

Muscles of the lower limb

Mm. coxae

Musculus iliopsoas

- **ORIGIN:**disci intervertebrales and fibrous bundles along the lumbar spine, fossa iliaca
- **INSERTION:**trochanter minor femoris
- **INNERVATION:**plexus lumbalis
- **FUNCTION:** flexion of hip joint (it starts stepping)

Musculus gluteus maximus

- ORIGIN: linea glutea posterior, alae ossis ilium, fascia thoracolumbalis
- INSERTION: tractus iliotibialis, tuberositas glutea and proximal part of labium laterale lineae asperae femoris
- INNERVATION: n. gluteus inferior
- FUNCTION: extension of hip joint, by pulling tractus, it fixes the knee joint in extension

Musculus gluteus medius

- ORIGIN: between linea glutea anterior et posterior, crista iliaca
- INSERTION: trochanter major
- INNERVATION: n. gluteus superior
- FUNCTION: abduction of hip joint, flexion, extension

Musculus gluteus minimus

- **ORIGIN:** between linea glutea inferior et anterior
- **INSERTION:** trochanter major
- **INNERVATION:** n. gluteus superior
- **FUNCTION:** abduction and flexion of hip joint

Musculus tensor fasciae latae

- ORIGIN: spina iliaca anterior superior
- INSERTION: tractus iliotibialis
- INNERVATION: n. gluteus superior
- FUNCTION: it stretches tractus iliotibialis and secures stability of knee joint during extension

Musculus piriformis

- **ORIGIN:** lateral part of facies pelvina osis sacri
- **INSERTION:** trochanter major
- **INNERVATION:** plexus sacralis
- **FUNCTION:** femoral supination

Musculus gemellus superior

- **ORIGIN:** spina ischiadica
- **INSERTION:** fossa trochanterica
- **INNERVATION:**
- plexus sacralis
- **FUNCTION:**
femoral
supination

Musculus obturatorius internus

- **ORIGIN:**
membrana
obturatoria
- **INSERTION:** fossa
trochanterica
- **INNERVATION:**
plexus sacralis
- **FUNCTION:**
femoral supination

Musculus gemellus inferior

- ORIGIN: tuber ischiadicum
- INSERTION:
fossa trochanterica
- INNERVATION:
plexus sacralis
- FUNCTION:
femoral
supination

Musculus quadratus femoris

- ORIGIN: tuber ischiadicum
- INSERTION: crista intertrochanterica
- INNERVATION:
plexus sacralis
- FUNCTION: femoral supination

- Mm. femoris

Musculus sartorius

- ORIGIN: spina iliaca anterior superior
- INSERTION: pes anserinus
- INNERVATION: n. femoralis
- FUNCTION: flexion of hip joint, flexion of knee joint

Musculus quadriceps femoris

- ORIGIN: rec: spina iliaca anterior inferior, med: labium mediale, lat: labium laterale, inter: corpus femoris
- INSERTION:basis patellae, ligamentum patellae, tuberositas tibiae
- INNERVATION: n. femoralis
- FUNCTION:extension of knee joint
rectus: flexion of hip joint

Musculus quadriceps femoris

M. rectus femoris

M. vastus lateralis

M. vastus medialis

M. vastus intermedius

Musculus semitendinosus

- ORIGIN: tuber ischiadicum
- INSERTION: pes anserinus
- INNERVATION: n.
ischiadicus
- FUNCTION: extension of
hip joint, flexion of knee
joint

Musculus semimebranosus

- ORIGIN: tuber ischiadicum
- INSERTION: proximal part of tibia, ligamentum popliteum obliquum
- INNERVATION: n. ischiadicus
- FUNCTION: extension of hip joint, flexion of knee joint

Musculus biceps femoris

- ORIGIN: caput longum: tuber ischiadicum, caput breve: labium laterale lineae aspereae
- INSERTION: caput fibulae
- INNERVATION: n. ischiadicus
- FUNCTION: flexion of knee joint, extension of hip joint

Musculus gracilis

- **ORIGIN:**
ventrocaudally from
symphysis
- **INSERTION:** pes
anserinus
- **INNERVATION:** n.
obturatorius
- **FUNCTION:** adduction
of hip joint, flexion of
knee joint

Pes anserinus

Musculus adductor longus

- ORIGIN: ramus superior ossis pubis
- INSERTION: middle part of labium mediale lineae asperae
- INNERVATION: n. obturatorius
- FUNCTION: adduction of thigh

Musculus adductor brevis

- ORIGIN: between ramus superior et inferior
- INSERTION: proximal part of labium mediale lineae asperae
- INNERVATION: n. obturatorius
- FUNCTION: adduction of thigh

Musculus adductor magnus

- ORIGIN: from ramus inferior to tuber ischiadicum
- INSERTION: labium mediale lineae asperae, epicondylus medialis femoris
- INNERVATION: n. obturatorius, n. ischiadicus
- FUNCTION: adduction of thigh

Musculus pectineus

- ORIGIN: pecten ossis pubis
- INSERTION: linea pectinea femoris
- INNERVATION: n. obturatorius, n. femoralis
- FUNCTION: adduction of thigh

Musculus obturatorius externus

- **ORIGIN:** external surface of membrana obturatoria
- **INSERTION:** fossa trochanterica
- **INNERVATION:** n. obturatorius
- **FUNCTION:** supination of hip joint

FEMORAL FASCIAE

- **Fascia lata- tractus iliotibialis**

Mm. cruris

Musculus tibialis anterior

- ORIGIN: lateral part of tibia,
membrana interossea cruris
- INSERTION: base of 1st
metatarsal bone, os
cuneiforme mediale
- INNERVATION: n. fibularis
profundus
- FUNCTION: dorsal flexion
of foot, supination

Musculus extensor hallucis longus

- **ORIGIN:** distal part of fibula, membrana interossea cruris
- **INSERTION:** dorsal aponeurosis of big toe
- **INNERVATION:** n. fibularis profundus
- **FUNCTION:** extension of big toe, dorsal flexion of foot

Musculus extensor digitorum longus

- **ORIGIN:** condylus lateralis tibiae, fibula, membrana interossea
- **INSERTION:** dorsal aponeuroses of 2nd-5th toes, tuberositas ossis metatarsi quinti (m. peroneus tertius)
- **INNERVATION:** n. fibularis profundus
- **FUNCTION:** dorsal flexion of toes and foot, tertius-pronation of foot

Musculus fibularis longus

- ORIGIN: caput fibulae and proximal part of fibula
- INSERTION: os cuneiforme mediale, base of 1st metatarsal bone, on the plantar side!
- INNERVATION: n. fibularis superficialis
- FUNCTION: plantar flexion and pronation of foot, transversal foot vault

Musculus fibularis brevis

- ORIGIN: distal part of fibula
- INSERTION: tuberositas ossi metatarsi quinti
- INNERVATION: n. fibularis superficialis
- FUNCTION: plantar flexion and pronation of foot

Musculus triceps surae

- ORIGIN: m.
gastrocnemius-epikondyly
femuru, soleus-caput
fibulae a arcus tendineus
musculi solei
- INSERTION: tendo
calcaneus-tuber calcanei
- INNERVATION: n. tibialis
- FUNCTION: plantar
flexion of foot,
gastrocnemius-flexion of
knee joint

Musculus plantaris

- **ORIGIN:**
epicondylus
lateralis femoris
- **INSERTION:**
tendo calcanei
- **INNERVATION:**
n. tibialis
- **FUNCTION:**
flexion of knee
joint

Musculus popliteus

- ORIGIN: epicondylus lateralis femoris
- INSERTION:
proximally from linea m. solei on tibia
- INNERVATION: n. tibialis
- FUNCTION: flexion of knee joint

Musculus tibialis posterior

- ORIGIN: membrana, tibia
- INSERTION: tuberositas
ossis navicularis
- INNERVATION: n. tibialis
- FUNCTION: plantar flexion
of foot, foot vault

Musculus flexor digitorum longus

- ORIGIN: posterior surface of tibia
- INSERTION: distal phalanx of 2nd-5th toes
- INNERVATION: n. tibialis
- FUNCTION: plantar flexion of foot and toes

Musculus flexor hallucis longus

- **ORIGIN:** posterior surface of fibula
- **INSERTION:** distal phalanx of big toe, groes together with tendon of m. fdl
- **INNERVATION:** n. tibialis
- **FUNCTION:** plantar flexion of foot and big toe

Mm. pedis

Musculus extensor hallucis brevis

- **ORIGIN:** in area of sinus tarsi
- **INSERTION:** dorsal aponeurosis of big toe
- **INNERVATION:** n. fibularis profundus
- **FUNCTION:** extension of big toe

Musculus extensor digitorum brevis

- **ORIGIN:** in area of sinus tarsi
- **INSERTION:** dorsal aponeurosis of the 2nd-4th toes
- **INNERVATION:** n. fibularis profundus
- **FUNCTION:** extension of the 2nd – 4th toes

Musculus abductor hallucis

- ORIGIN: processus medialis tuberis calcanei
- INSERTION: medial sesamoidal bone and base of proximal phalanx of big toe
- INNERVATION: n. plantaris medialis
- FUNCTION: flexion and abduction of proximal phalanx of big toe

Musculus flexor hallucis brevis

- **ORIGIN:** plantar side of ossa cuneiformia,
- **INSERTION:** sesamoidal bone
- **INERVATION:** n. plantaris medialis
- **FUNCTION:** flexion of big toe

Musculus adductor hallucis

- ORIGIN: by two heads- caput obliquum- plantar side of os cuboideum and base of the 4th and 5th metatarsal bone
 - caput transversum- plantar side of the 3rd-5th metatarsophalangeal joint
- INSERTION: lateral sesamoidal bone
- INNERVATION: n. plantaris lateralis
- FUNCTION: adduction of big toe

Musculus abductor digiti minimi

- ORIGIN: processus lateralis tuberis calcanei
- INSERTION: base of proximal phalanx of the 5th toe
- INNERVATION: n. plantaris lateralis
- FUNCTION: abduction of the 5th toe

Musculus flexor digiti minimi brevis

- **ORIGIN:** base of the 5th metatarsal bone
- **INSERTION:** base of the proximal phalanx of 5th toe
- **INNERVATION:** n. plantaris lateralis
- **FUNCTION:** flexion of 5th toe

Musculus opponens digiti minimi

- **ORIGIN:** plantar side of os cuboideum
- **INSERTION:** body of the 5th metatarsal bone
- **INNERVATION:** n. plantaris lateralis
- **FUNCTION:** mild opposition of the 5th toe

Musculus flexor digitorum brevis

- ORIGIN: processus medialis tuberis calcanei
- INSERTION: 4 parts to toes with three phalanges, middle phalanx, chiasma tendinum
- INNERVATION: n. plantaris medialis
- FUNCTION: flexion of proximal and middle phalanx

Musculus quadratus plantae

- ORIGIN: tuber calcanei
- INSERTION: tendon of m. flexor digitorum longus
- INNERVATION: n. plantaris lateralis
- FUNCTION: participates in flexion of toes

Musculi interossei plantares (3)

- ORIGIN: medial side of the 3th-5th metatarsal bone
- INSERTION: medial side of proximal phalanx of 3th-5th toes
- INNERVATION: n. plantaris lateralis
- FUNCTION: adduction of the 3th-5th toes, mild flexion of proximal palanges

Musculi interossei dorsales (4)

- ORIGIN: with two heads on adjacent sides of neighboring metatarsal bones
- INSERTION: proximal phalanges of appropriate toes
- INNERVATION: n. plantaris lateralis
- FUNCTION: abduction of toes, flexio of proximal phalanges

Musculi lumbricales

- **ORIGIN:** tendons of m. flexor digitorum longus
- **INSERTION:** medial side of base of prox. phalanges of the 2nd-5th and to their dorsal aponeuroses
- **INNERVATION:** the 1st and 2nd ones - n. plantaris medialis, the 3rd and 4th - n. plantaris lateralis
- **FUNCTION:** flexion of proximal palanges, inclination of toes to medial side

Thank you for your attention!
