## **Determine the PBI value**

Example: all distal papillas PBI 4, all teeth are present:

PBI 112/28

1/ all distal papillas have PBI 2	3rd molares and all lower incisors	
	are missing	
2/ all distal papillas have PBI 3	all lower incisors are missing	
3/ all distal papillas have PBI 1	3rd and 2nd molares are missing	
4/ all upper distal papillas have	all molares are missing	
PBI 3; all lower distal papillas have		
PBI 2		

Determine the API value when all teeth are present	API
--	-----

1/ all distal aproximal areas have a plaque	
2/ all distal aproximal areas at incisors and canines have a plaque, the	
others not	
3/ all distal aproximal areas at molars and premolars have a plaque, the	
others not	

4/ all distal aproximal areas at molars and premolars have a plaque, the	
others not. 3rd and 2nd molares and 1st premolars are missing
