

## Skeleton of the lower limb

### 1) Skeleton of the pelvic girdle:

The hip bone – *os coxae*

(the ilium – *os ilium*, the ischium – *os ischii*, the pubis – *os pubis*)

### 2) Skeleton of the free part of the lower limb:

The thigh bone – *femur*

*Patella*

The shinbone – *tibia*

*Fibula*

The tarsus – *ossa tarsi*

The metatarsus – *ossa metatarsi*

Bones of digits (*ossa digitorum pedis – phalanges*)

### The hip bone – *os coxae*

(the ilium – *os ilium*, the ischium – *os ischii*, the pubis – *os pubis*)

acetabulum (lunate articular surface – *facies lunata acetabular fossa* – *fossa acetabuli* acetabular notch – *incisura acetabuli*)

obturator foramen – *foramen obturatum*

### The ilium – *os ilium*

body – *corpus*

*ala ossis illi*

iliac fossa – *fossa iliaca*

auricular surface – *facies auricularis*

iliac tuberosity – *tuber osseum iliaca*

arcuate line – *linea arcuata*

iliac crest – *crista iliaca*

outer and inner lips of iliac crest – (*labium externum and labium internum cristae iliaceae*)

intermediate line – *linea intermedia*

superior anterior iliac spine – *spina iliaca anterior superior*

inferior anterior iliac spine – *spina iliaca anterior inferior*

superior posterior iliac spine – *spina iliaca posterior superior*

inferior posterior iliac spine – *spina iliaca posterior inferior*

posterior gluteal line – *linea glutaea posterior*

anterior gluteal line – *linea glutaea anterior*

inferior gluteal line – *linea glutaea inferior*

### The ischium – *os ischii*

Body – *corpus*

Ramus of the ischium – *ramus ossis ischii*

Ischial tuberosity – *tuber ischiadicum*

Ischial spine – *spina ischiadica*

Greater sciatic notch – *incisura ischiadica major*

Lesser sciatic notch – *incisura ischiadica minor*

### The pubis – *os pubis*

Body – *corpus ossis pubis*

Superior ramus – *ramus superior ossis pubis*

Iliopubic eminence – *eminentia iliopubica*

Pubic pecten – *pecten ossis pubis*

Pubic tubercle – *tuberculum pubicum*

Obturator groove – *sulcus obturatorius*

Inferior ramus – *ramus inferior ossis pubis* (phallic crest – *crista phallica*)

Symphysial surface – *facies symphysialis*

### The thigh bone – *femur*

#### Proximal end:

The head of the femur – *caput femoris*

Fovea of the head – *fovea capitis femoris*

Neck of the femur – *collum femoris*

#### Body – *corpus femoris*:

Greater trochanter – *trochanter major*

Lesser trochanter – *trochanter minor*

Intertrochanteric line – *linea intertrochanterica*

Intertrochanteric crest – *crista intertrochanterica*

Trochanteric fossa – *fossa trochanterica*

*linea aspera*

Medial lip of the linea aspera – *labium mediale* (pectineal line – *linea pectinea*)

Lateral lip of the linea aspera – *labium laterale* (gluteal tuberosity – *tuberis glutae*)

Supracondylar lateral and medial crest

#### Distal end of the femur:

Medial condyle – *condylus medialis*

Adductor tubercle – *tuberculum adductorium*

Lateral condyle – *condylus lateralis*

Patellar surface – *facies patellaris*

Intercondylar fossa – *fossa intercondylaris*

Intercondylar line – *linea intercondylaris*

Popliteal surface – *facies poplitea*

Epicondylus medialis and lateralis

### The patella – *patella* (knee cap)

The base of the patella – *basis patellae*

The apex patellae – *apex patellae*

The articular surface of the patella – *facies articularis patellae*

### The shin bone – *tibia*

#### Proximal end:

Medial condyle – *condylus medialis*

Lateral condyle – *condylus lateralis*

Superior articular facet – *facies articularis superior*

Intercondylar eminence – *eminentia intercondylaris*

Medial intercondylar tubercle – *tuberculum intercondylare mediale*

Lateral intercondylar tubercle – *tuberculum intercondylare laterale*

Anterior intercondylar area – *area intercondylaris anterior*

Posterior intercondylar area – *area intercondylaris posterior*

Articular surface for fibula – *facies articularis fibularis*

#### Body – *corpus*

Tibial tuberosity – *tuberis tibiae*

Soleal line – *linea musculi solei*

Medial margin – *margo medialis*

Anterior margin – *margo anterior*

Interosseous margin – *margo interosseus*

#### distal end:

Medial malleolus – *malleolus medialis*

Malleolar articular surface – *facies articularis malleoli medialis*

Fibular notch – *incisura fibularis*

Inferior articular surface – *facies articularis inferior tibiae*

### **Fibula**

#### Proximal end:

Head of fibula – *caput fibulae* (apex of the fibular head – *apex capitis fibulae*)

Articular facet of the fibular head – *facies articularis capitis fibulae*

Neck – *collum fibulae*

#### Body – corpus:

Anterior margin – *margo anterior*

Medial margin – *margo medialis*

Posterior margin – *margo posterior*

Interosseous margin – *margo interosseus*

#### Distal end:

Lateral malleolus – *malleolus lateralis*

Facet for articulation with the talus – *facies articularis malleoli lateralis*

Malleolar groove – *sulcus malleoli lateralis*

Lateral malleolar fossa – *fossa malleoli lateralis*

### **Bones of the foot – ossa pedis**

#### **I. The tarsus – ossa tarsi**

#### **II. The metatarsus – ossa metatarsi**

#### **III. Bones of digits – ossa digitorum pedis**

### **The tarsus – ossa tarsi (7)**

*talus*

The heel bone – *calcaneus*

The navicular – *os naviculare*

The cuboid – *os cuboideum*

The cuneiform bones – *ossa cuneiformia*

The medial cuneiform bone – *os cuneiforme mediale*

The intermediate cuneiform bone – *os cuneiforme intermedium*

The lateral cuneiform bone – *os cuneiforme laterale*

### **The talus – talus**

Head of talus – *caput tali* (navicular articular surface – *facies articularis navicularis*)

Neck of the talus – *collum tali*

Body of the talus – *corpus tali*

The trochlea of the talus – *trochlea tali*

Superior articular surface – *facies articularis superior*

Lateral and medial malleolar surfaces – *facies articularis malleoli lateralis et medialis*

Posterior, middle and anterior calcaneal surfaces – *facies articularis calcanea posterior, media et anterior*

Talar sulcus – *sulcus tali*

Lateral talar process – *processus lateralis tali*

Posterior talar process – *processus posterior tali* (lateral and medial tubercles – *tuberculum laterale et mediale*)

Groove for the tendon of the flexor hallucis longus muscle – *sulcus tendinis musculi flexoris hallucis longi*

### **Calcaneus**

*tuber calcanei* – *tuber calcanei*

Medial and lateral processes of tuber calcanei – (*processus medialis et lateralis*)

Posterior, middle and anterior talar articular surfaces of calcaneus – *facies articularis talaris posterior, media et anterior*

Calcaneal groove – *sulcus calcanei*

*Sustentaculum tali*

Groove for the tendon of flexor hallucis longus muscle – (*sulcus tendinis musculi flexoris hallucis longi*)

Peroneal trochlea – *trochlea peronealis*

Surface for articulation with cuboid bone – *facies articularis cuboidea*

**sulcus calcanei + sulcus tali = sinus tarsi**

**The navicular bone – os naviculare**

*tuberositas ossis navicularis*

**The cuboid bone– os cuboideum**

Groove for the tendon of peroneus longus muscle (*sulcus tendinis musculi peronei longi*)

**Cuneiform bones (medial, intermediate and lateral)**

– *ossa cuneiformia (mediale, intermedium et laterale)*

**The metatarsal bones – ossa metatarsi (I. – V.)**

Base – basis (tuberosity of the metatarsal I. and V. – *tuberositas ossis metatarsi I. et V.*)

Body – *corpus*

Head – *caput*

MTV. – *tuberositas oosis metatarsi quinti*

**Ossa sesamoidea pedis**

**Bones of the digits – ossa digitorum pedis**

(*phalanges*)

**Big toe has proximal and distal phalanx – phalanx proximalis et distalis**

**II. – V. toe has proximal, middle and distal phalanx**

– *phalanx proximalis, media et distalis*

Base of phalanx – *basis phalangis*

Body of phalanx – *corpus phalangis*

Trochlea/ head (distal phalanx has distal tuberosity – *tuberositas phalangis distalis*)
