

# VISUAL APPARATUS

**EYEBALL - bulbus oculi**

**ACCESSORY VISUAL STRUCTURES - organa  
oculi accessoria**

# Eyeball (AP diameter 24 - 26 mm)

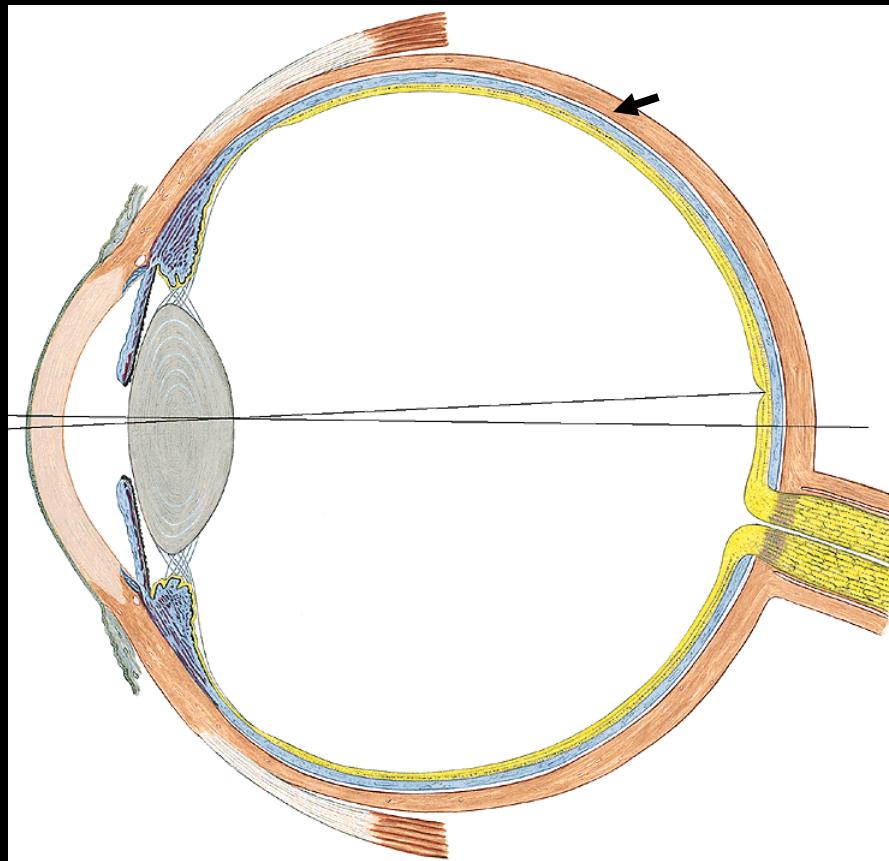

## Layers:

1. tunica fibrosa
2. t. vasculosa
3. t. interna

## **1. tunica fibrosa**

**fibrous skeleton of the eyeball  
attachment of muscles**

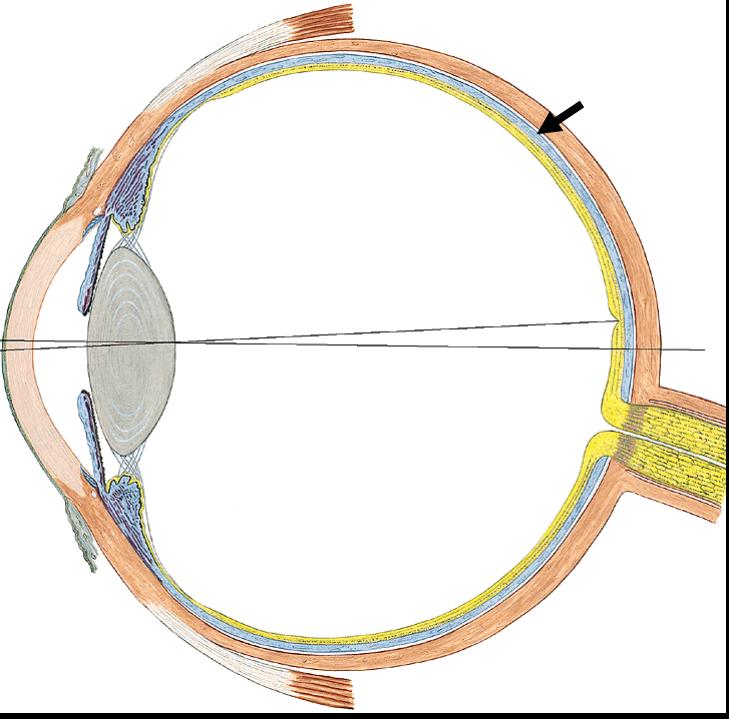

### **Sclera - post. 5/6**

- **limbus sclerae**
- **sinus venosus**
- **lamina cribrosa**

### **Cornea - ant. 1/6**

- **limbus corneae**
- **facies ant. et post.**

## 2. tunica vasculosa

### Choroidea (2/3)

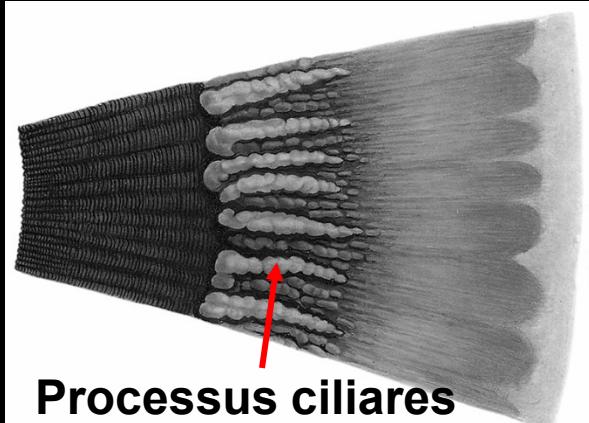

- ✓ supplies the retina
- ✓ pigmented – light-absorbing
- ✓ vascular

### Corpus ciliare

- ✓ attachment for the lens
- ✓ controls thickness of the lens
- ✓ secretion of aqueous humor

### Iris

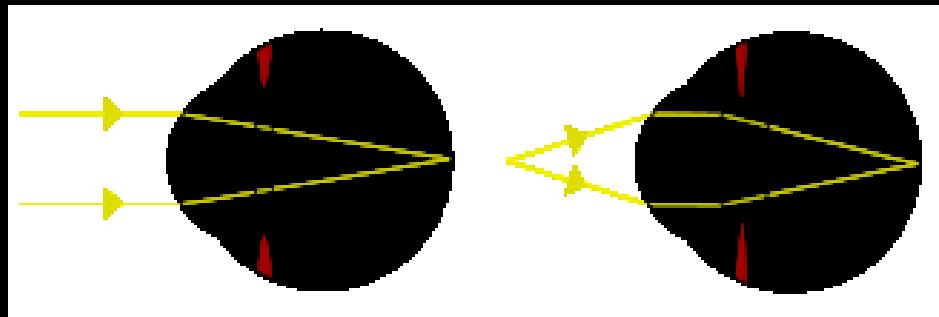

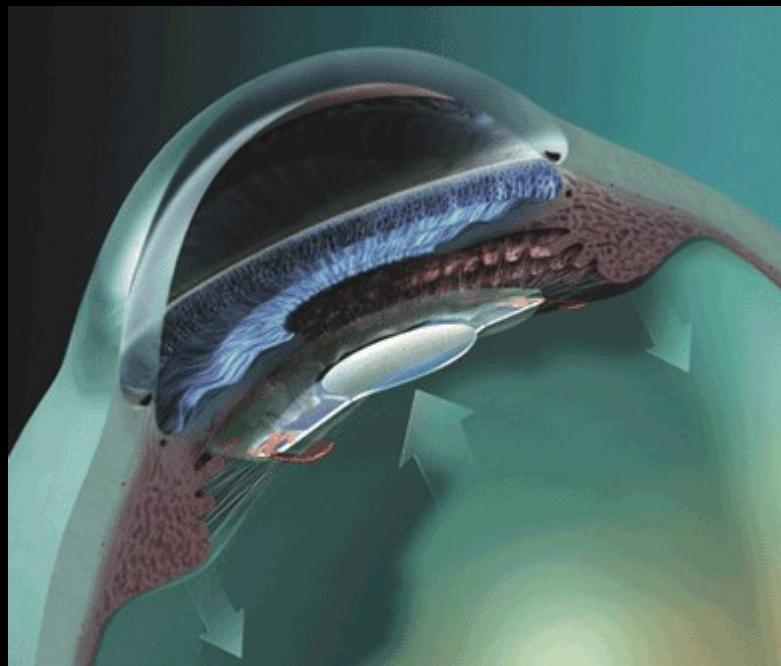

- ✓ contractile diaphragm with a central aperture – **pupilla**
  - **facies ant. et post.**
  - **sphincter, dilator**

Processus ciliares

# M. ciliaris

## Accommodation of the lens

increased convexity of the  
lens – refraction suitable  
for near vision

Innervation: E-W ncl. CN III

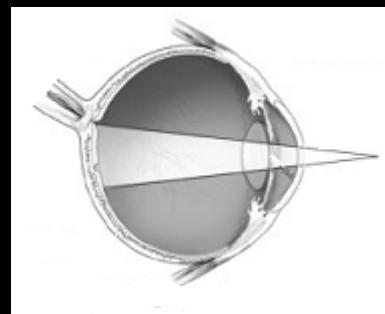

**M. sphincter pupillae**

**Miosis**

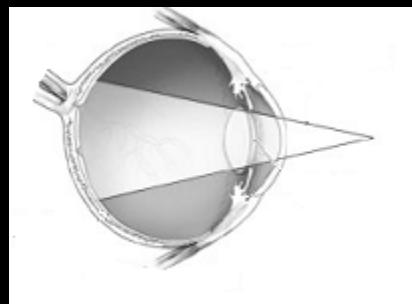

**M. dilatator pupillae**

**Mydriasis**

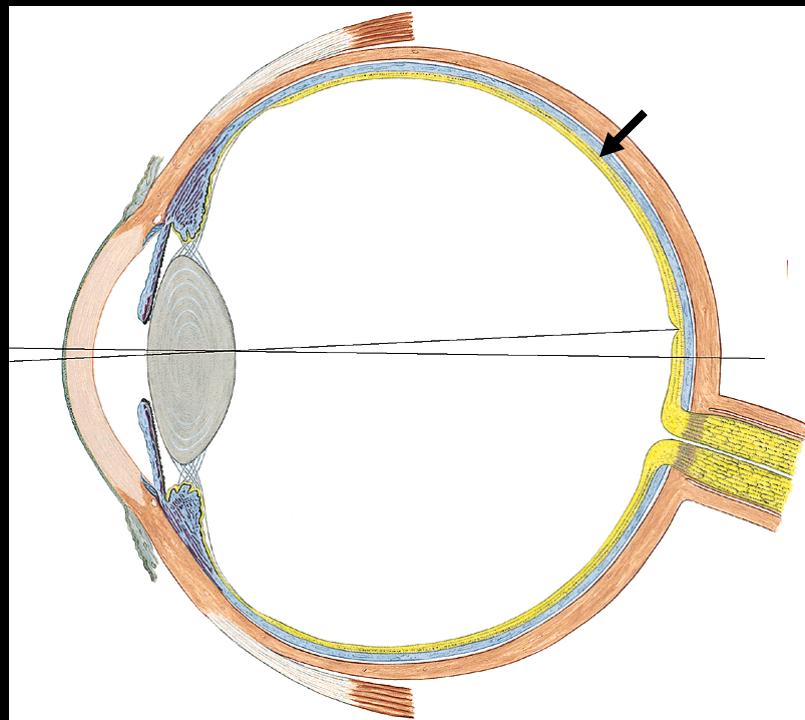

**E-W ncl. CN III**

**Symp.ncl.**

### 3. tunica interna

#### Retina

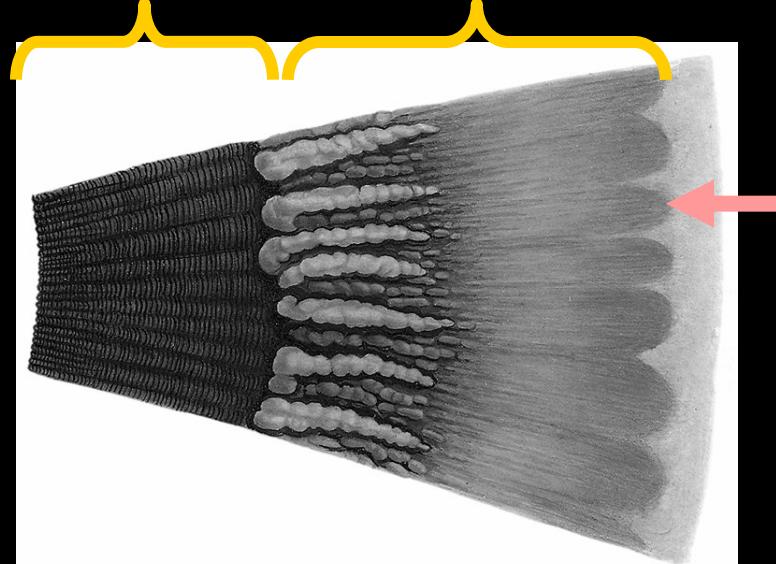

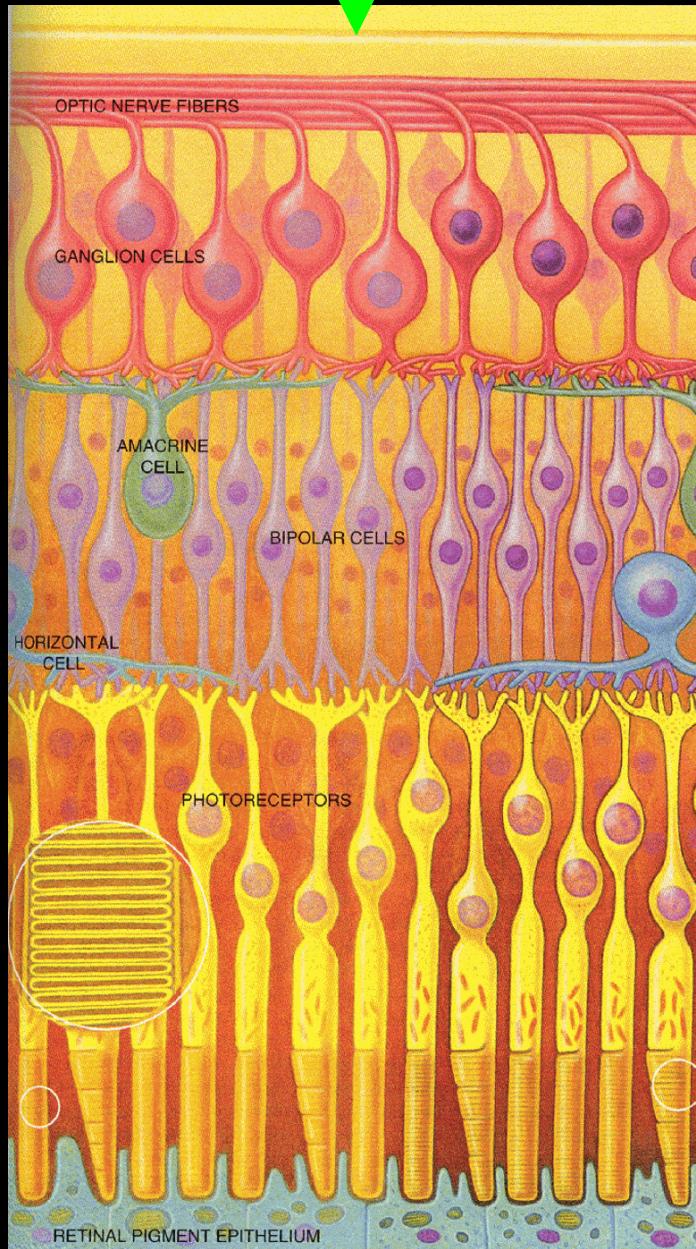

■ pars optica  
(rods, cones)

ora serrata

■ pars caeca:

p. iridica      p. ciliaris

# Layers of the retina

N. opticus

ganglion cells

bipolar cells

photoreceptors  
(rods and cones)

stratum pigmentosum

## **Photoreceptors:**

### **Rods**

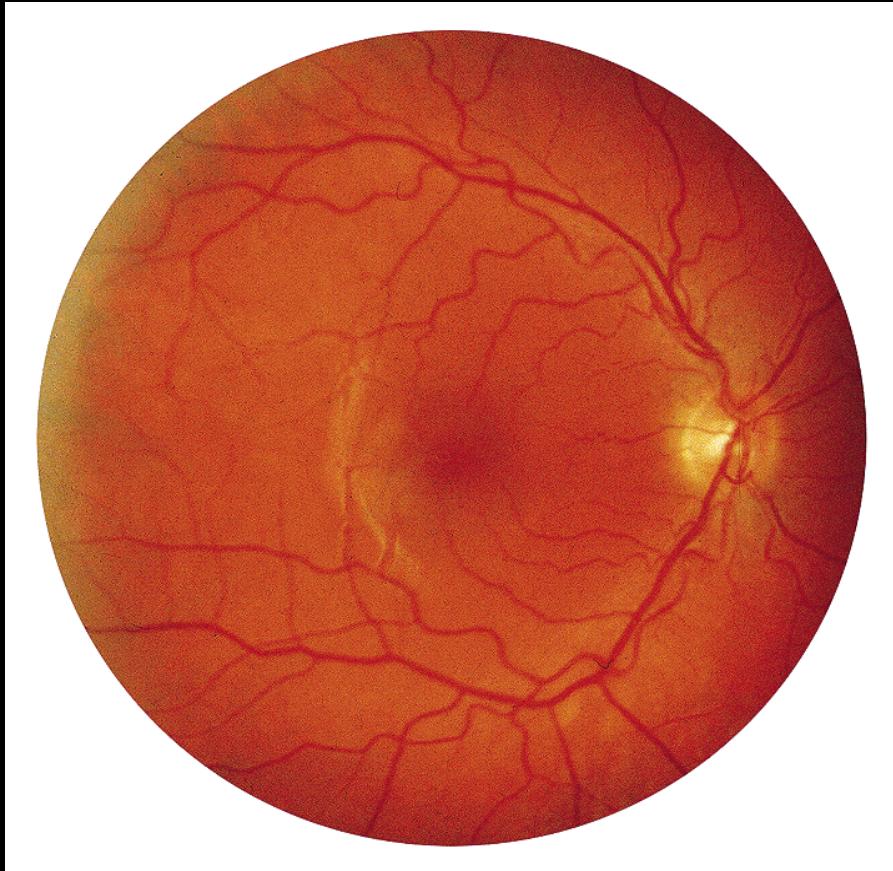

- ✓ 120 million
- ✓ primary source of visual information at night
- ✓ used in peripheral vision

### **Cones**

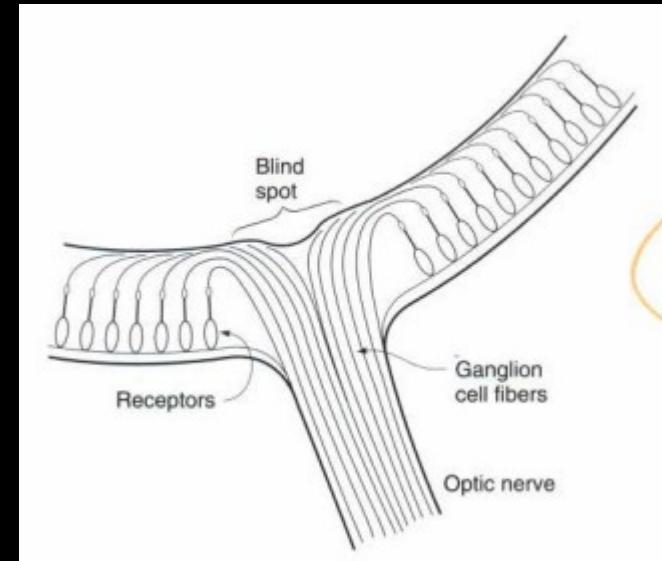

- ✓ 7 million
- ✓ detection of color
- ✓ central fovea – responsible for central vision

# Ophthalmoscopy

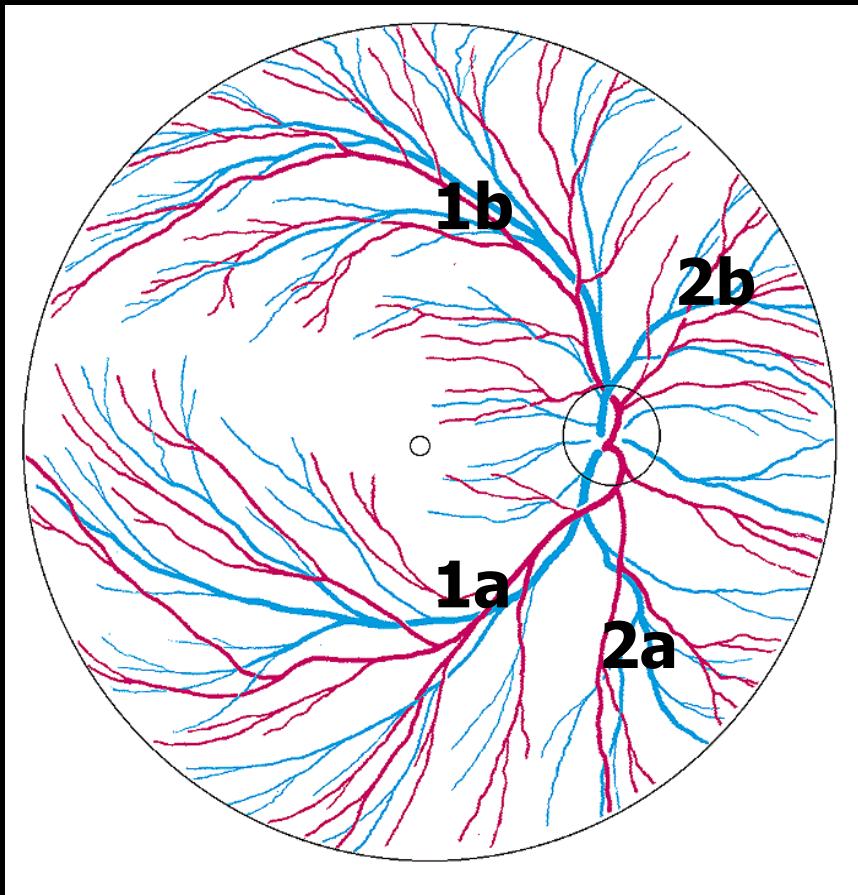

**Fundus - OCULA DEXTRA (OD)**

**Discus (papilla) n.  
optici**

**Macula lutea + fovea centralis**  
- the area of most acute vision

**A. et v. centralis retinae**

**1a,b** a. et v. temporalis

**2a,b** a. et v. nasalis

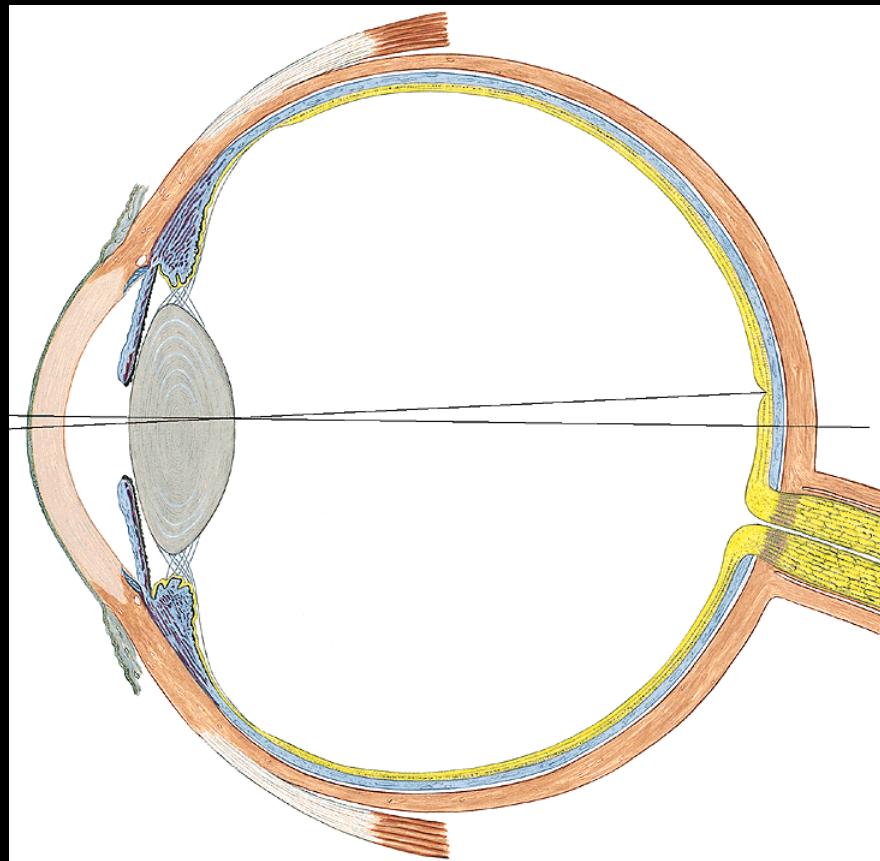

# **Refractive media of the eyeball:**

**cornea**

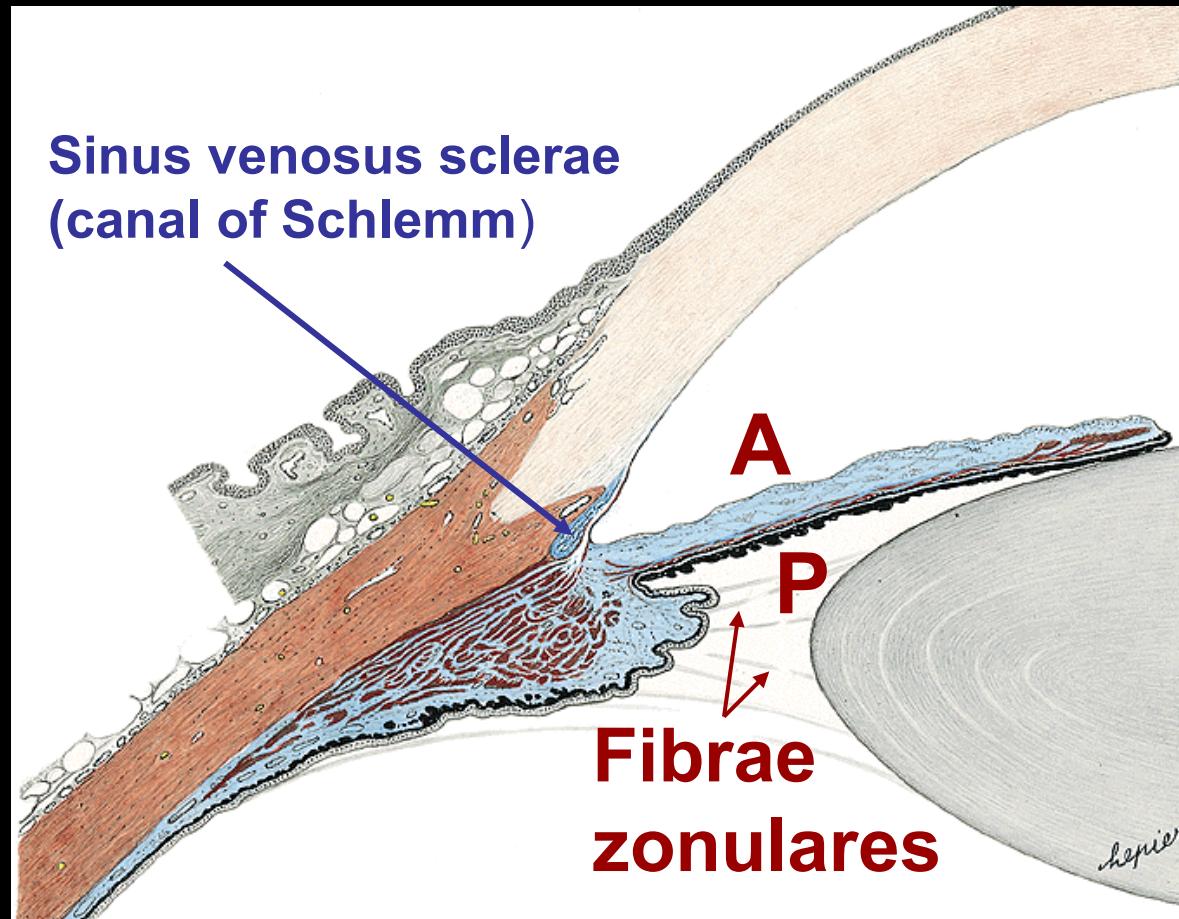

**humor aquosus**

**lens**

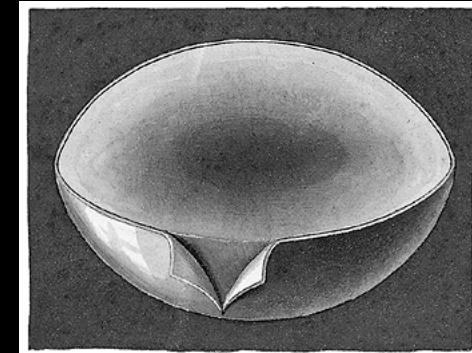

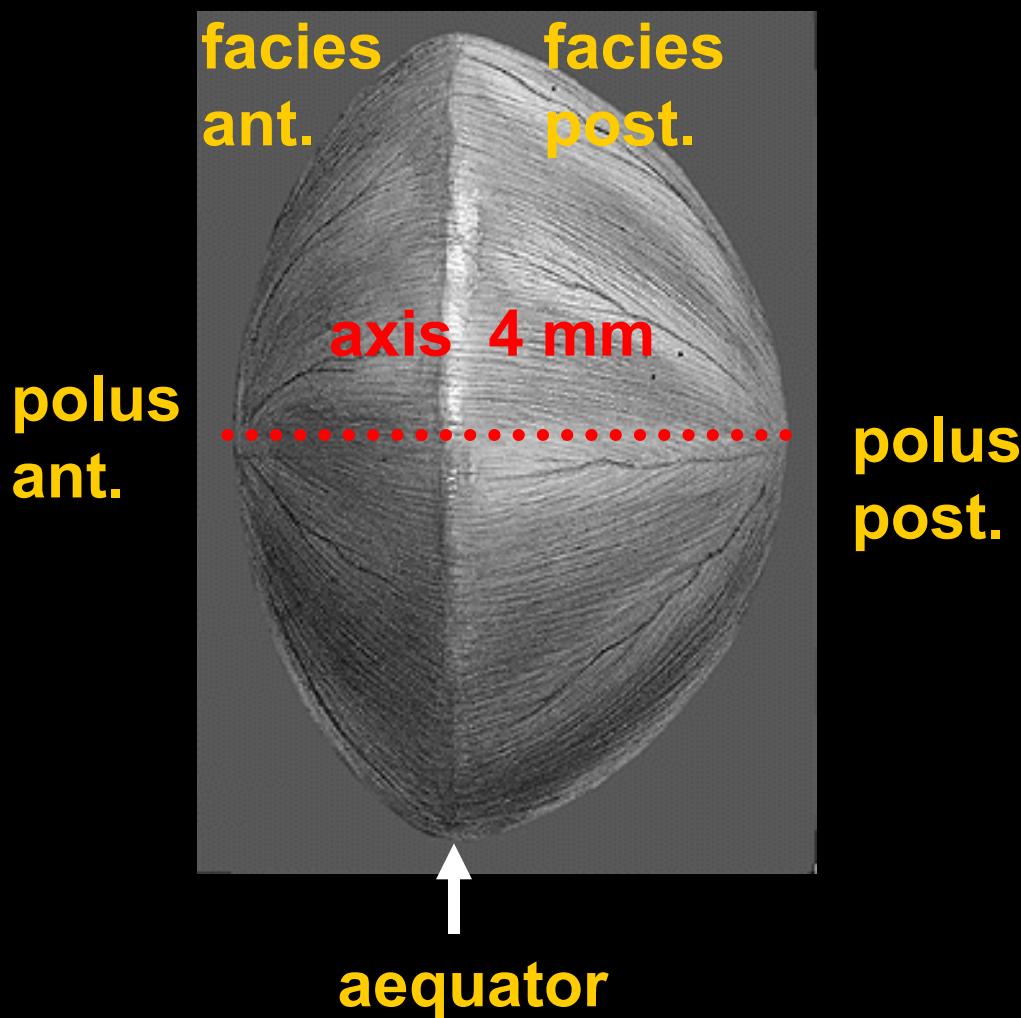

**corpus vitreum**

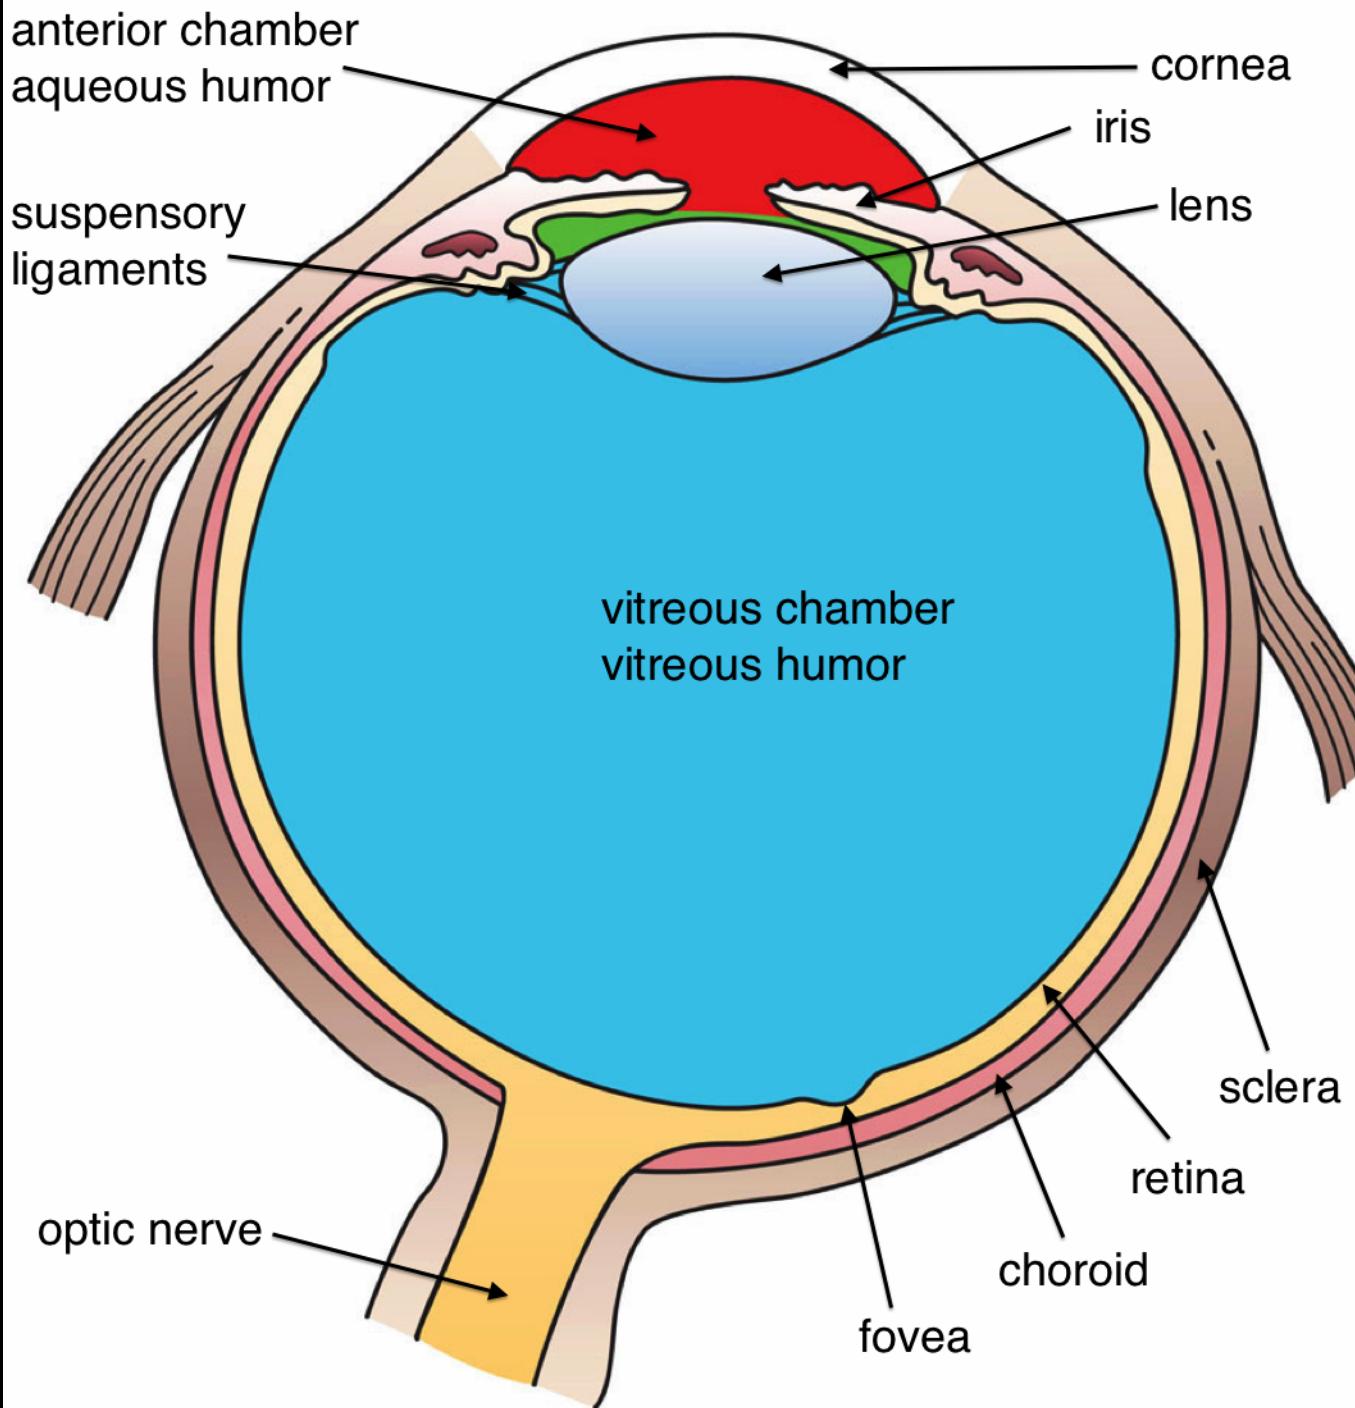

**Chambers - camera bulbi ant. et post.**  
**Aqueous humor - humor aquosus**

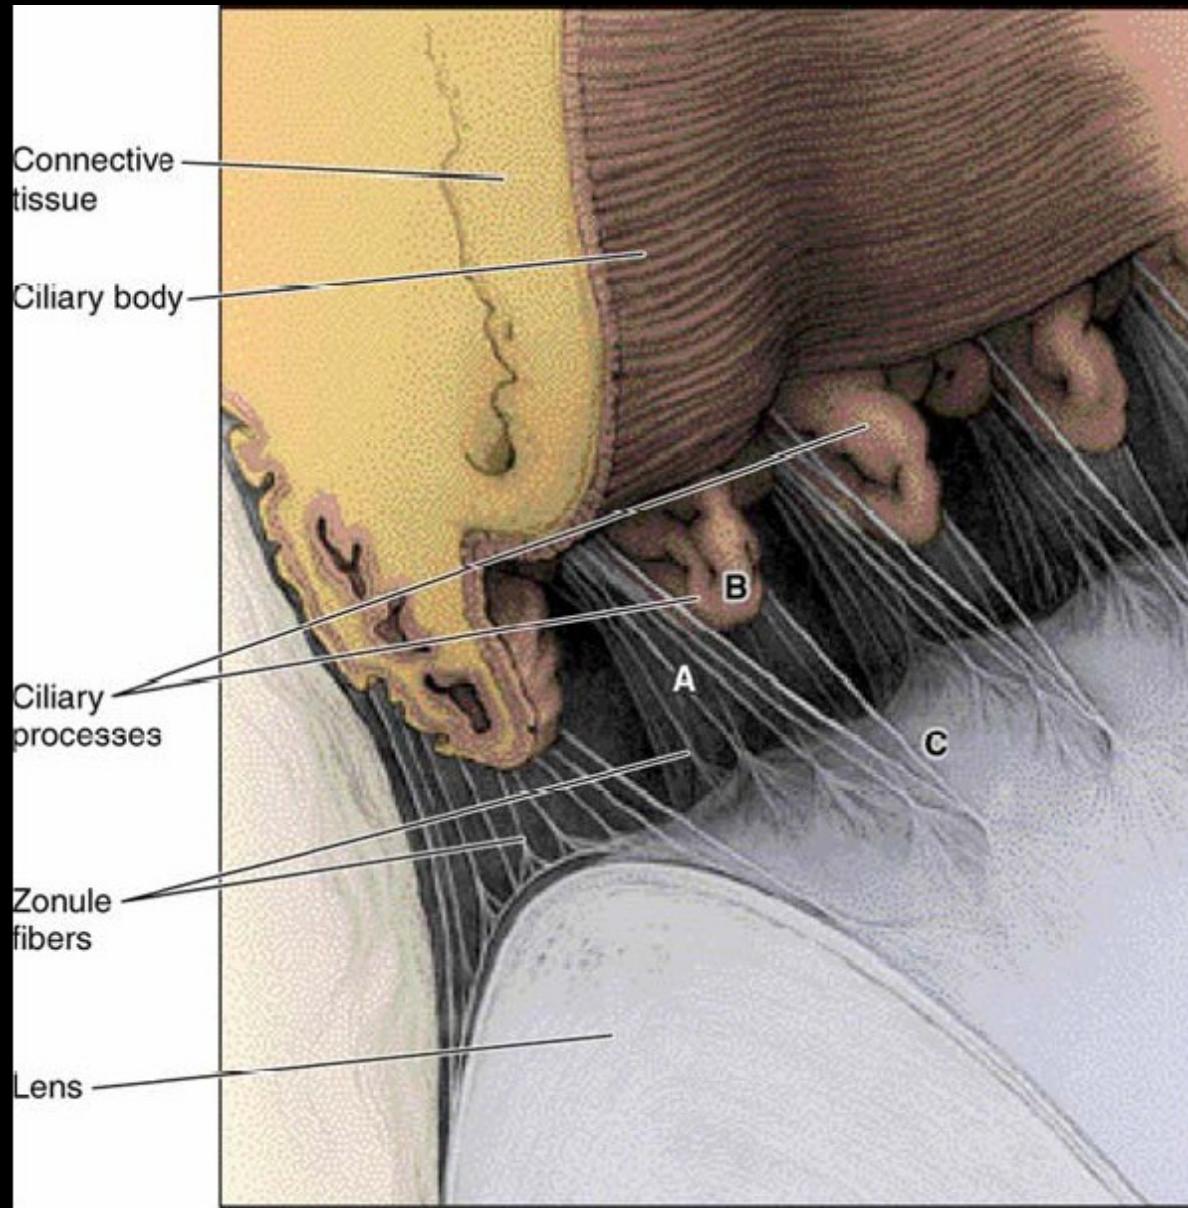

# Lens

**capsula lentis**  
■ **substantia lentis**

**PRESBYOPIA**

# Cataract

- ✓ loss of transparency - clouding
- ✓ cataract extraction and intraocular lens implantation

# Vitreous chamber: corpus vitreum

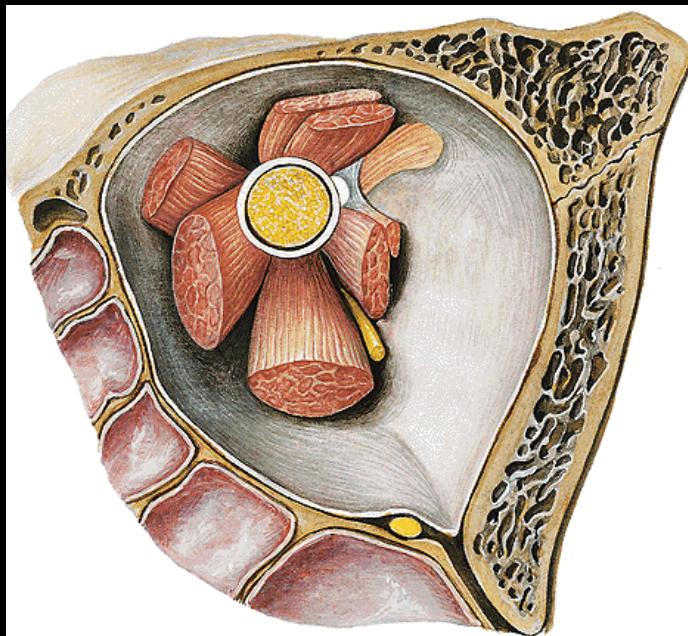

- ✓ jelly-like substance with watery fluid
- ✓ holds the retina in place
- ✓ supports the lens

# Extraocular muscles

## Non-striated

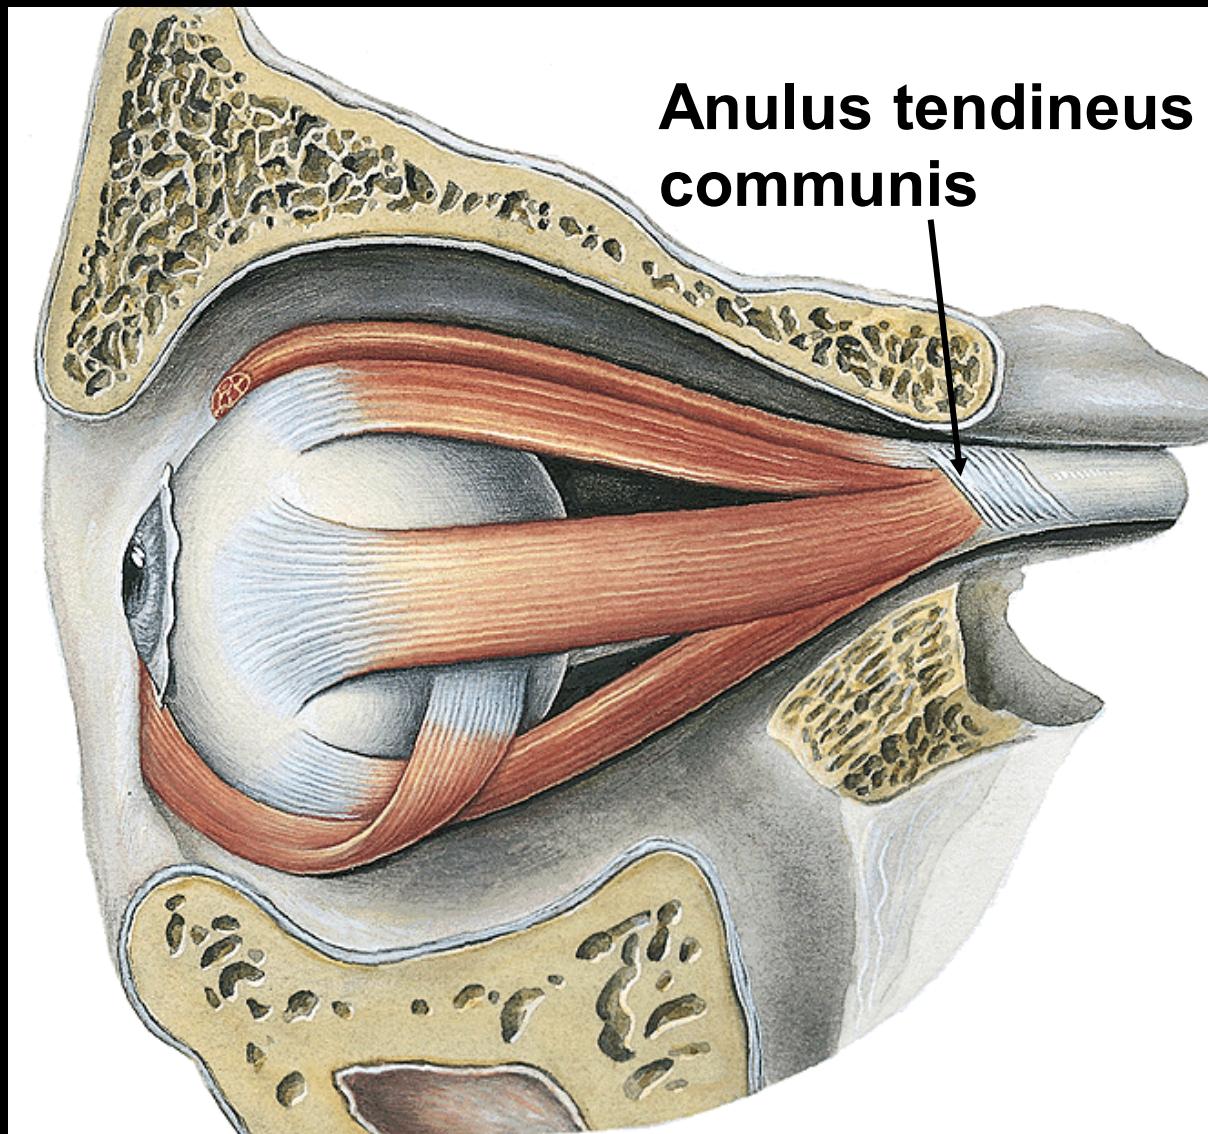

- m. orbitalis (**symp.**) ■ mm. tarsales (**symp.**)

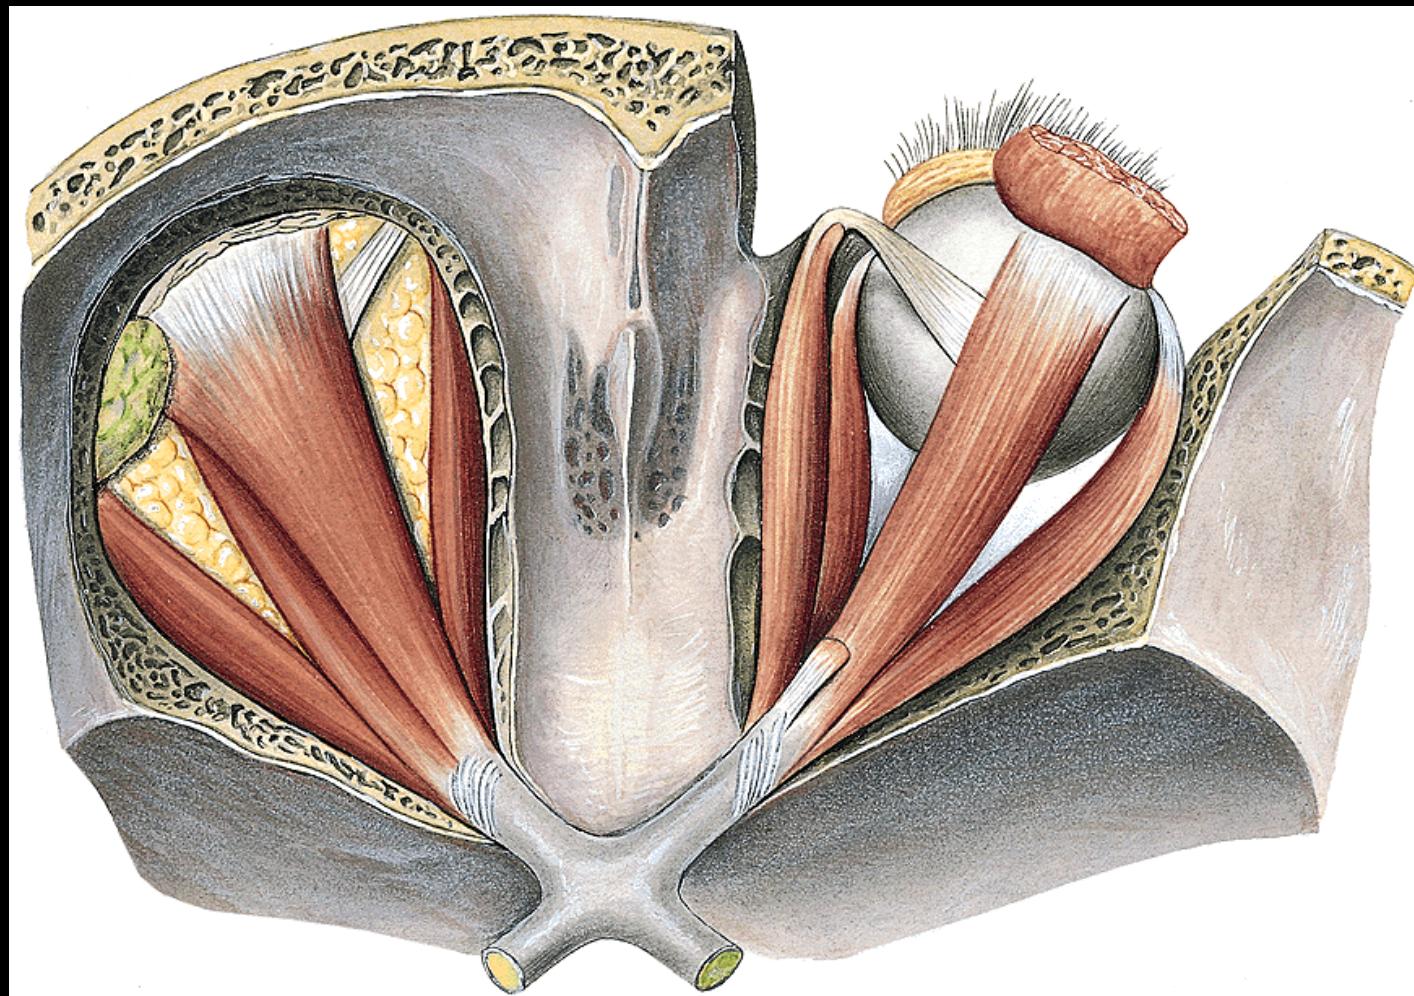

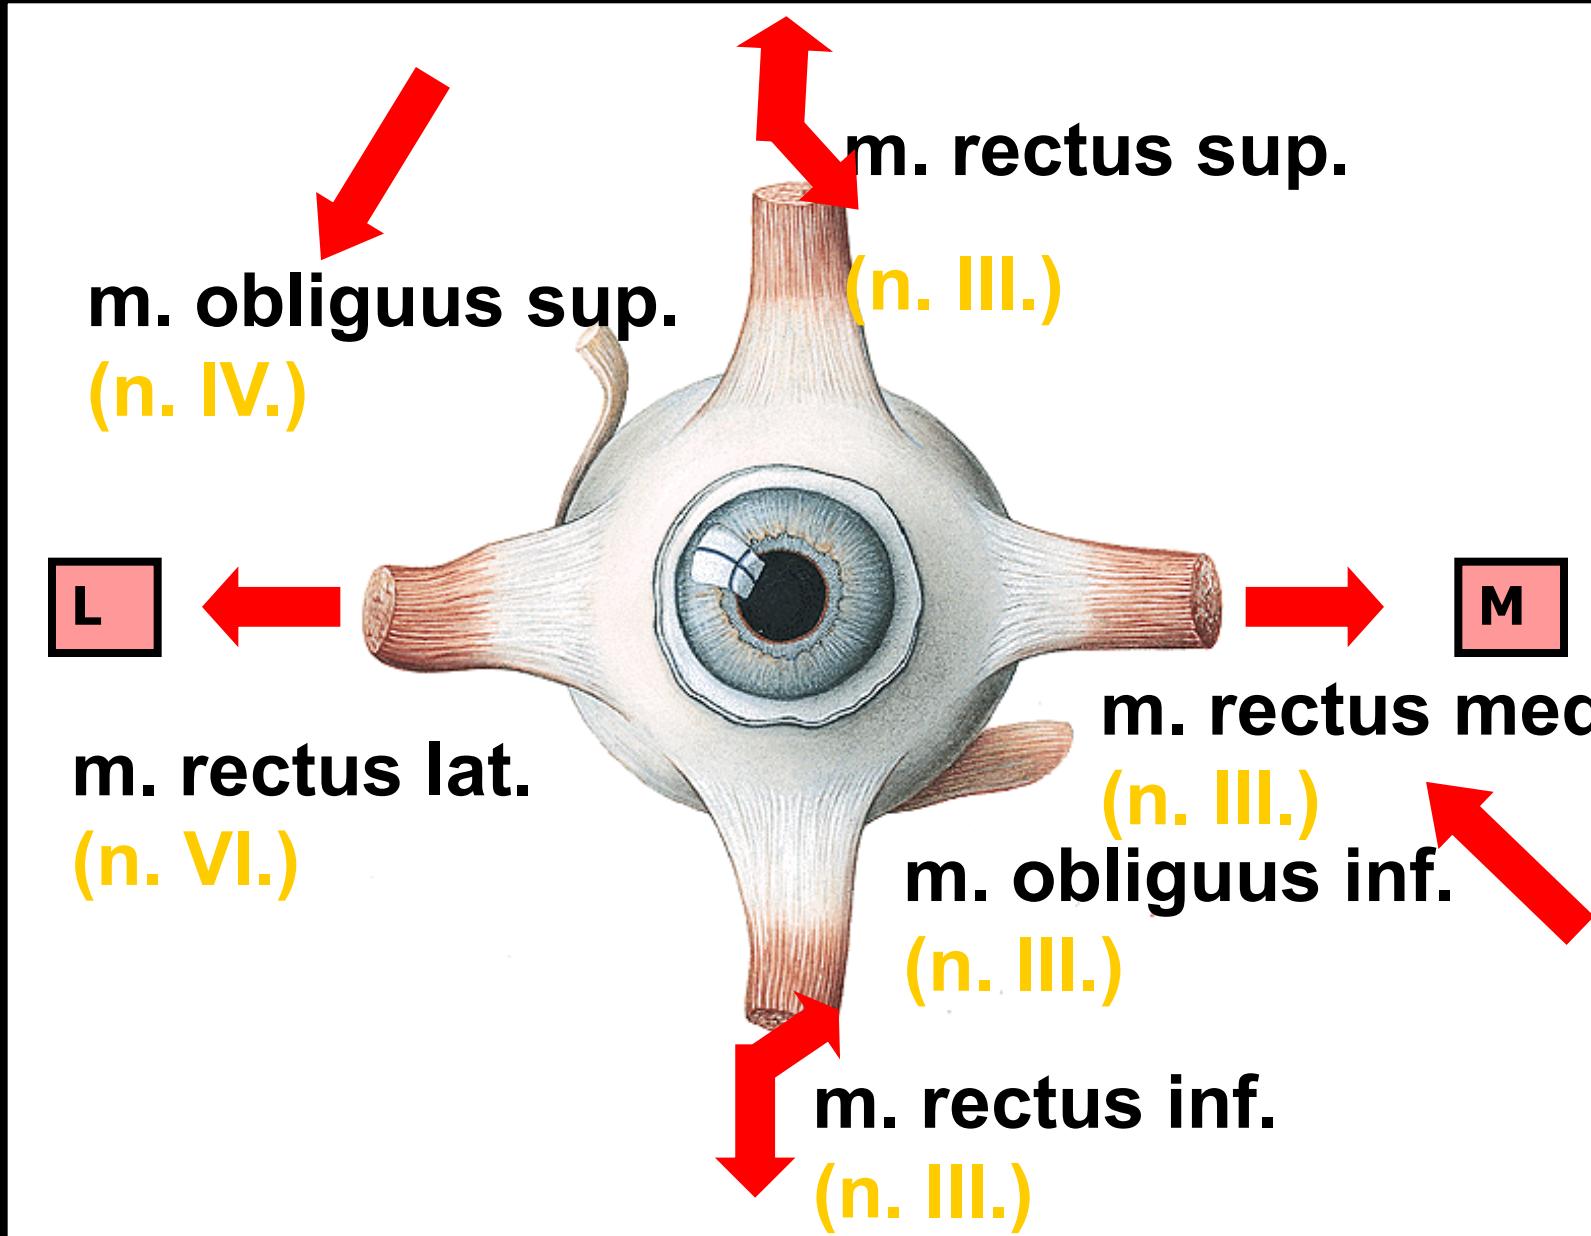

## Striated

- m. rectus bulbi sup., inf., med., lat.
- m. obliquus sup., inf.
- m. levator palp. sup.

**Anulus tendineus  
communis**

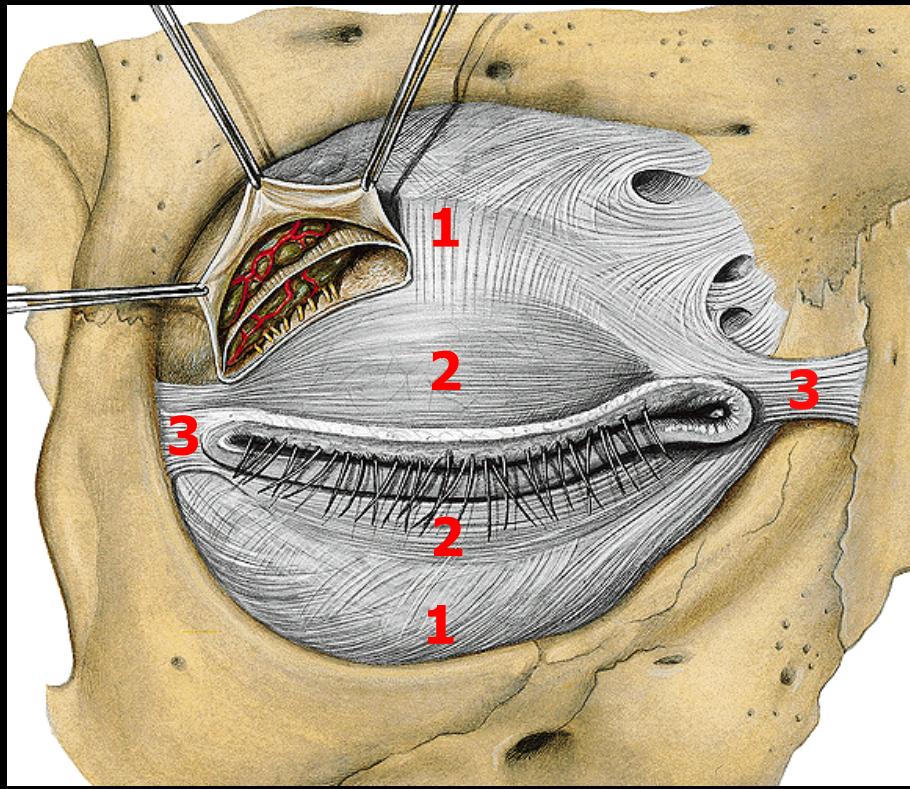

# **Eyelids - palpebrae Conjunctiva**

**palpebra sup. et inf.**

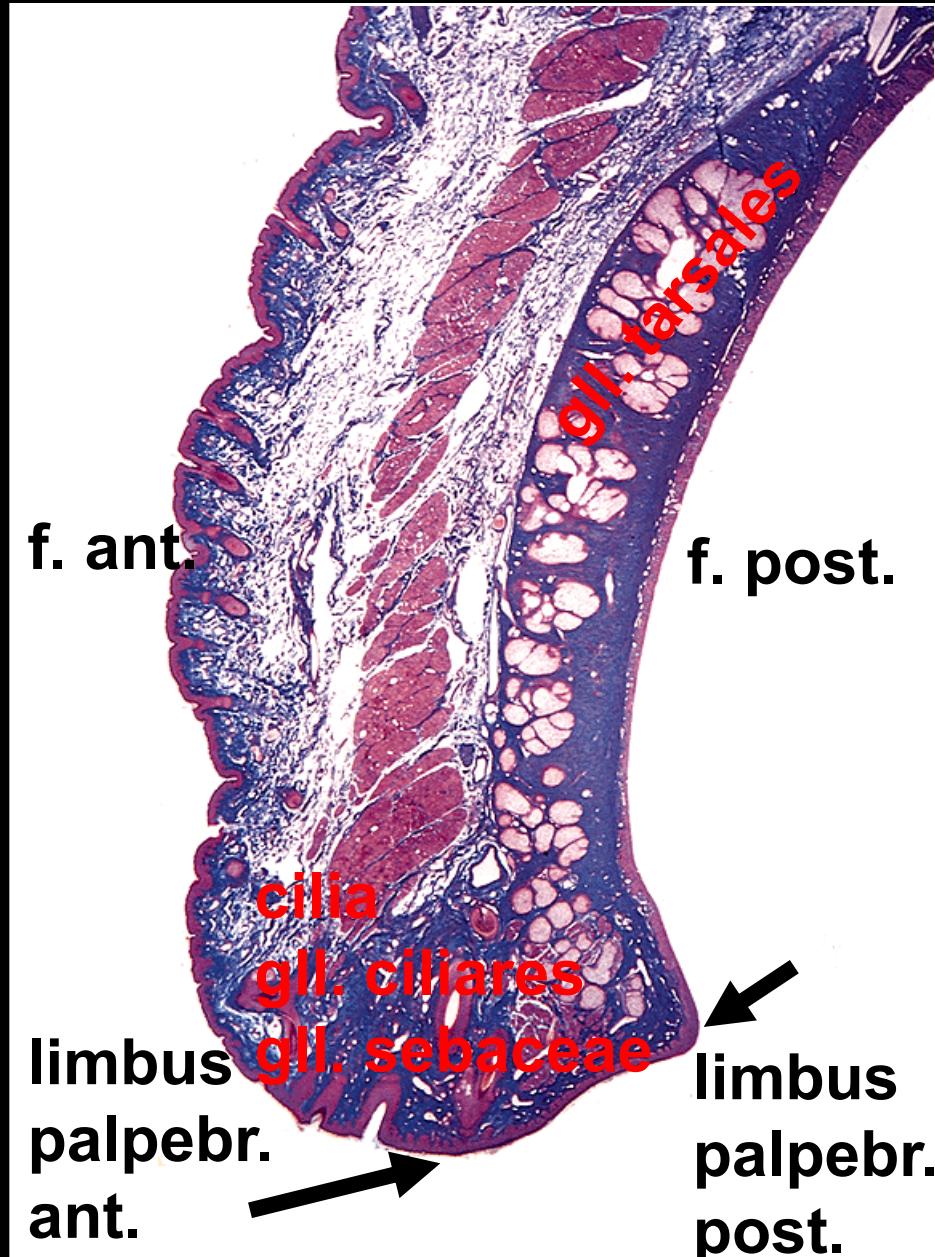

- **commisurae palpebr.**
- **rima palpebrarum**
- **angulus oculi med. et lat.  
(canthus)**
- **facies ant. et post.**

# Structure of the eyelid

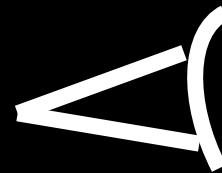

- 1 septum orbitale**
- 2 tarsus sup. et inf.**
- 3 lig. palp. med. et lat.**

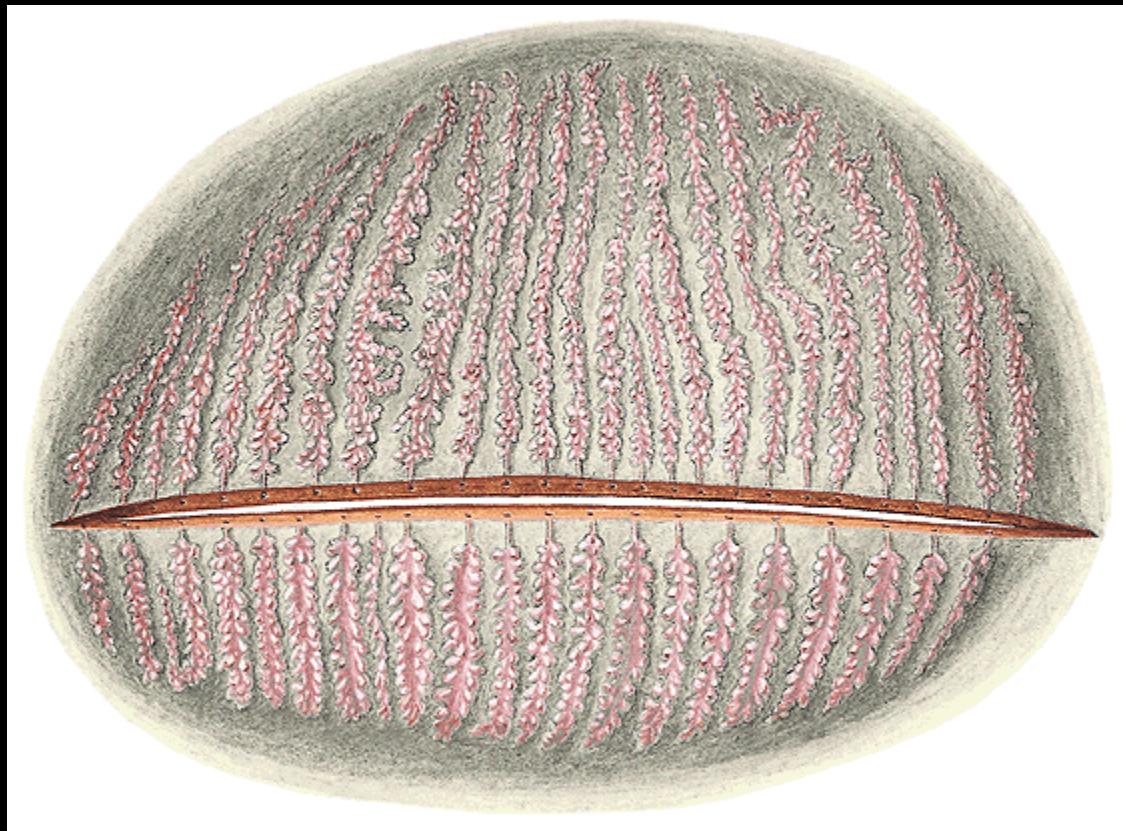

skin

- **m. orbicularis oculi**
- **septum orbitale + tarsi**
- **conjunctiva**

**Rivus lacrimalis**

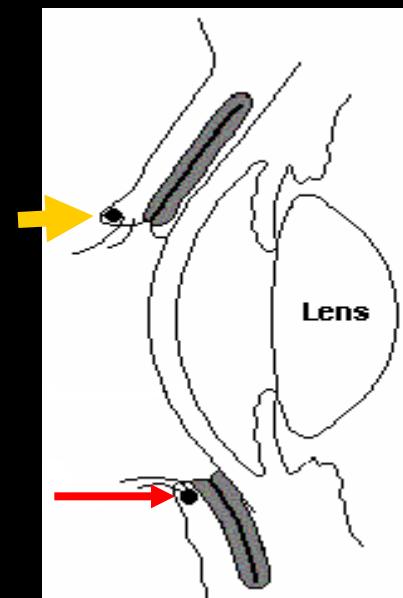

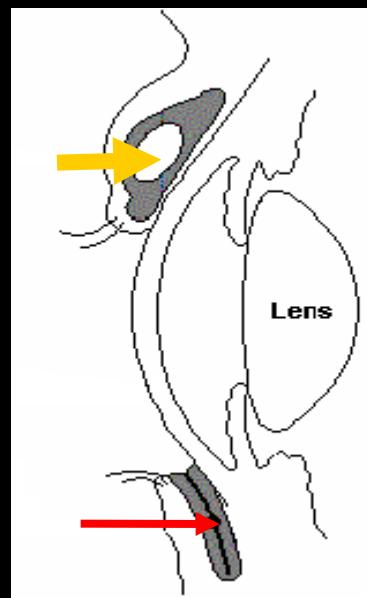

# GII. tarsales

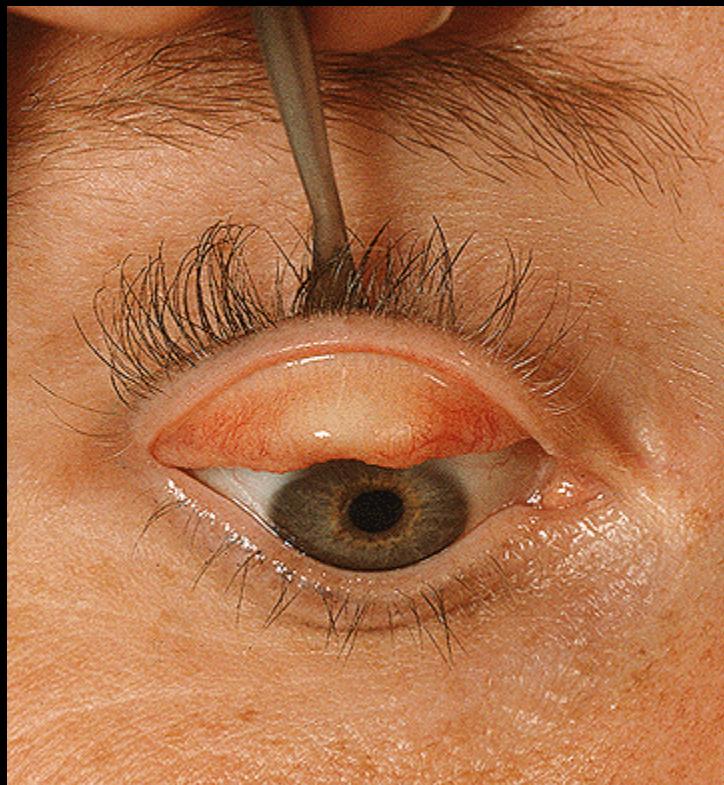

## **Chalazion** (tarsal chalazion)

## **Hordeolum** (stye)

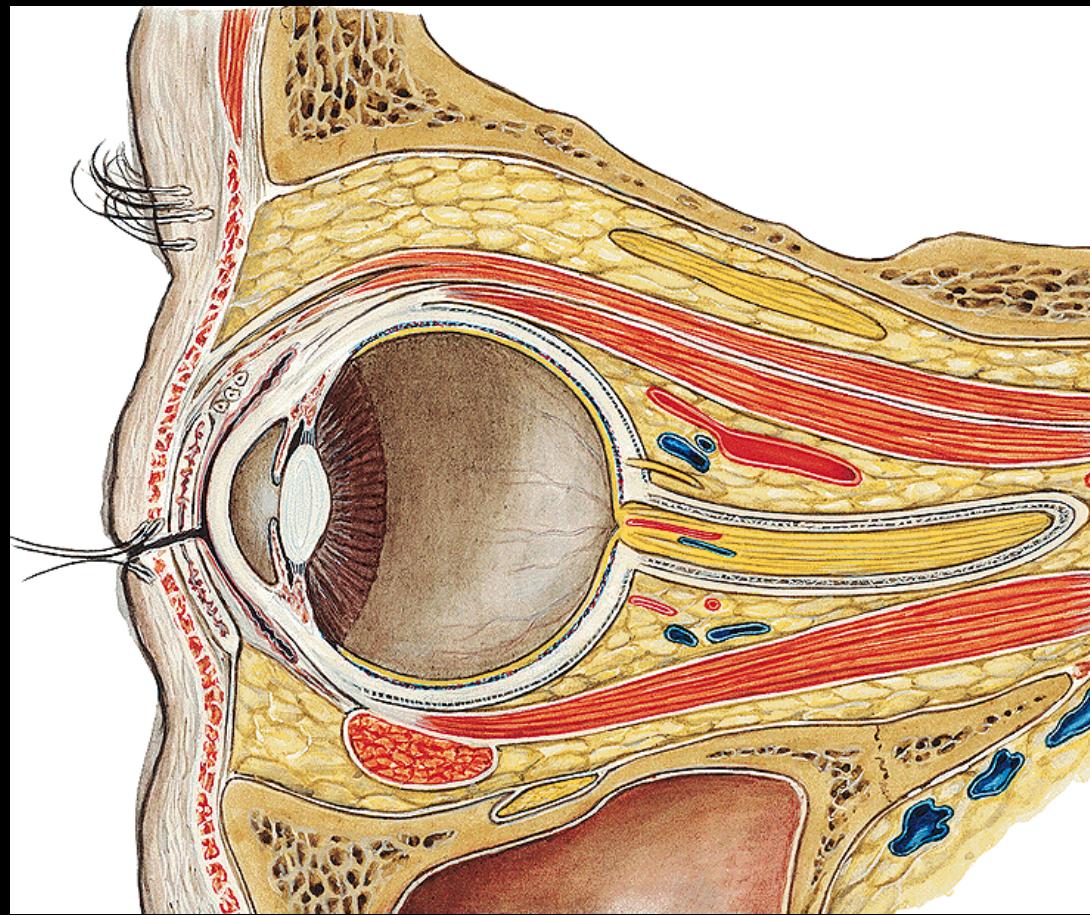

## Tunica conjunctiva

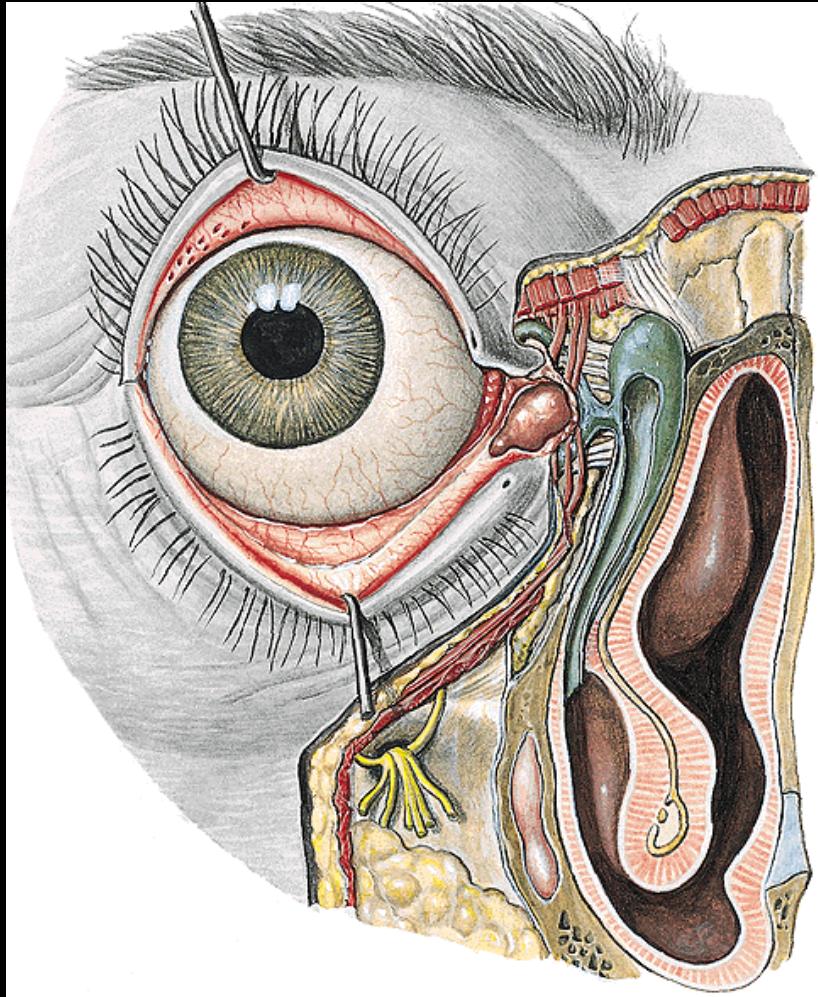

**tun. conj. palpebrarum**

■ **tun. conj. bulbi**

Fornix conjunctivae sup. et inf.

# **Apparatus lacrimalis**

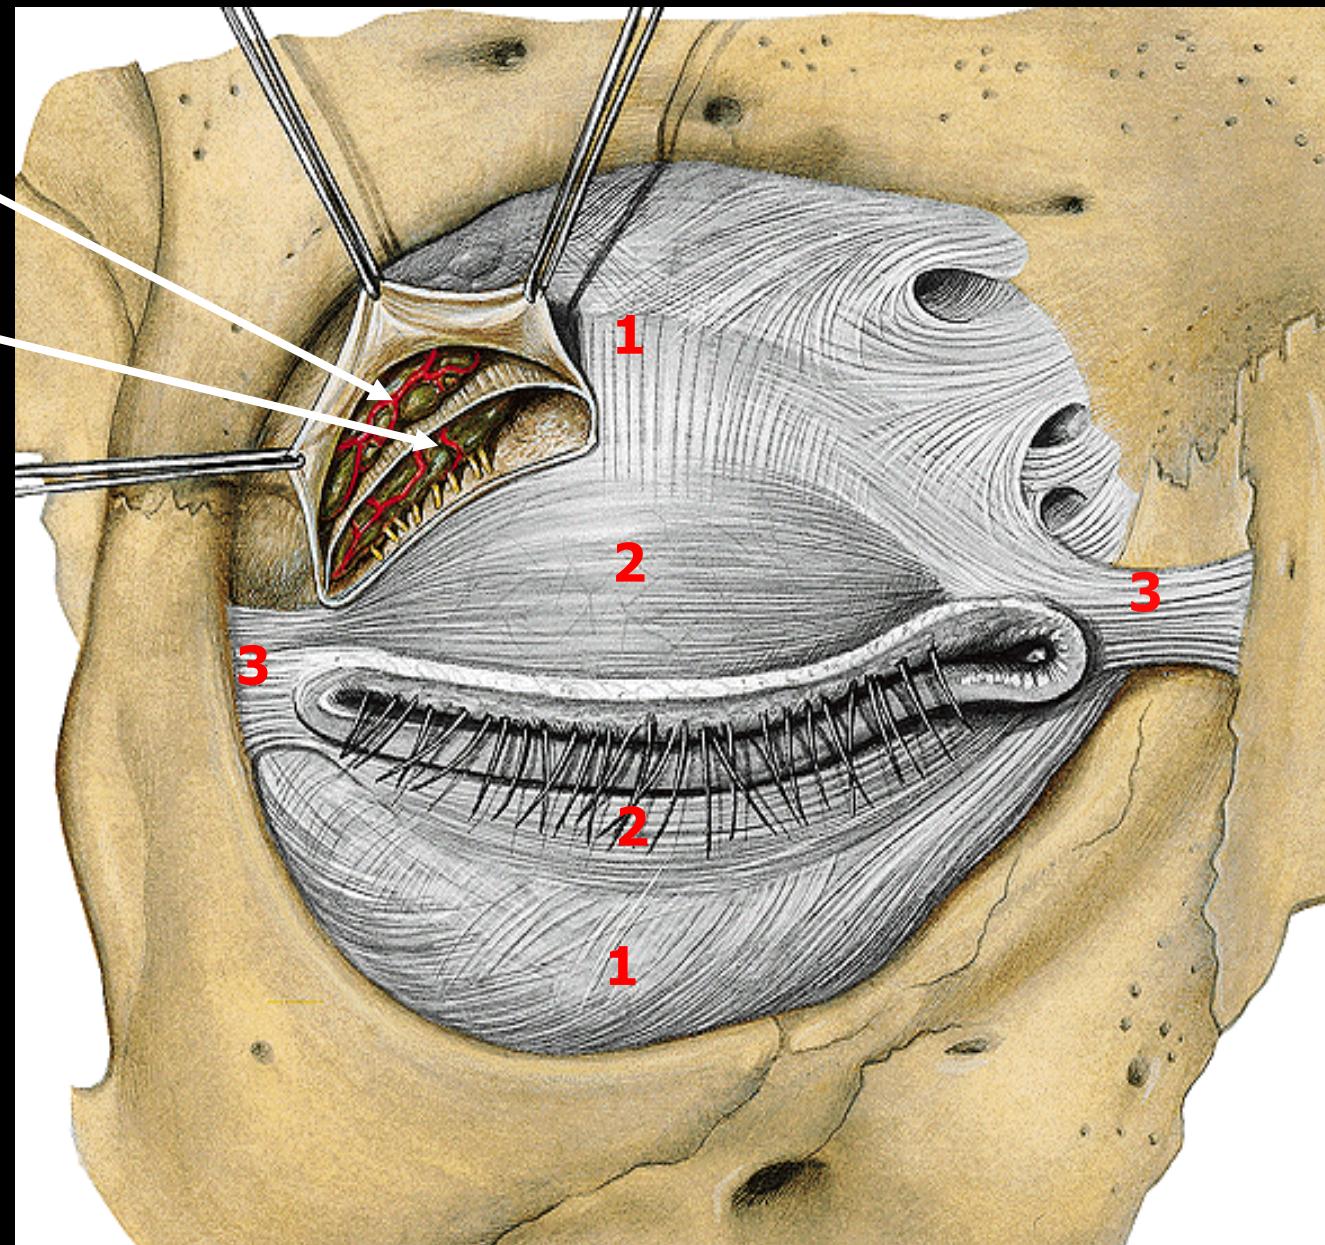

## **Glandula lacrimalis**

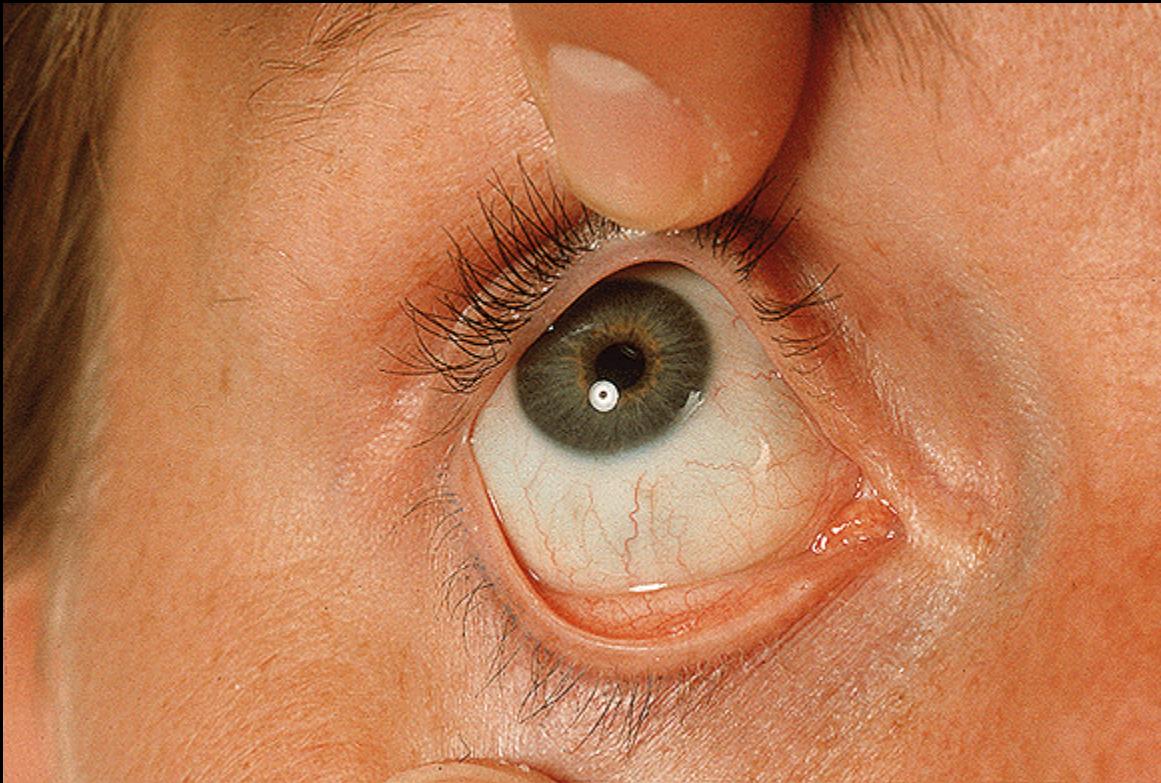

- > **ductuli excretorii**
- > **lacus lacrimalis**

- **papillae lacrimales**
- **puncta lacrimalia**
- **canaliculi lacrimales**
- **saccus lacrimalis**
- **ductus nasolacralis**

Pars orbitalis

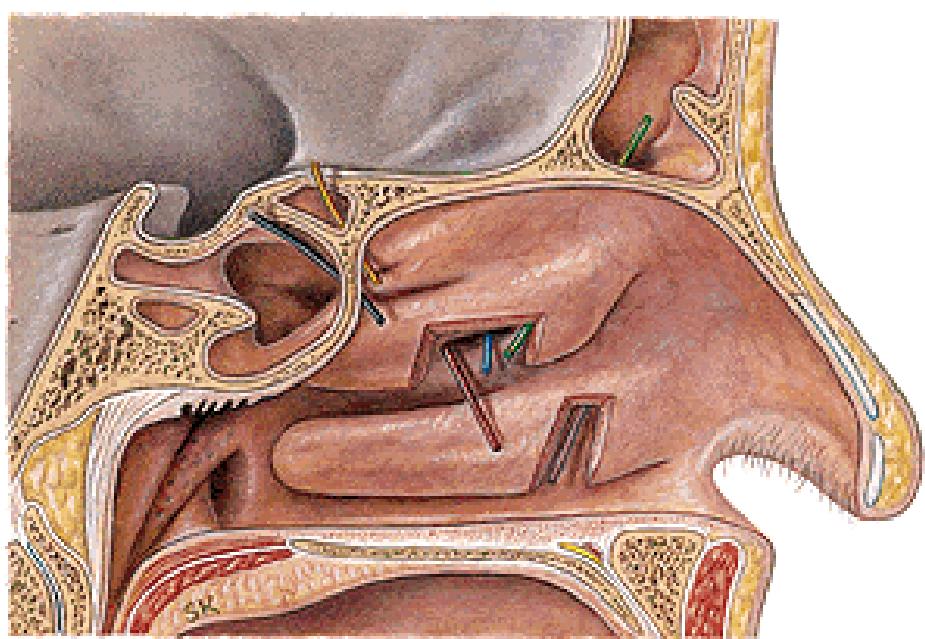

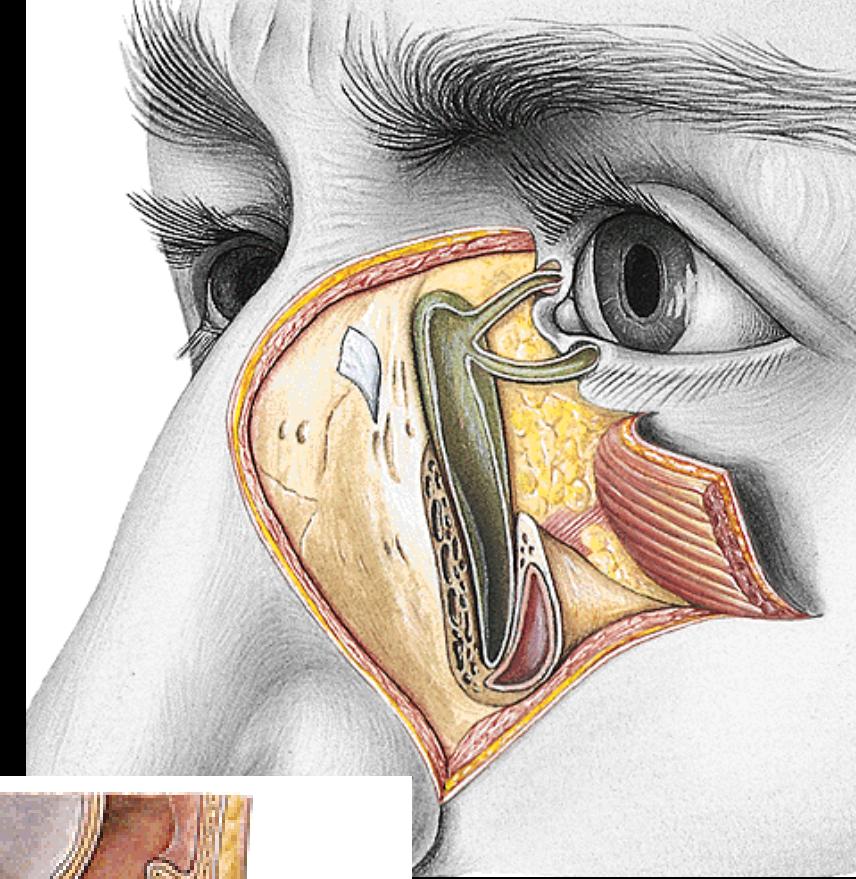

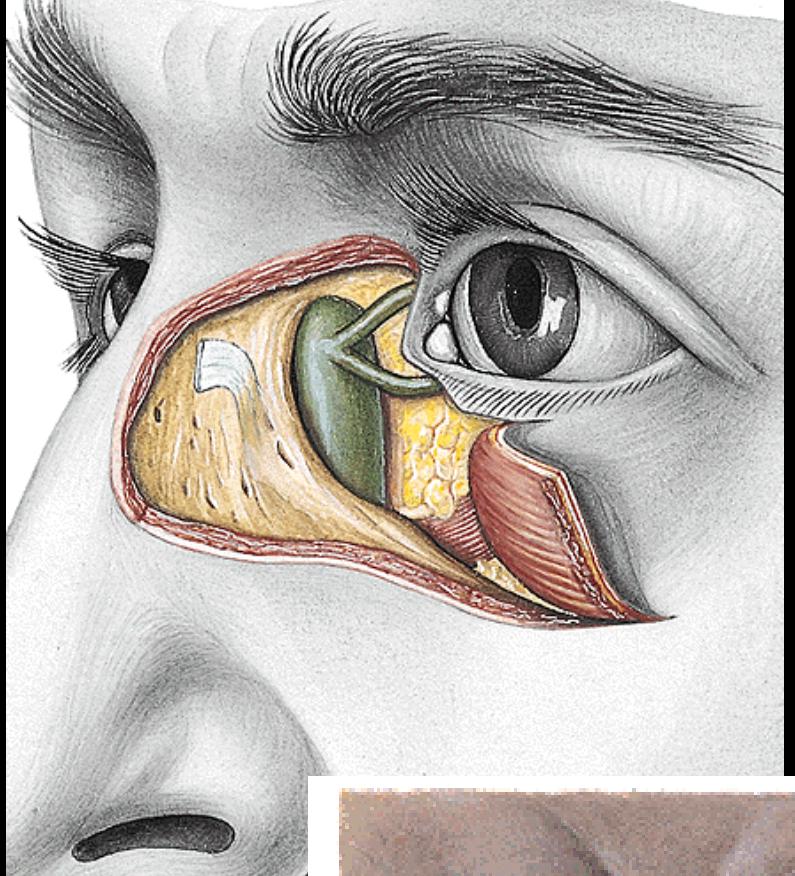

Pars palpebralis

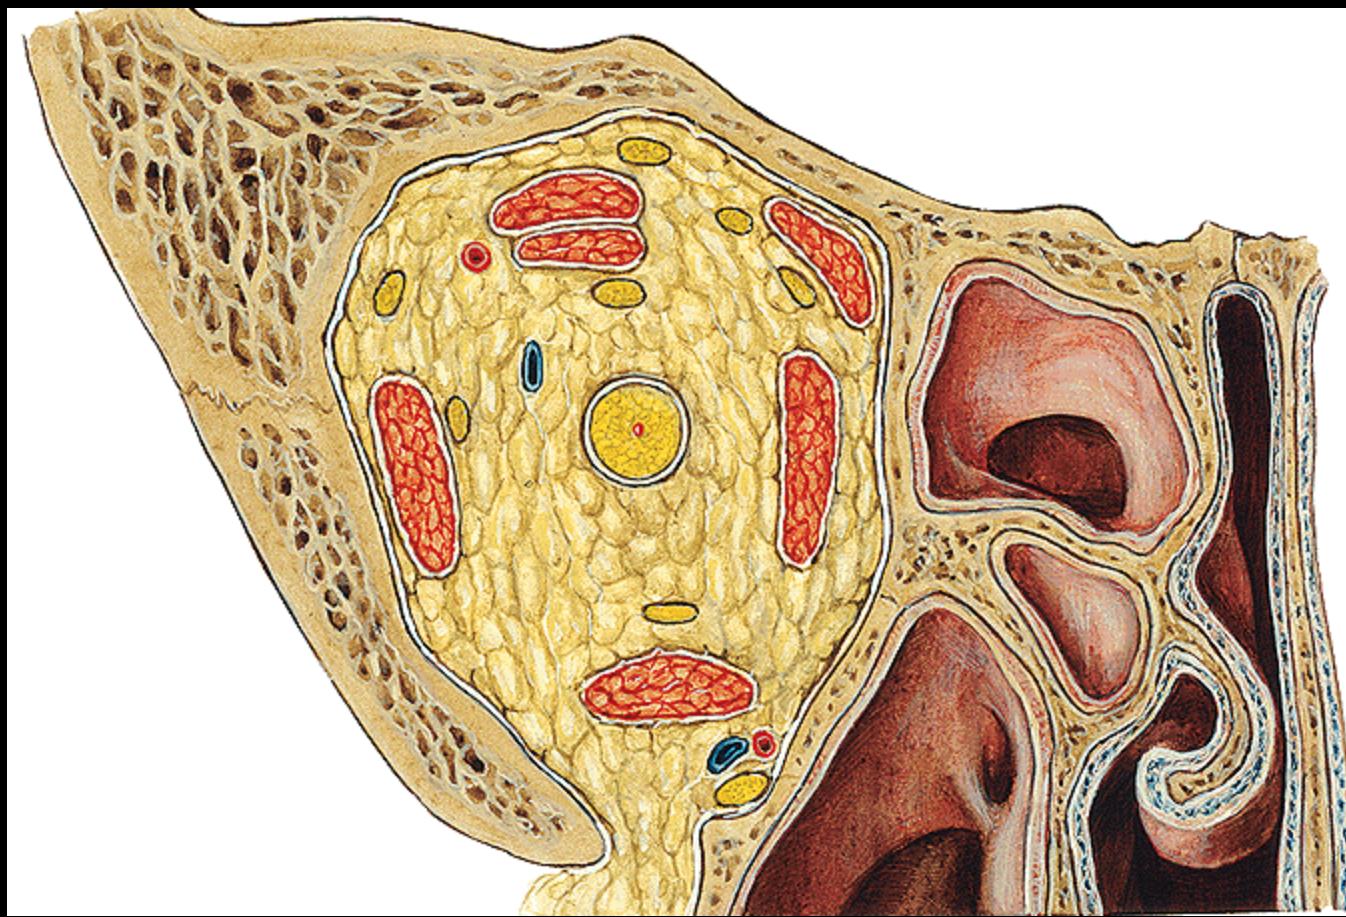

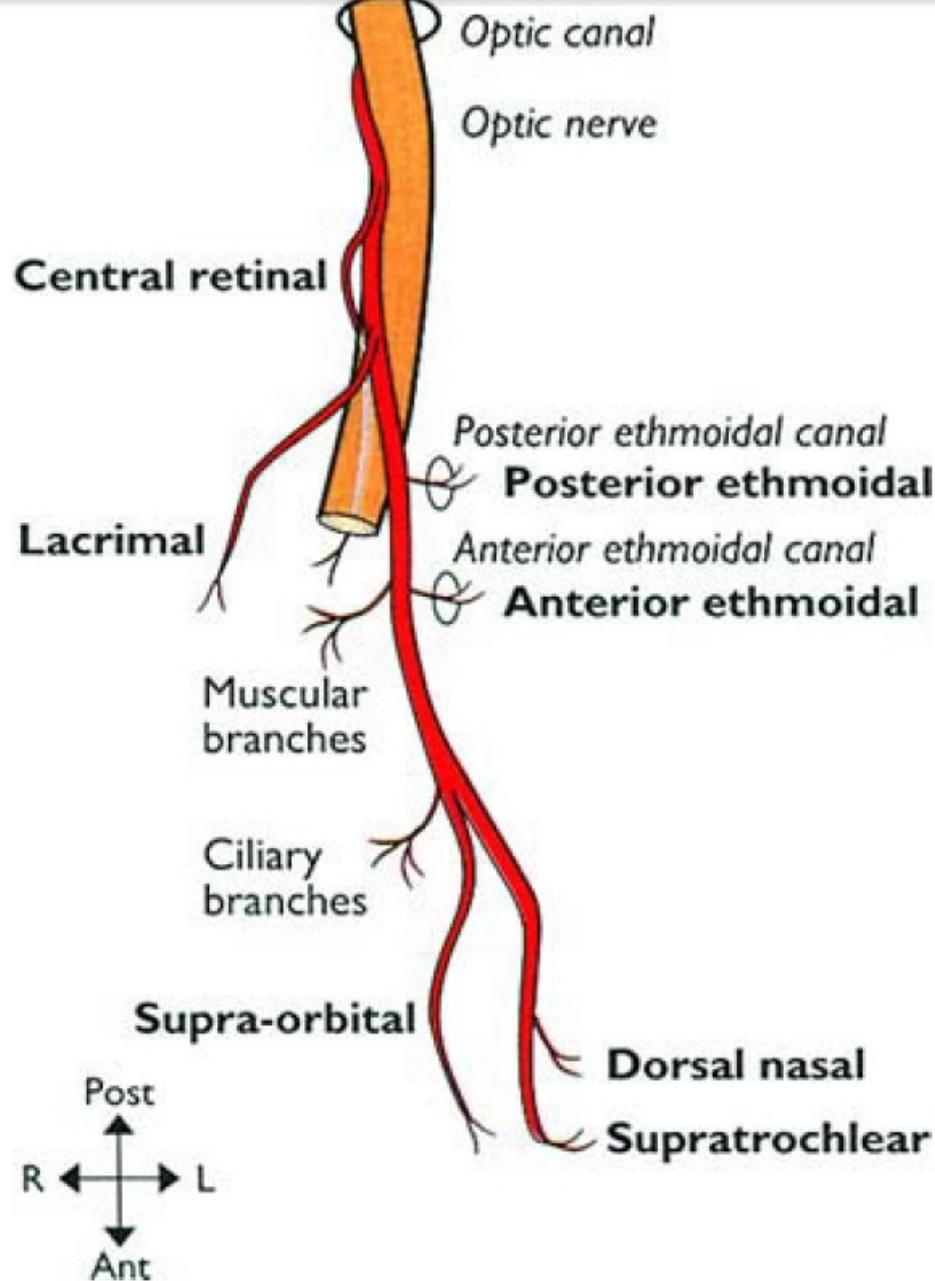

**Angulus medialis:**  
**lacus lacrimalis**

- **caruncula lacrimalis**
- **plica semilun. conjunctivae**

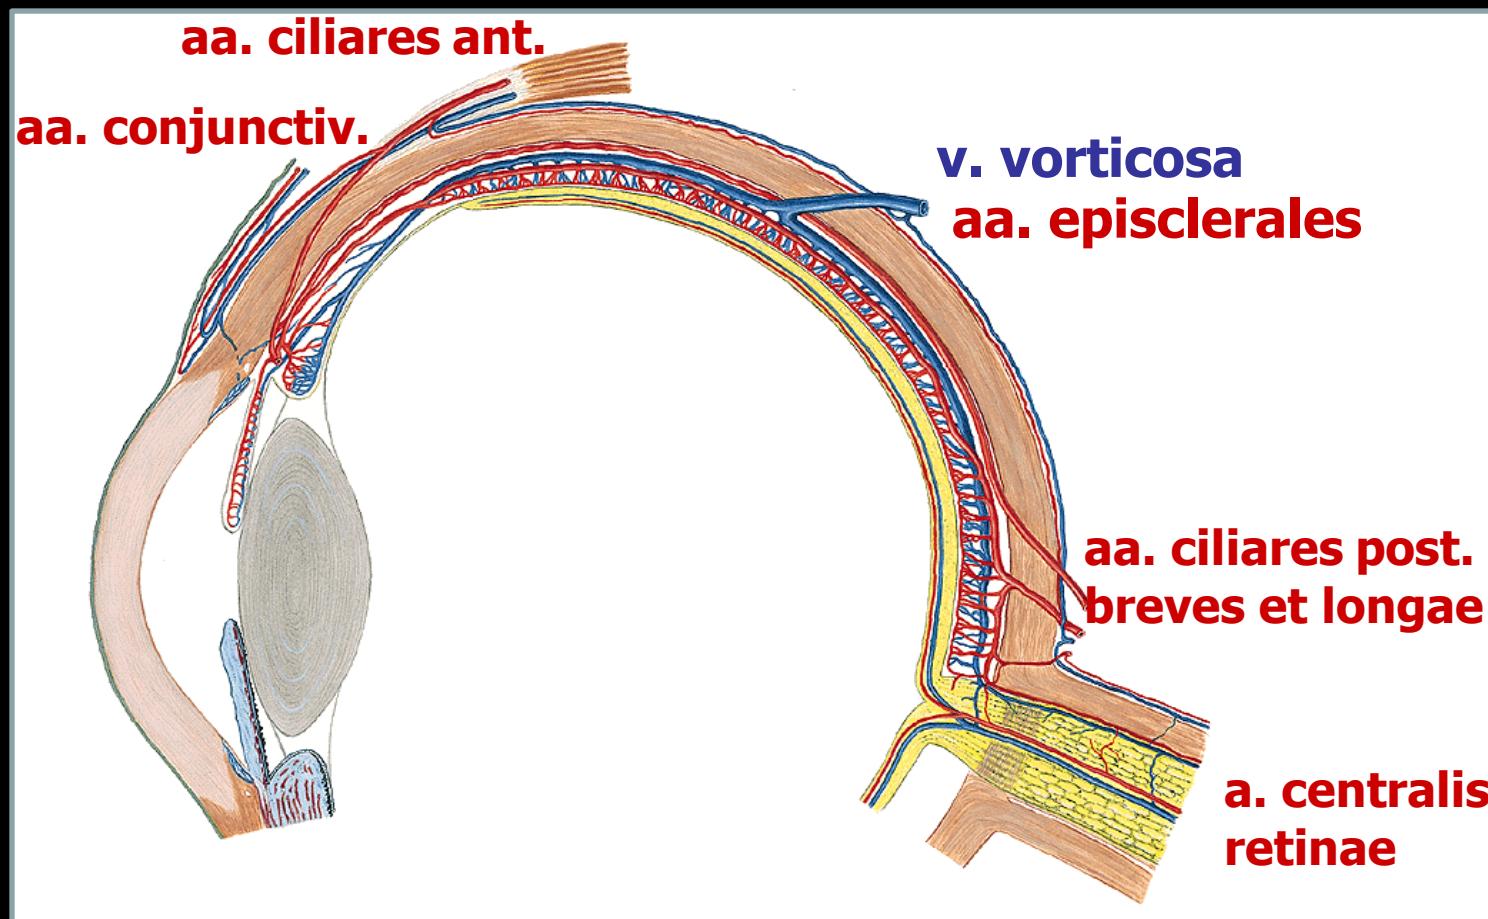

## Ophthalmic artery

Note: Right side viewed from above

# Blood supply

A. ophthalmica  
V ophtalmica sup.  
V. ophtalmica inf.

# Optic Nerve [Visual Pathway]

## Schema
