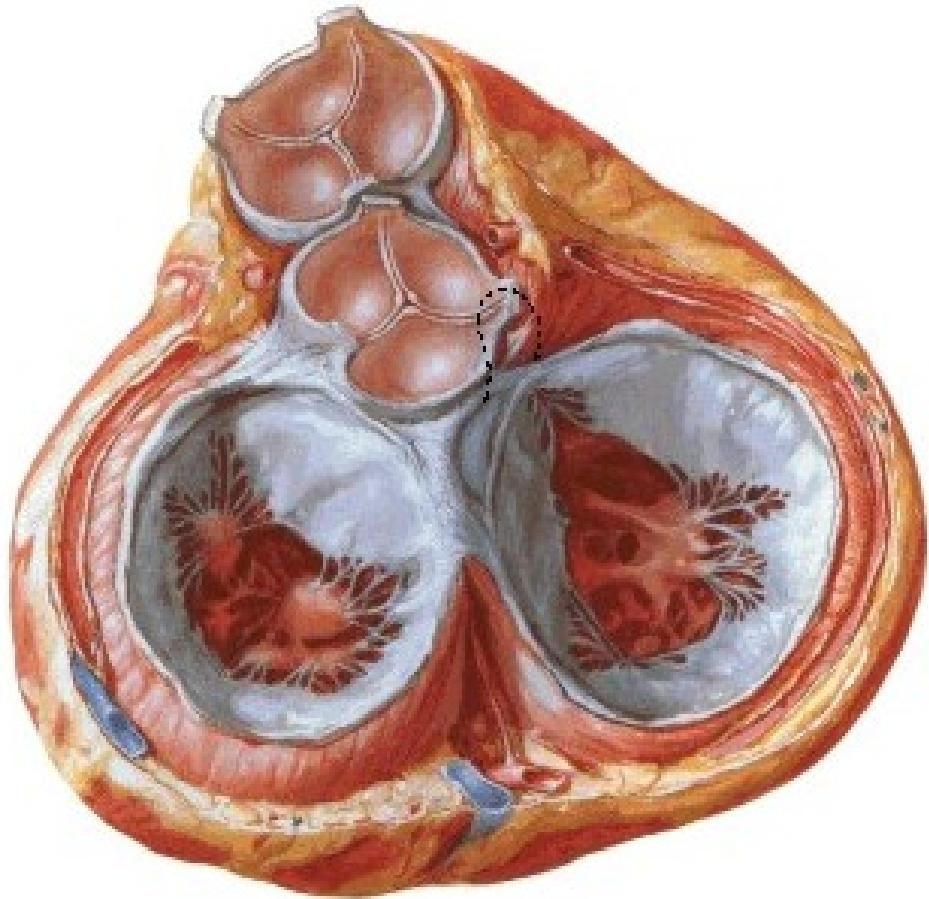

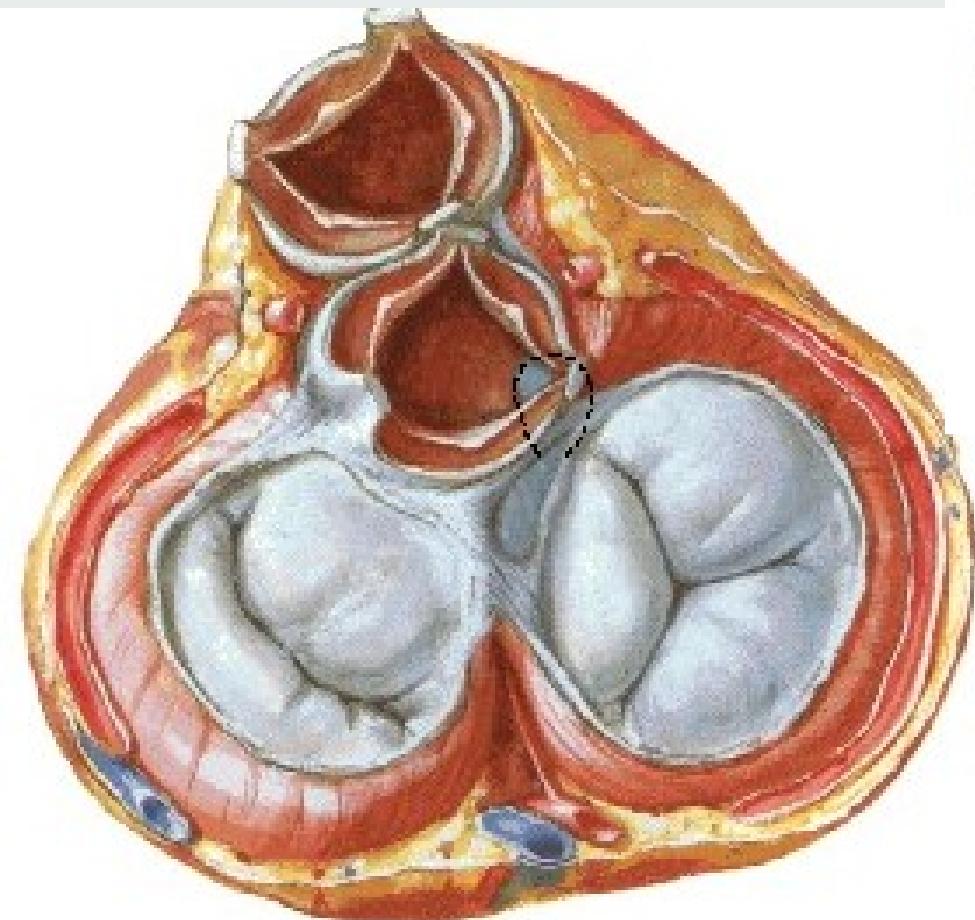

VENTRICULUS SINISTER

Ostium atrioventriculare sin.– valva bicuspidalis (mitralis) – cuspis ant. et post. – m. papillaris ant. et post. – chordae tendineae

Ostium aortae – valva aortae – valvula semilunaris dx., sin. et post. – lunula, nodulus, sinus aortae dx. et sin. – arteriae coronariae, bulbus aortae

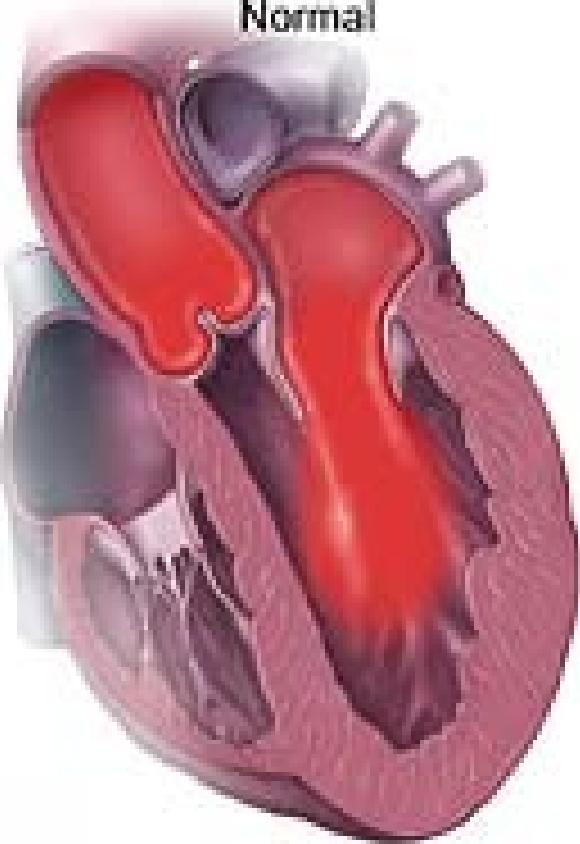

SYSTOLE

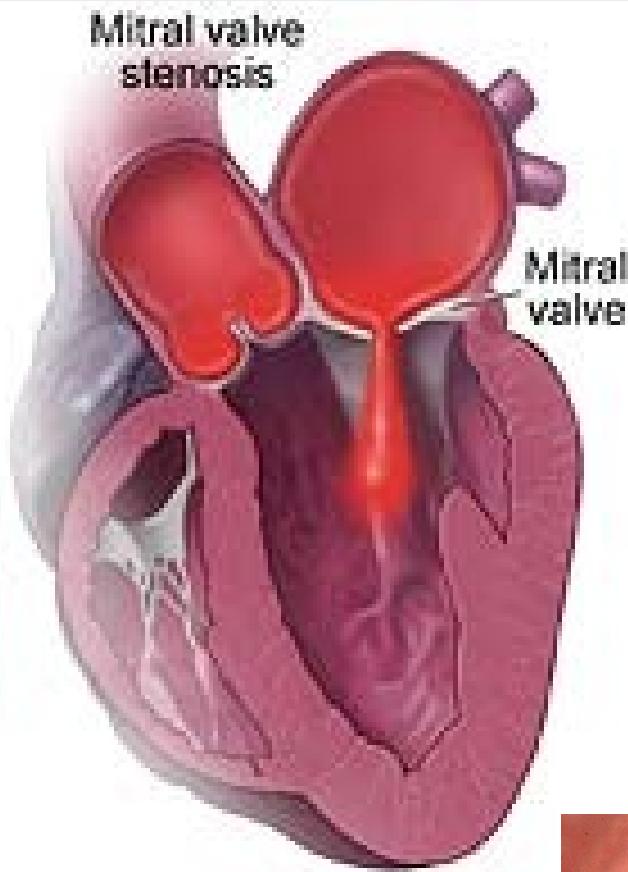

DIASTOLE

Normal

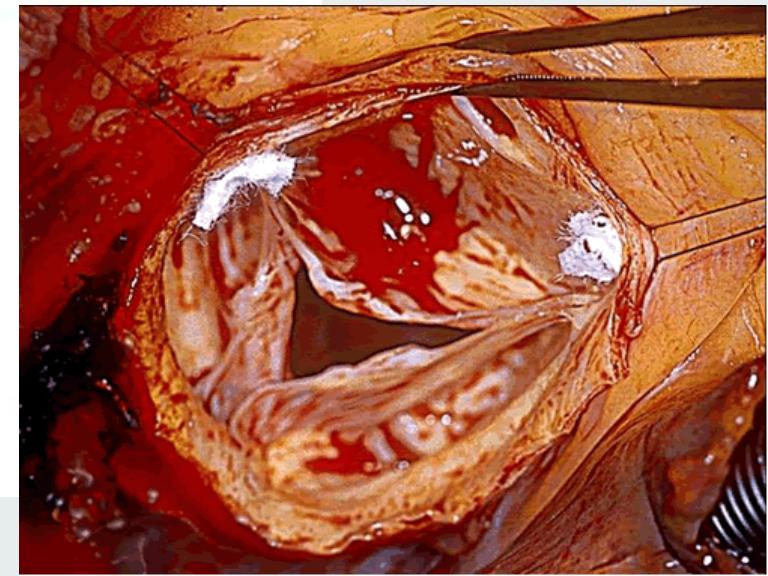

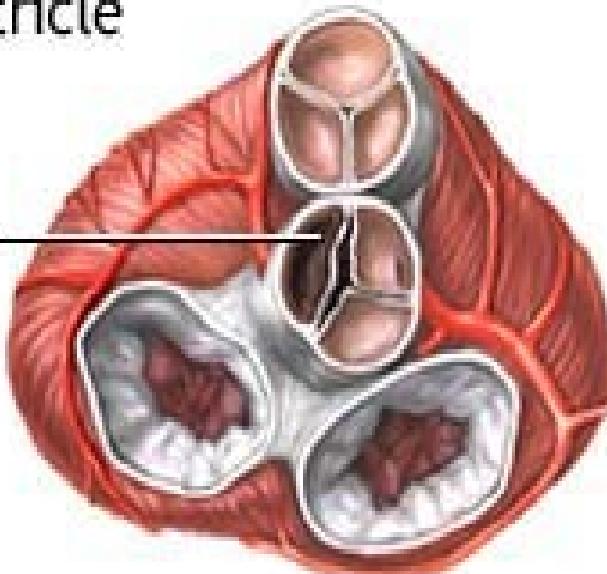

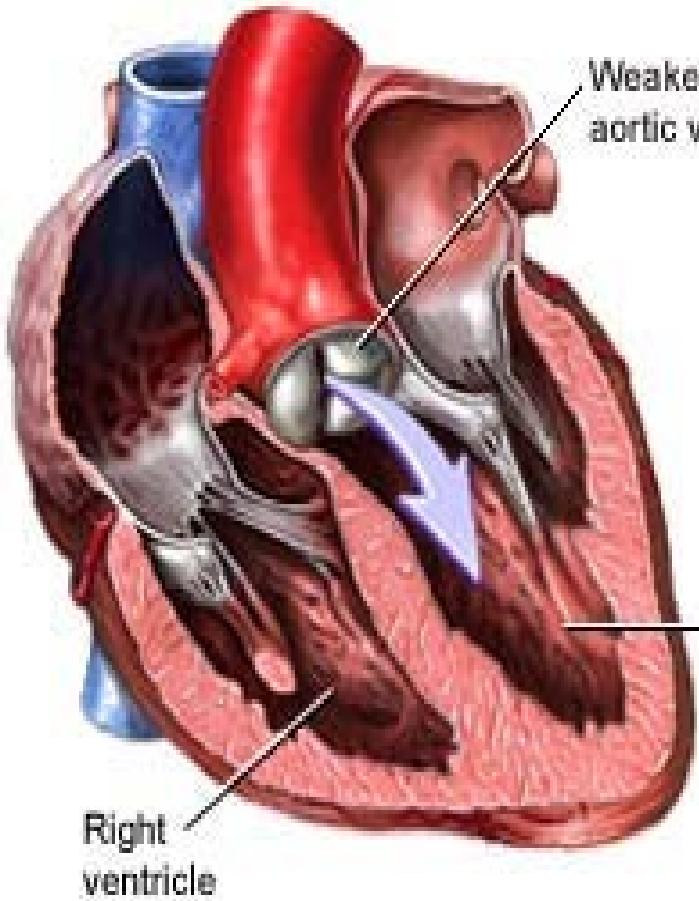

Mitral valve stenosis

Mitral valve

Failure of the aortic valve to close tightly causes back flow of blood into the left ventricle

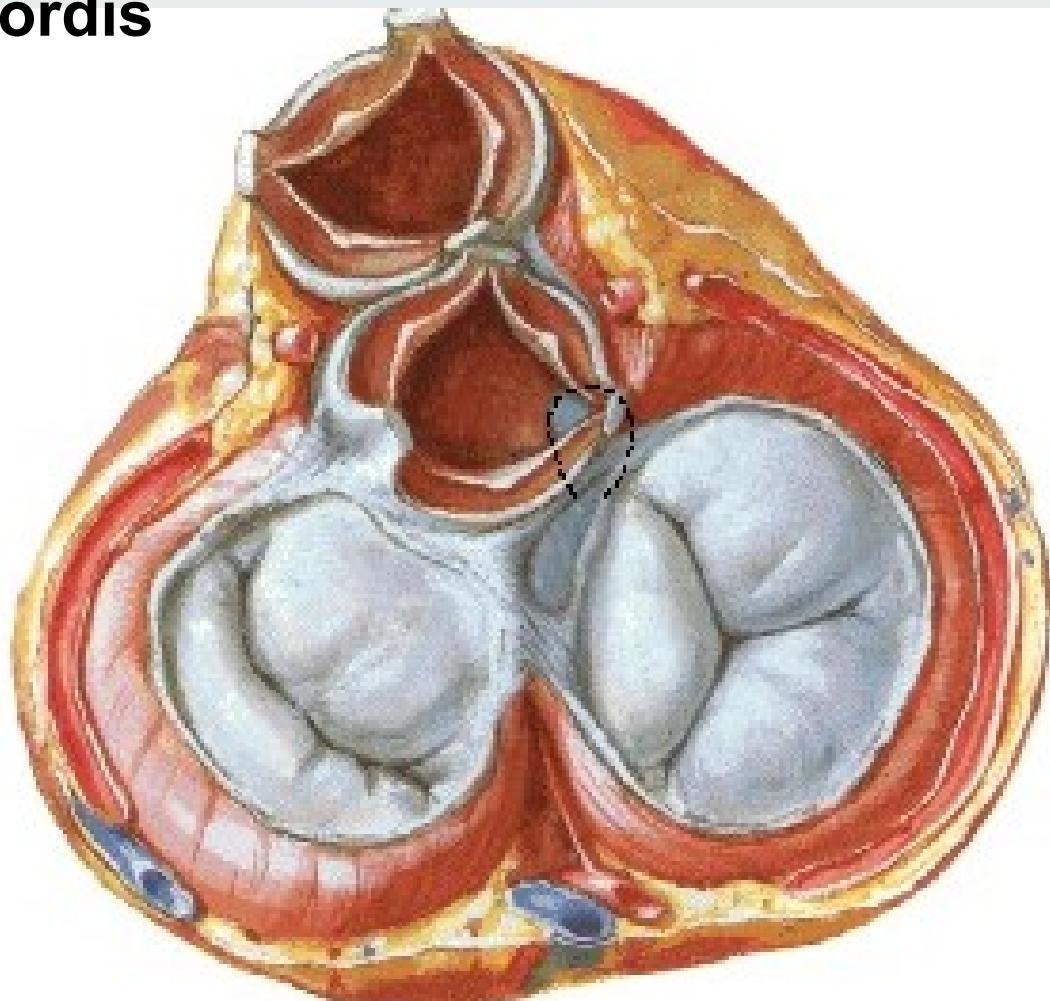

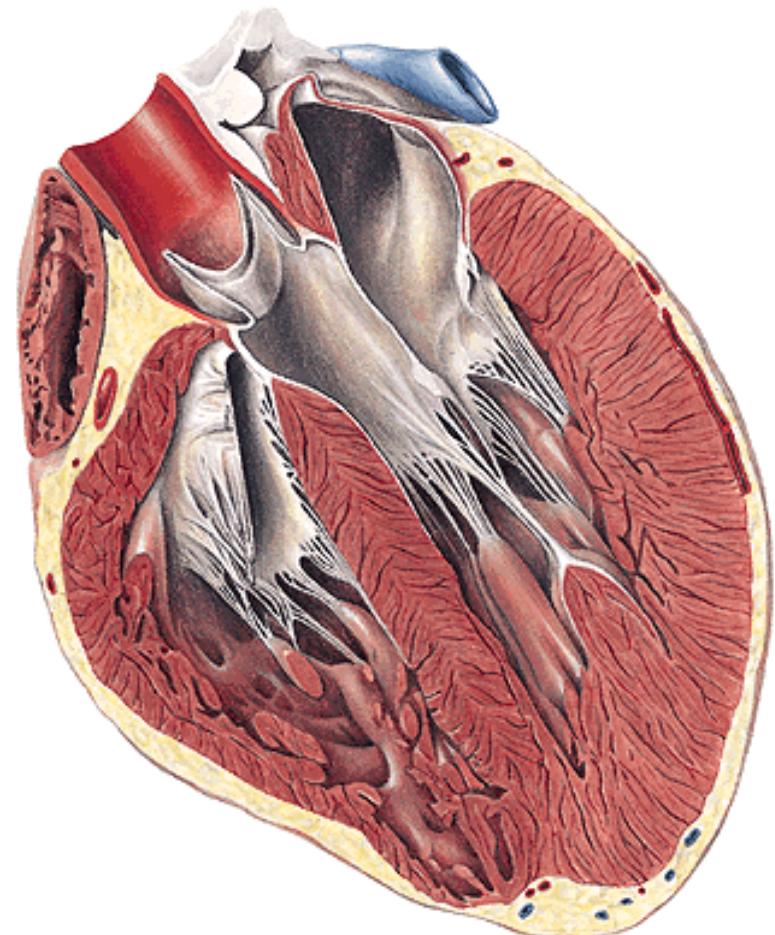

Endocardium, myocardium, pericardium

SKELETON OF THE HEART

Anulus fibrosus dexter, sinister, aorticus, trunci pulmonalis

Trigonum fibrosum dextrum et sinistrum

Pars membranacea septi cordis

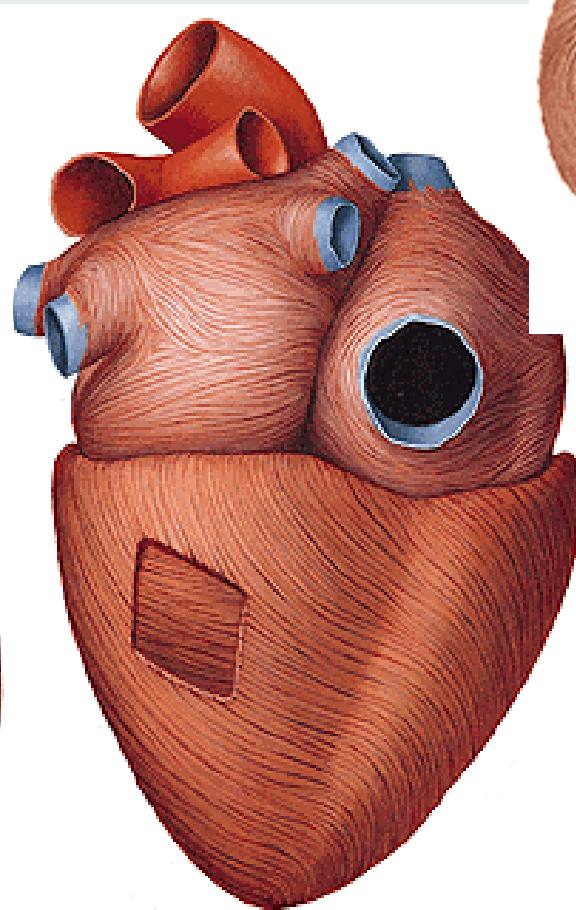

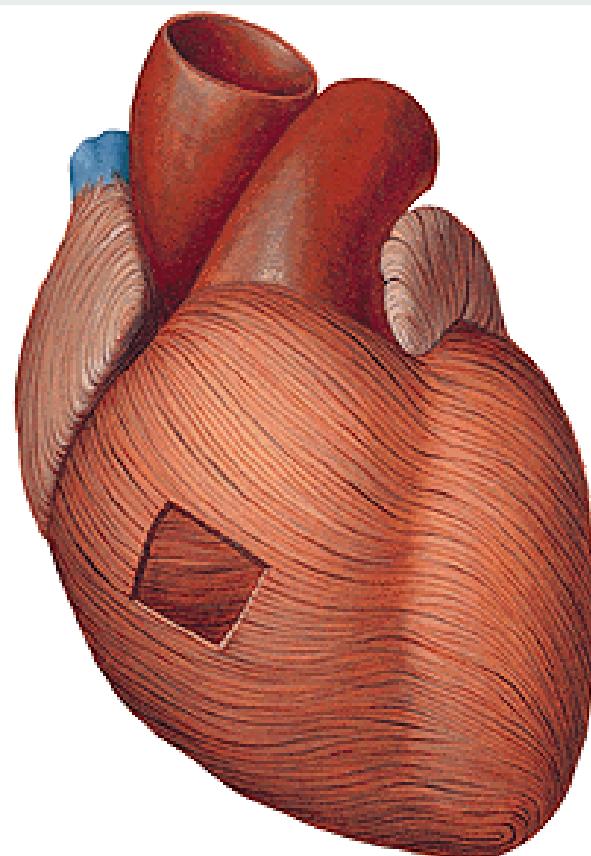

MYOCARDIUM

Mm. pectinati

Trabeculae carneae, mm. papillares

Vortex cordis

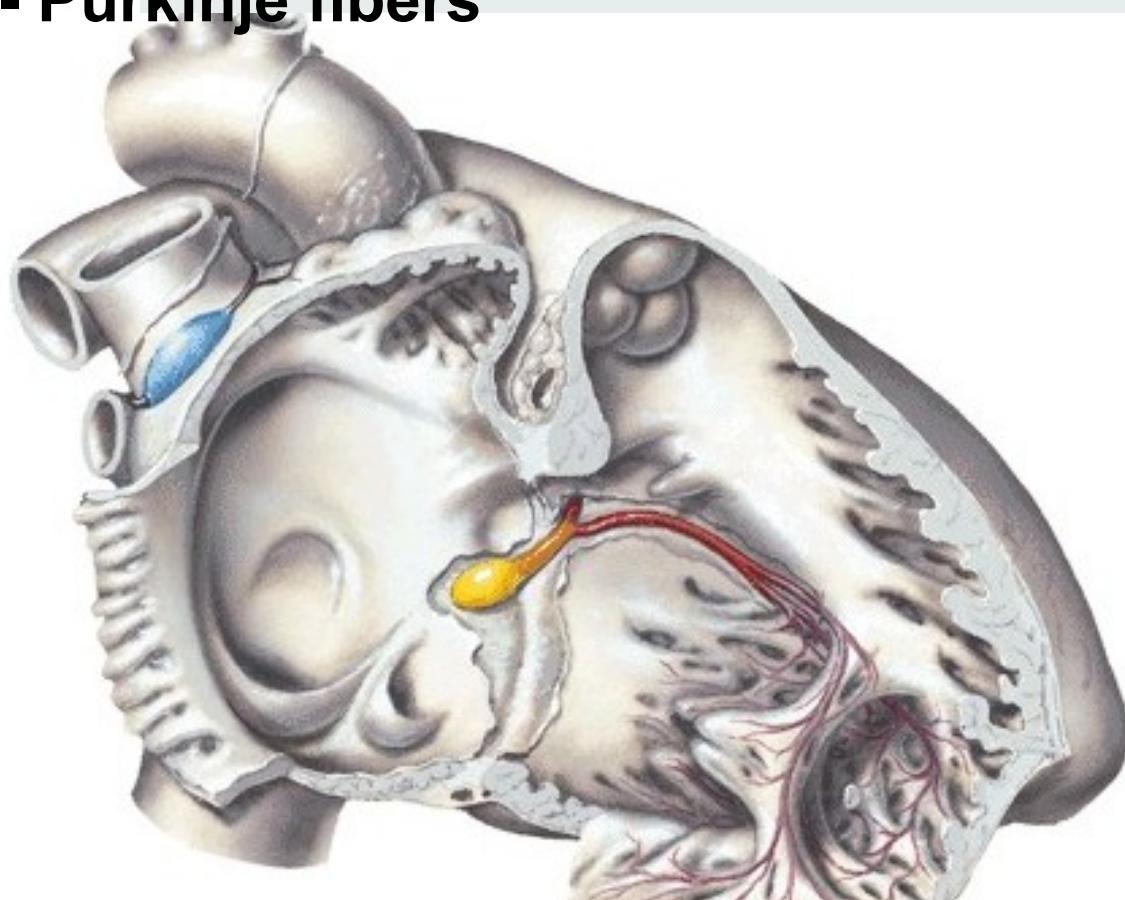

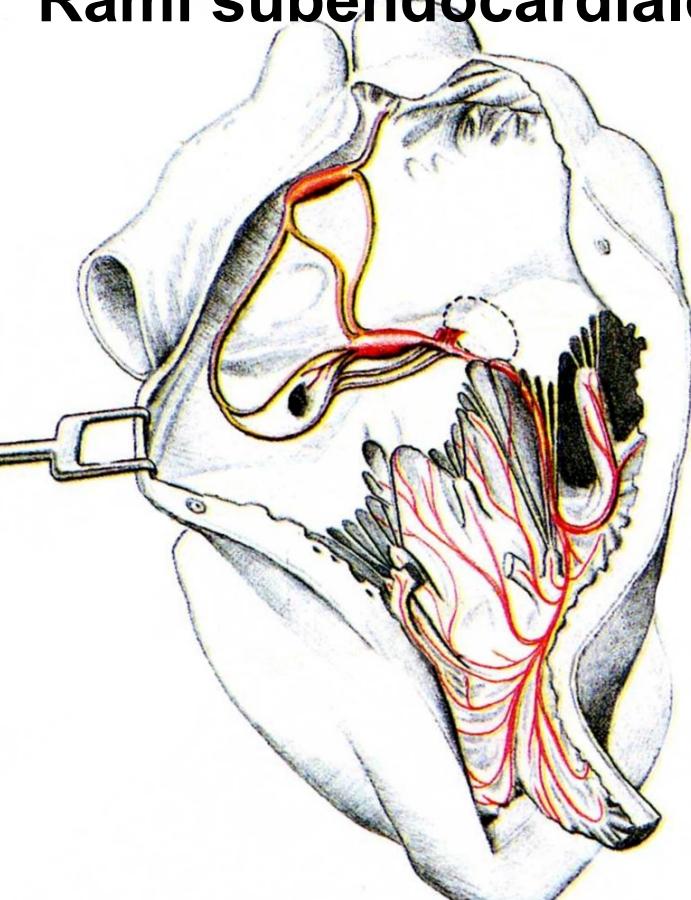

CONDUCTING SYSTEM (Complexus stimulans cordis)

Nodus sinuatrialis (Bachmann interatrial, anterior, middle and posterior internodal tracts)

Nodus atrioventricularis (accessory AV connections – Kent fibres)

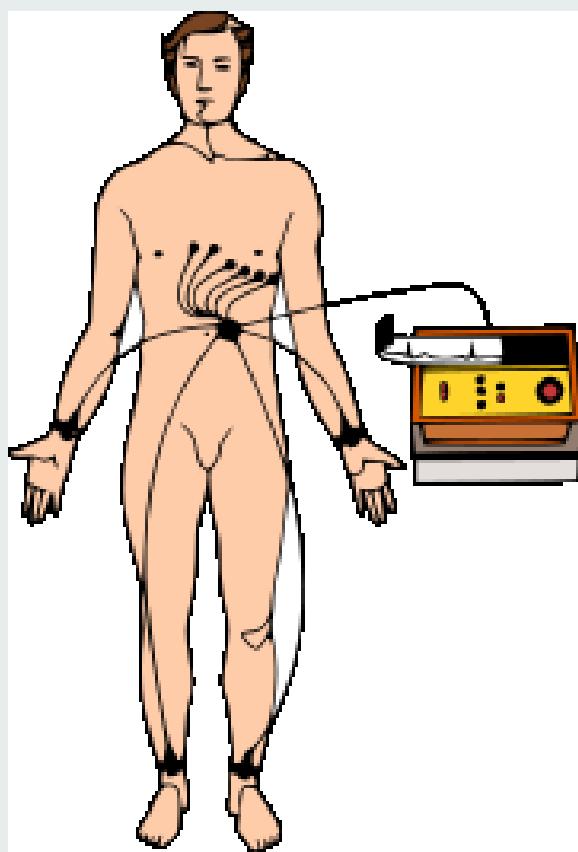

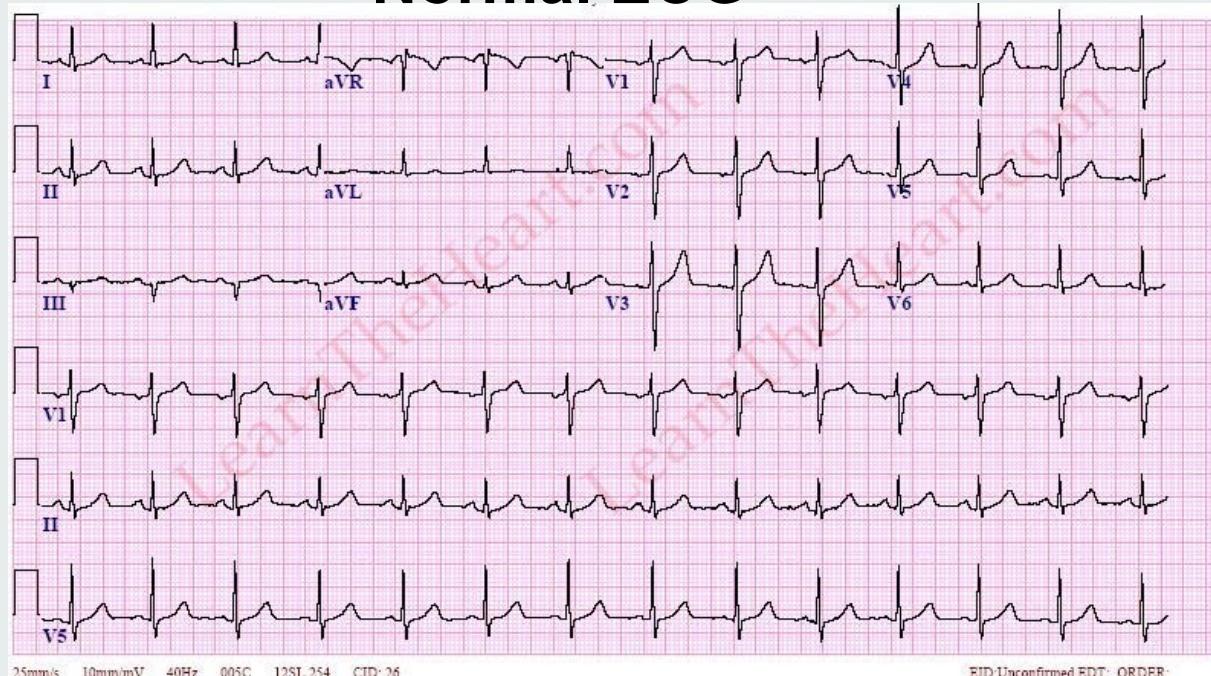

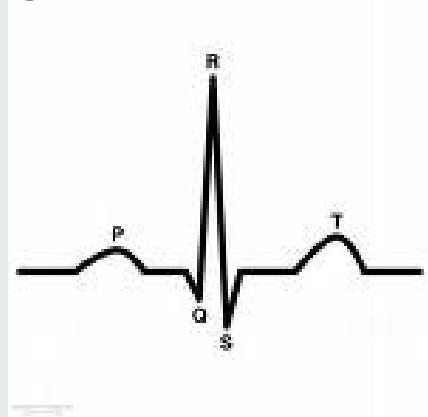

Fasciculus atrioventricularis (His) – crus dextrum et sinistrum

Rami subendocardiales - Purkinje fibers

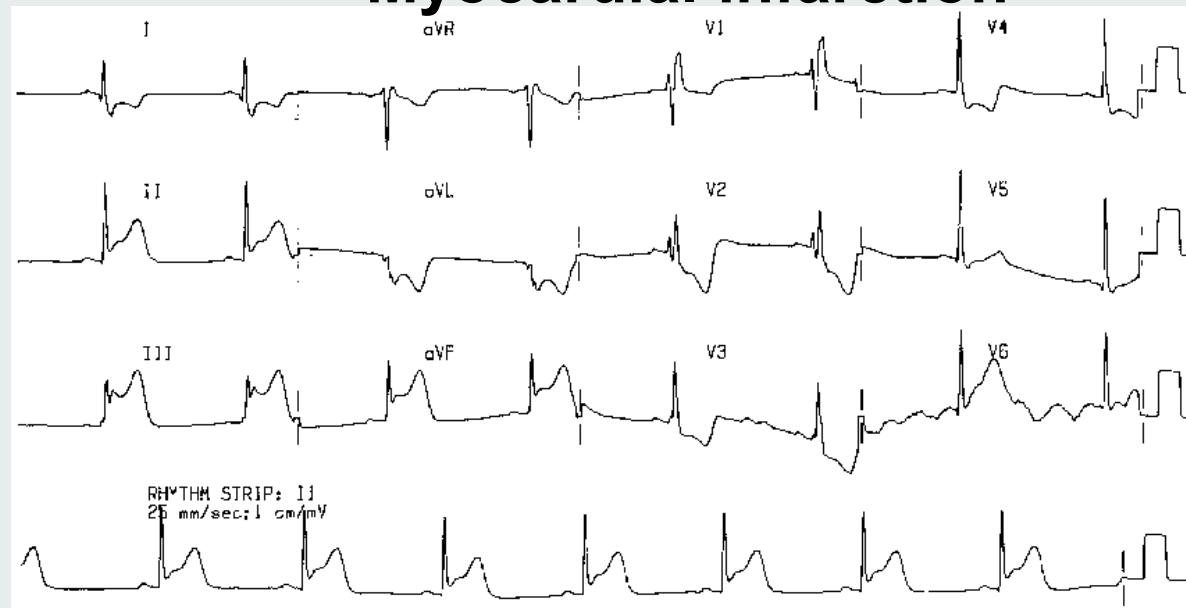

ECG

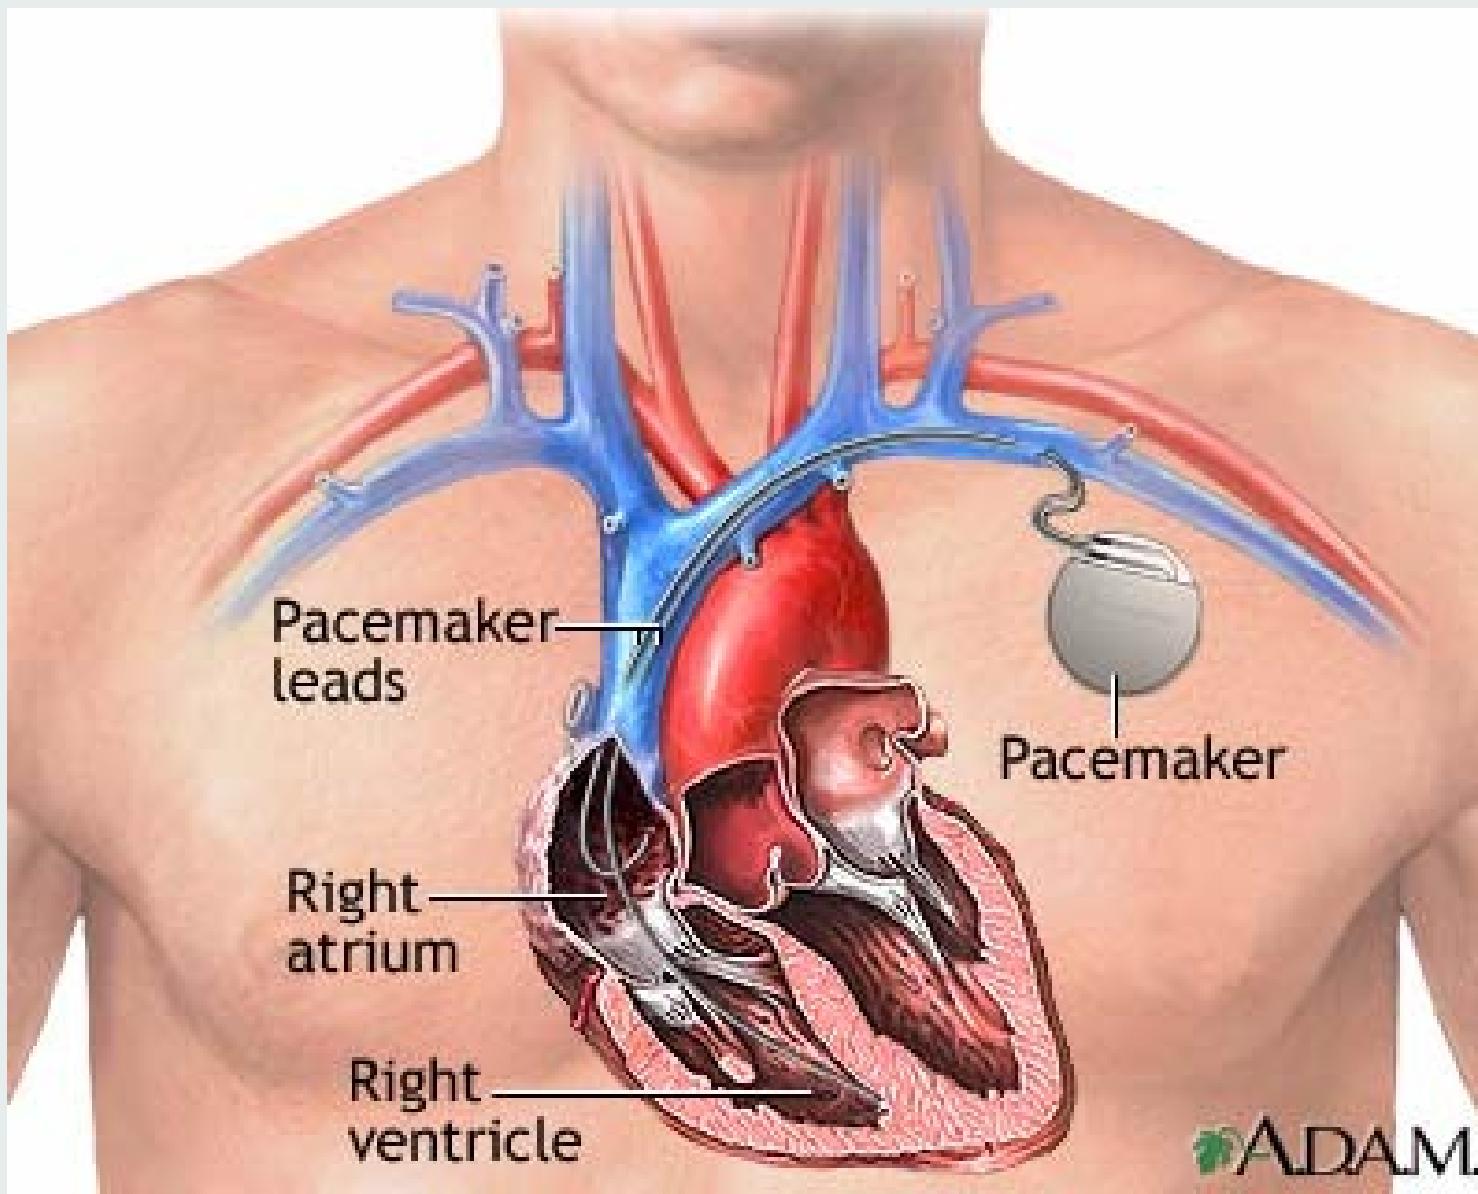

Normal ECG

Myocardial infarction

Artificial pacemaker

PERICARDIUM FIBROSUM

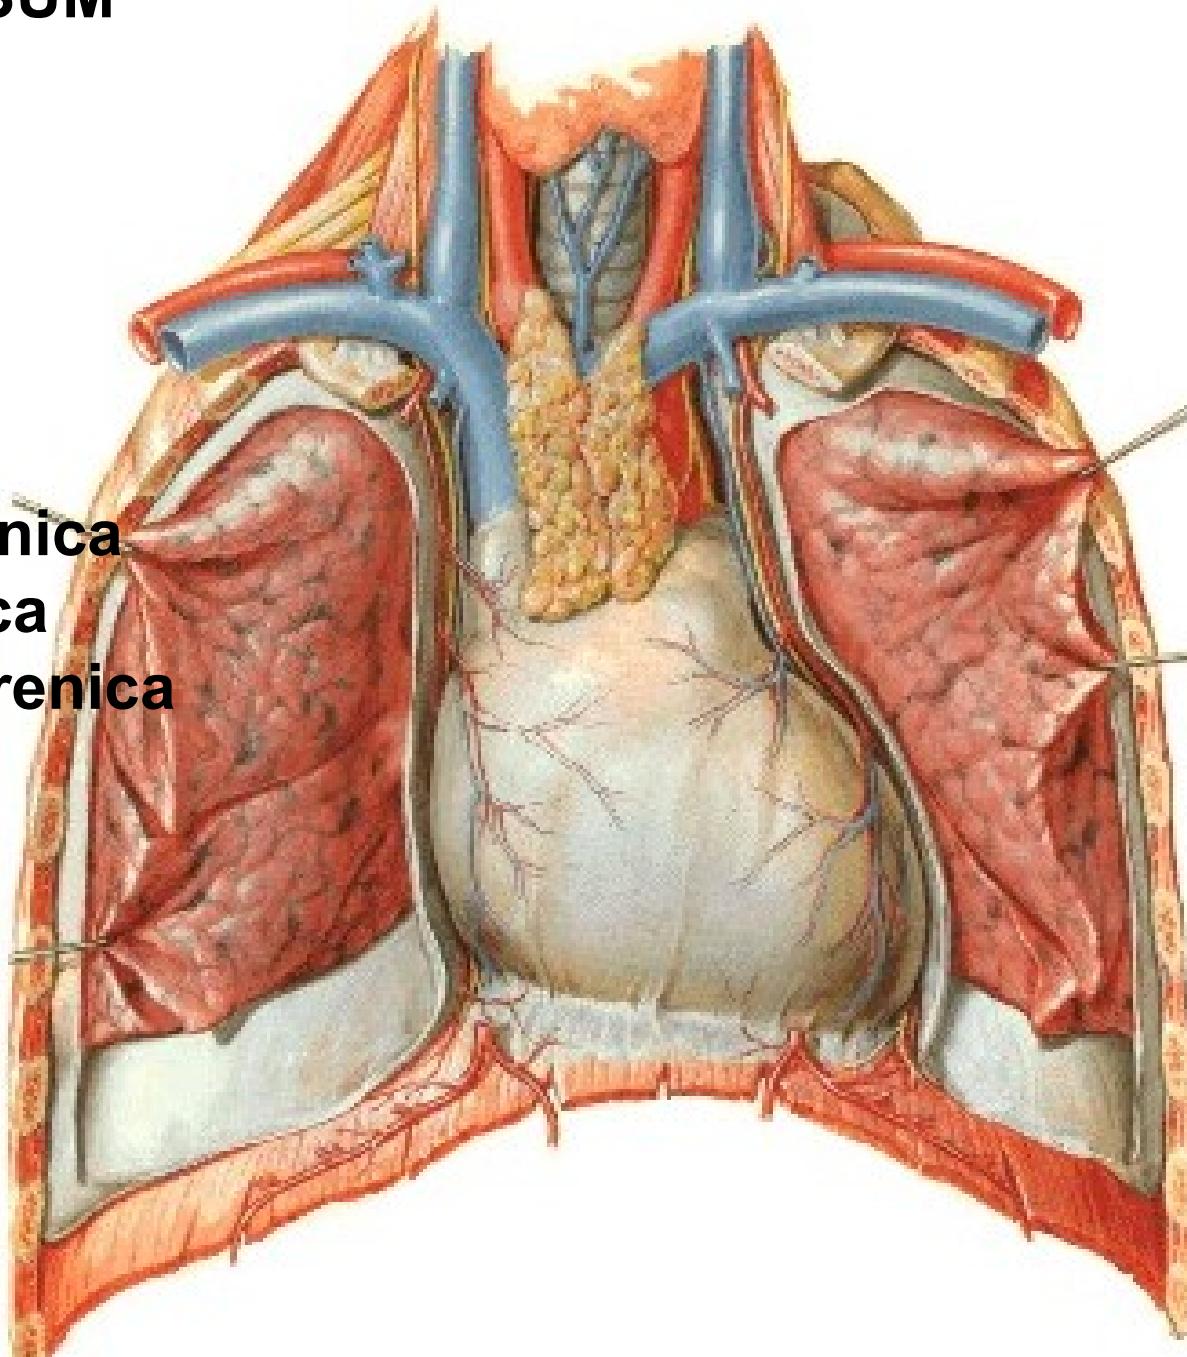

- basis
- cupula
- pars sternalis,
- partes laterales
- pars dorsalis

Ligg. pericardiophrenica

Ligg. sternopericardiaca

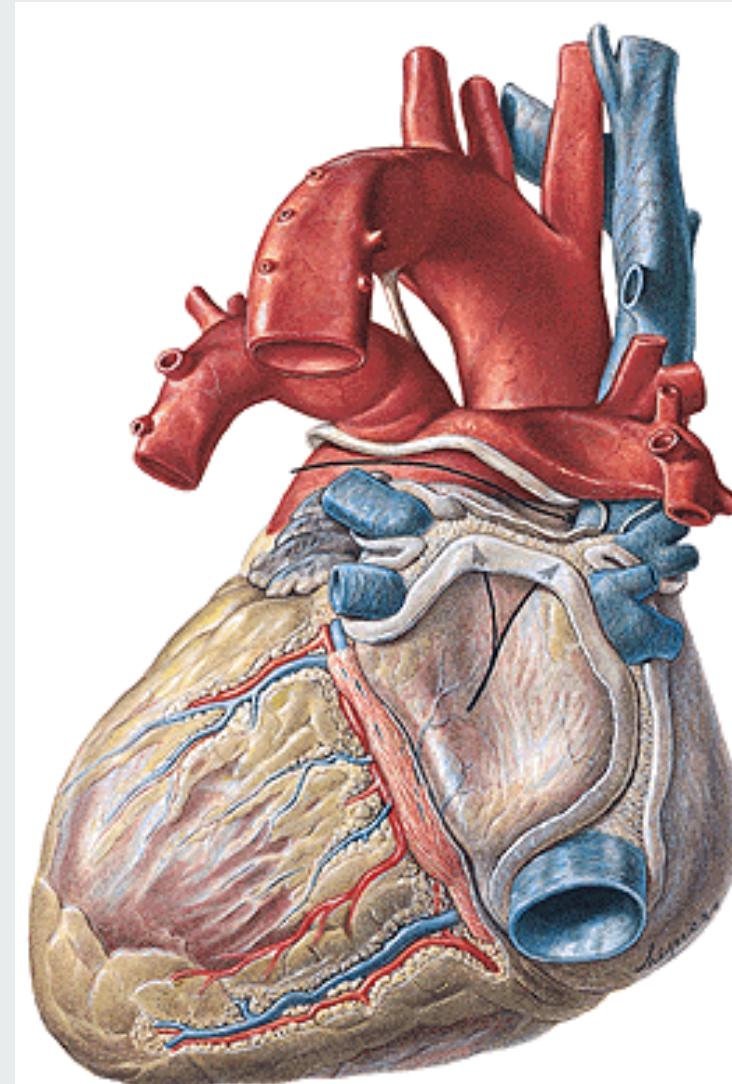

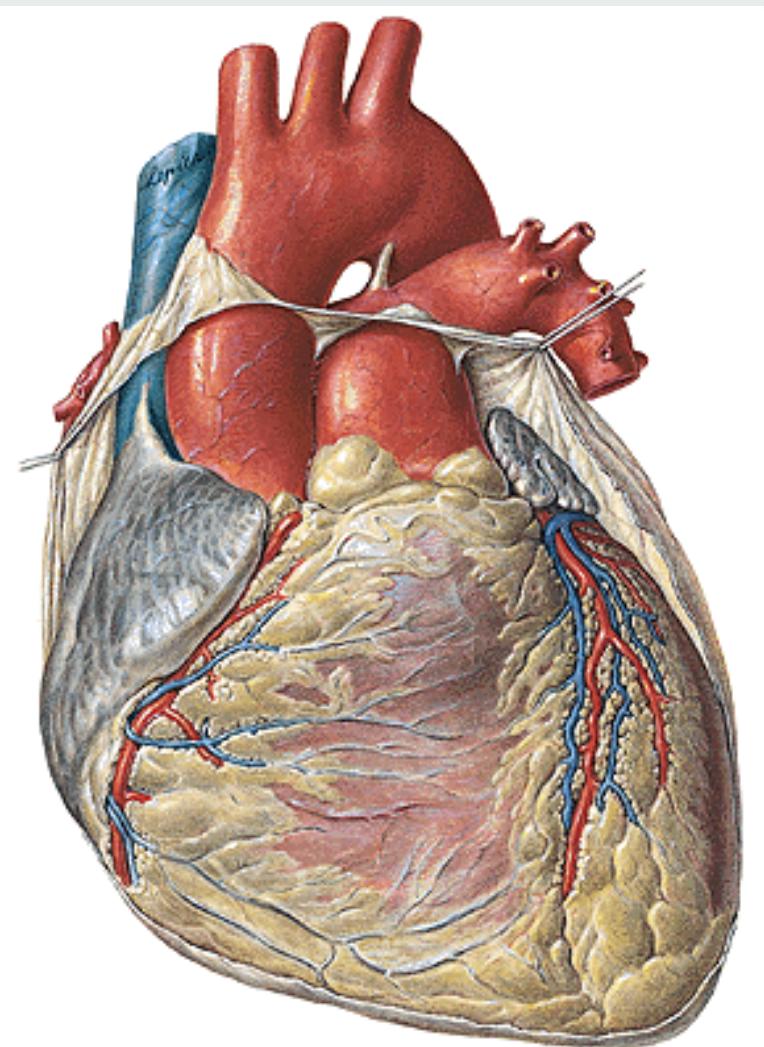

A. et v. pericardiophrenica

N. phrenicus

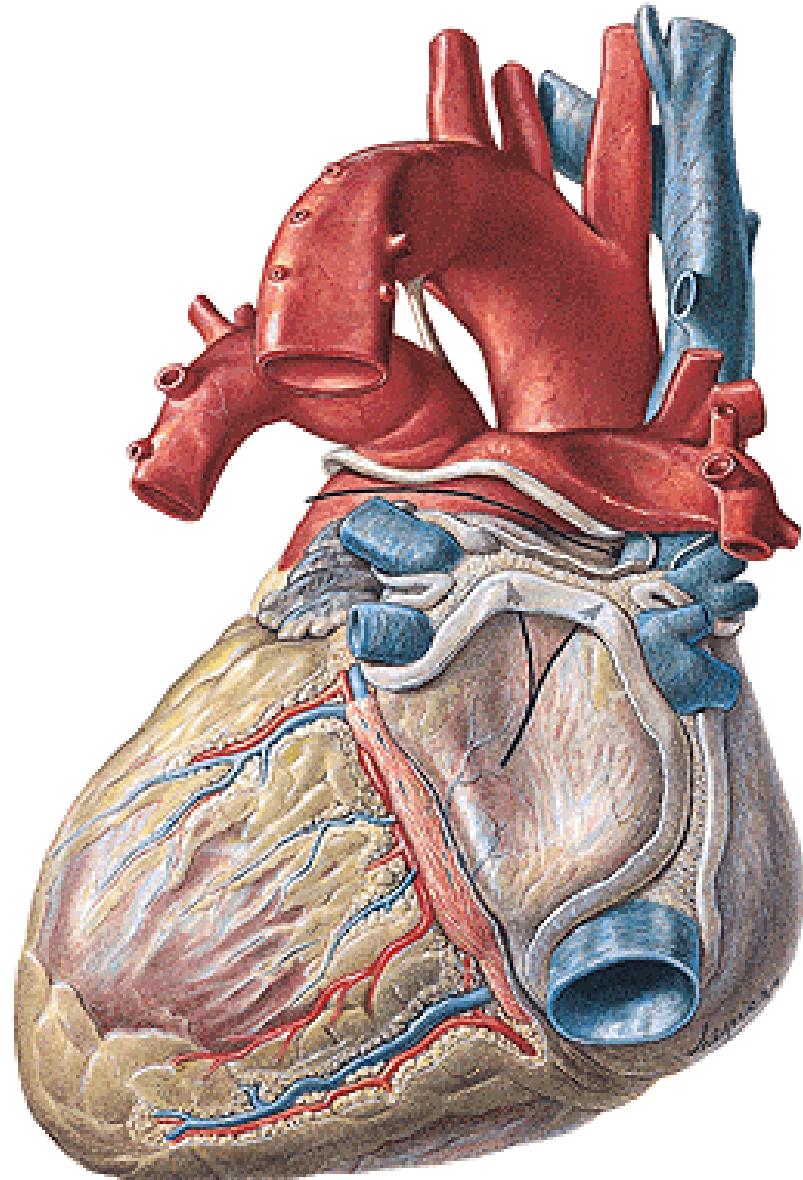

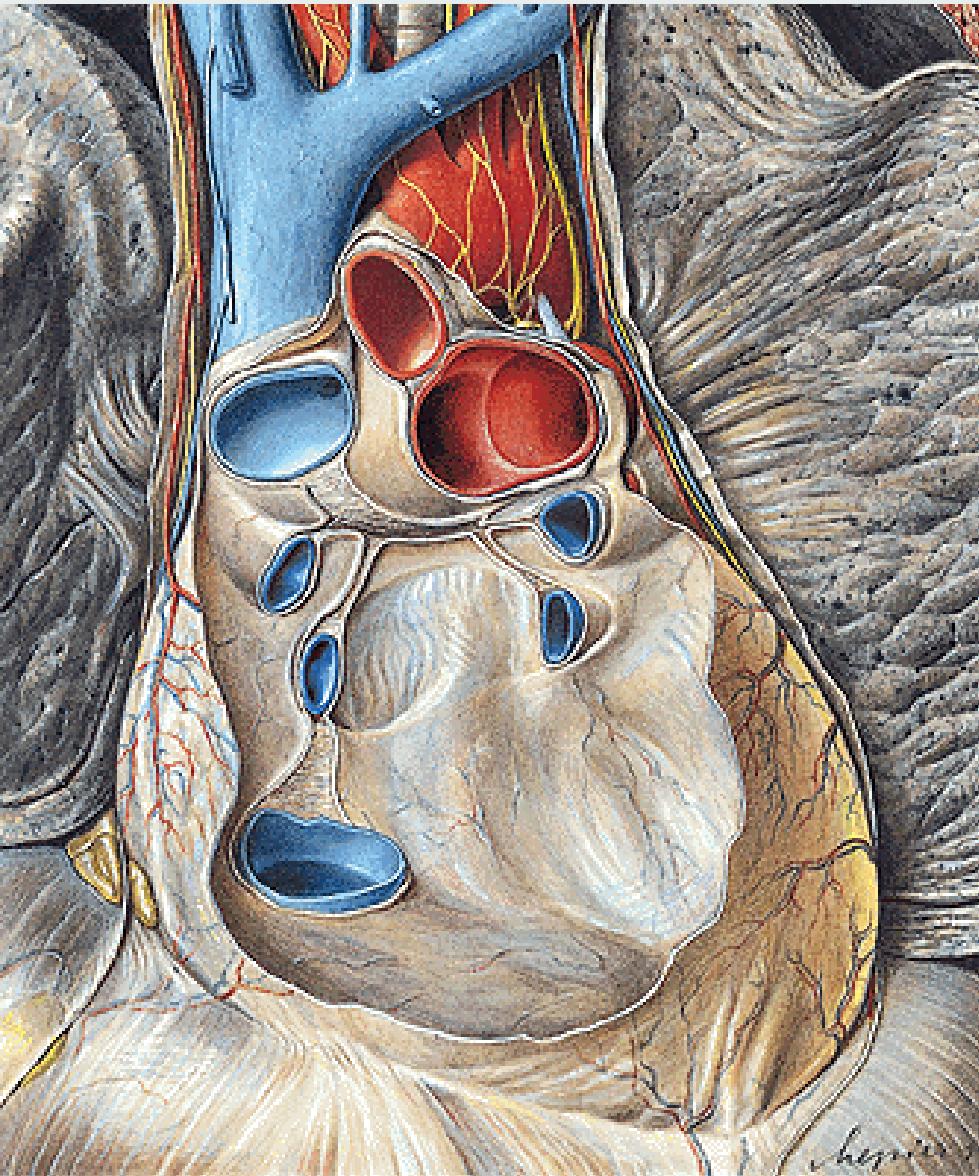

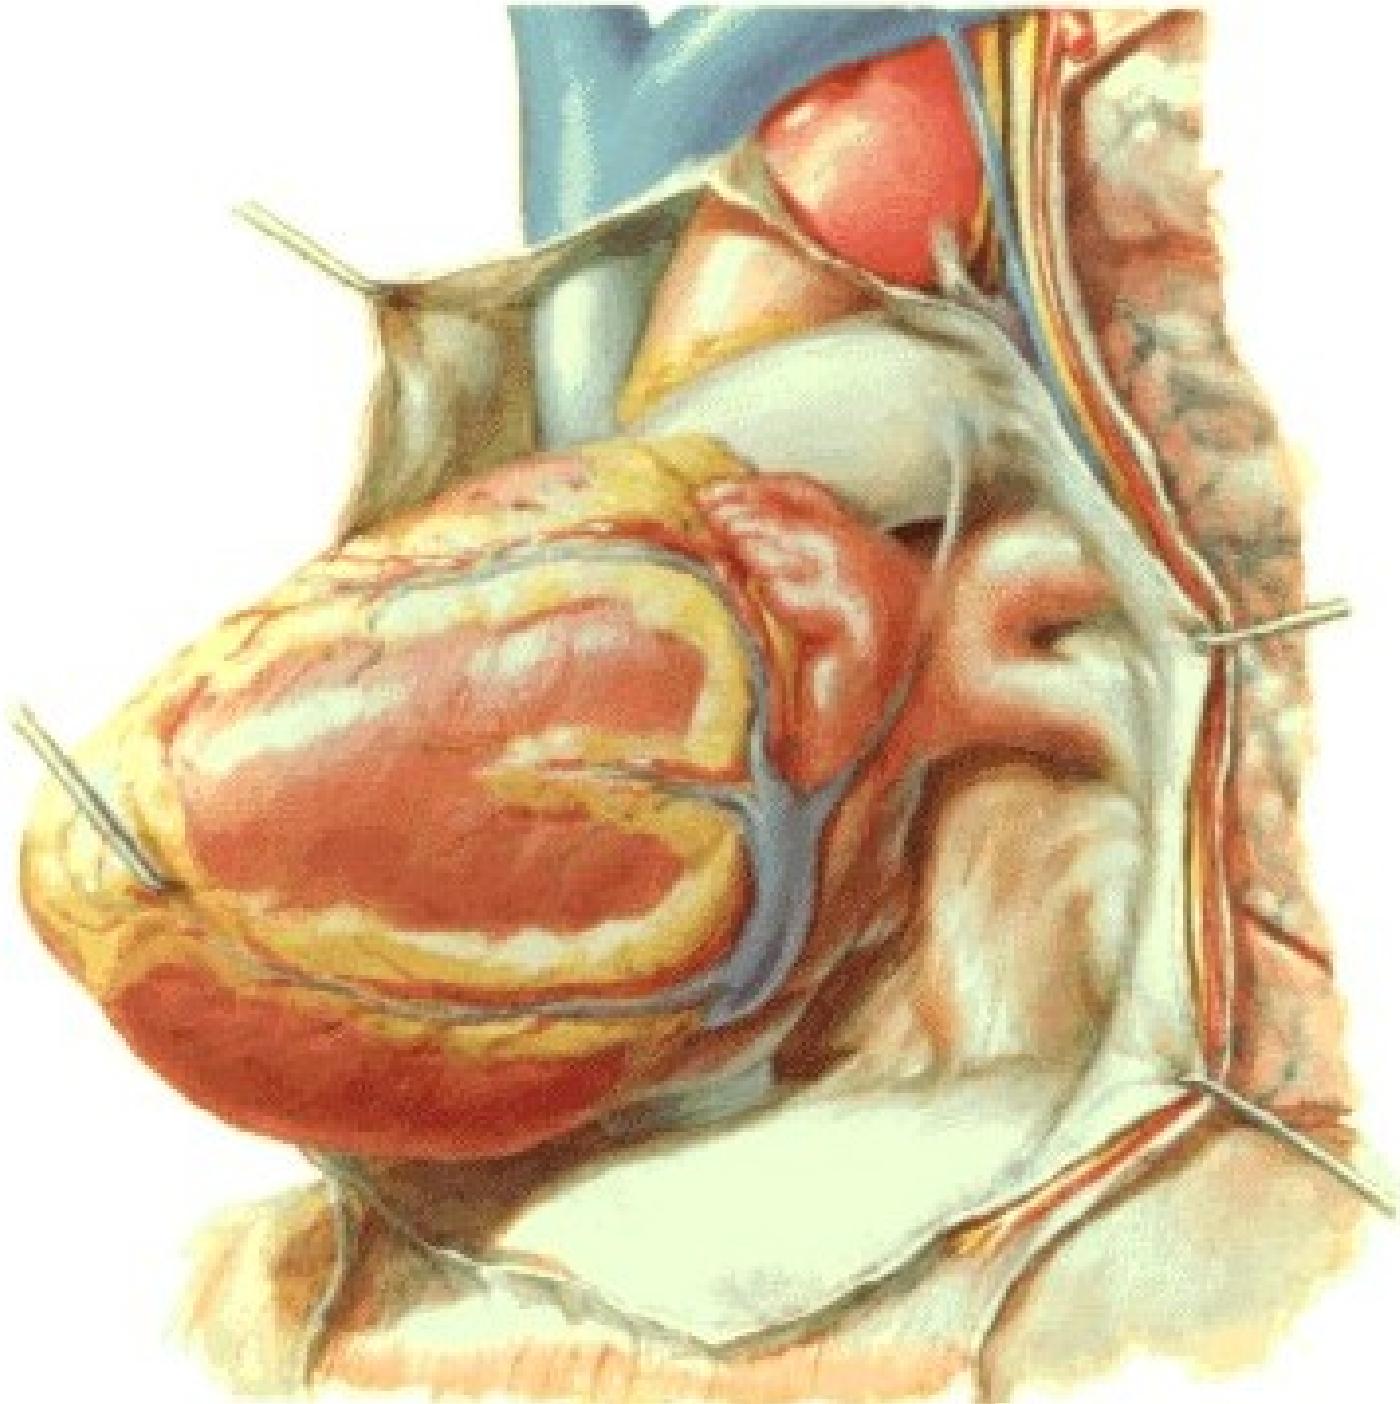

PERICARDIUM SEROSUM

- lamina parietalis
- lamina visceralis (epicardium)
- cavitas pericardii – liquor pericardii

Porta arteriarum – sinus transversus pericardii
Porta venarum – sinus obliquus pericardii

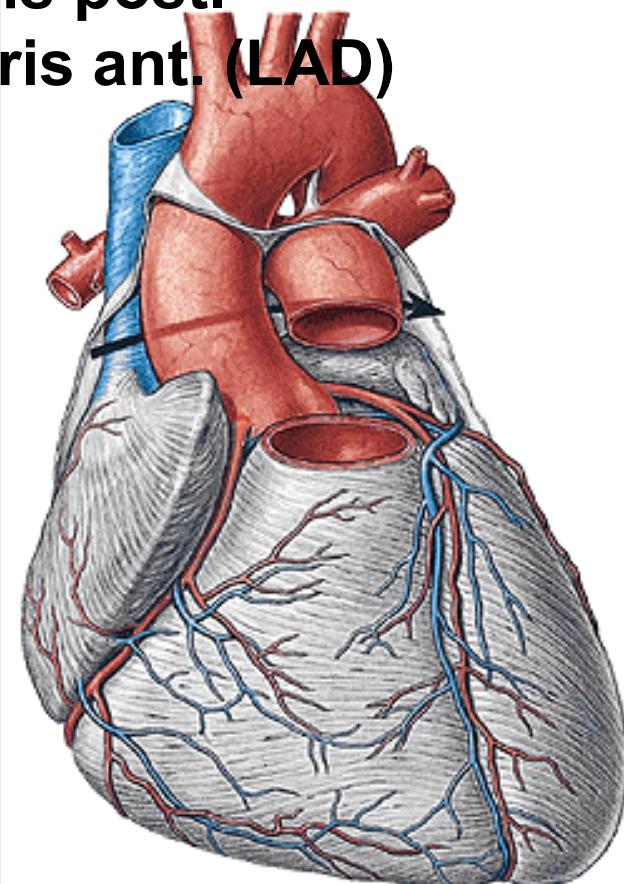

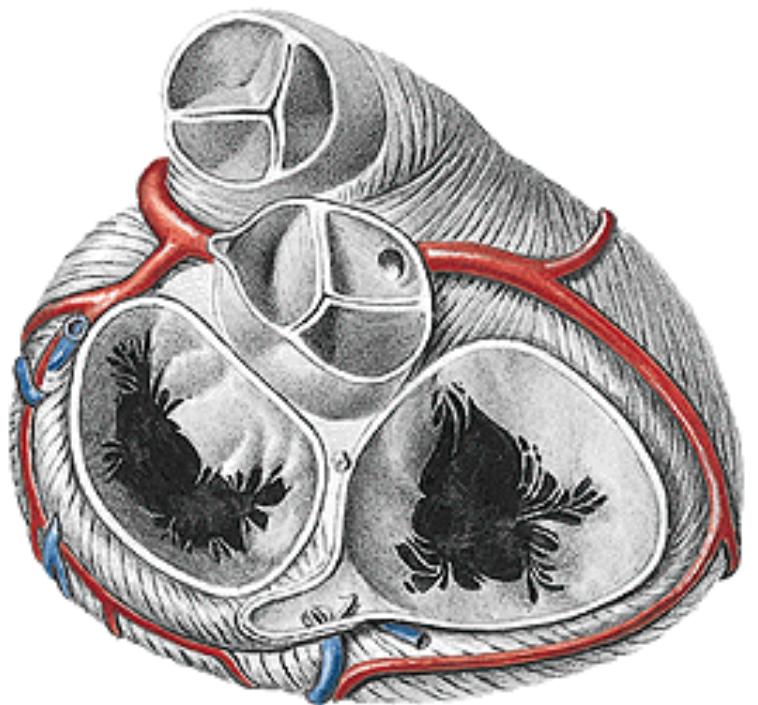

A. coronaria cordis dx. - rr. atriales

- rr. ventriculares
- r. marginalis dx.
- r. coni arteriosi
- r. nodi sinuatrialis
- r. nodi atrioventricularis
- r. interventricularis post.

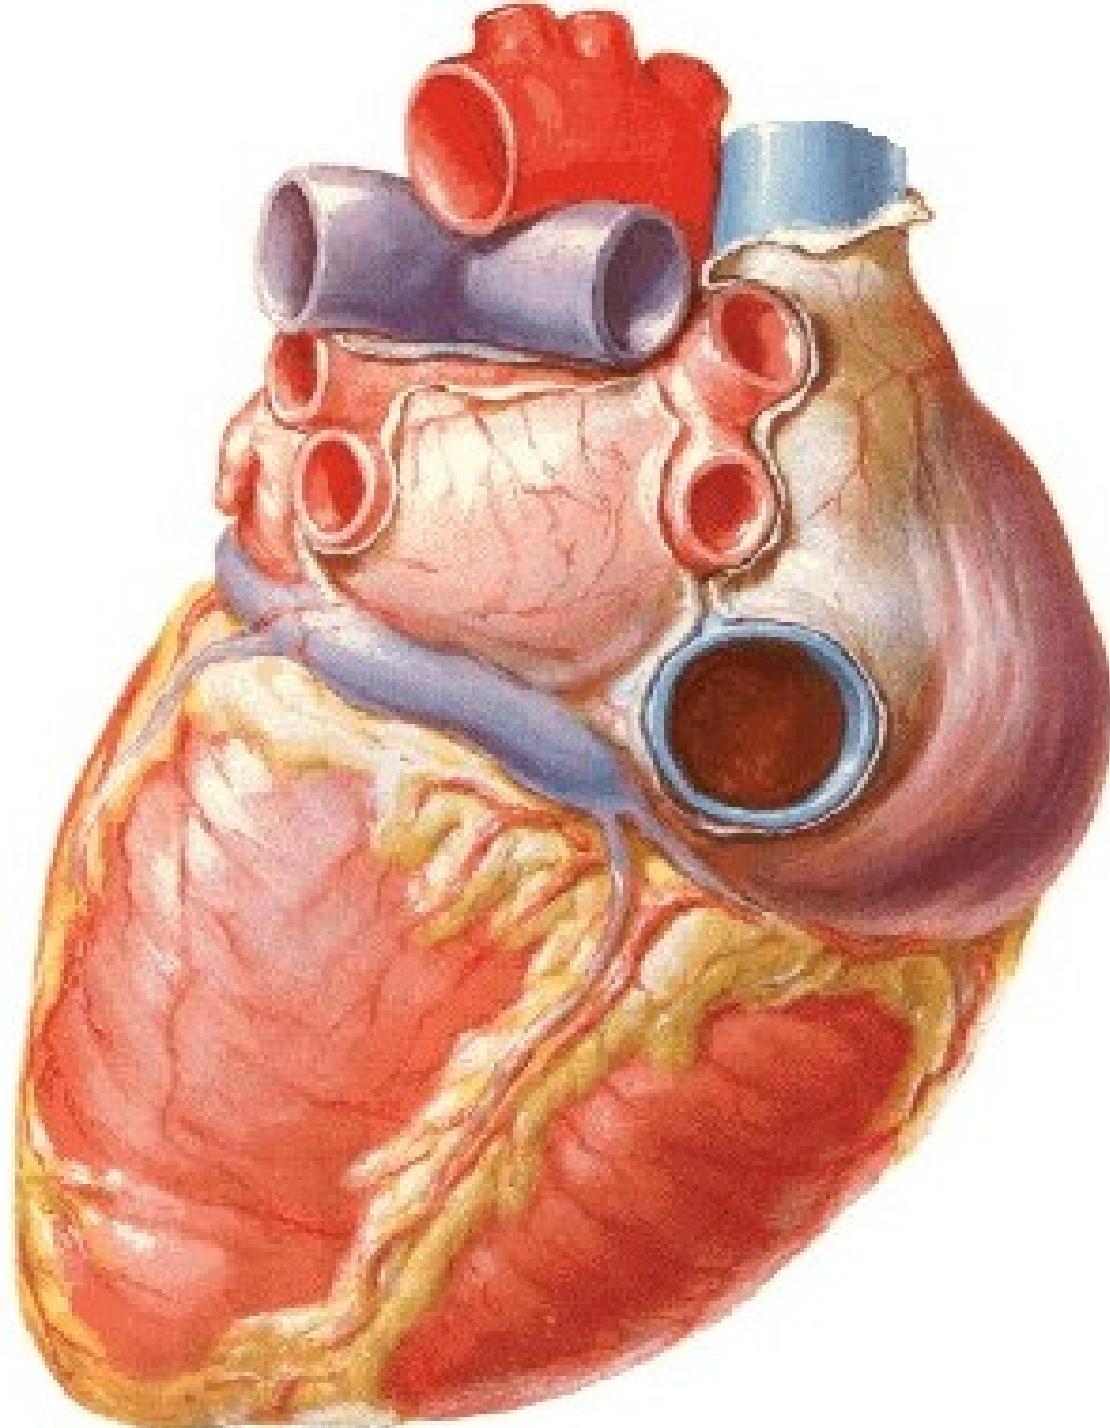

A. coronaria cordis sin. - r. interventricularis ant. (LAD)

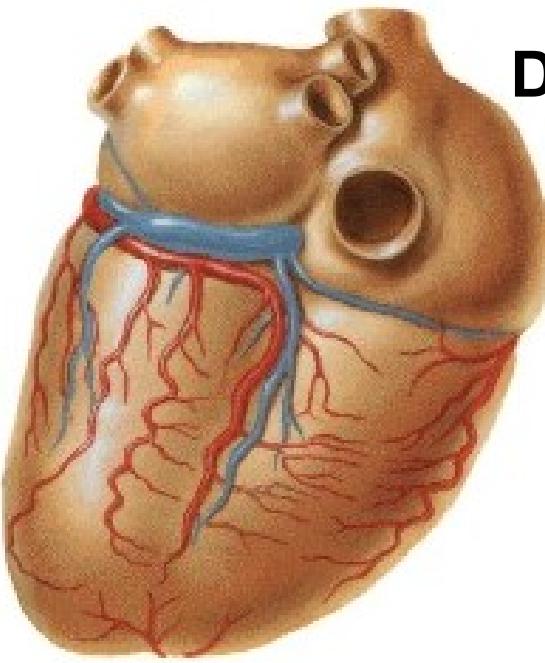

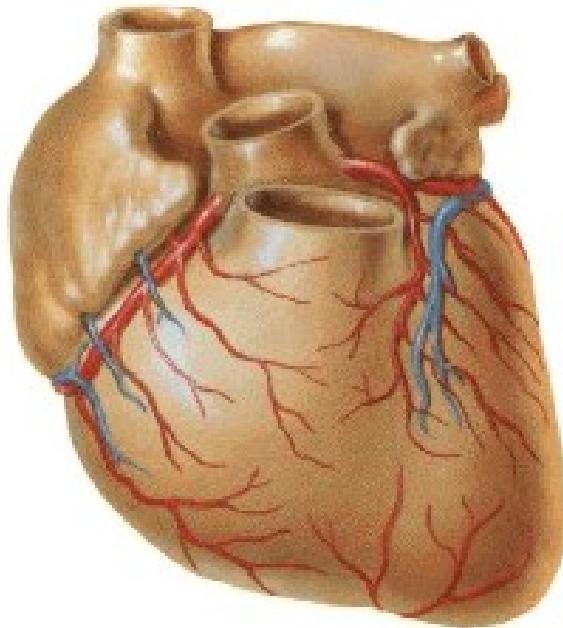

- r. circumflexus

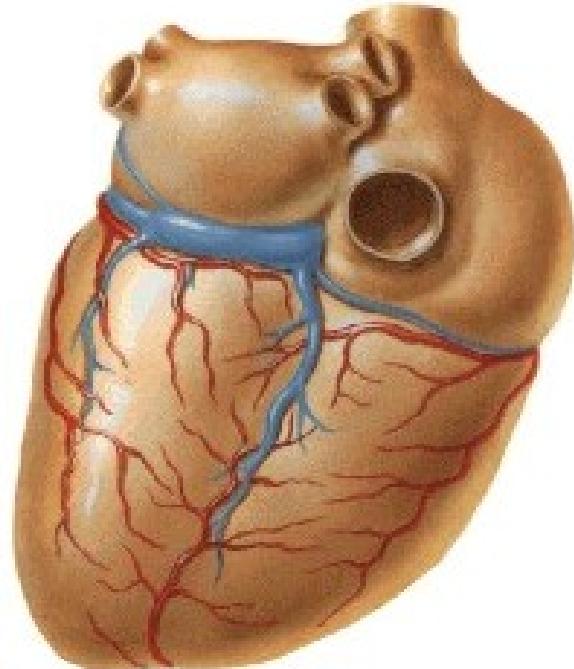

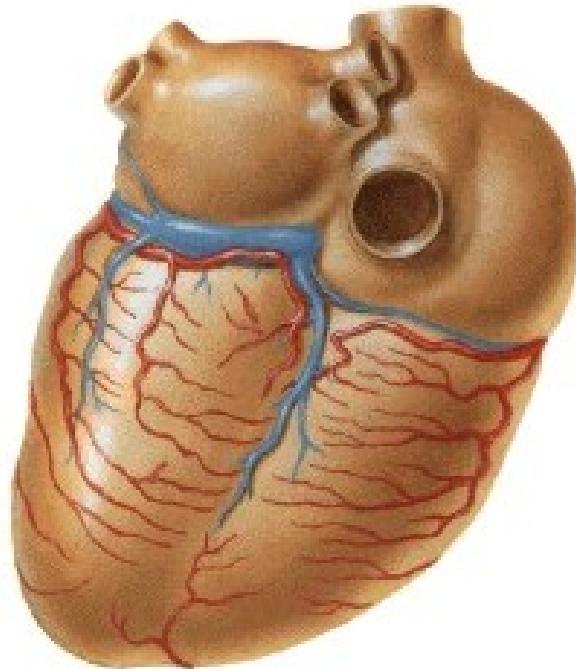

Dominance of RCA

67%

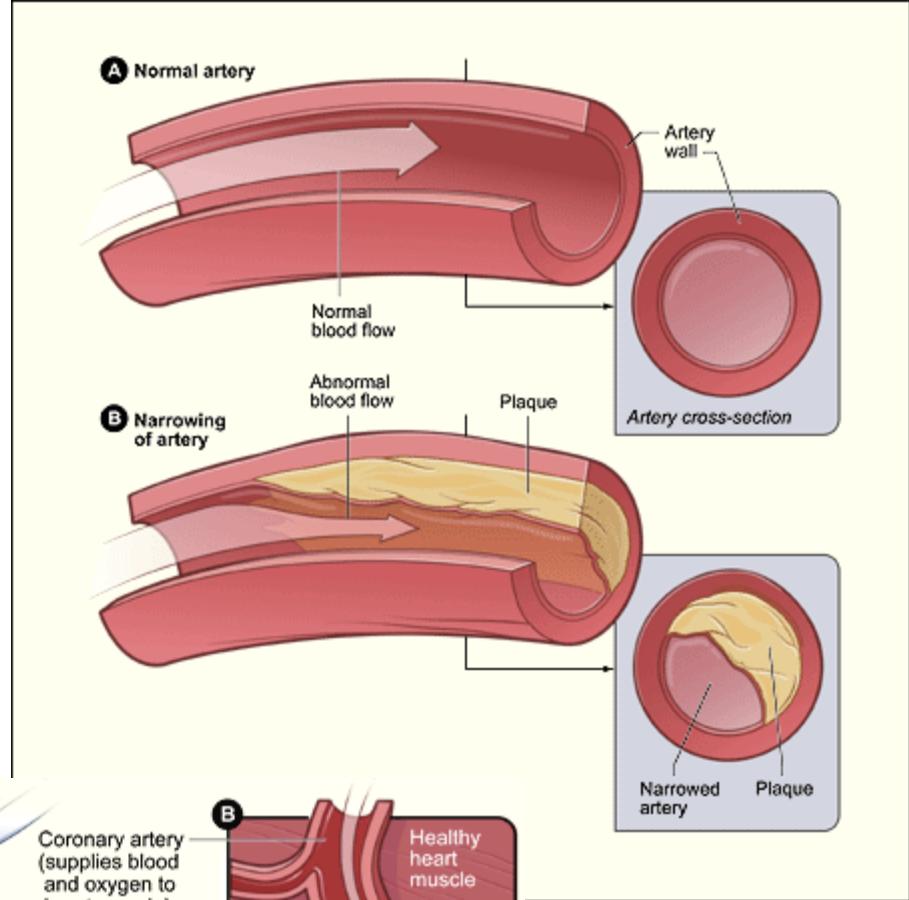

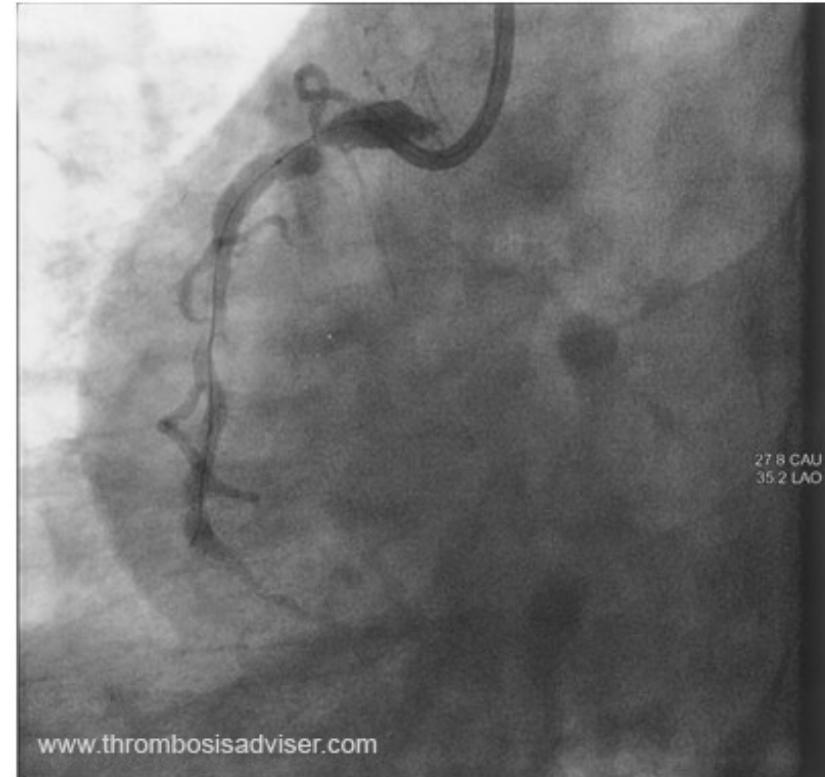

Dominance of LCA
15%

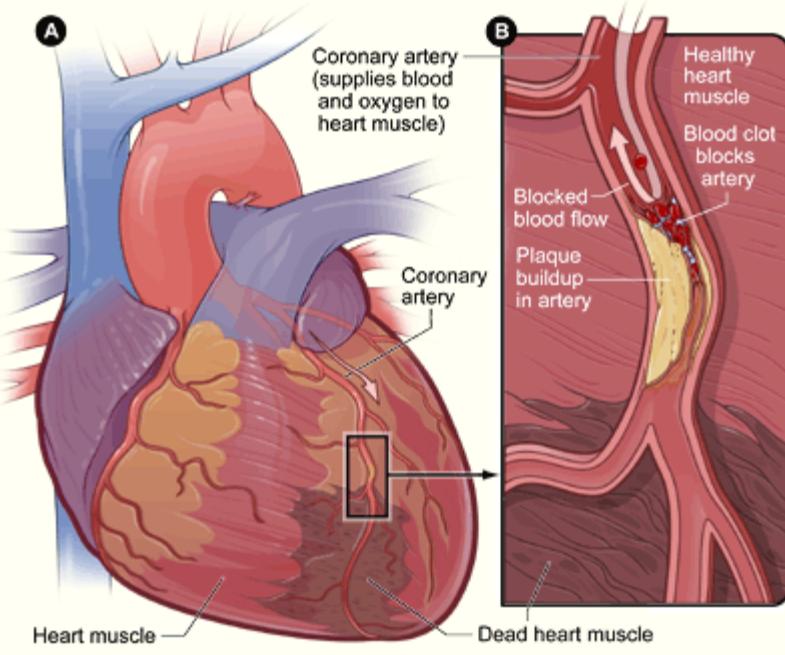

Codominance
18%

Angina pectoris Myocardial infarction

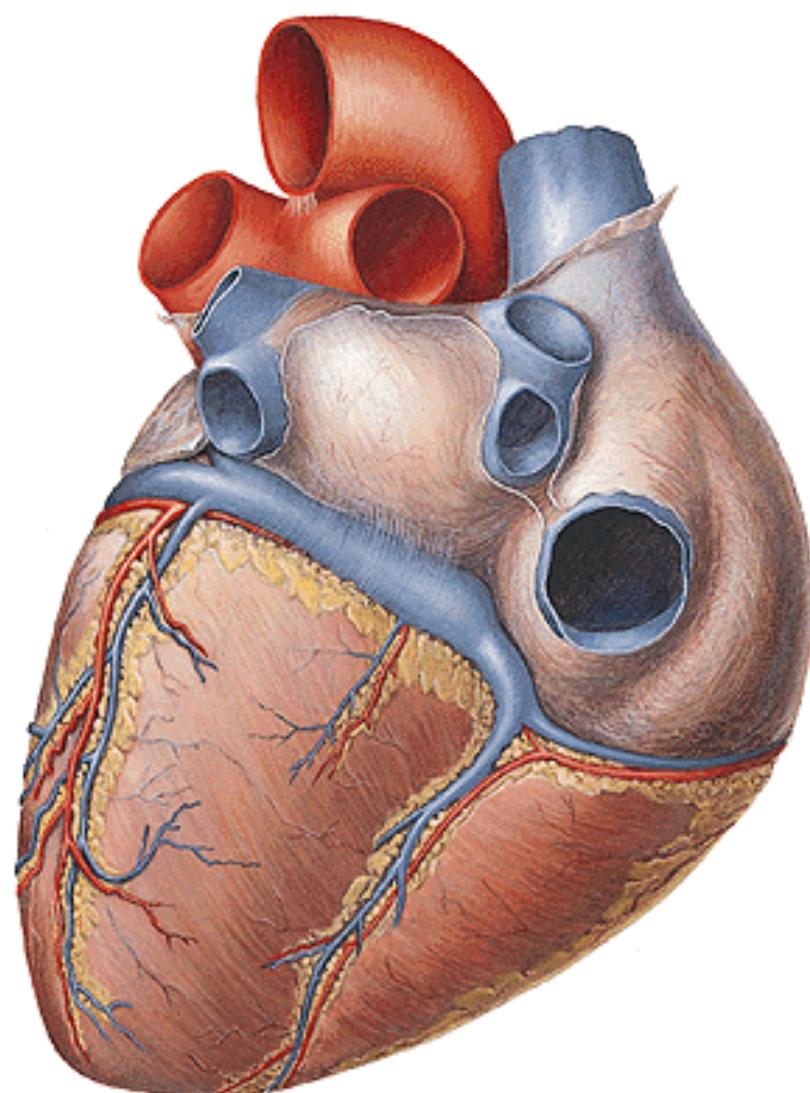

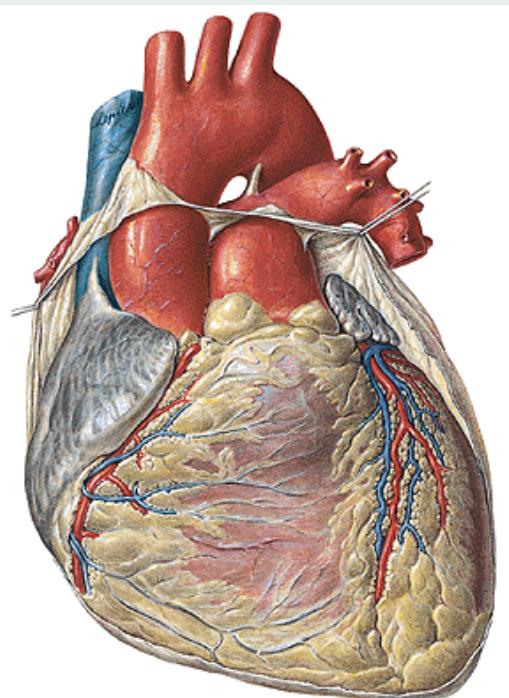

Venae cordis

1. Sinus coronarius cordis

- a) v. cordis magna**
- b) v. cordis media**
- c) v. cordis parva**
- d) v. obliqua atrii sinistri**
- e) v. posterior ventriculi sinistri**

2. Vv. cordis anteriores

3. Vv. cordis minimae

Lymphatics:

Truncus lymphaticus anterior sinister + truncus lymph. post. – nodus lymph. retroaorticus

Truncus lymph. ant. dx. – nodus lymph. praeaorticus

Nerves:

**Plexus cardiacus spf.
(ganglion cardiacum)**

Plexus cardiacus prof.

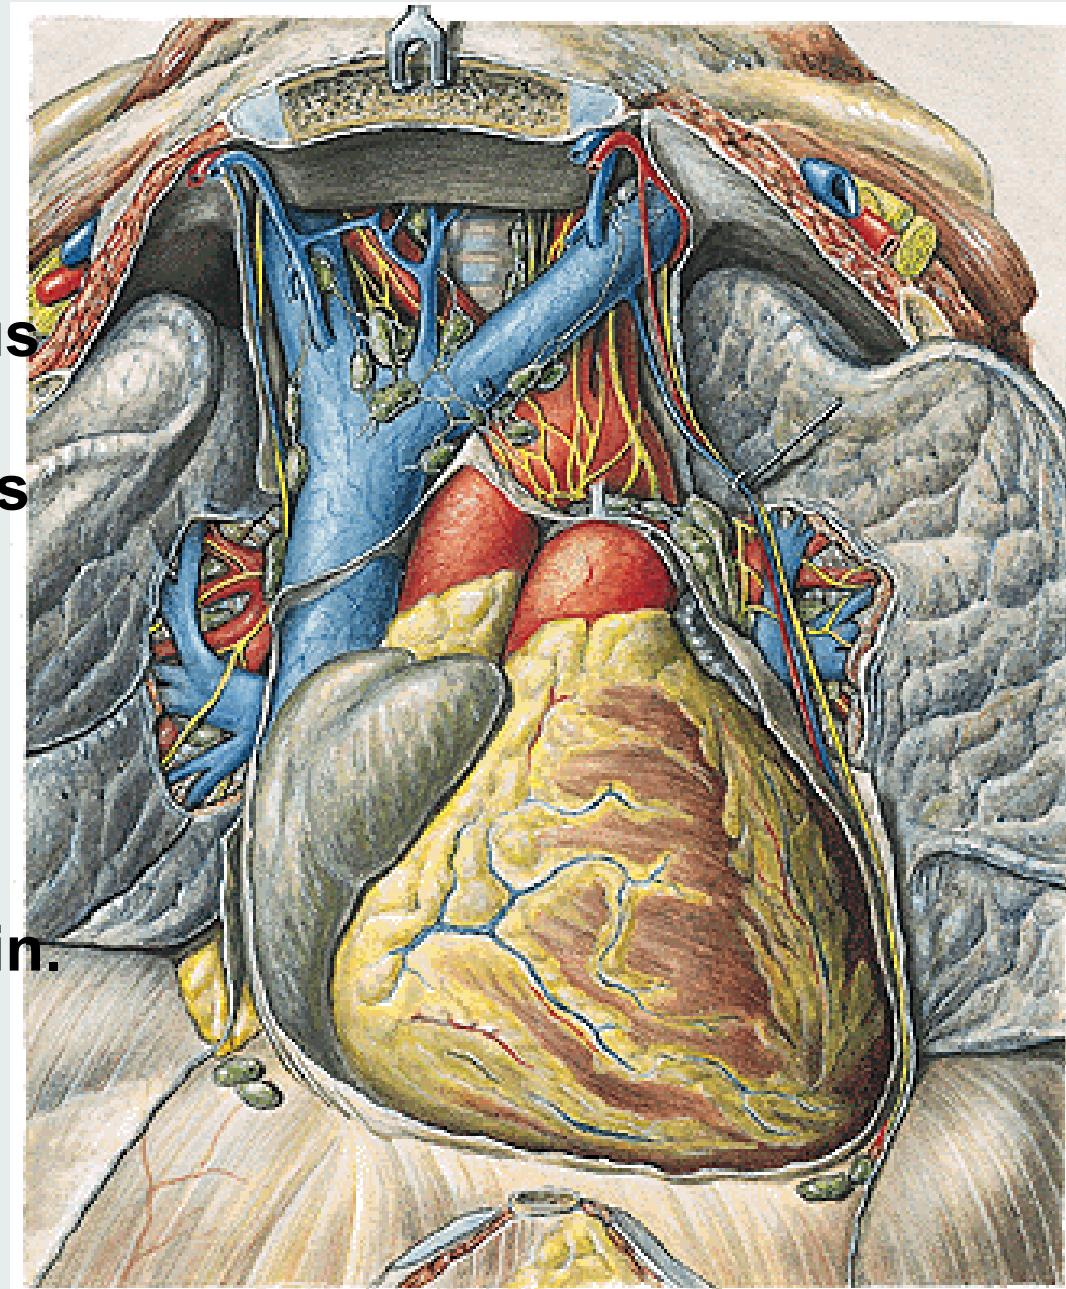

Plexus coronarius dx. et sin.

Nn. cardiaci (symp.)

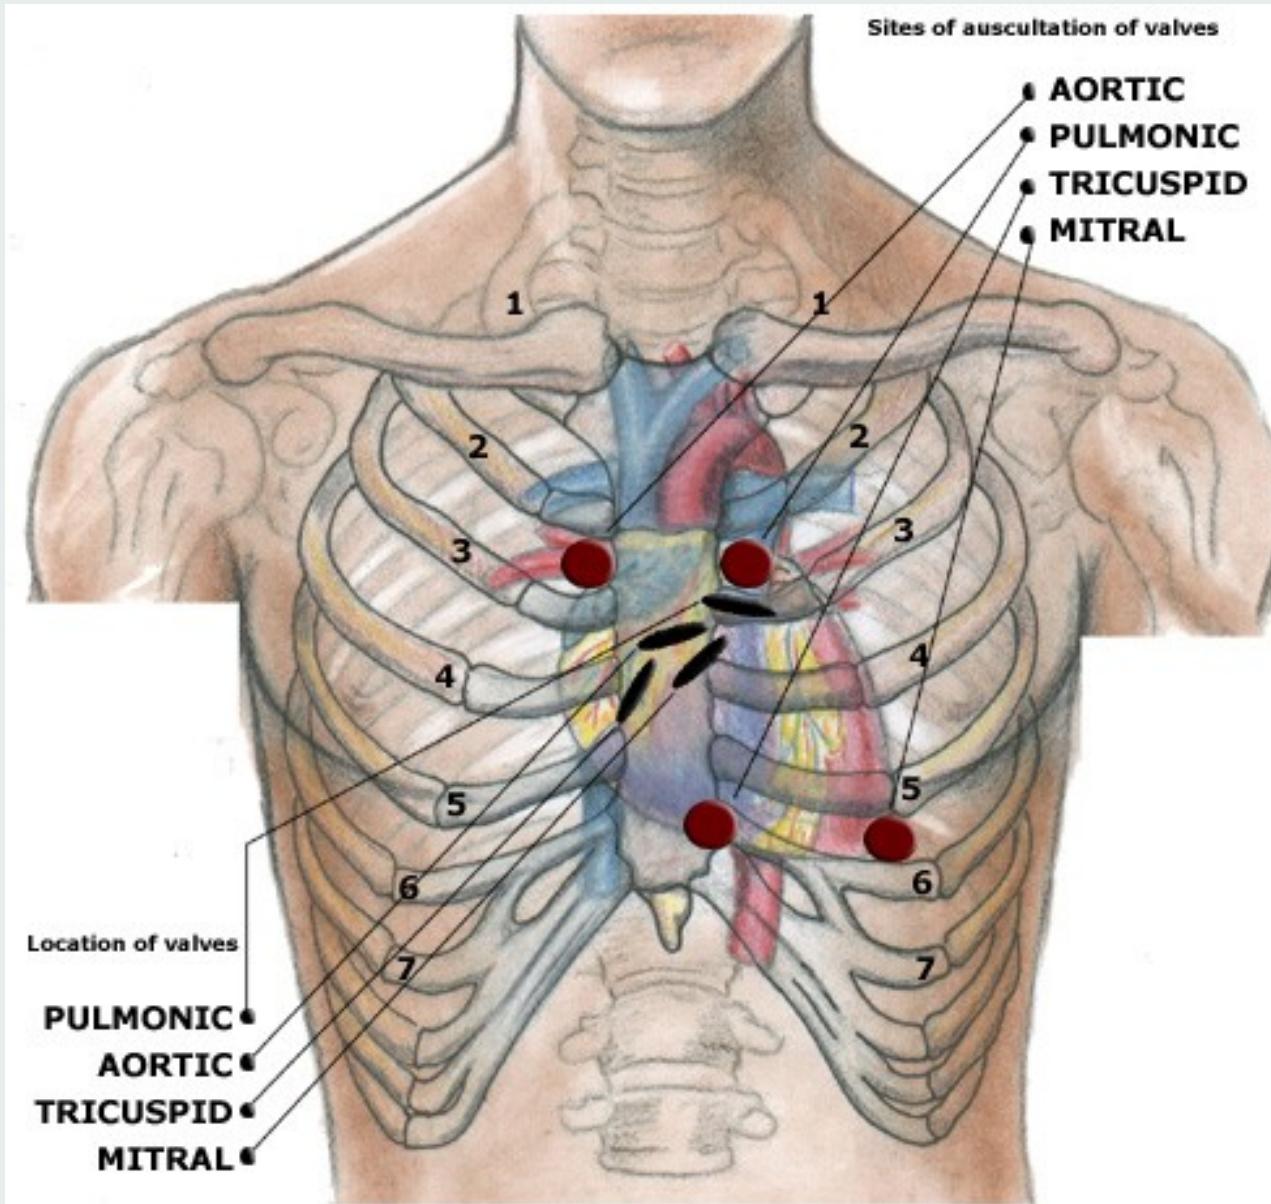

– accelerantes

Rr. cardiaci (parasymp.)

– retardantes

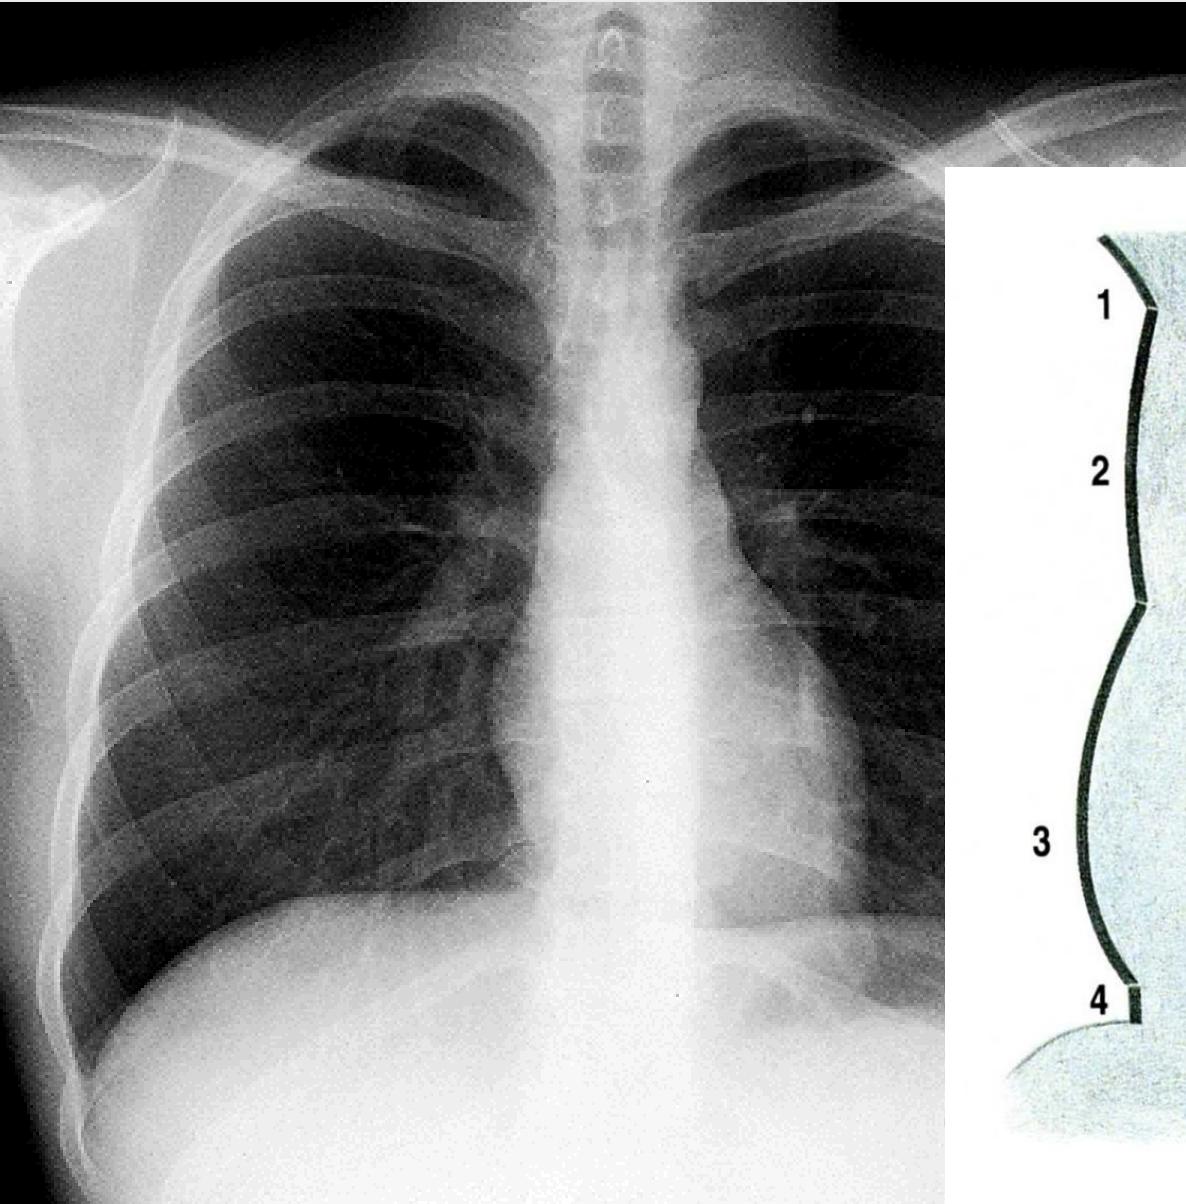

Sites of auscultation:

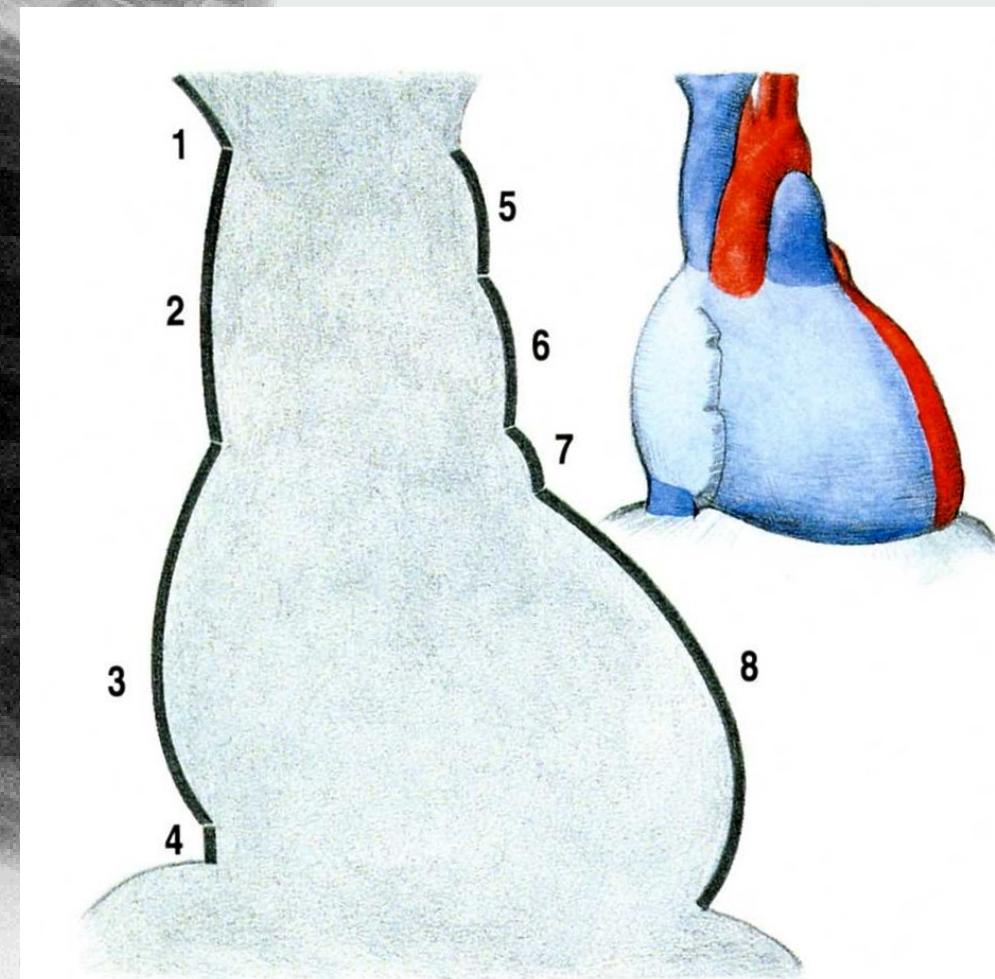

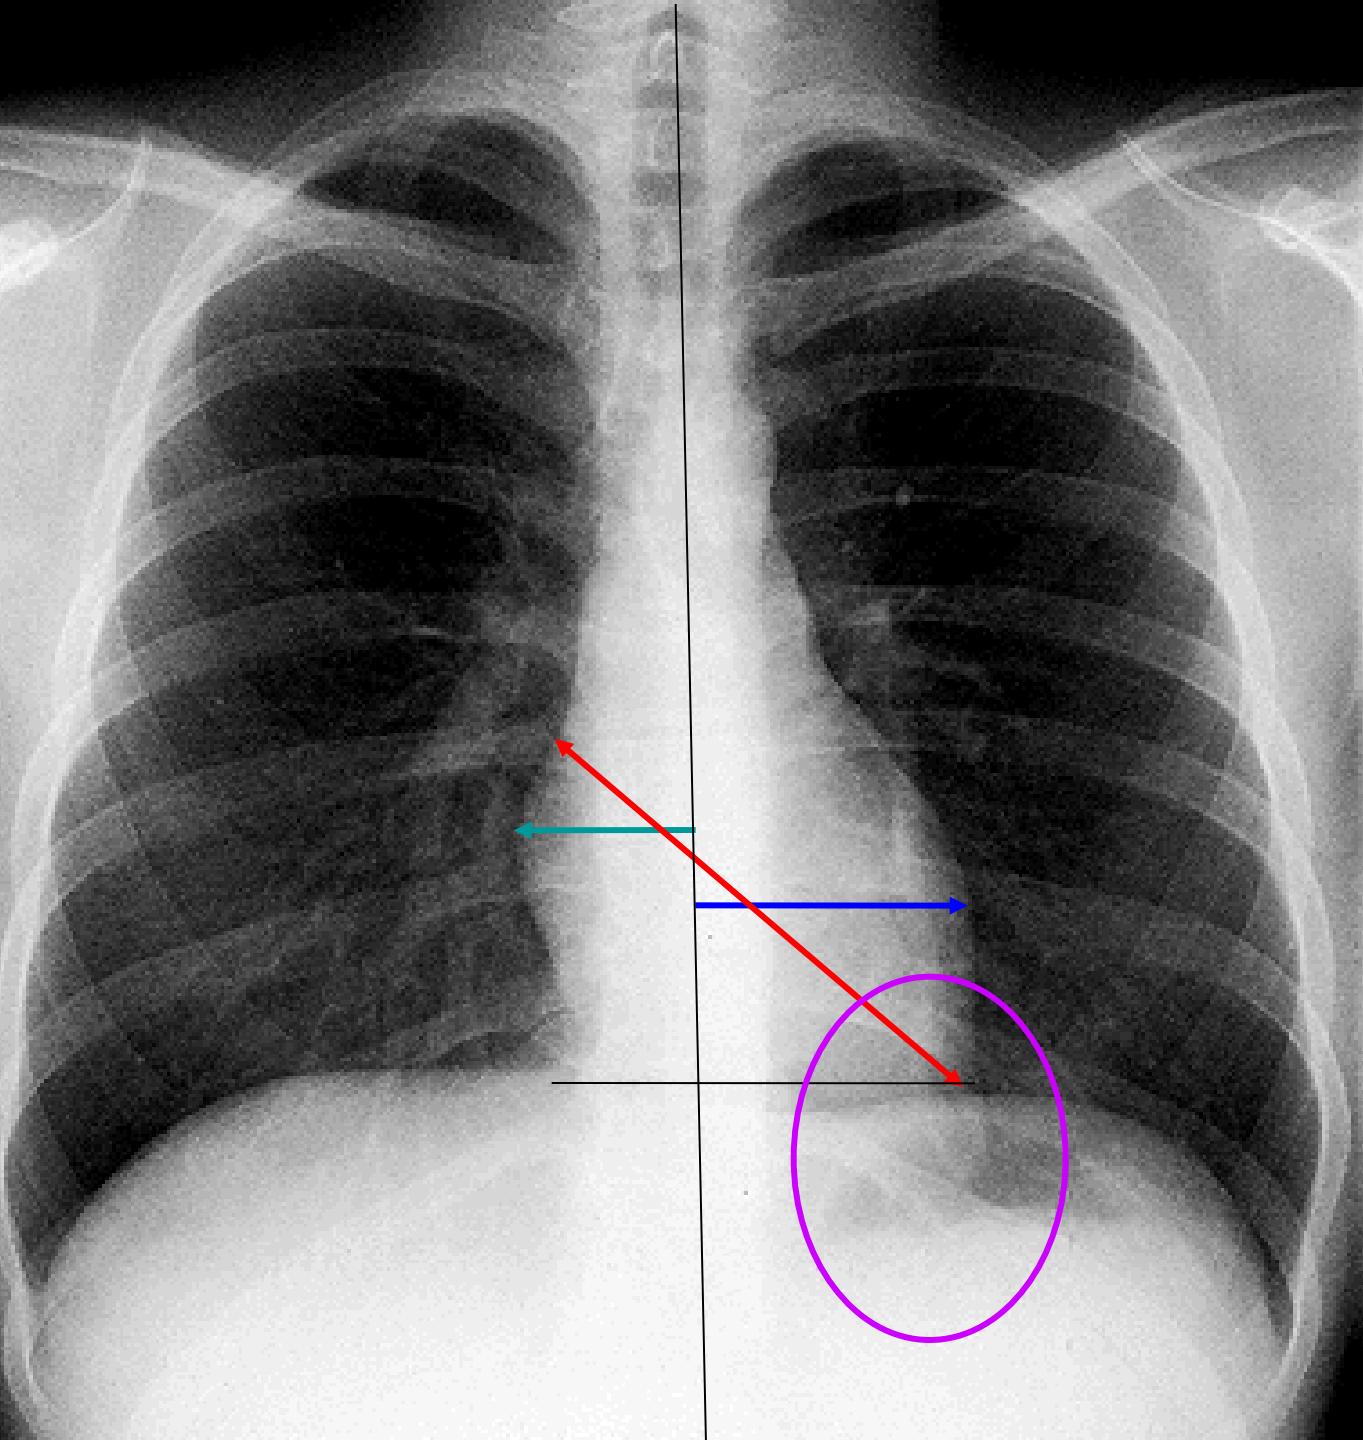

Heart shadow:

1. V. brachiocephalica dx.
2. V. cava sup.
3. Atrium dx.
4. V. cava inf.

5. Arcus aortae
6. Truncus pulmonalis
7. Auricula sin.
8. Ventriculus sin.

A black and white posterior-anterior (PA) chest X-ray. A vertical black line bisects the image through the midline of the thorax. Several colored arrows and lines are overlaid to measure the mediastinum. A red double-headed arrow at the top left indicates the width of the mediastinum on the left side. A blue double-headed arrow at the top right indicates the width of the mediastinum on the right side. A horizontal black line extends from the midline to the right mediastinal border, with a red arrow pointing to the right end of this line. A purple circle highlights a circular area in the lower central mediastinum.

**Distantia
mediodextra**

**Distantia
mediosinistra**

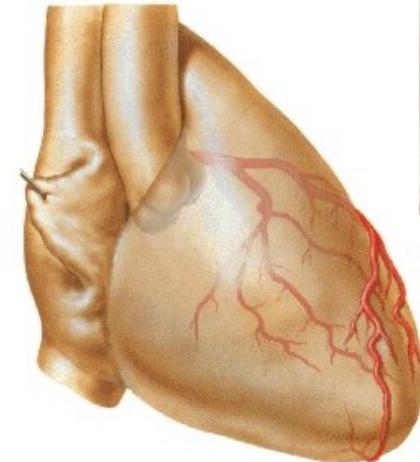

**Transverse
line = DMd+DMs**

Length

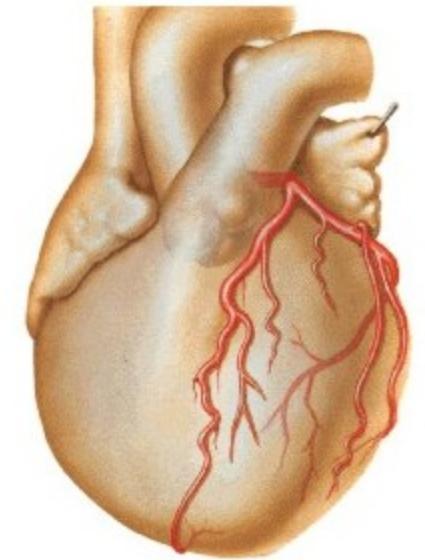

Gradient

Area

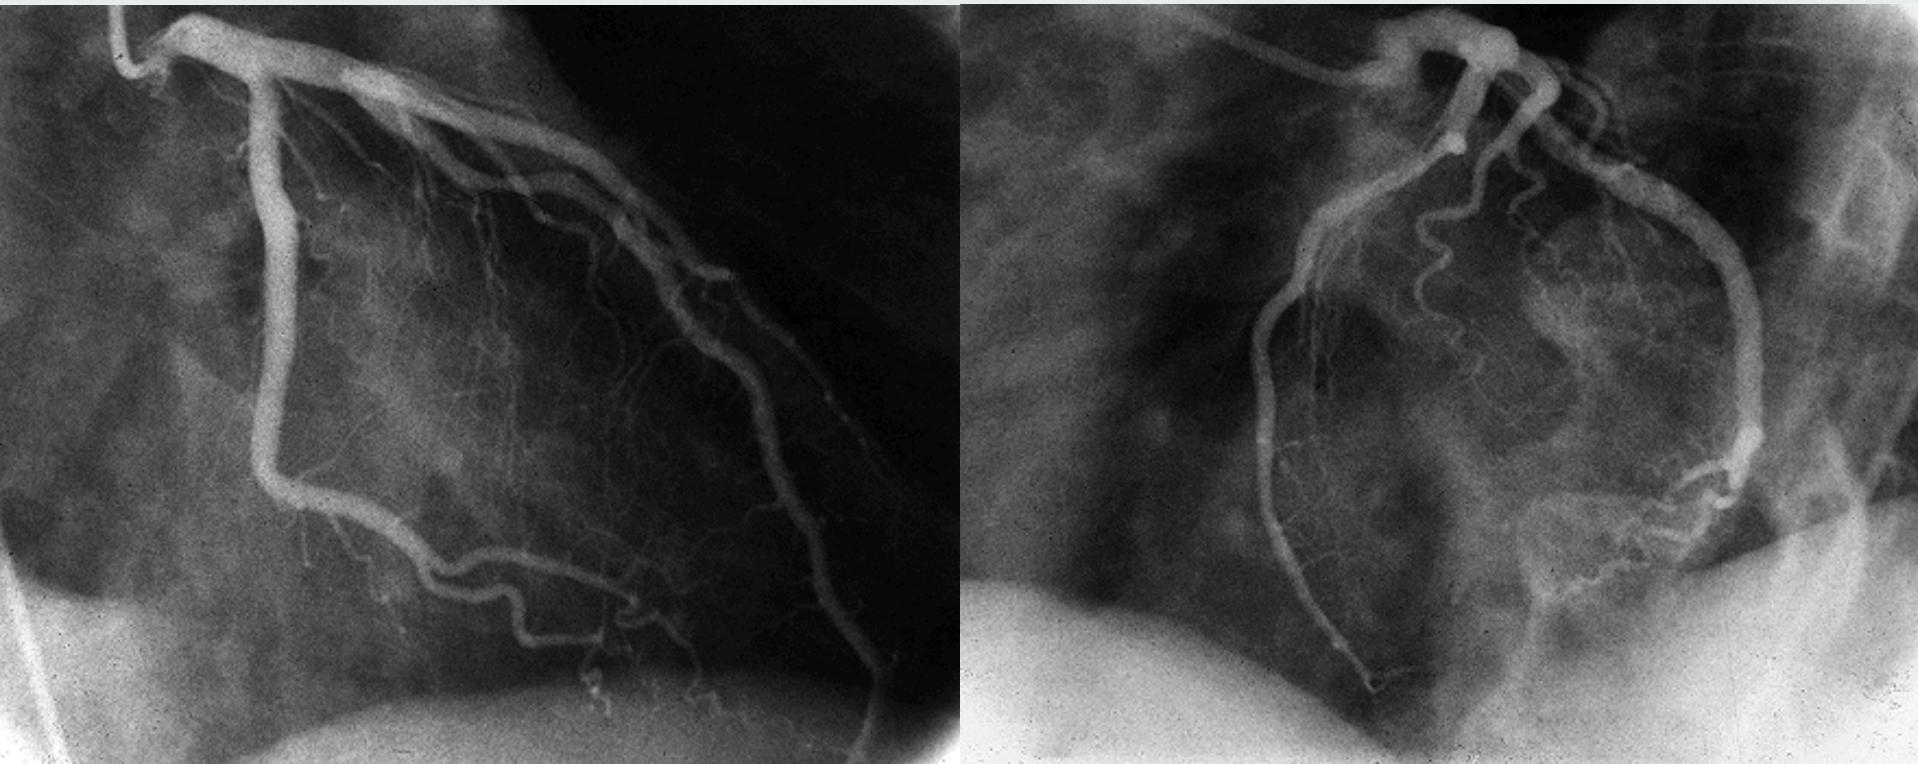

Coronary angiography – left coronary artery

Right anterior oblique projection

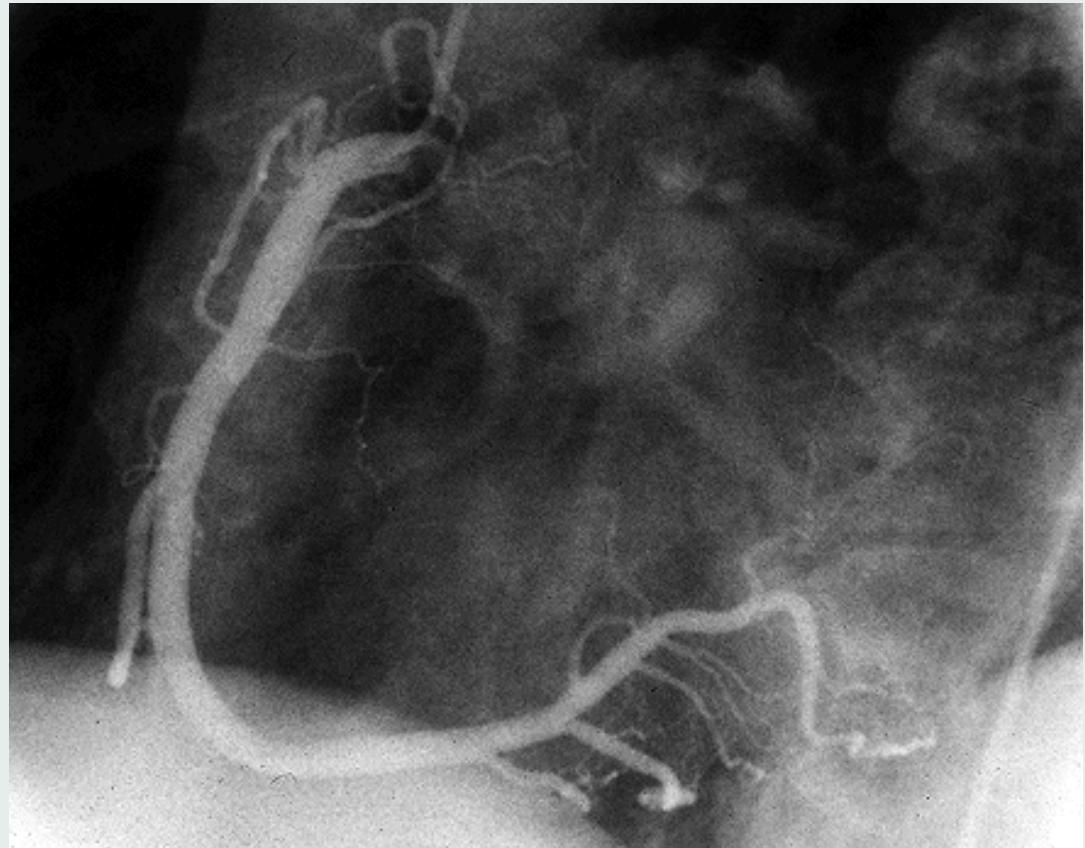

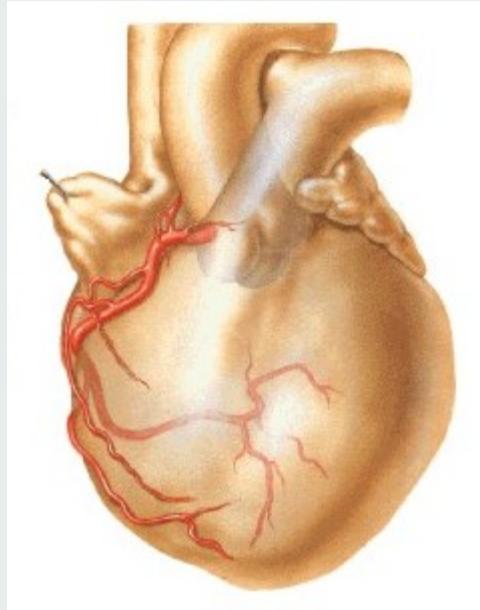

Left anterior oblique projection

Coronary angiography – right coronary artery

Left anterior oblique projection
