

Questions for examination: Infectious Diseases (valid since semester Spring 20

1.

- a) Varicella
- b) Typhoid and paratyphoid fever
- c) Narrow-spectrum and penicillinase-resistant penicillins

2.

- a) Chlamydia and chlamydophila infections
- b) Covid-19
- c) Eysipelas

3.

- a) Viral hepatitis A
- b) Infections caused by Streptococcus pneumoniae
- c) Corticosteroids in the therapy of infectious diseases

4.

- a) Listeriosis
- b) Erythema infectiosum (fifth disease)
- c) Prophylaxis and treatment of malaria

5.

- a) Viral hepatitis B and D
- b) Tularemia
- c) Treatment of diarrhoea

6.

- a) Viral hepatitis C
- b) Yersiniosis
- c) Broad-spectrum penicillins, carbapenems

7.

- a) Infections caused by Haemophilus spp.
- b) Tapeworm infections
- c) Differential diagnosis of CNS infections

8.

- a) Aseptic meningitis and encephalitis (generally)
- b) Cholera
- c) Cephalosporins

9.

- a) Tick-borne encephalitis
- b) Shigellosis
- c) Glycopeptides, aminoglycosides

10.

- a) Toxoplasmosis
- b) Diarrhoea caused by E. coli
- c) Vaccination against infectious diseases

11.

- a) Infectious mononucleosis
- b) Salmonellosis
- c) Quinolones, ansamycines (rifamycins)

12.

- a) Poliomyelitis
- b) Campylobacteriosis
- c) Differential diagnosis of exudative tonsillitis

13.

- s) Ascariasis and enterobiasis
- b) Botulism
- c) Differential diagnosis of fever

14.

- a) Infections caused by Enteroviruses (except of poliomyelitis)
- b) Invasive infection caused by *Neisseria meningitidis*
- c) Care of asplenic and hyposplenic patient

15.

- a) Trypanosomiasis
- b) Scarlet fever
- c) Differential diagnosis of exantematic diseases

16.

- a) Lyme borreliosis - epidemiology, etiology, skin manifestations - diagnosis, therapy
- b) Infections caused by *Streptococcus* spp.
- c) Differential diagnosis of gastroenteritis

17.

- a) Lyme borreliosis - neuroborreliosis, joint involvement - diagnosis, therapy
- b) Infections caused by *Staphylococci*
- c) Macrolides, azalides, lincosamides

18.

- a) Mumps
- b) Colitis caused by *Clostridium difficile* toxin
- c) Clinical features of central nervous system infections

19.

- a) Measles
- b) Anaerobic infections of soft tissues (gas gangrene)
- c) Differential diagnosis of upper respiratory tract infections

20.

- a) Arboviral infections (generally + West Nile fever, Chikungunya fever)
- b) Leptospirosis
- c) Oxazolidinones, tetracyclines, chloramphenicol (amphenicols)

21.

- a) German measles (=rubella)
- b) Septic meningitis (dependence of etiology on age of patients and diagnosis)
- c) Antiretroviral therapy (ART)

22.

- a) Viral gastroenteritis
- b) Visceral larva migrans (toxocarosis)
- c) Correct methods of taking biological materials for microbiological examinations

- 23.
- c) Herpes-zoster (shingles)
 - b) Schistosomiasis
 - c) Metronidazole, cotrimoxazole

- 24.
- a) Influenza
 - b) Food-borne intoxication
 - c) Prophylaxis and therapy of opportunistic infections in HIV infection

- 25.
- a) HIV/AIDS - epidemiology and diagnosis
 - b) Diphtheria
 - c) Antifungal therapy
- 26.
- a) HIV/AIDS - clinical and laboratory categories, opportunistic infections, malignancies
 - b) Rickettsiosis
 - c) Differential diagnosis of lymphadenopathy

- 27.
- a) Infectious diseases and pregnancy
 - b) Tetanus
 - c) Antiviral therapy

- 28.
- a) Rabies
 - b) Malaria
 - c) Mycoplasma infections

- 29.
- a) Leishmaniasis
 - b) Pertussis
 - c) Therapy of septic meningitis

- 30.
- a) Infections caused by herpesviruses 1,2
 - b) Ehrlichiosis and anaplasmosis
 - c) Differential diagnosis of pneumonia

- 31.
- a) Infections caused by herpesviruses 6,7,8
 - b) Infection caused by Legionella (Pontiac fever and Legionnaires' disease)
 - c) Travel-related diseases

- 32.
- a) Viral hepatitis E
 - b) Pneumocystis pneumonia
 - c) Zoonoses

- 33.
- a) Infection caused by Cytomegalovirus
 - b) Amoebiasis, lambliasis
 - c) Cerebrospinal fluid examination

34.

- a) Dengue fever a Yellow fever
- b) Felinosis
- c) Care of patients with cystic fibrosis

|23)
