

ORGANUM VISUS (VISUAL SYSTEM)

TUNICA FIBROSA BULBI

- **sclera**: posterior 5/6 of eye
- **cornea**: anterior 1/6 of eye

Sclera (diameter: 11-12 mm)

Tunica

- **fibrosa bulbi**
- **vasculosa bulbi**
- **interna bulbi**

lamina cribrosa sclerae

fascia bulbi (Tenoni) → spatium episclerale

spatium perchoroideum

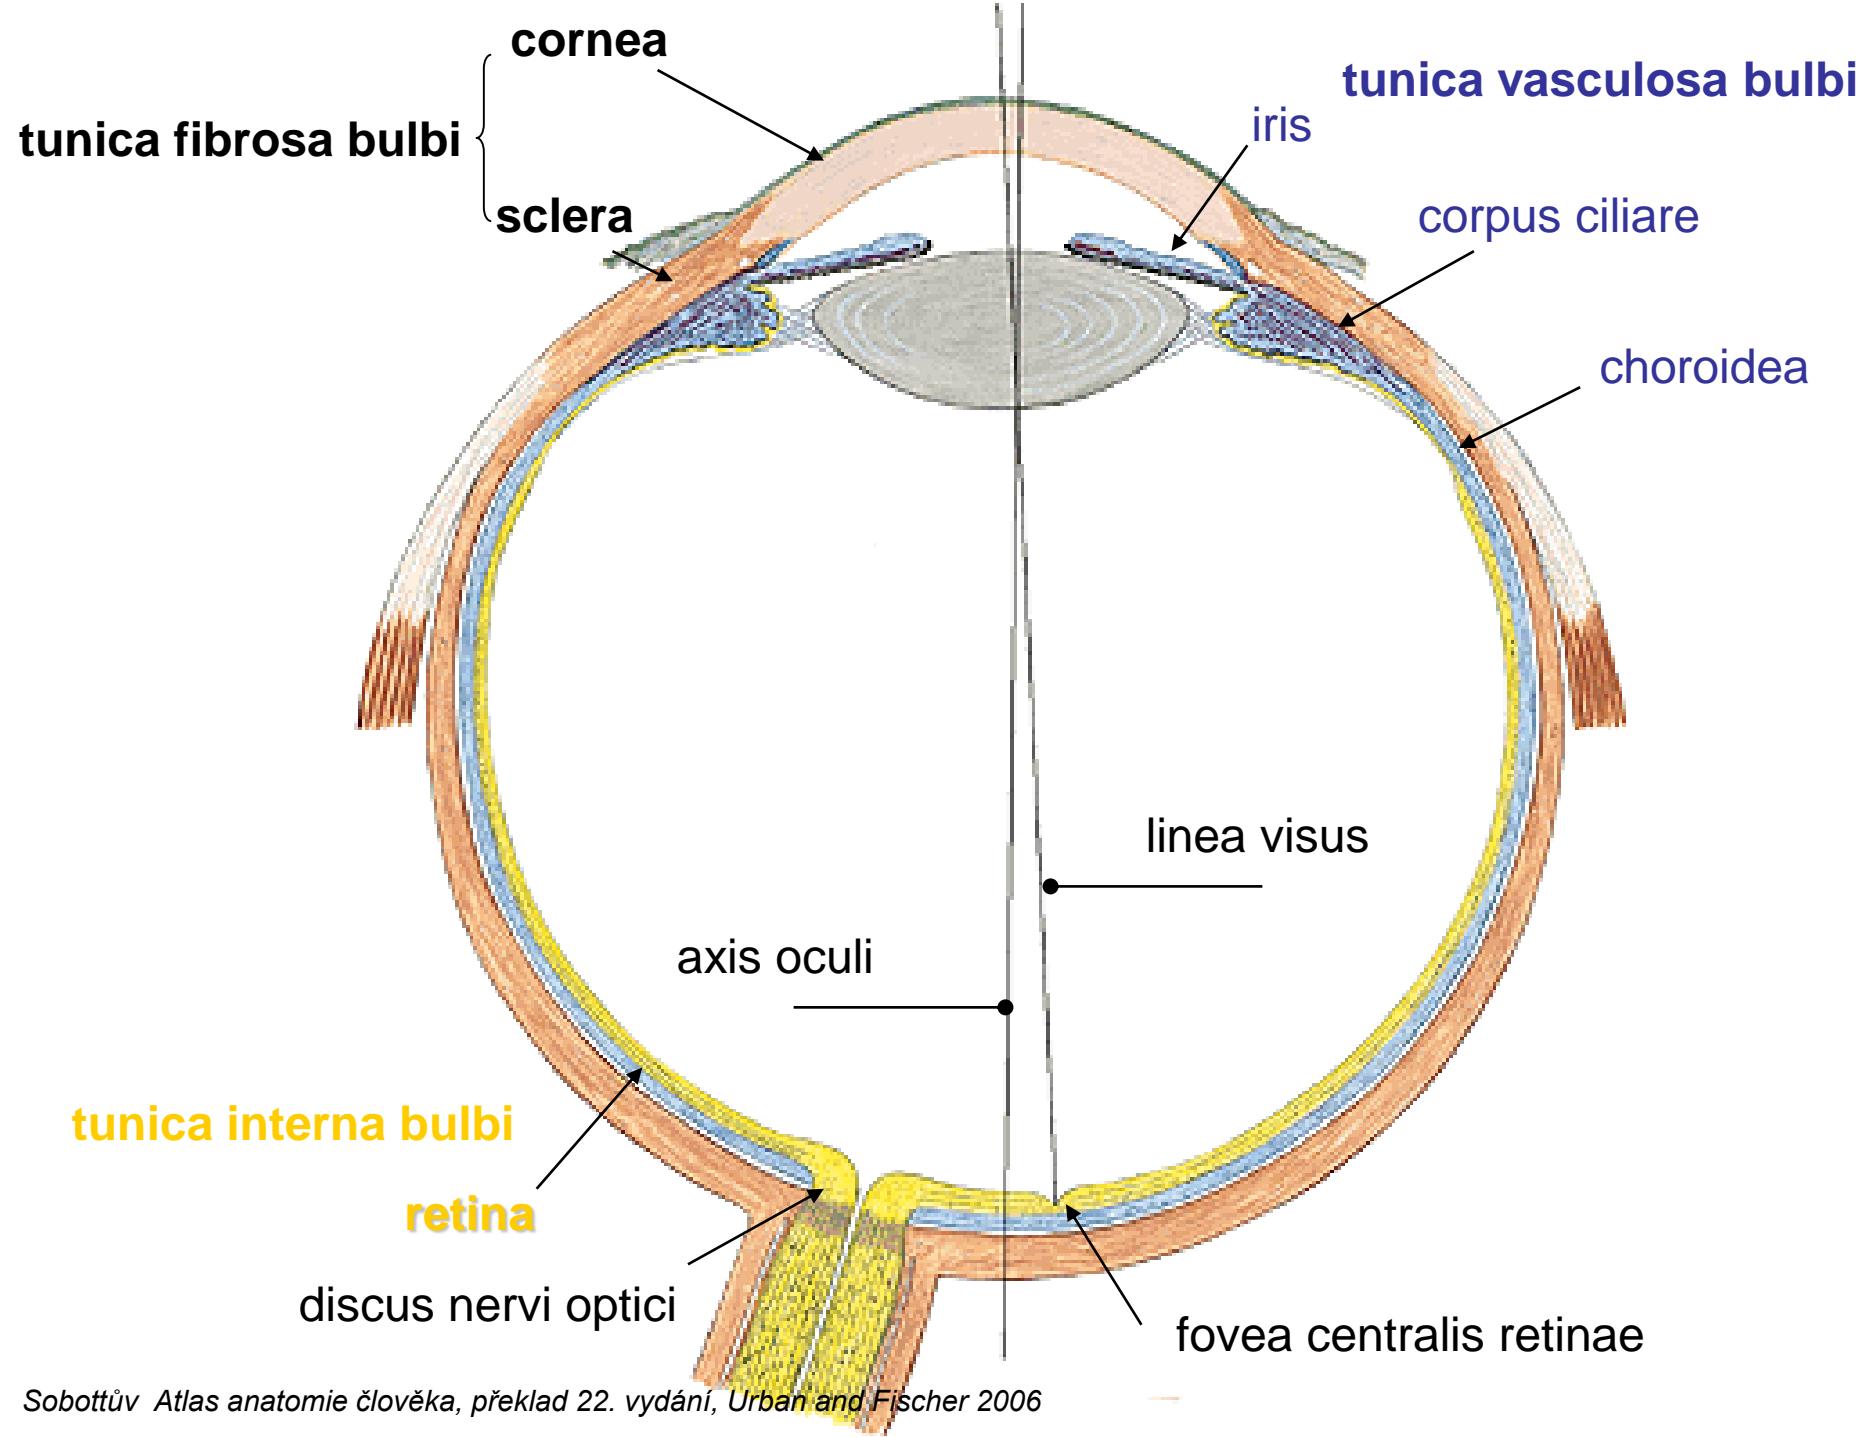

Cornea (diameter: 7-8 mm)

facies anterior et posterior corneae

limbus corneae

sclerocorneal junction - sulcus sclerae

- venous sinus **sinus venosus sclerae** (Schlemm's canal)

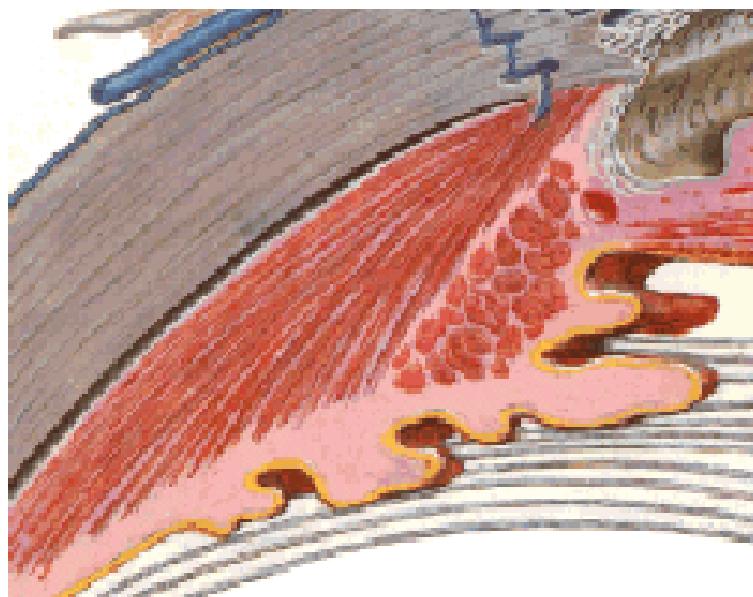

TUNICA VASCULOSA BULBI

choroidea (choroid)

corpus ciliare (ciliary body)

iris (iris)

CILIARY BODY (CORPUS CILIARE)

m. ciliaris fibrae meridionales

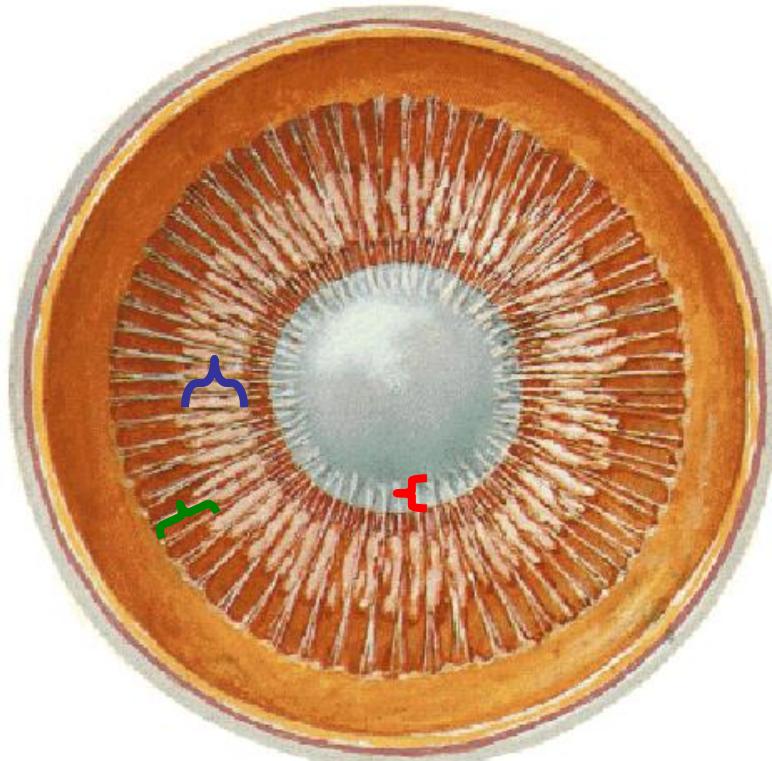

(ciliary m.) fibrae circulares

orbiculus ciliaris

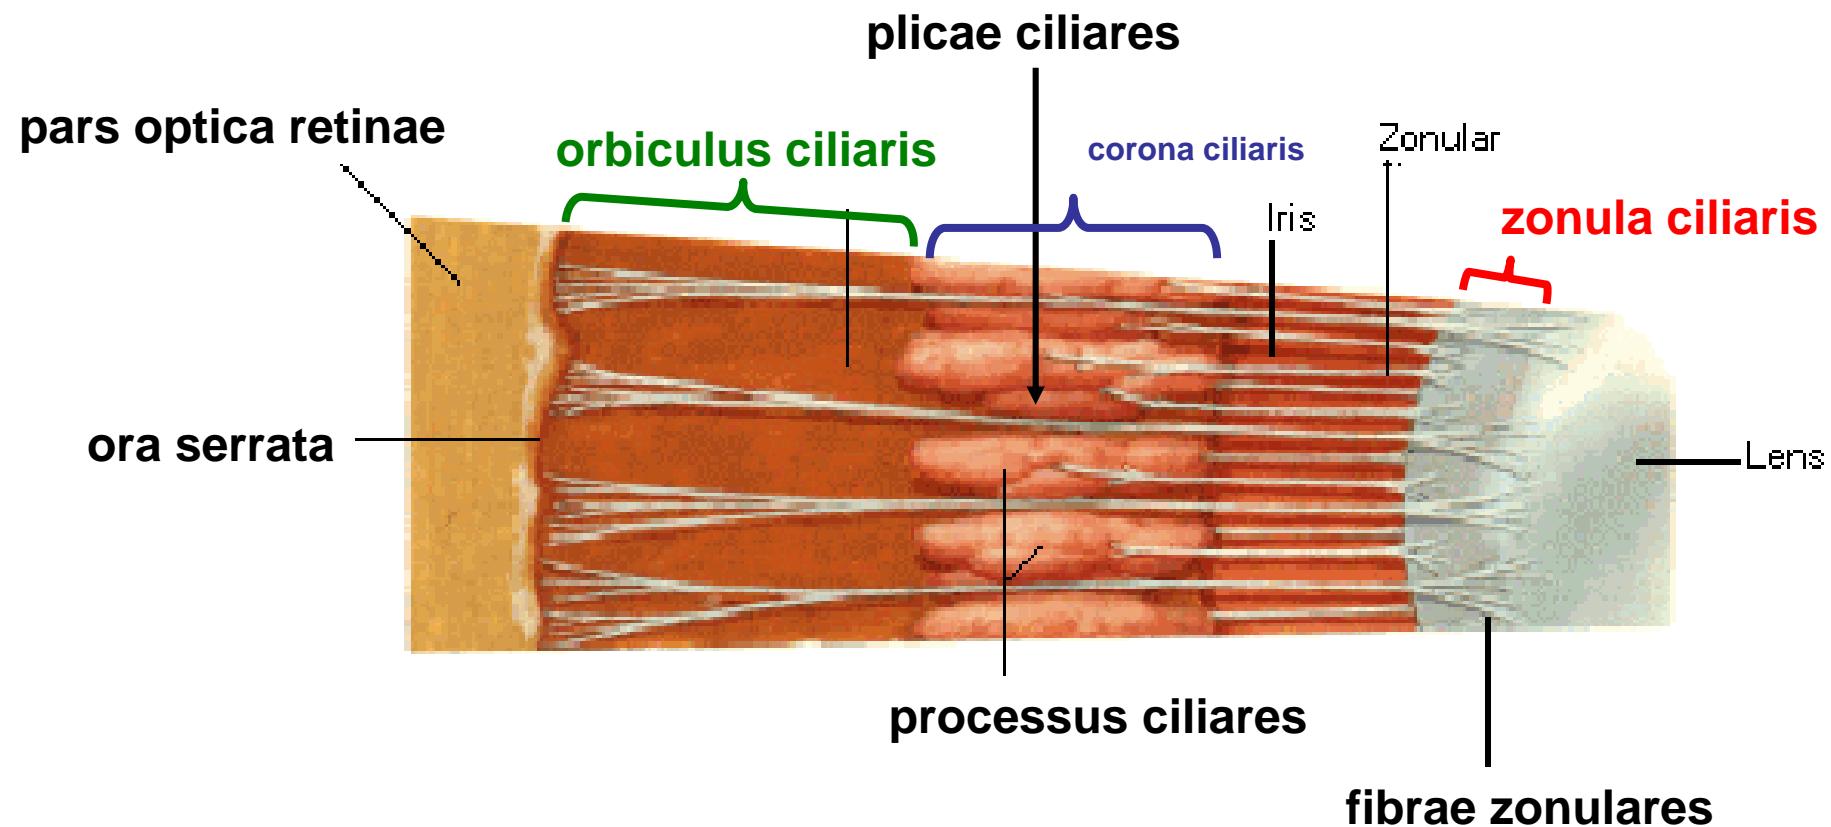

processus ciliares } **corona ciliaris**

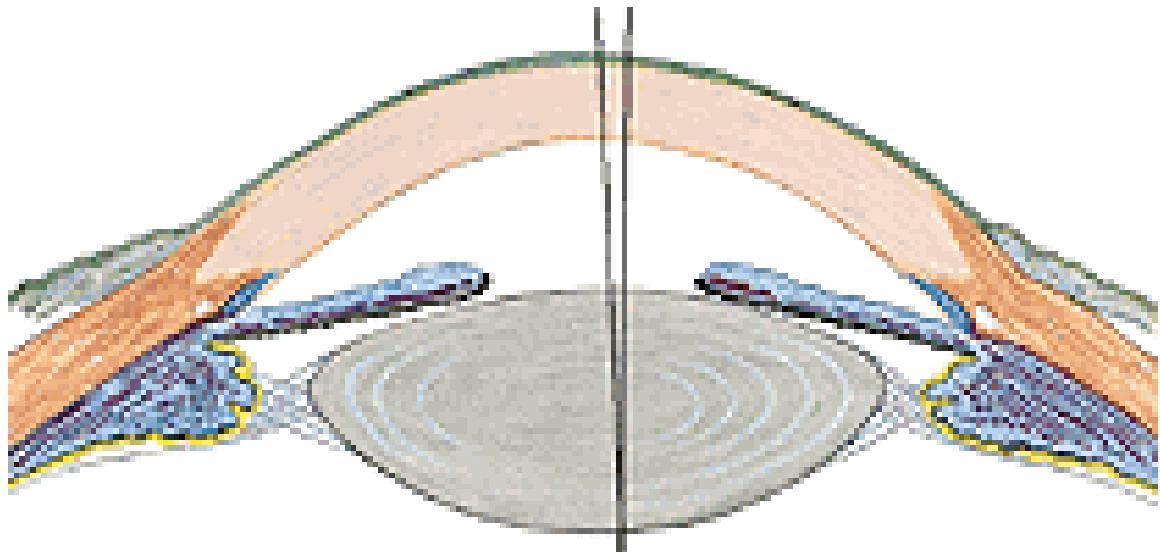

plicae ciliares

fibrae zonulares **zonula ciliaris**

CILIARY BODY (CORPUS CILIARE)

IRIS

margo pupillaris

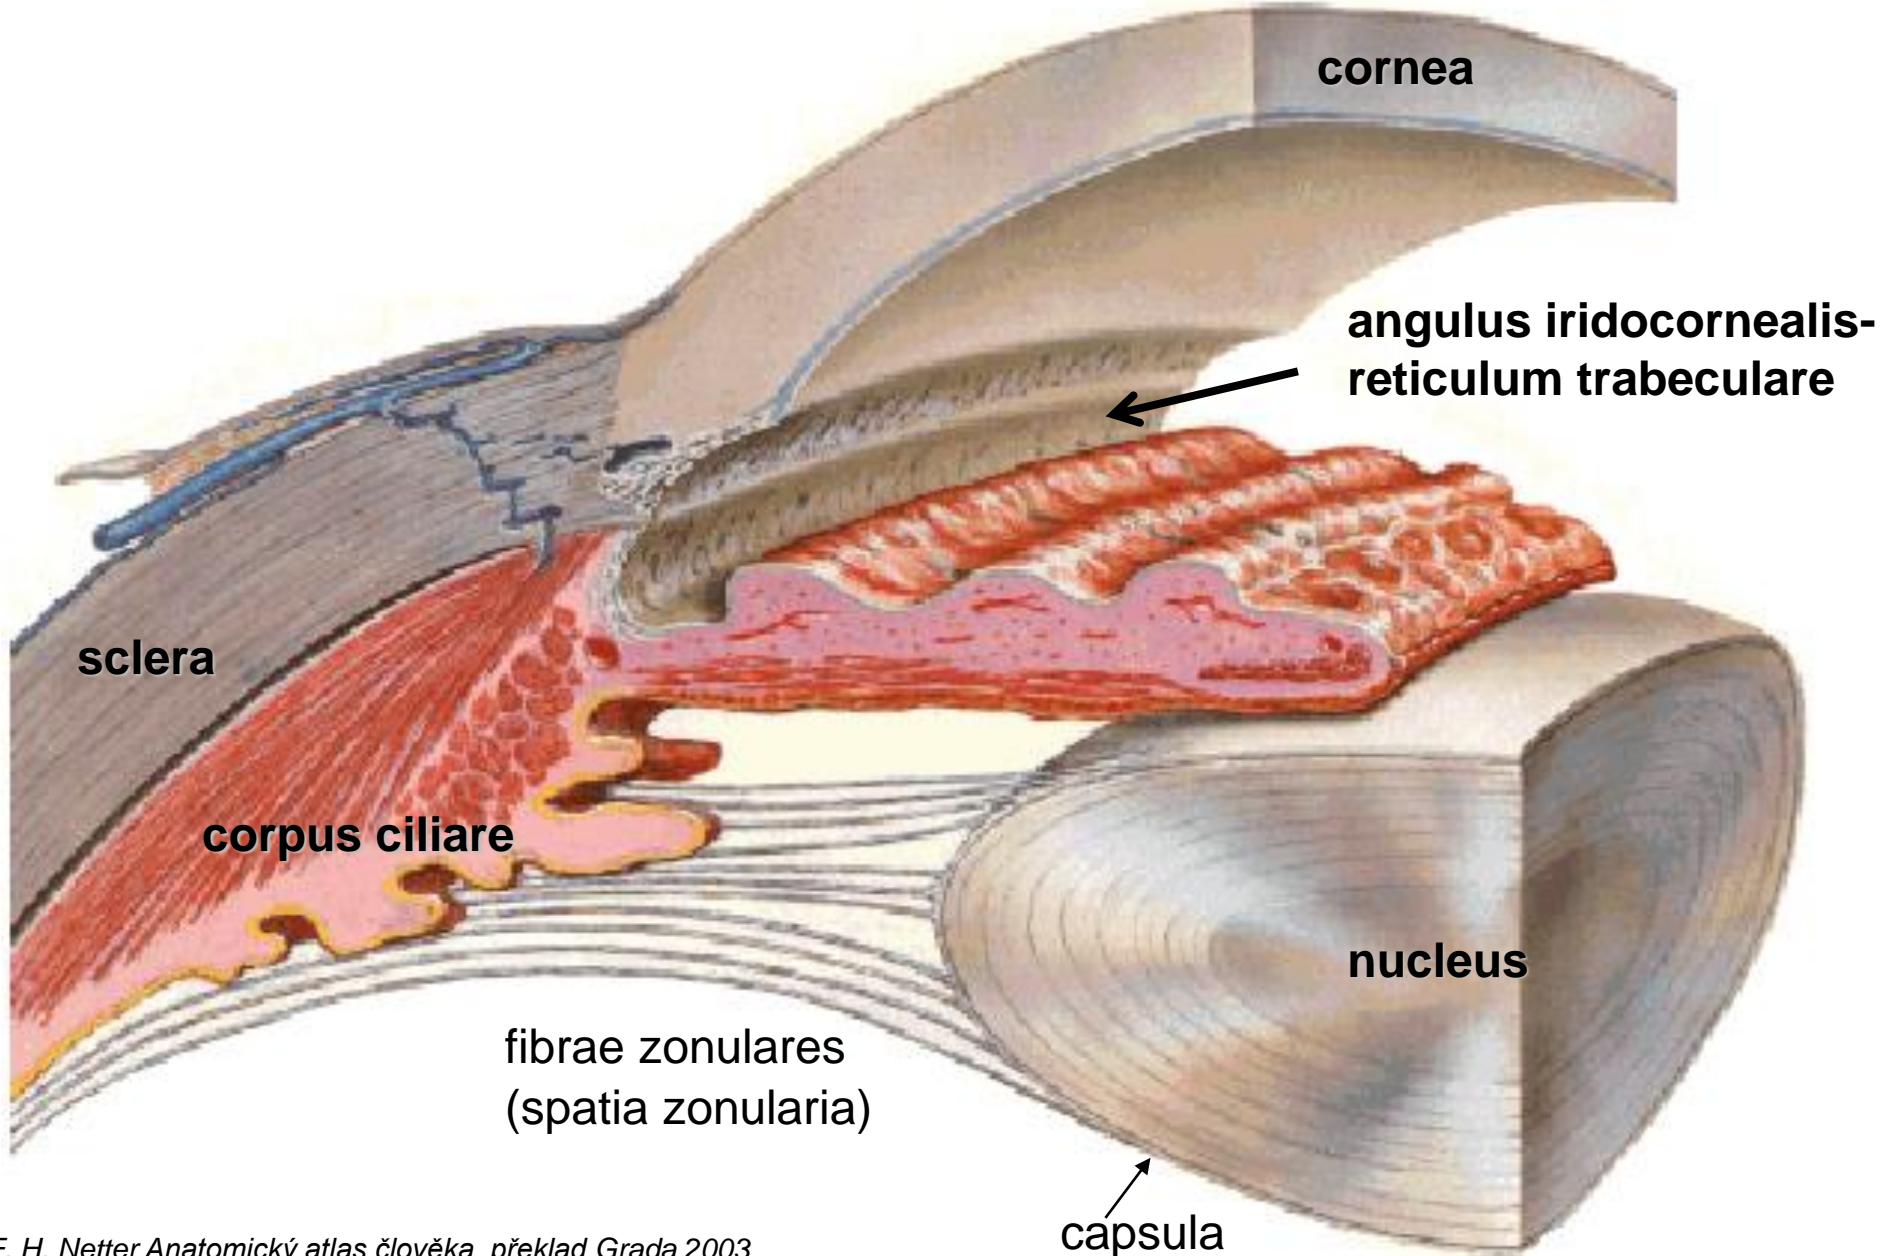

margo ciliaris

facies anterior et posterior iridis

m. sphincter pupillae – parasympathetic fibres - miosis

m. dilatator pupillae – sympathetic fibres - mydriasis

angulus iridocornealis → reticulum trabeculare

TUNICA INTERNA BULBI RETINA

pars optica retinae

pars caeca retinae (pars ciliaris retinae, pars iridica retinae)

ora serrata

pars optica retinae

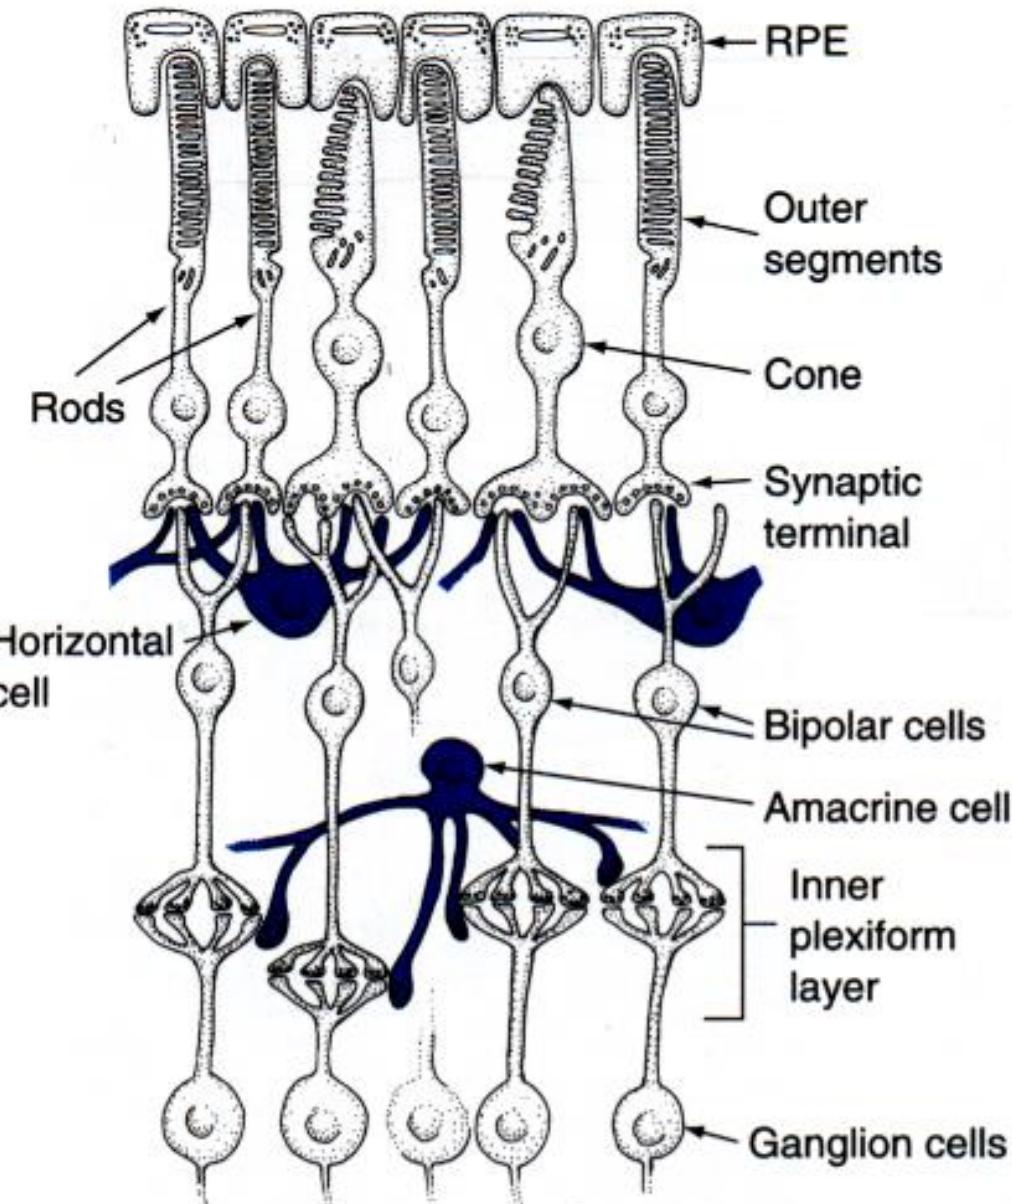

stratum pigmenti retinae (pigmented layer)

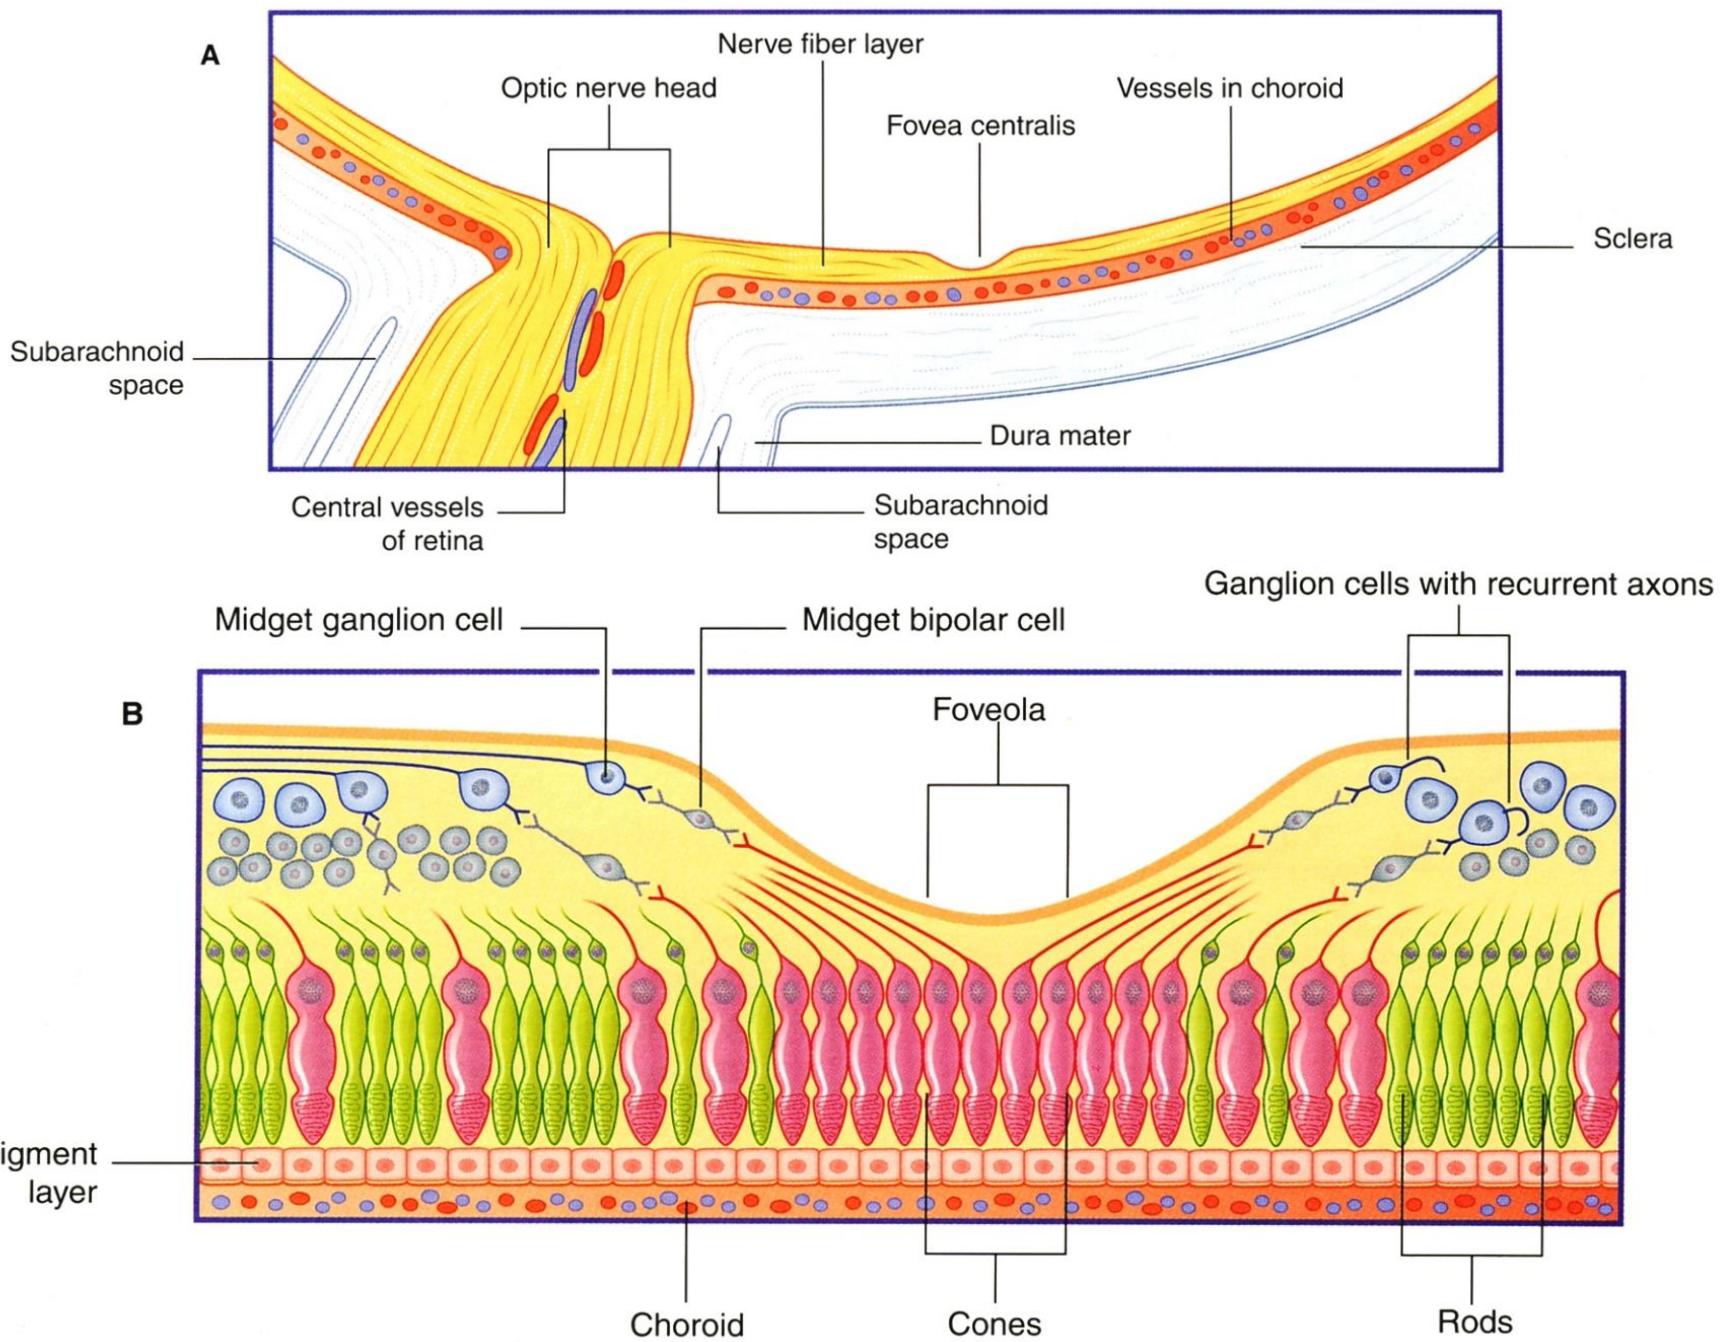

stratum neuroepitheliale (layer of rods and cones)

stratum ganglionare retinae (ganglionic layer of retina)

stratum ganglionare nervi optici (ganglionic layer of optic nerve)

NEURONS OF RETINA

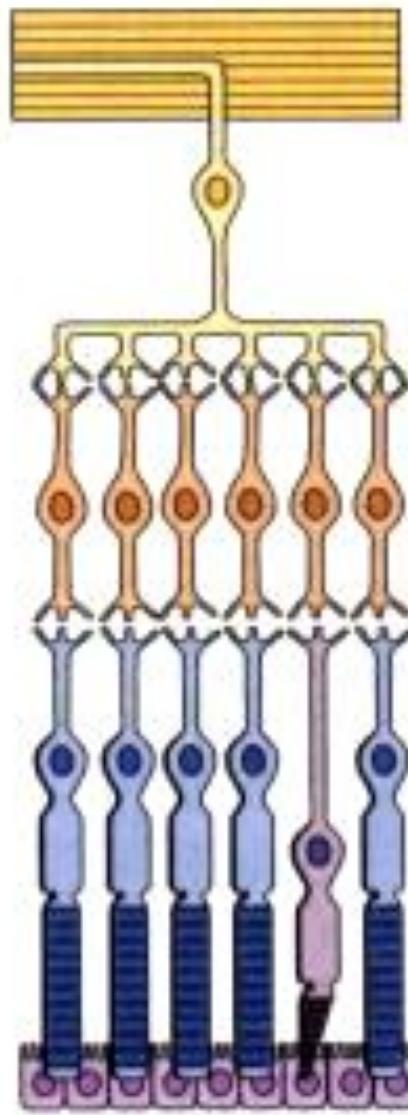

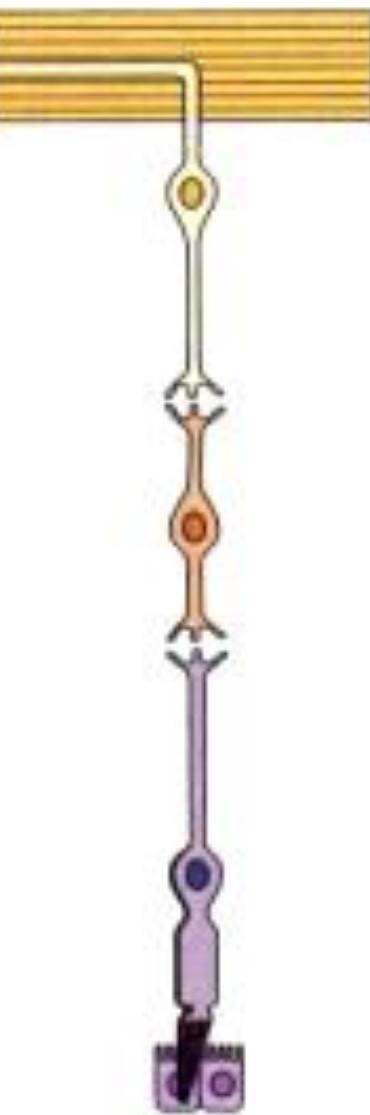

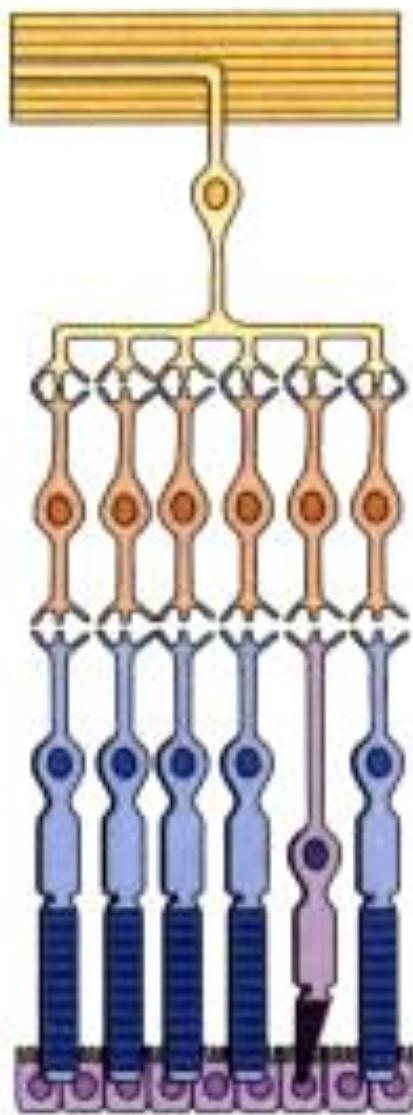

Temporal
periphery

Central
retina

Nasal
periphery

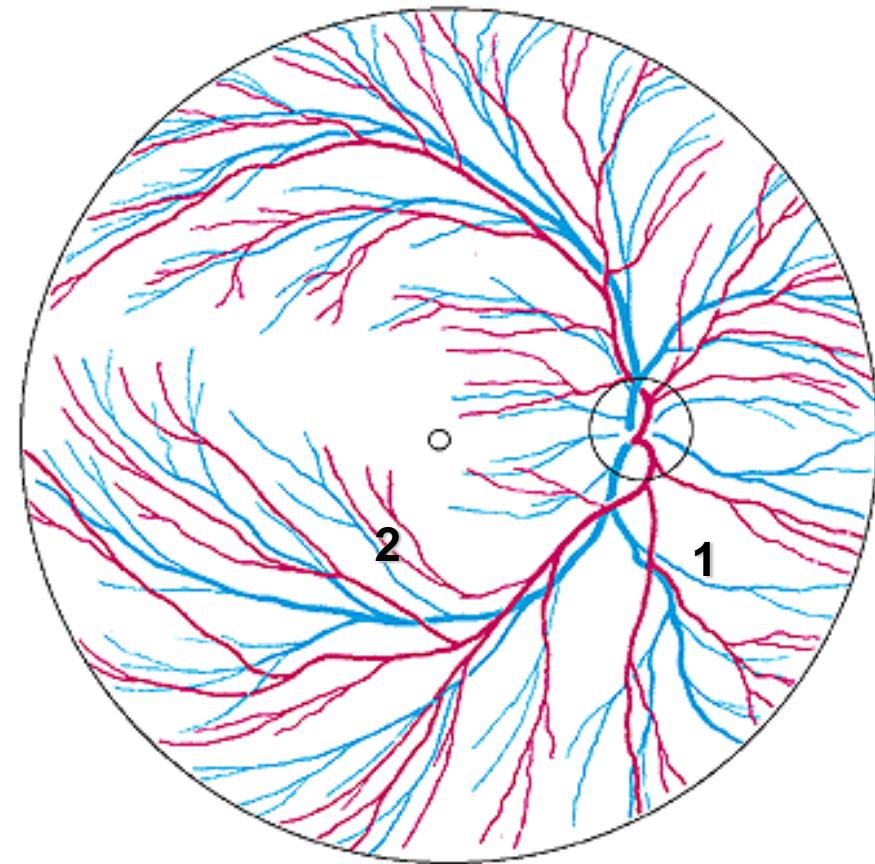

Peripheral retina

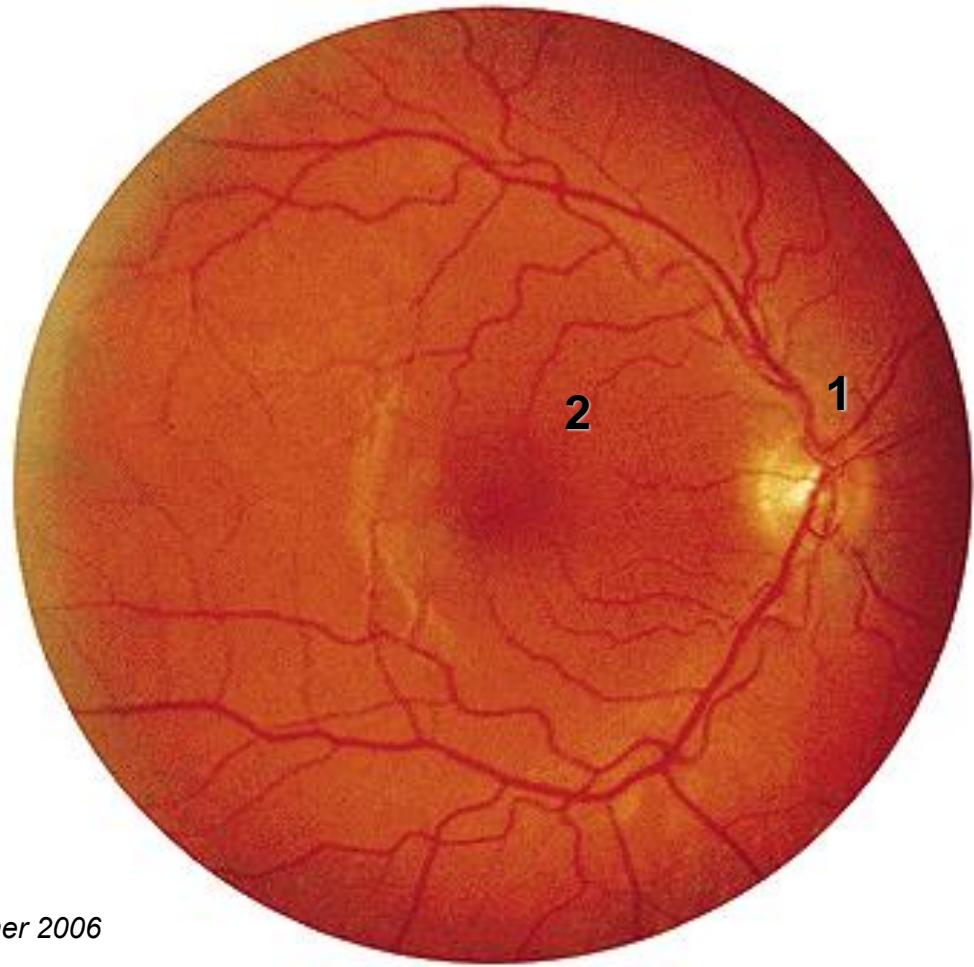

Central retina

Peripheral retina

Ophthalmoscopic picture to view eye fundus

branches of
a. et v. centralis retinae

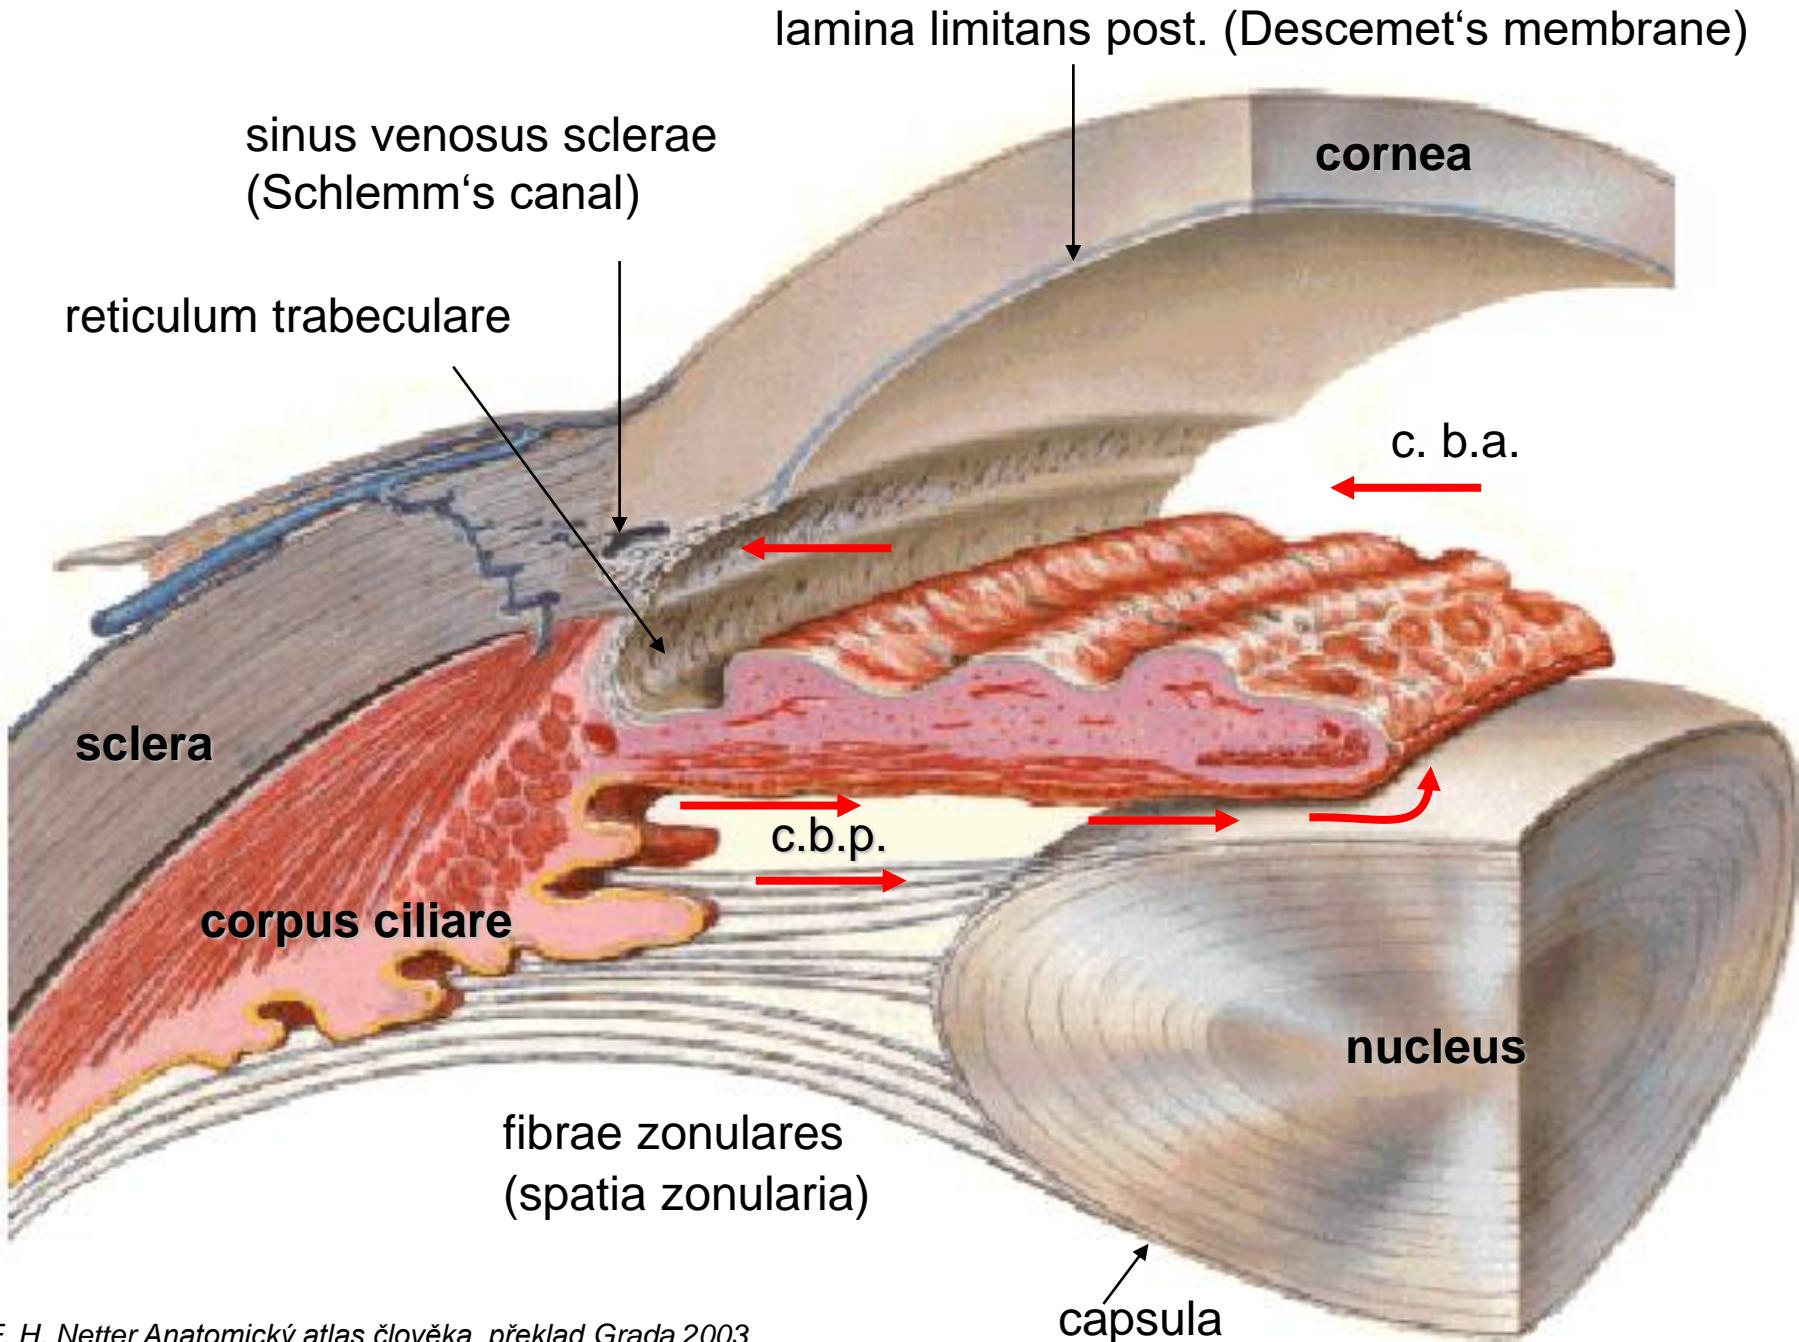

1. discus nervi optici - excavatio disci

2. macula (lutea) - fovea centralis

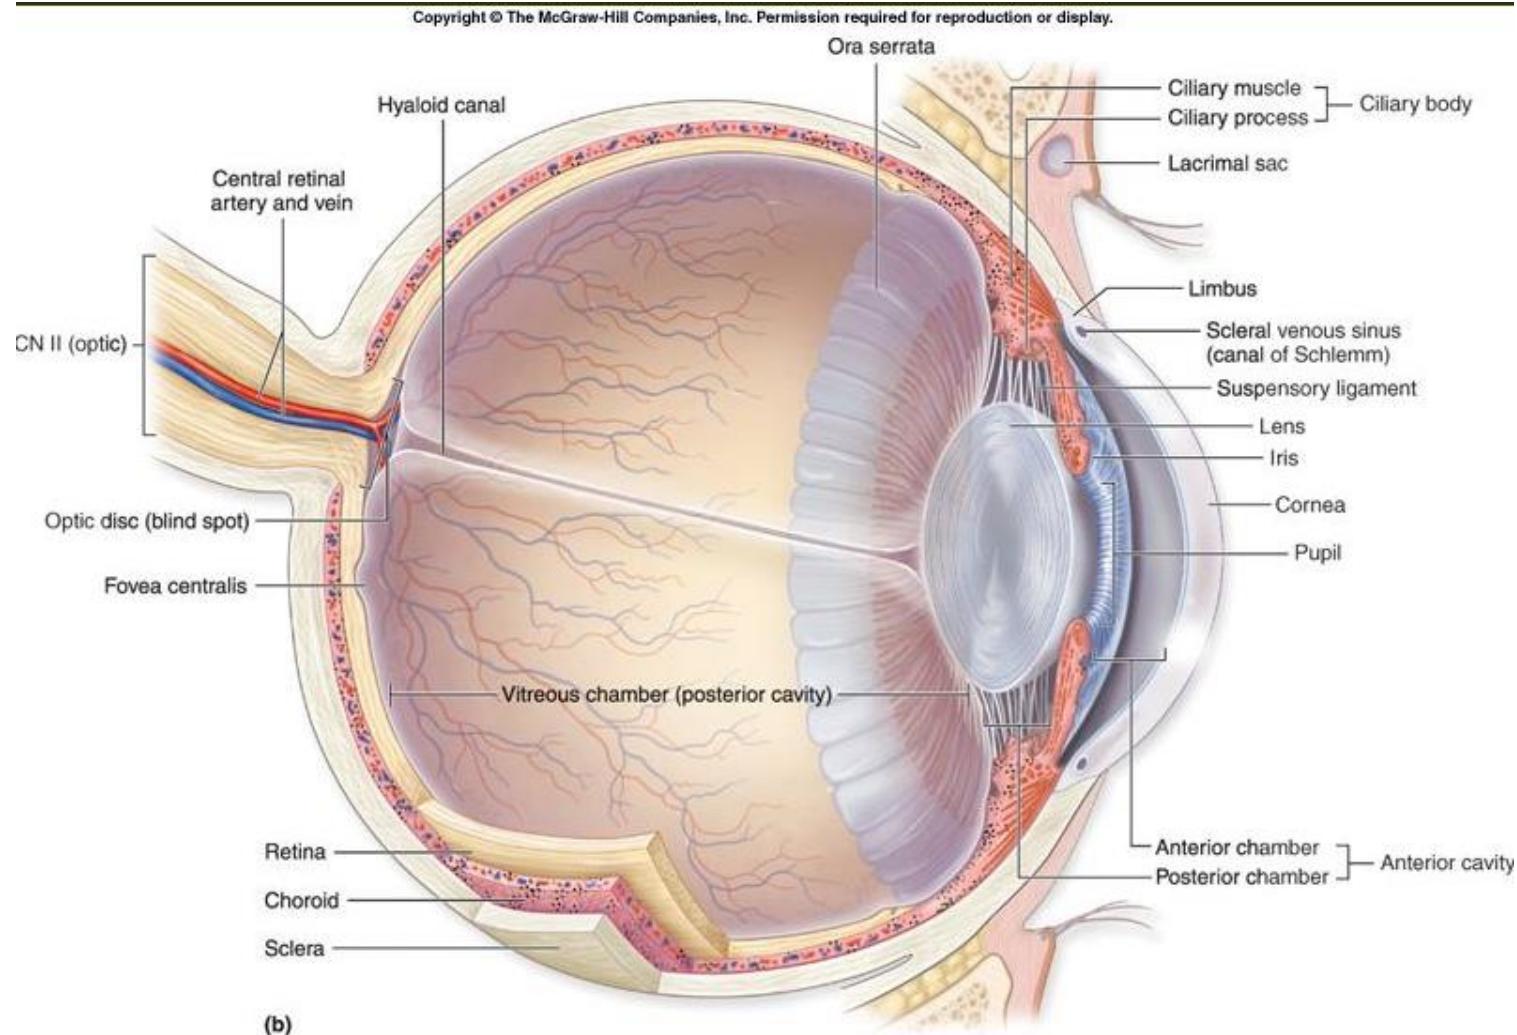

Diabetic retinopathy

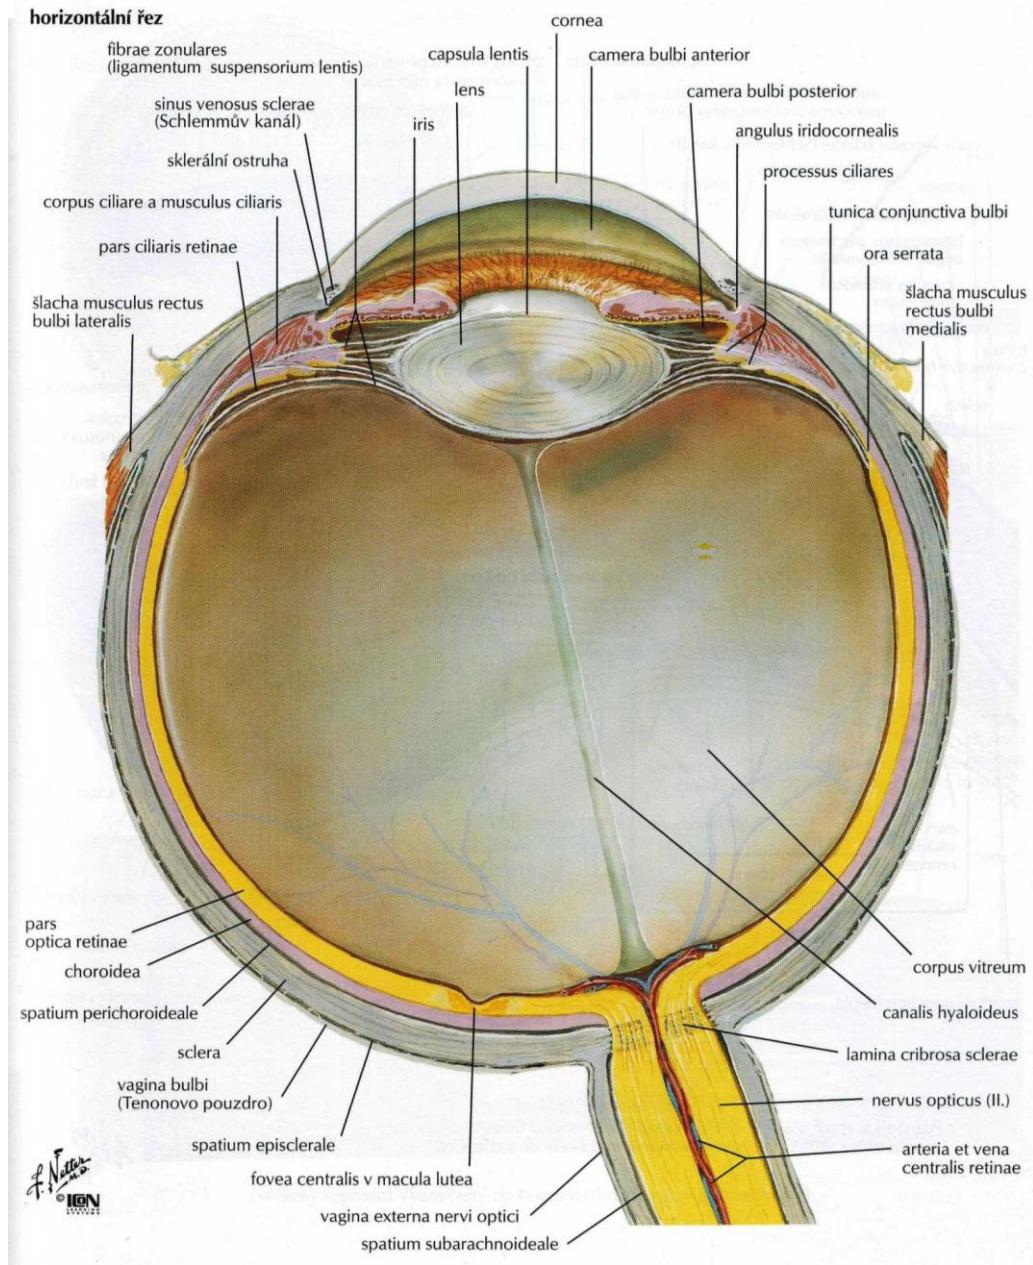

Vitreous chamber – Aqueous humour

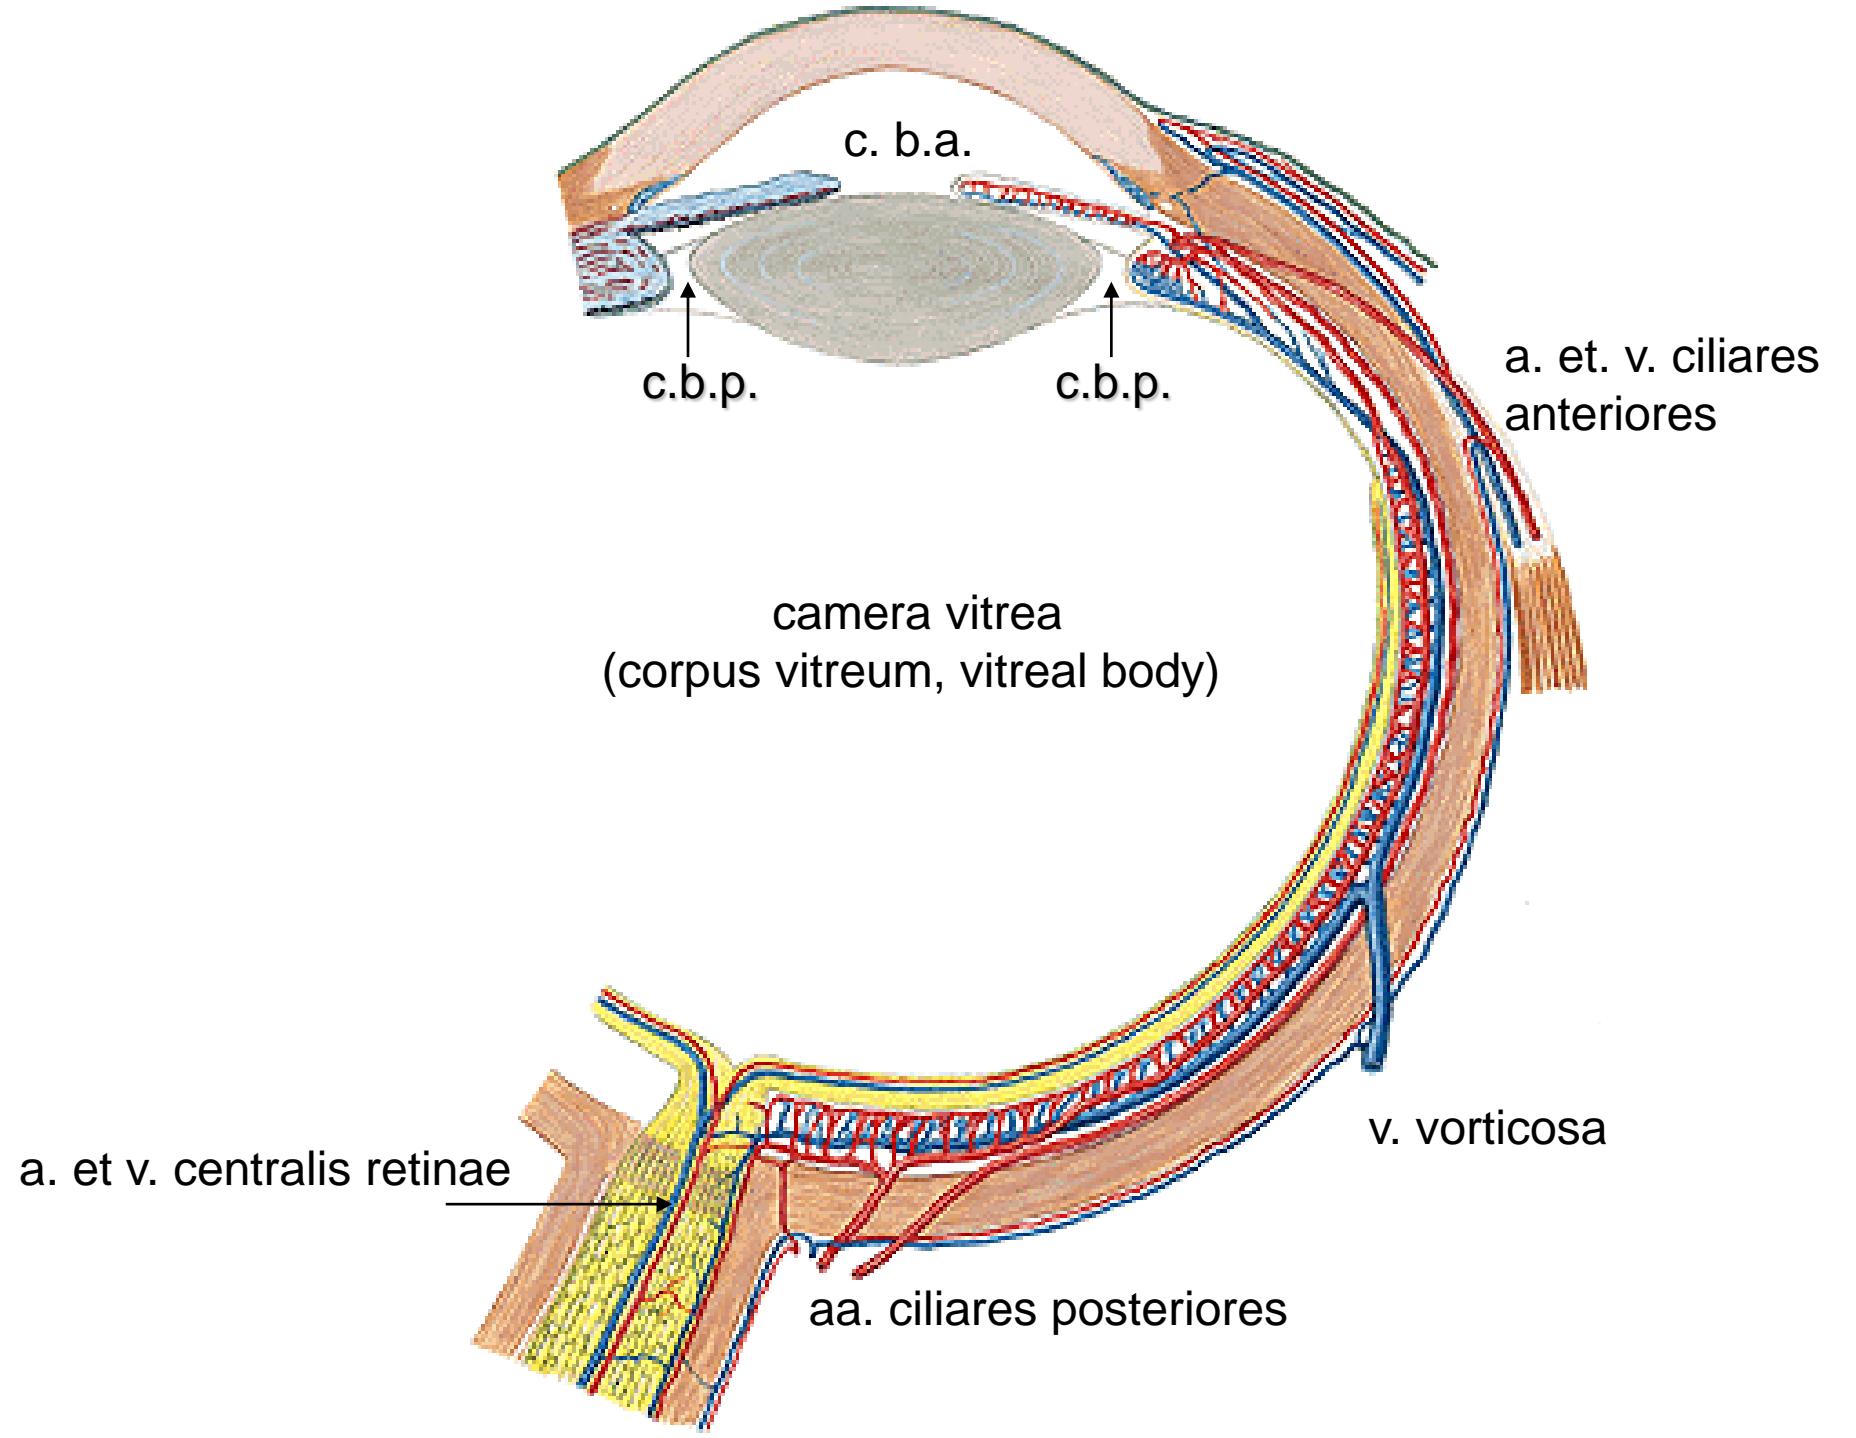

embryonic hyaloid a. – hyaloid canal

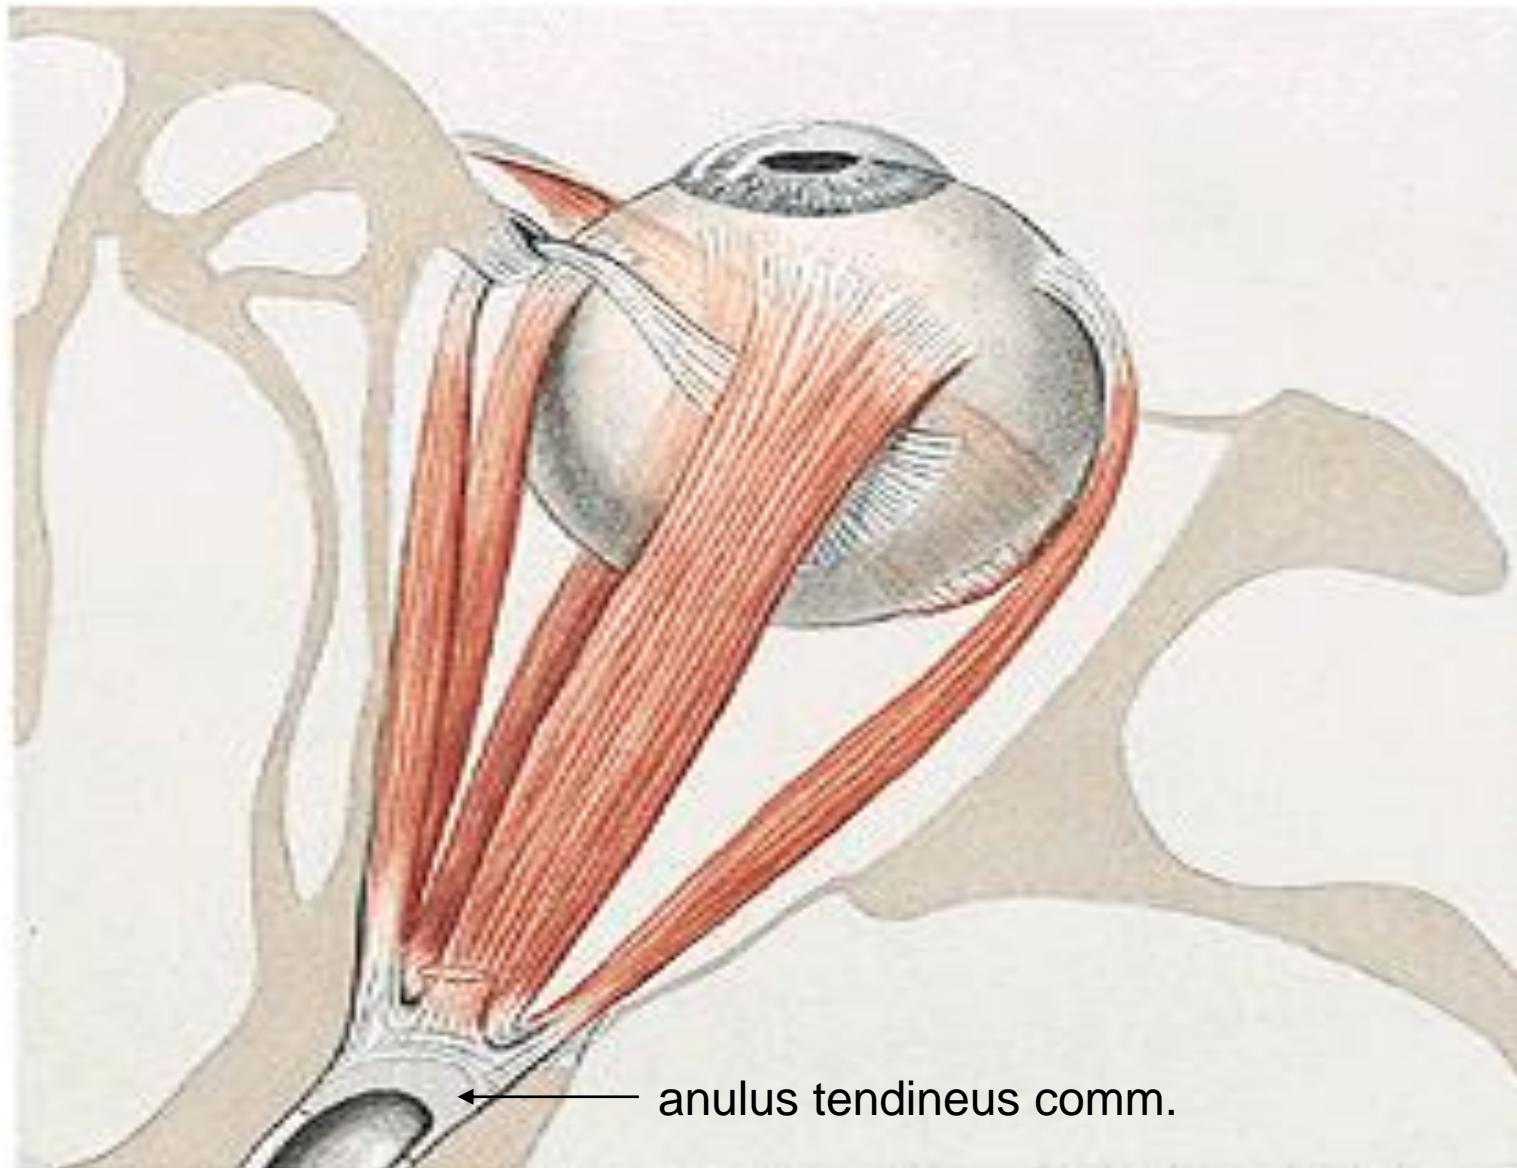

Camera vitrea – humor aquosus

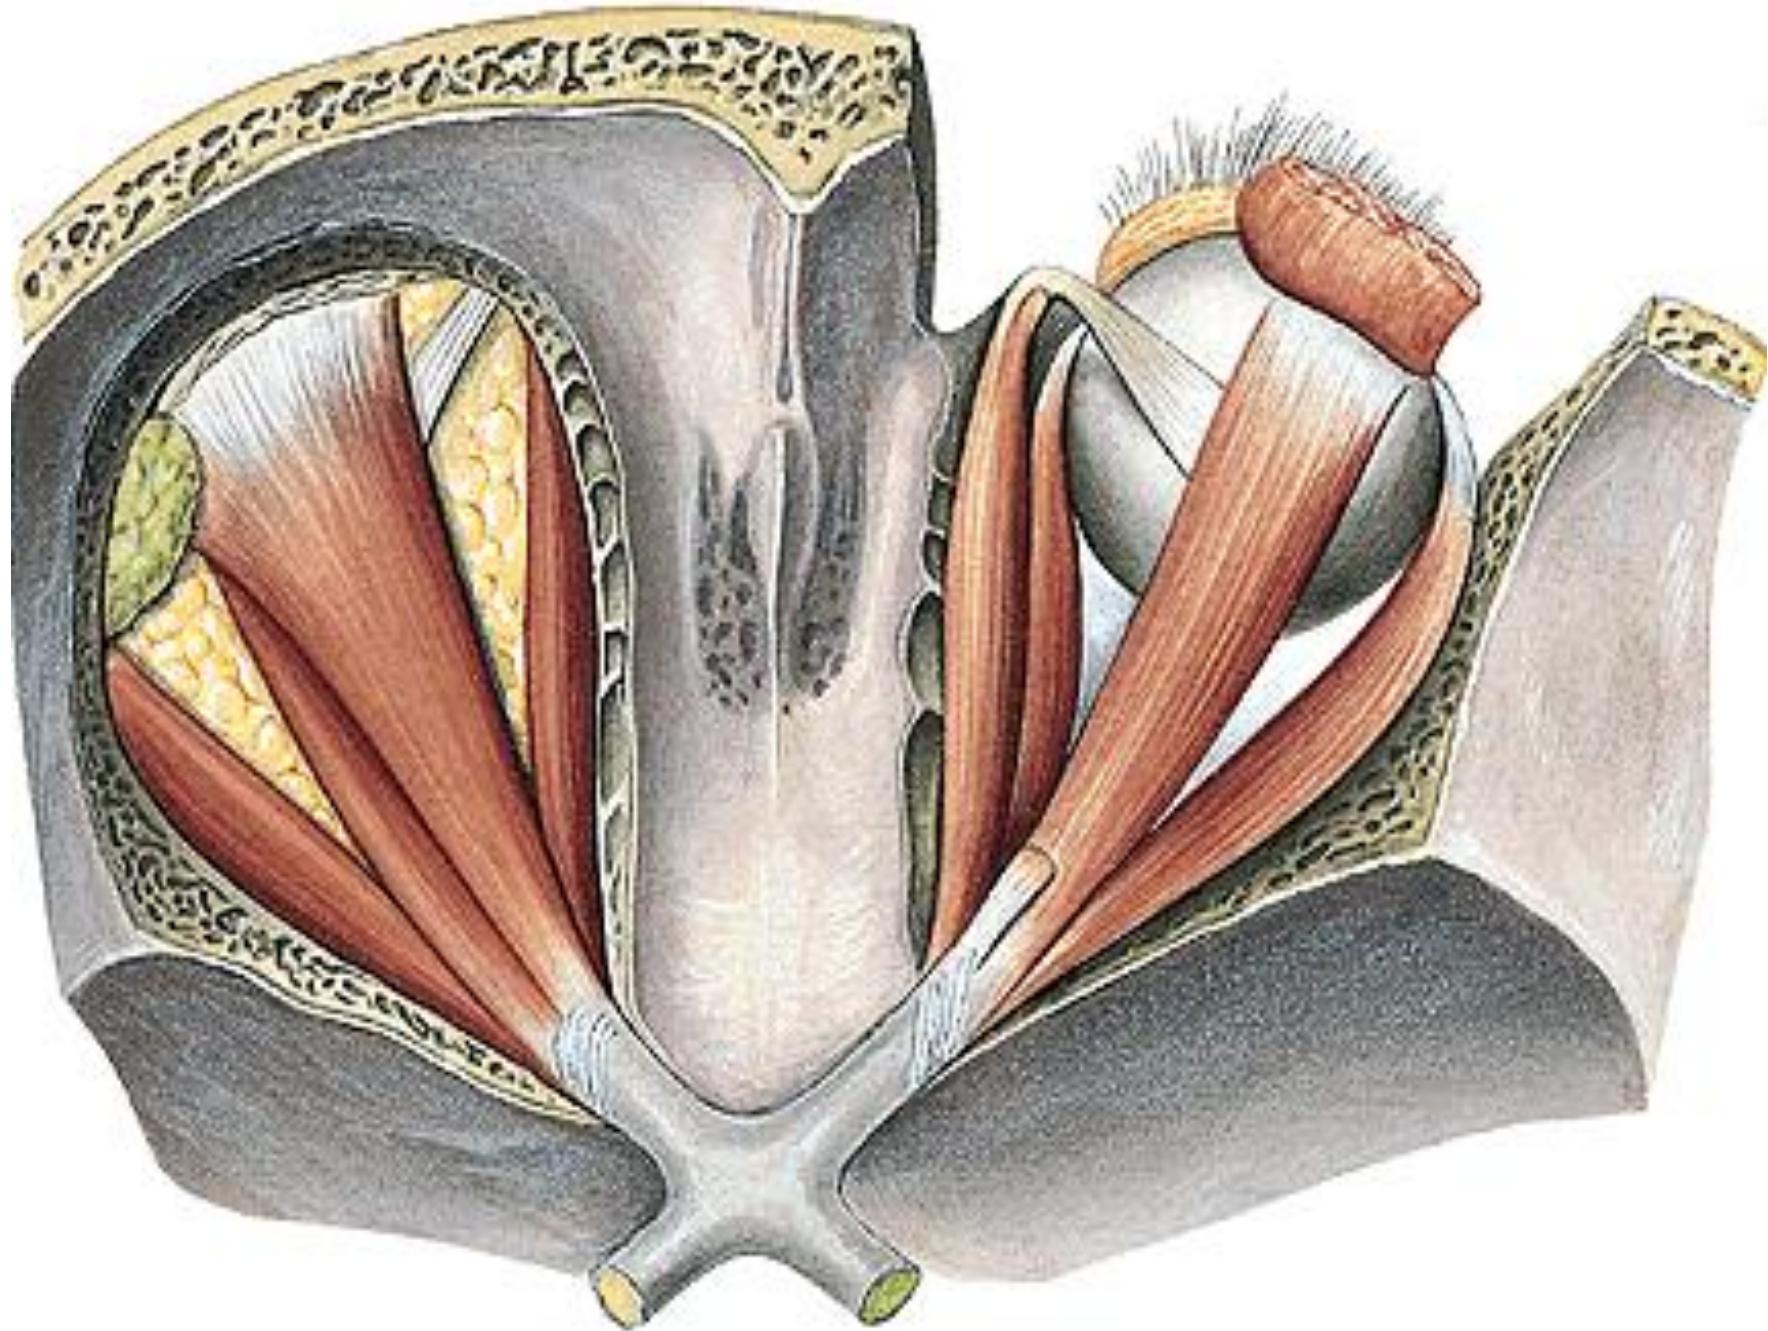

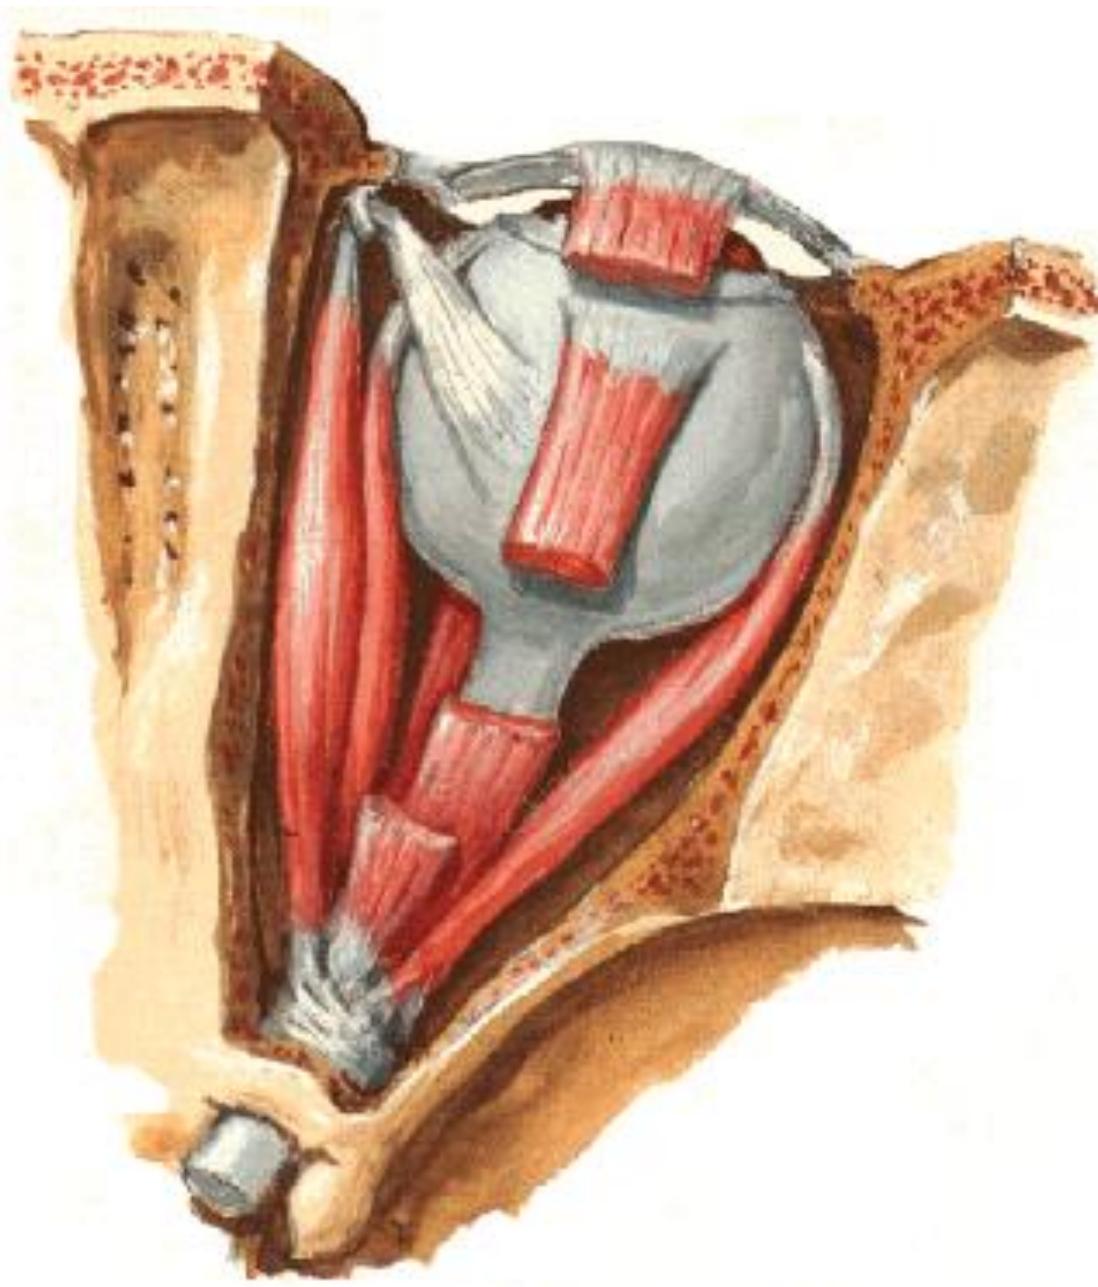

F. H. Netter Anatomický atlas člověka, překlad Grada 2003

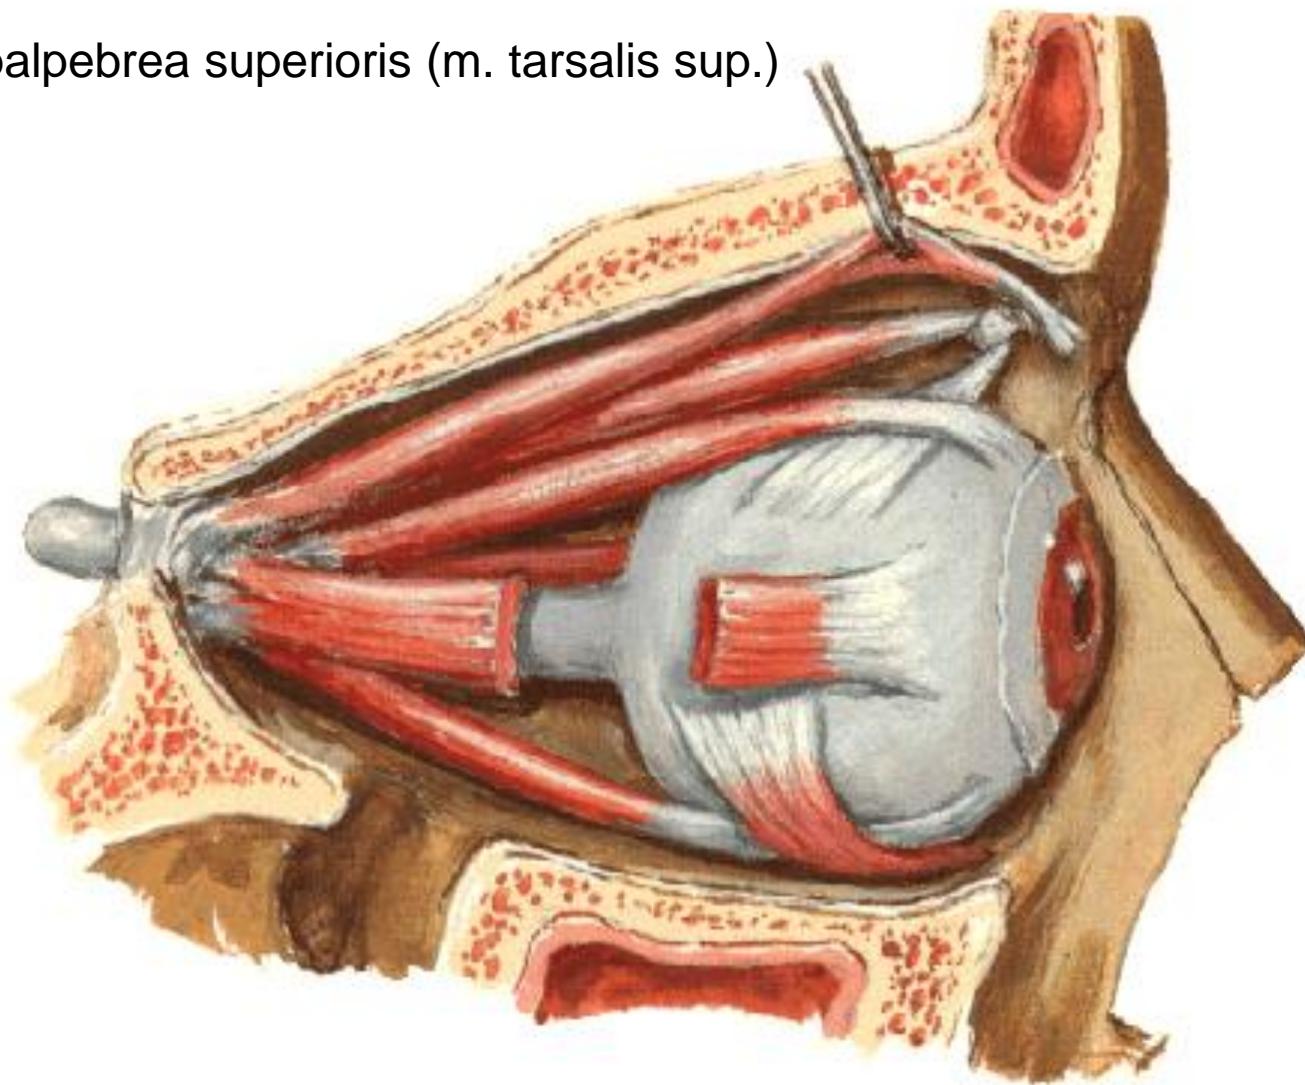

Striated extraocular muscles

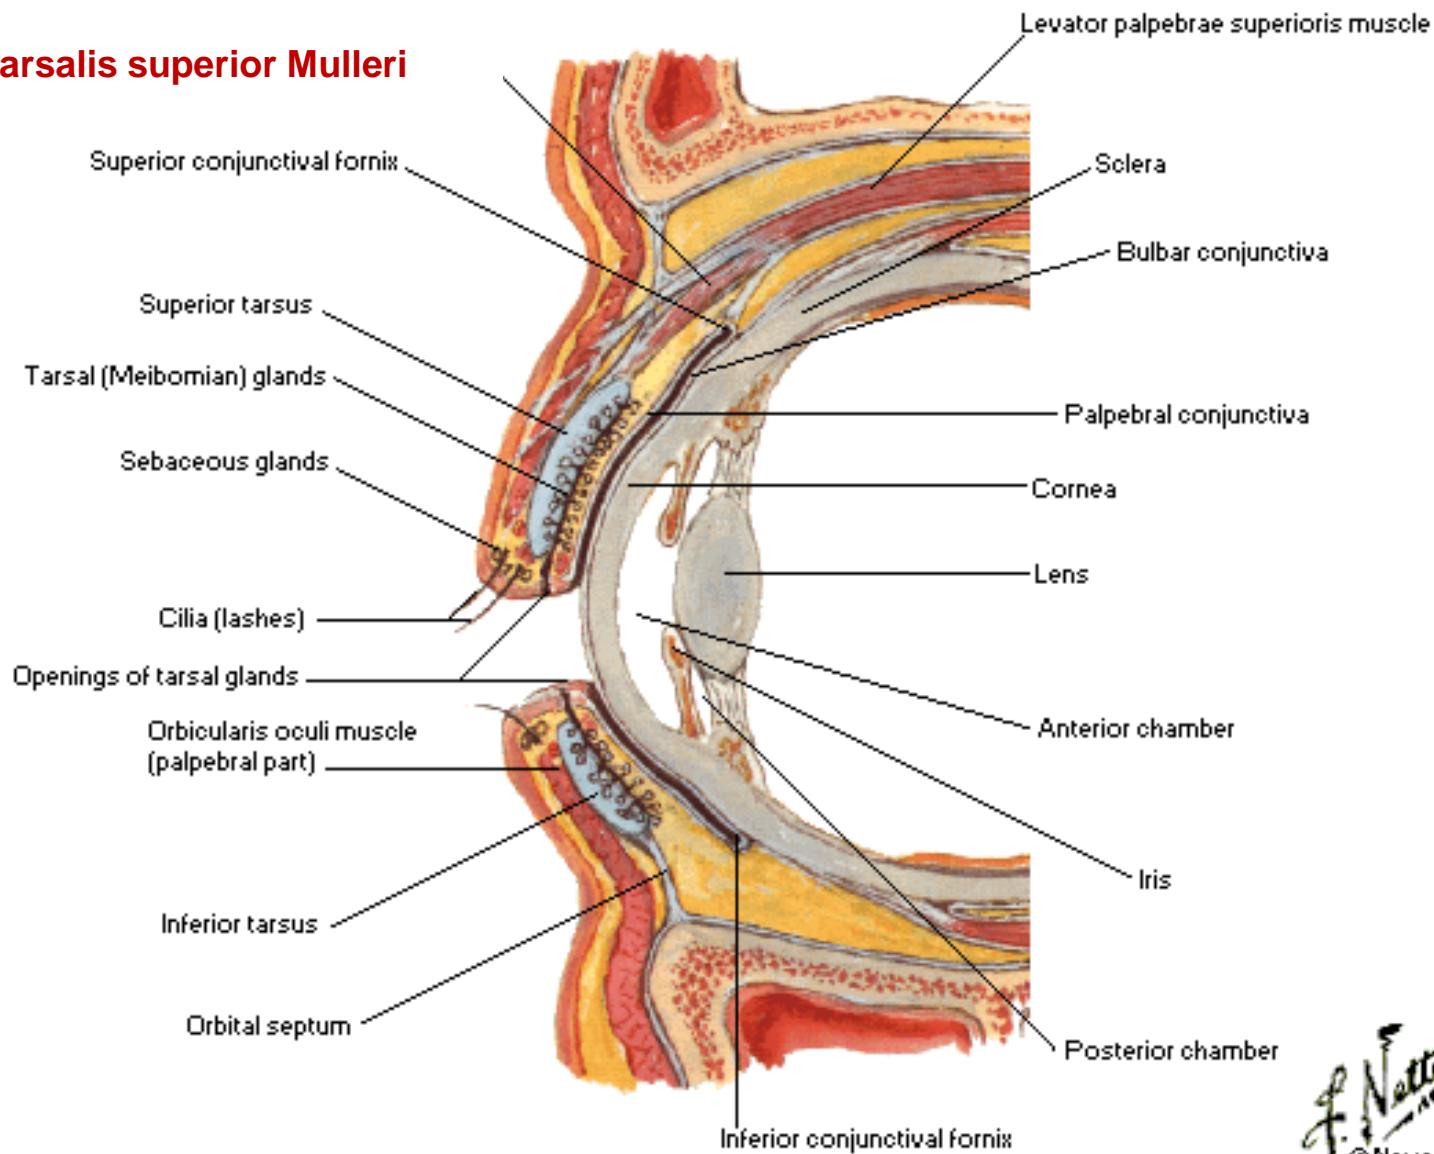

m. levator palpebrae superioris (m. tarsalis sup.)

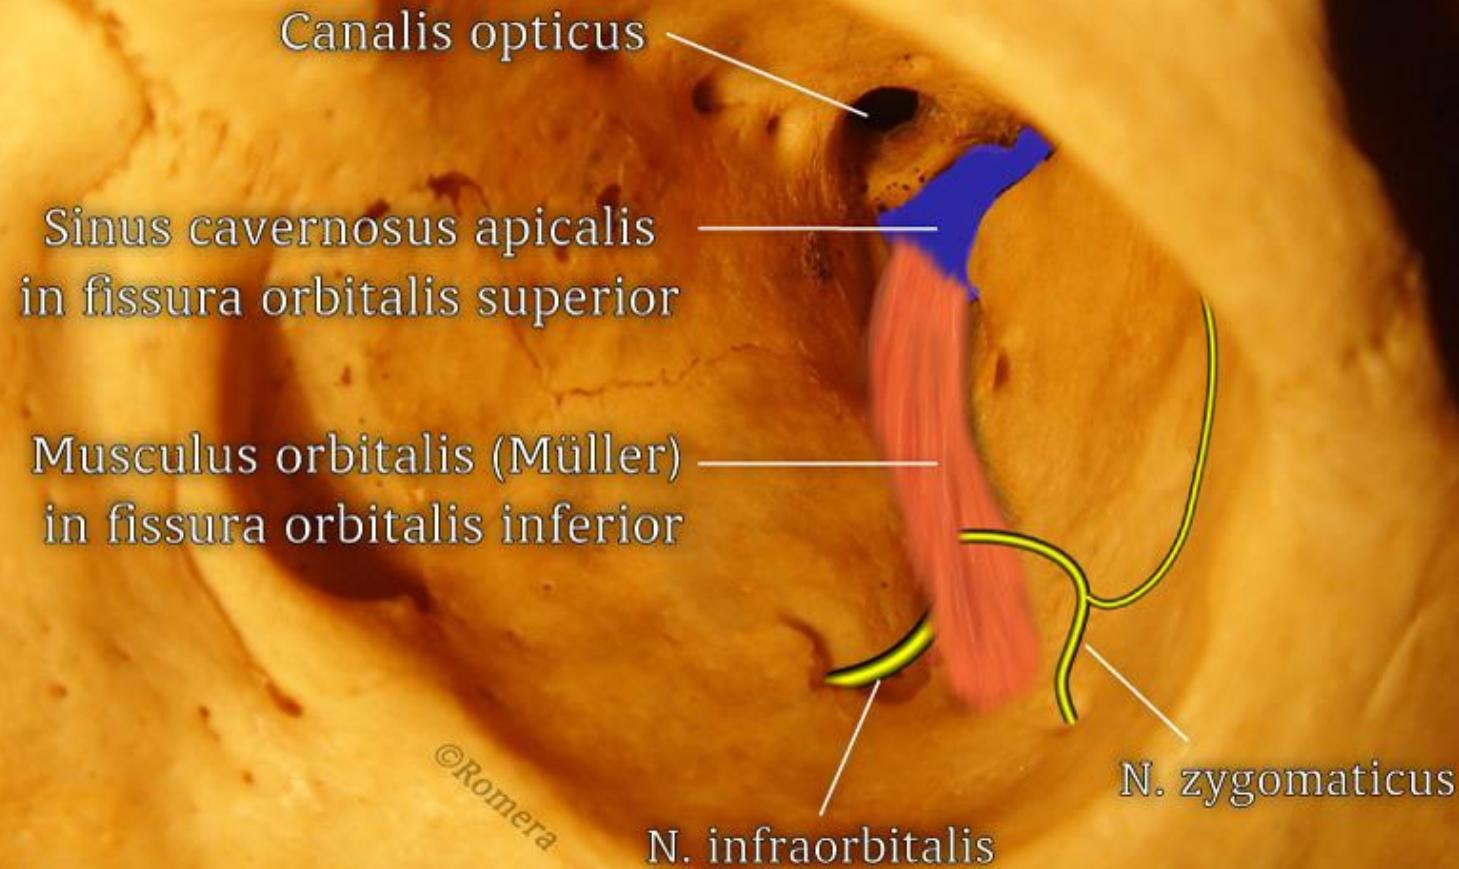

Smooth extraocular muscles

m. tarsalis superior Mulleri

F. Netter
© Novartis

M. orbitalis

Horner's syndrome

Horner's triad: miosis, ptosis of eyelid, enophthalmus

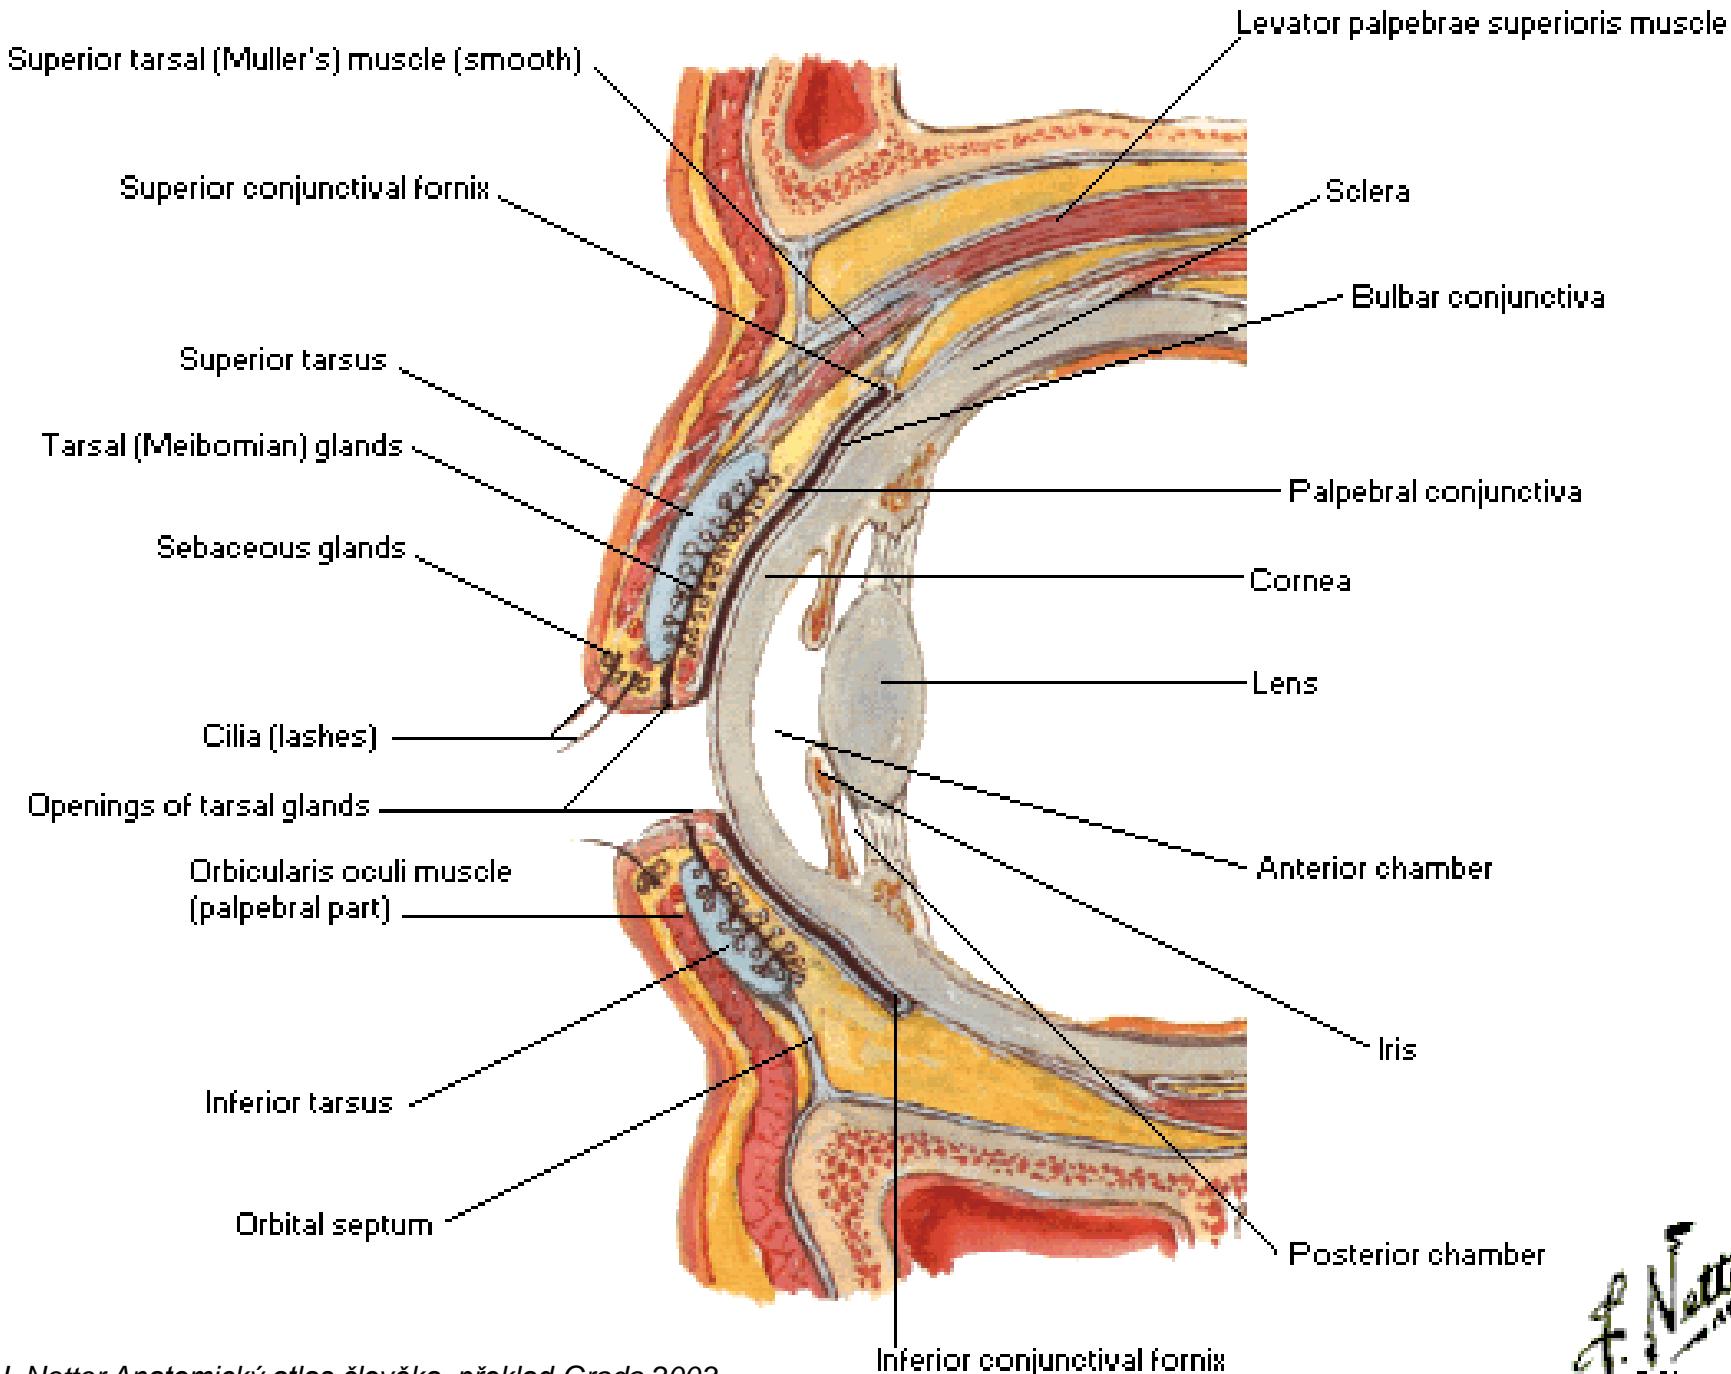

Injury/compression – cervical sympathetic, both preganglionic and postganglionic (plexus caroticus)

Tunica conjunctiva - conjunctiva

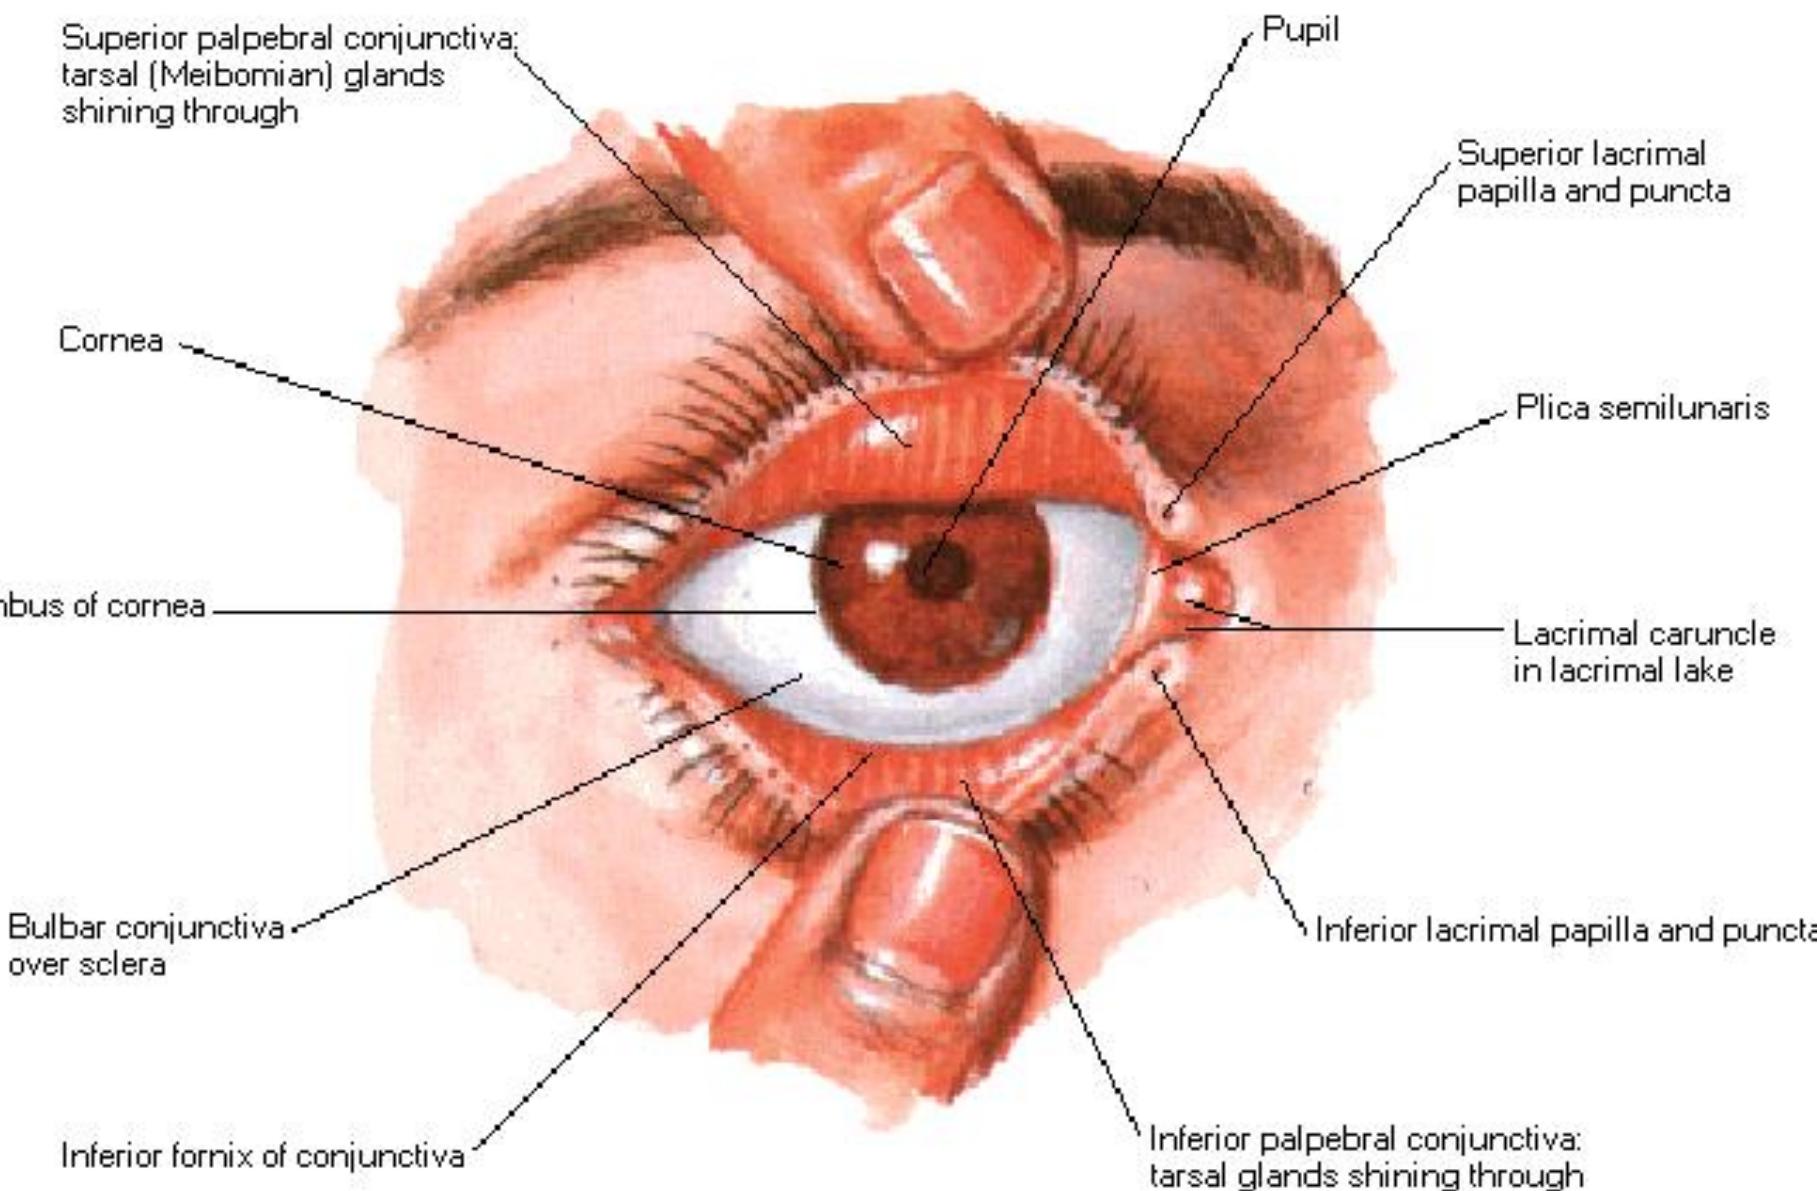

tunica conjunctiva bulbi et palpebrarum **conjunctiva of eyeball and eye lids**
fornix conjunctivae sup. et inf.

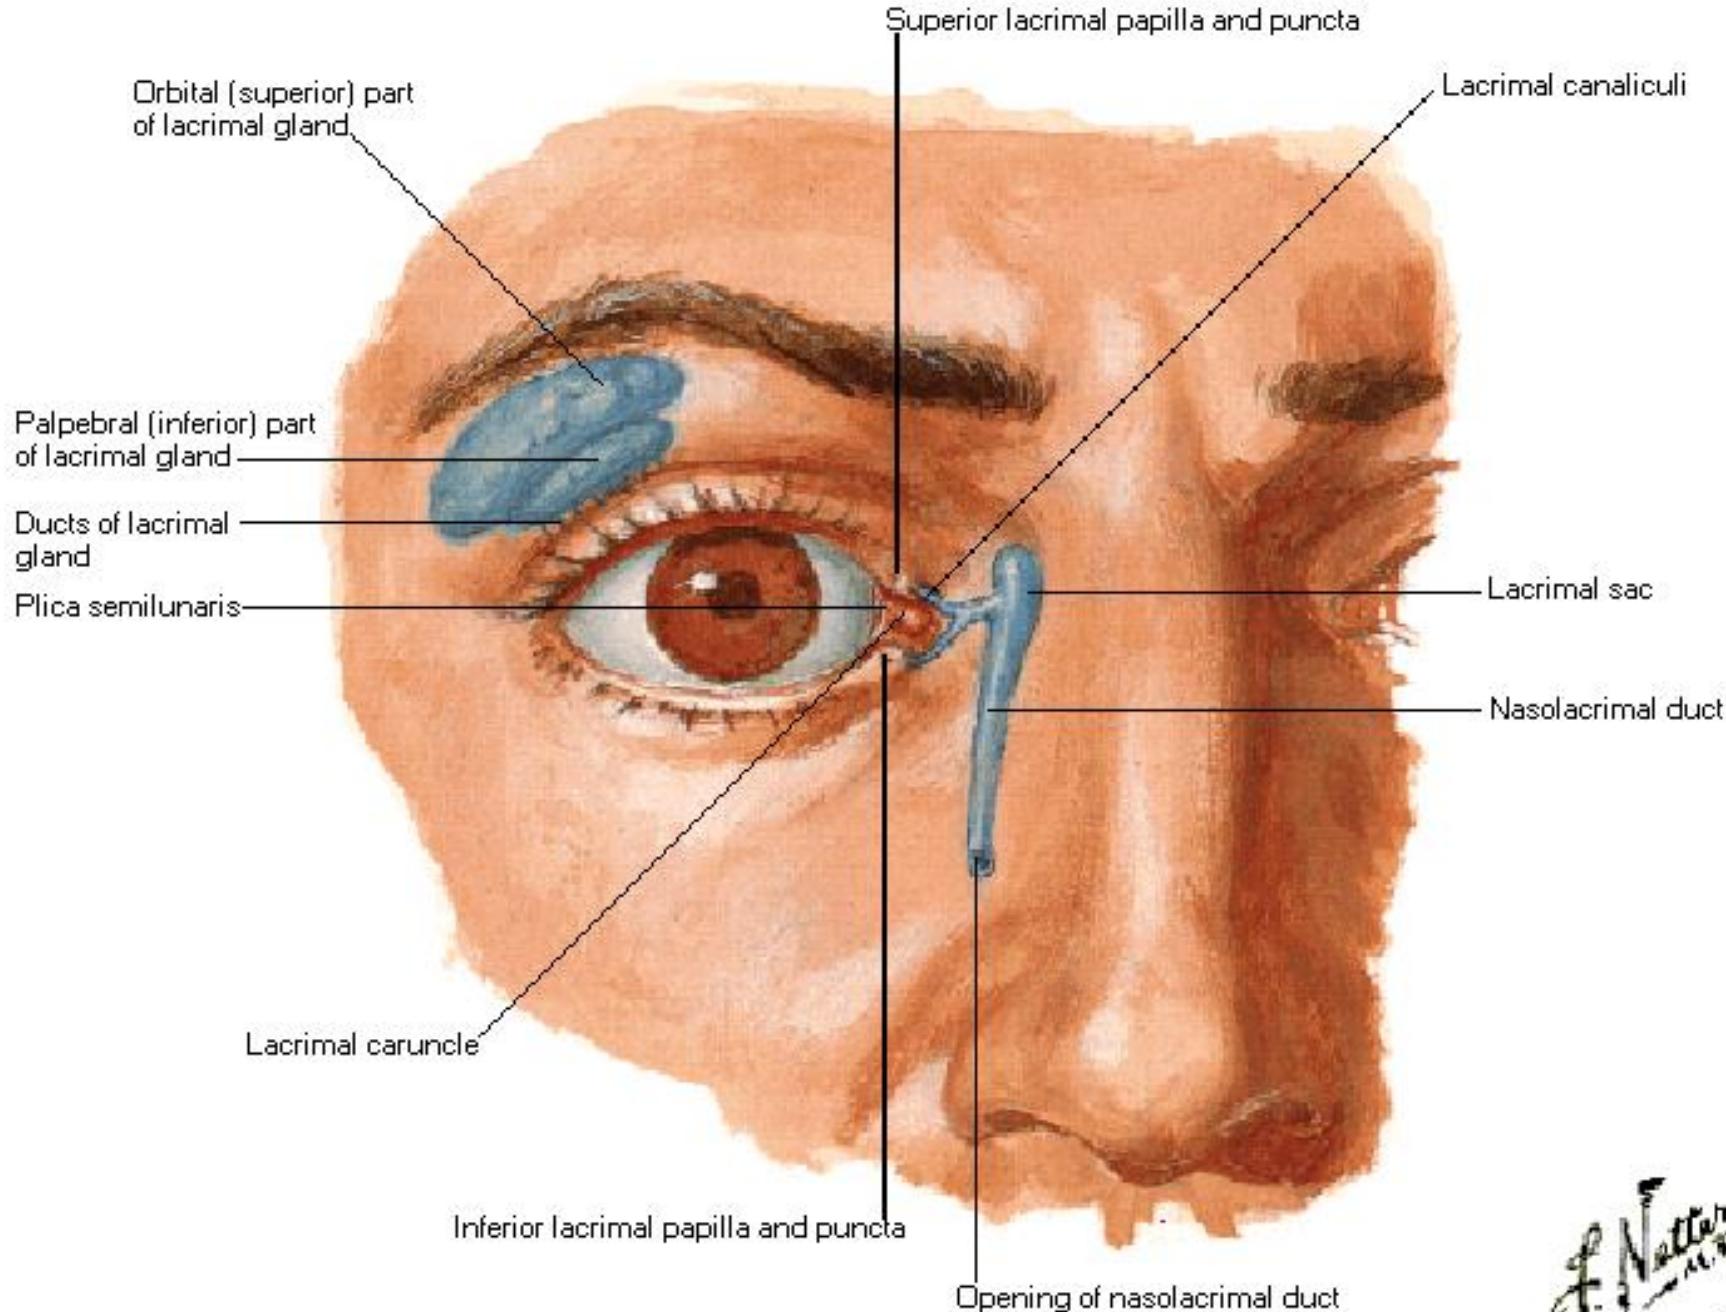

Palpebrae – eye lids

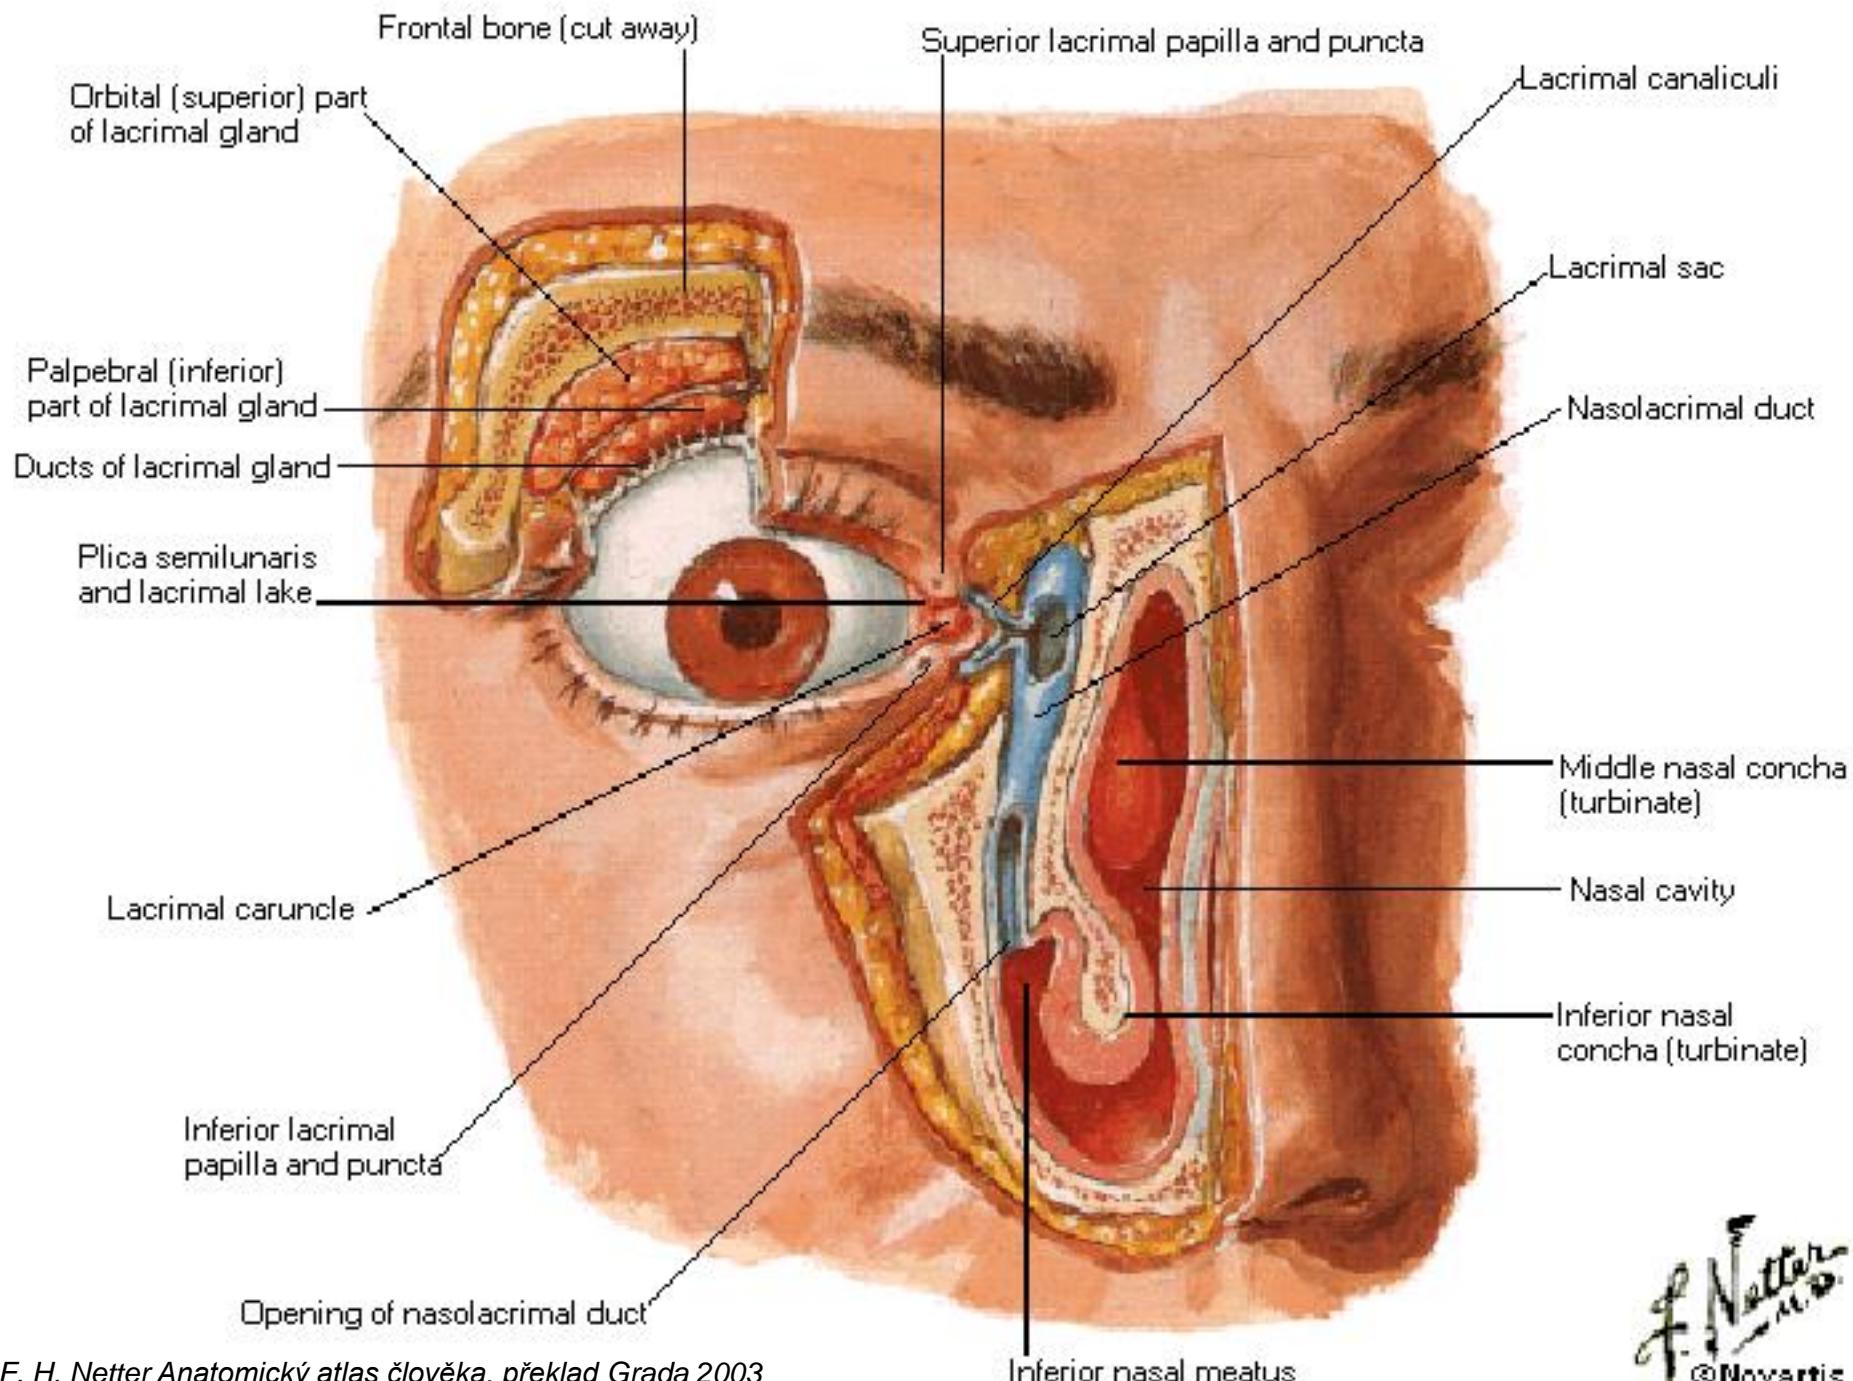

- tarsus sup. et inf.
- lig. palpebrale med. et lat.
- rima palpebrarum
- rivus lacrimalis
- angulus oculi medialis et lateralis
- gll. tarsales (Meibomi) – flow into rima (sebaceous)
- gll.ciliares (Molli) – openings are related with rima et cilie (apocrine sudorific)
- gll. sebaceae (Zeisi) – openings are related with cilie (holocrine sebaceous)
- hordeolum

Lacrimal apparatus

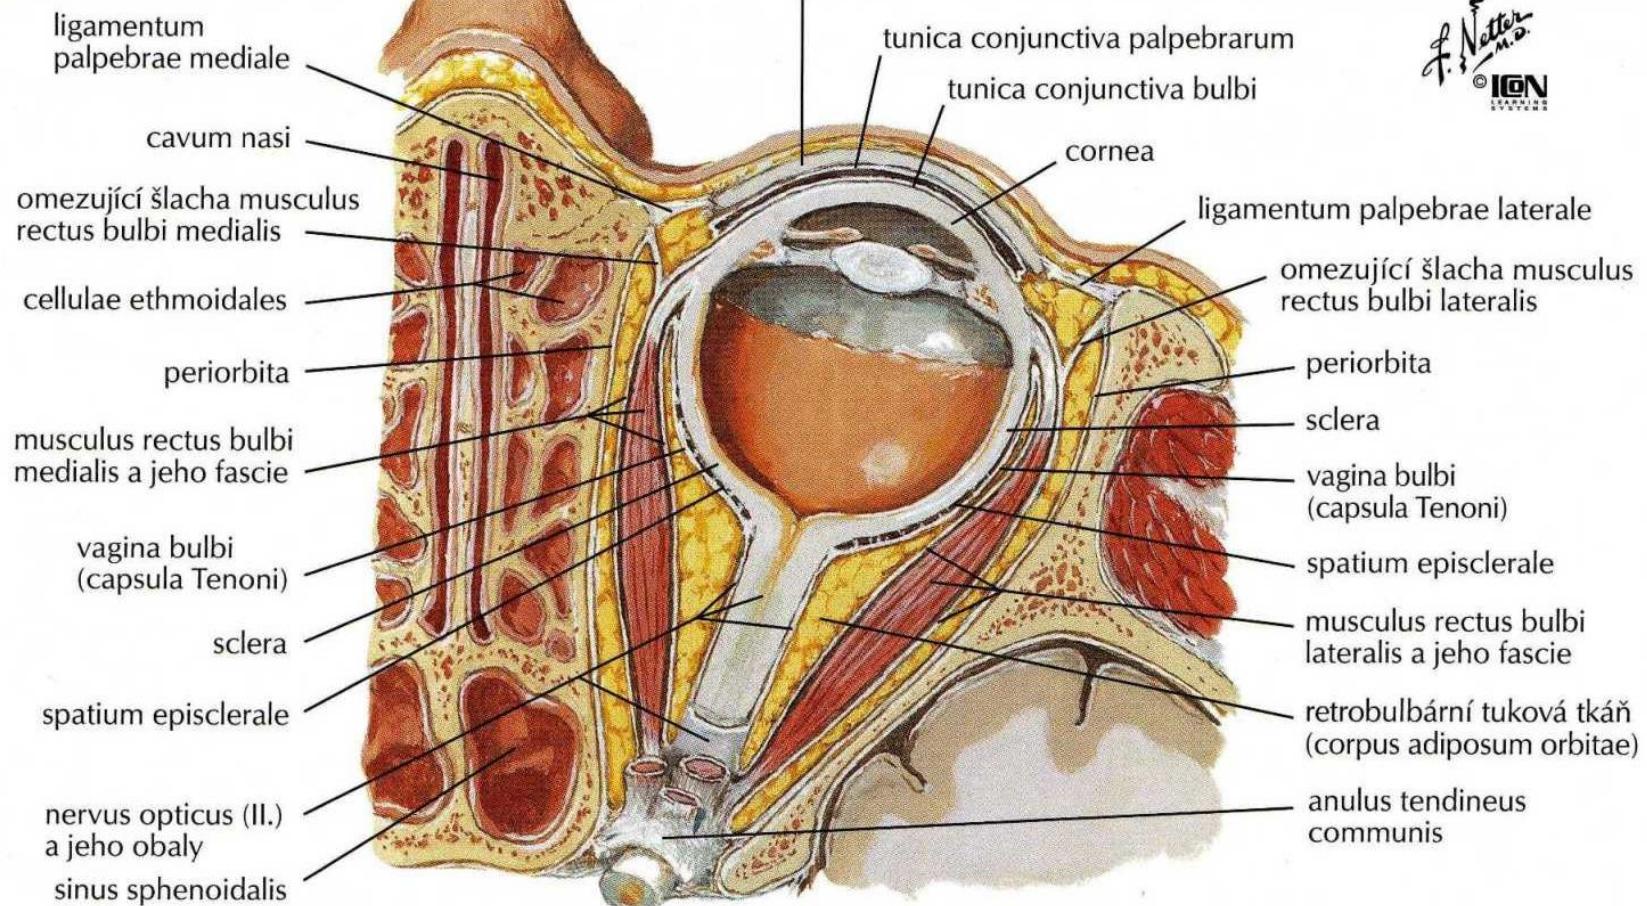

Orbit

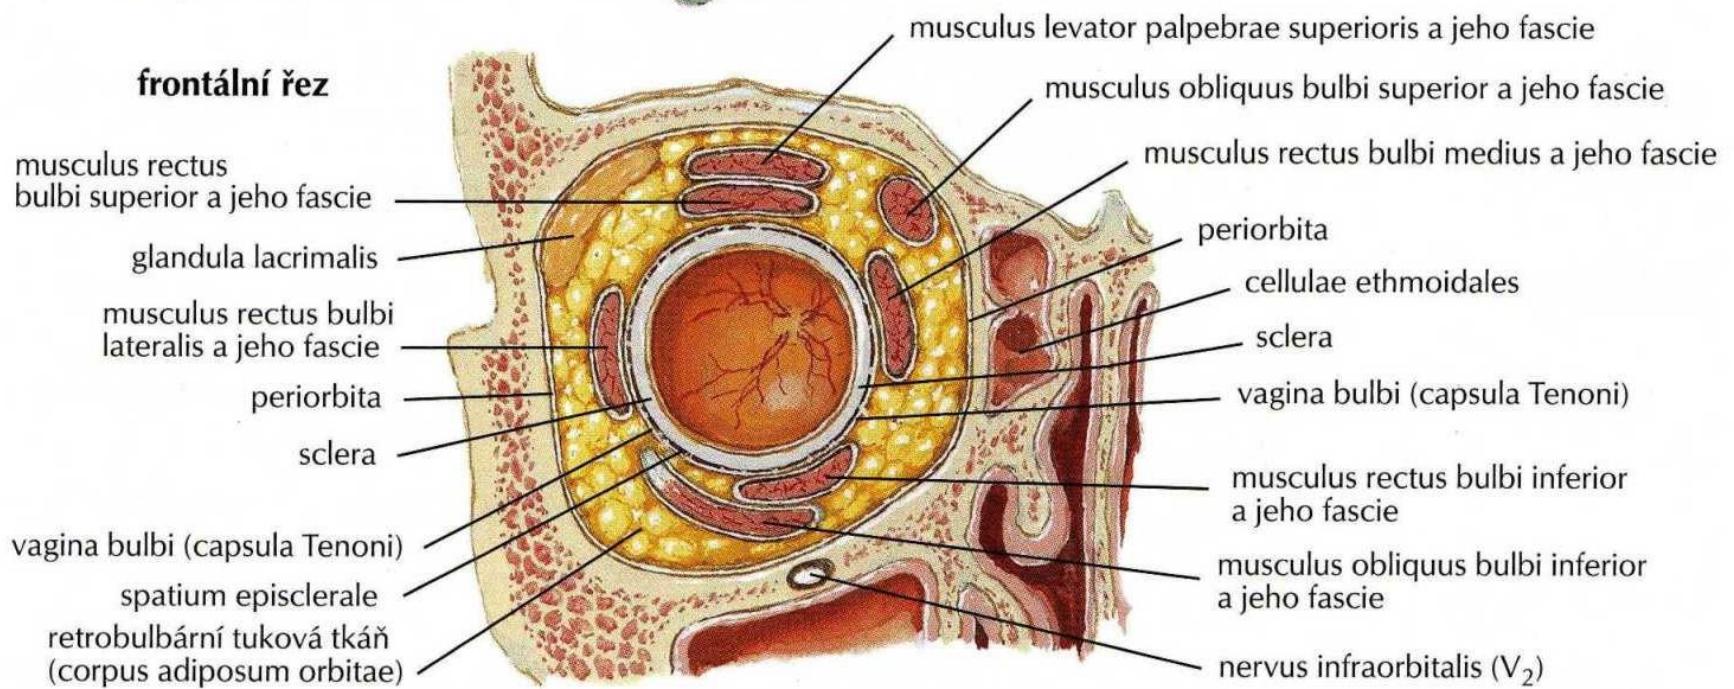

Walls of orbit – periorbita
Vagina (fascia) bulbi (Tenoni)
Corpus adiposum orbitae

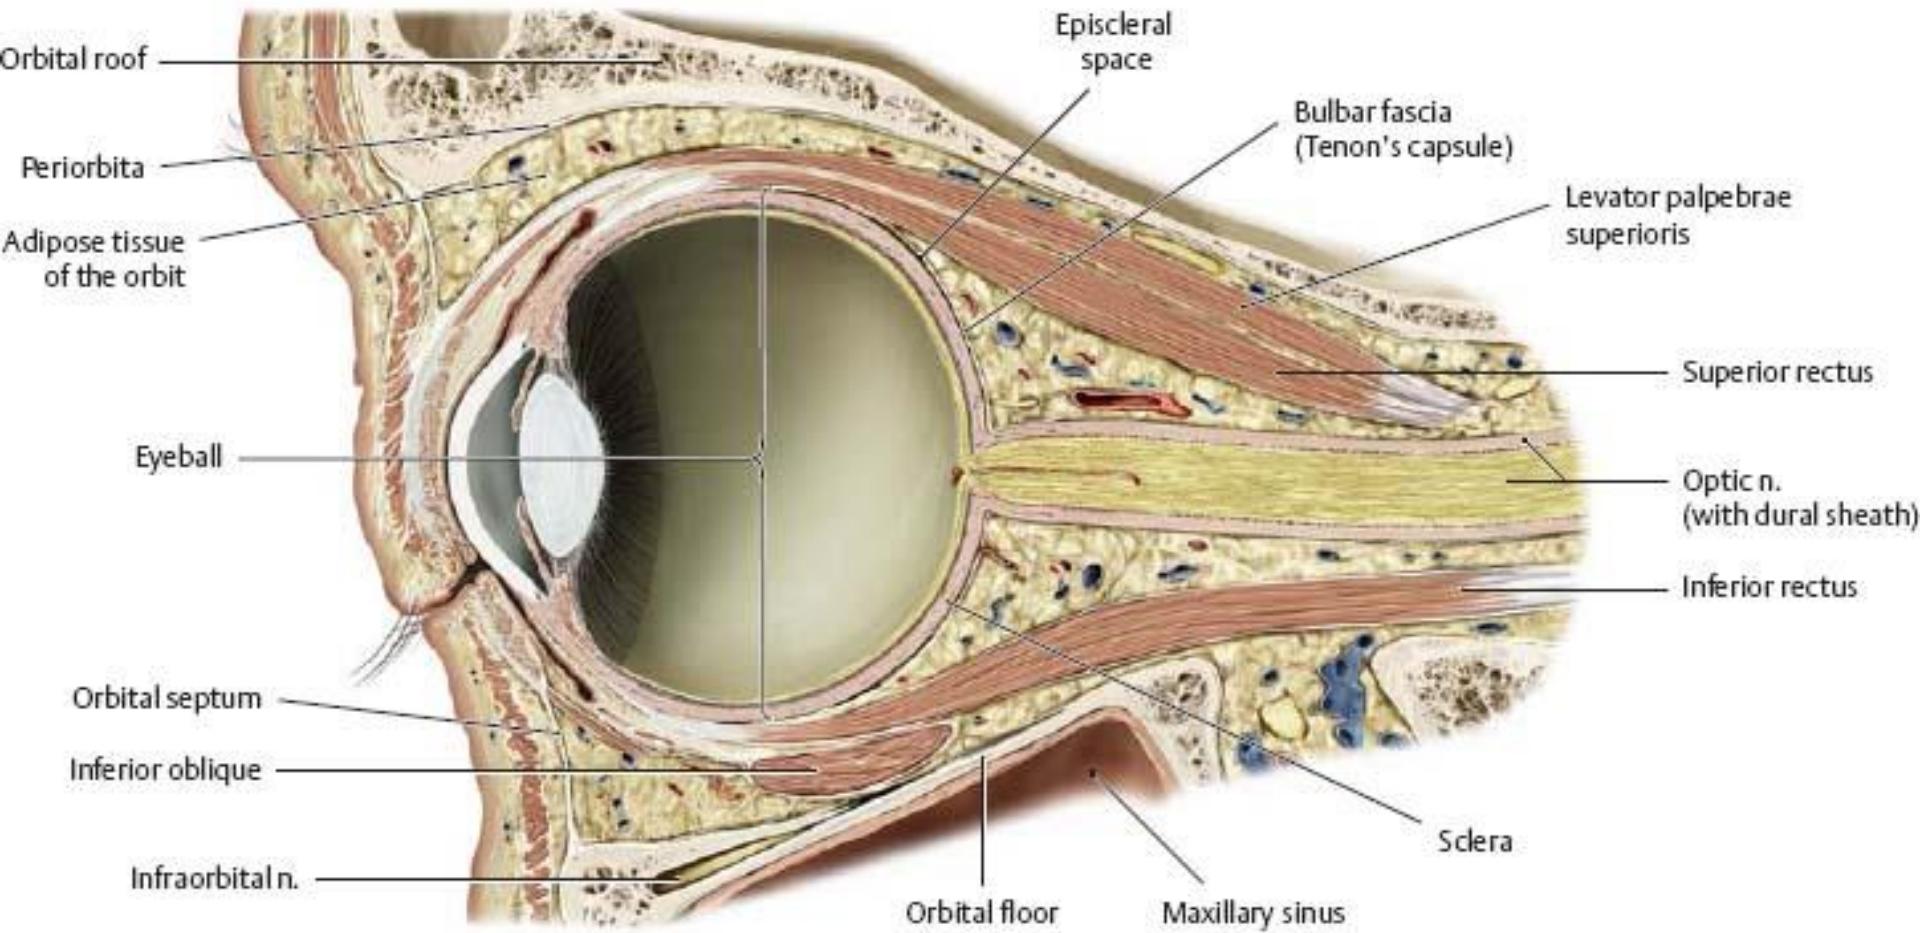

horizontální řez

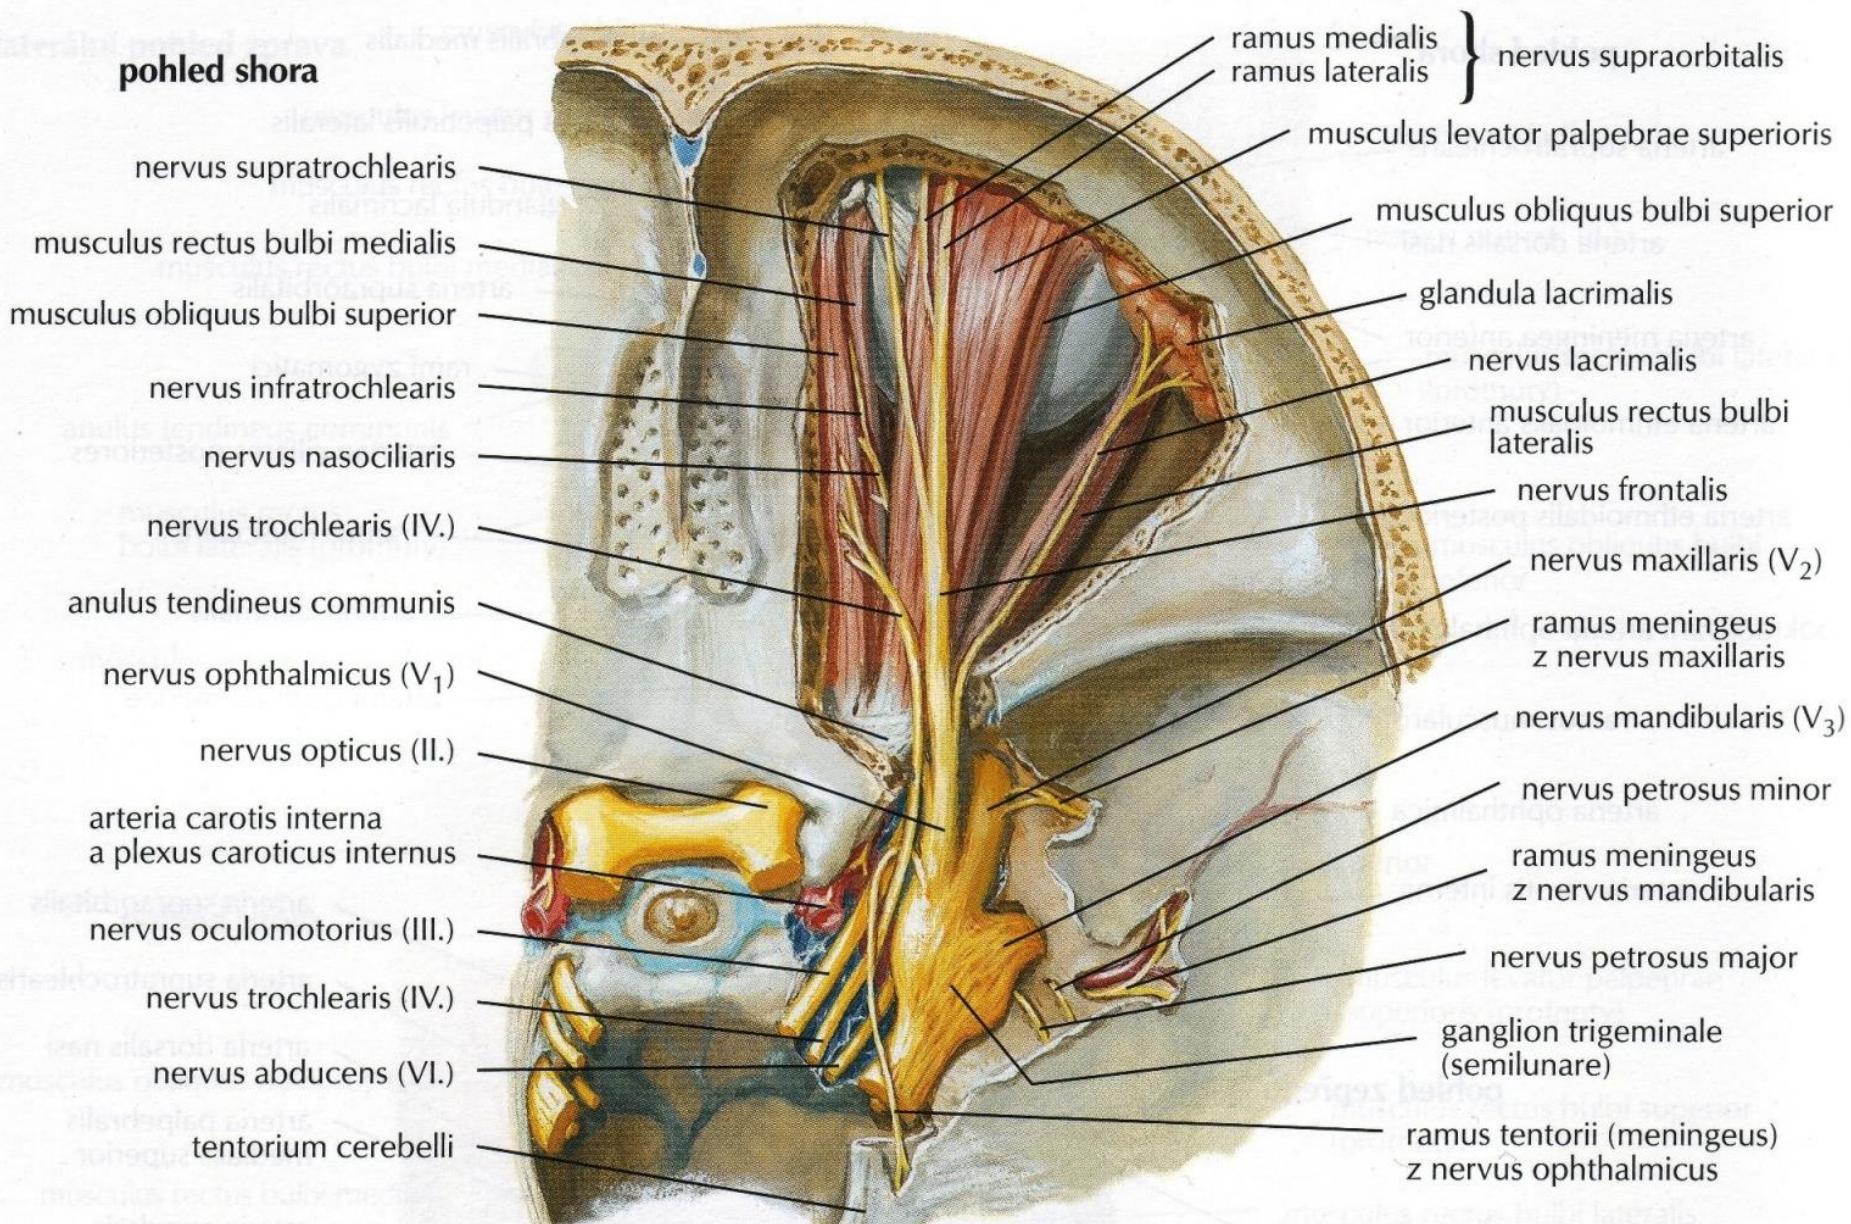

F. Netter M.D.

LEARNING SYSTEMS

frontální řez

Orbit – upper floor

Orbit – middle floor

pohled shora:

musculus levator palpebrae superioris, rectus bulbi superior et obliquus superior jsou částečně odstraněné

nervus supratrochlearis (protnutý)

rami nervi supraorbitalis (protnuté)

nervus infratrochlearis

nervus ethmoidalis anterior

nervus opticus (II.)

nervus ethmoidalis posterior

ramus superior nervi oculomotorii (III.) (protnutý)

nervus nasociliaris

plexus caroticus internus

nervus trochlearis (IV.) (protnutý)

nervus oculomotorius (III.)

nervus abducens (VI.)

nervi ciliares longi

nervi ciliares breves

nervus lacrimalis

ganglion ciliare

radix parasympathica pro ganglion ciliare (z ramus inferior nervi oculomotorii)

radix sympathica pro ganglion ciliare (z plexus caroticus internus)

radix sensoria pro ganglion ciliare (z nervus nasociliaris)

větve k musculus rectus bulbi inferior et medialis

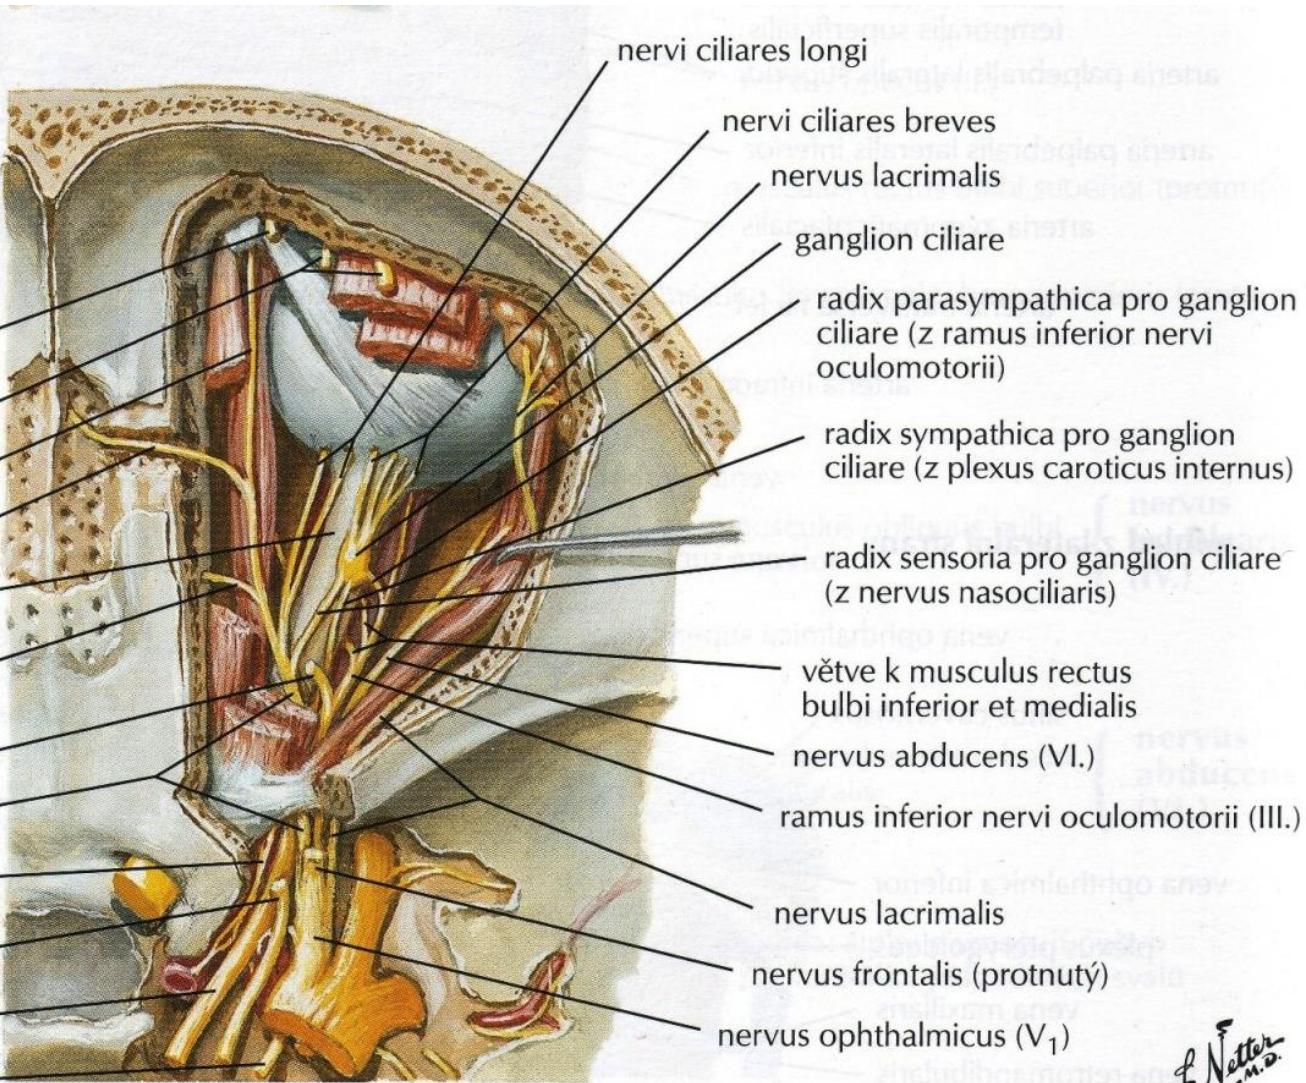

nervus abducens (VI.)

ramus inferior nervi oculomotorii (III.)

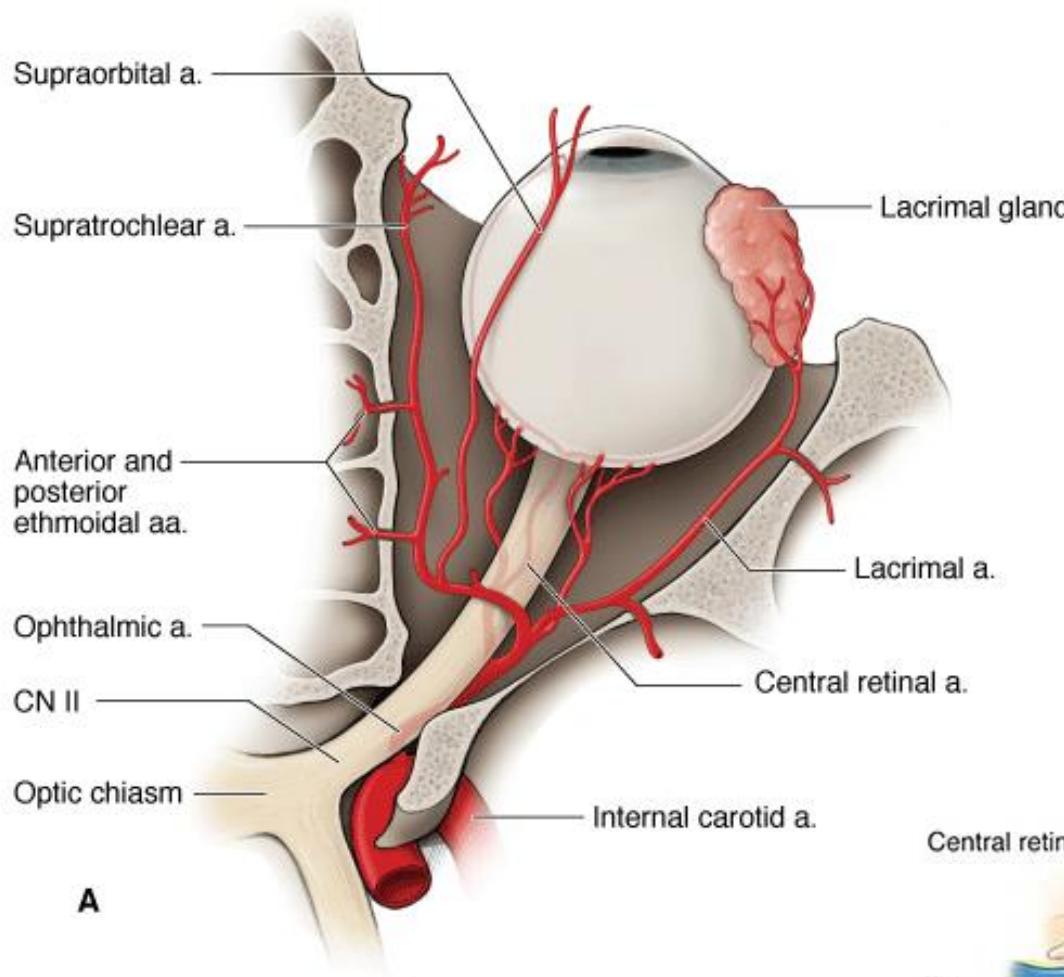

nervus lacrimalis

nervus frontalis (protnutý)

nervus ophthalmicus (V₁)
