

Syllabus of neurology and neurophysiology courses within a bachelor programme “Physiotherapy” – foreign students (2nd Year) at 1st Department of Neurology Faculty of Medicine Masaryk University. Lectures in autumn term of a school year 2017/2018.

- 1. Neurology and neurophysiology – the content of study. History in neurology. Reflexology, proprioceptive and exteroceptive reflexes.**
19.9.2017 Eva Pešlová, MD
- 2. Cranial nerves I-XII, physiology, pathology. Bulbar and pseudobulbar syndrome.**
26.9.2017 Kristína Saxunová, MD
- 3. Pyramidal syndrome, pathological reflexes in pyramidal tract, classification of pareses, main characteristics.**
3.10.2017 Eva Pešlová, MD
- 4. Extrapyramidal system, structure and functions, dyskinesia and dystonia, parkinsonian syndrome.**
10.10.2017 Barbora Sklenářová, MD
- 5. Sensory system, proprioception, exteroception, spinal cord syndromes, syndrome of transversal lesion of spinal cord, disorders of sensation, syndrome of spinal cord hemisection, syndrome of cauda equina.**
17.10.2017 Kristýna Saxunová, MD
- 6. Cerebellum, structure and functions. Paleocerebellar syndrome, neocerebellar syndrome. Disorders of consciousness, quantitative disorders of consciousness, scale of disorders of consciousness, quantitative disorders of consciousness.**
24.10.2017 Barbora Deutschová, MD
- 7. Structure and functions of meninges, hematoencephalic barrier, meningeal syndrome, syndrome of intracranial hypertension, hydrocephalus.**
31.10.2017 Barbora Deutschová, MD
- 8. Structure and function of spine. Examination of spine, principles of manipulation therapy. Radicular syndromes, history, clinical signs, radicular syndromes on upper and lower extremities. Radicular vs pseudoradicular syndrome.**
7.11.2017 Jiří Bůžil, MD
- 9. Symbolic functions and their disorders: disorders of speech, alexia, agraphia, acalculia, gnostic disorders, disorders of praxis.**
14.11.2017 Tomáš Boušek, MD
- 10. Supplemental examination in neurology – imaging (X-ray, CT, MRI, ultrasound, SPECT, PET)**
21.11.2017 Eva Pešlová, MD

11. Supplemental examination in neurology - neurophysiological (EEG, EMG, EP)

28.11.2017

Tomáš Boušek, MD

12. Gait and stability disorders - spastic gait, cerebellar gait, gait in lesions of peripheral nerves and plexuses, differential diagnostics of gait disorders. Synkinesia, postural instability.

5.12.2017

Jan Vinklárek, MD

13. Examination algorithm in neurology, repetition of neurological examination

12.12.2017

Barbora Sklenářová, MD

14. Credit test. (IS MU)

19.12.2017

Irena Doležalová, MD

The lectures take place in the Lecture room, building B1 – 5th floor in St. Anne's Faculty hospital, every Tuesday at 9:45 – 10:30.
