

Instructions for students of the subject Cariology

The practical training will be performed at the Department for Stomatology St. Ann Faculty Hospital - room for practical training (vyukovy sal 1)

Print a protocol of practical training and bring it.

After short introduction the students will train the work with rubber dam practically – one on the other. Isolation of onbe teeth as well as on a group of teeth will be preformed.

The other day you will perform investigation of the patient and also a simple treatment (e.g.calculus removal).
