Syllabus of neurology and neurophysiology courses within a bachelor programme "Physiotherapy" – foreign students (2<sup>nd</sup> Year) at 1<sup>st</sup> Department of Neurology Faculty of Medicine Masaryk University.

<u>Lectures</u> in autumn term of a school year 2018/2019.

1. Neurology and neurophysiology – the content of study. History in neurology. Reflexology, proprioceptive and exteroceptive reflexes.

18.9.2018 Eva Pešlová, MD

2. Cranial nerves I-XII, physiology, pathology. Bulbar and pseudobulbar syndrome.

25.9.2018 Barbora Sklenárová, MD

3. Pyramidal syndrome, pathological reflexes in pyramidal tract, classification of pareses, main characteristics.

2.10.2018 Eva Pešlová, MD

Extrapyramidal system, structure and functions, dyskinesis and dystonia, parkinsonian syndrome.
 9.10.2018
 Rastislav Šumec, MD

 Sensory system, proprioception, exteroception, spinal cord syndromes, syndrome of transversal lesion of spinal cord, disorders of sensation, syndrome of spinal cord hemisection, syndrome of cauda equina.

16.10.2018 Tomáš Boušek, MD

6. Cerebellum, structure and functions. Palleocerebellar syndrome, neocerebellar syndrome. Disorders of consciousness, quantitative disorders of consciousness, scale of disorders of consciousness, quantitative disorders of consciousness.

23.10.2018 Barbora Deutschová, MD

7. Structure and functions of meninges, hematoencephalic barrier, meningeal syndrome, syndrome of intracranial hypertension, hydrocephalus.

30.10.2018 Jiří Búřil, MD

8. Structure and function of spine. Examination of spine, principles of manipulation therapy. Radicular syndromes, history, clinical signs, radicular syndromes on upper and lower extremities. Radicular vs pseudoradicular syndrome.

6.11.2018 Eva Pešlová, MD

9. Symbolic functions and their disorders: disorders of speech, alexia, agraphia, acalculia, gnostic disorders, disorders of praxis.

13.11.2018 Tomáš Boušek, MD

10. Supplemental examination in neurology – imaging (X-ray, CT, MRI, ultrasound, SPECT, PET) 20.11.2018 Eva Pešlová, MD

**11. Supplemental examination in neurology - neurophysiological (EEG, EMG, EP)** 27.11.2018 Tomáš Boušek, MD

12. Gait and stability disorders - spastic gait, cerebellar gait, gait in lesions of peripheral nerves and plexuses, differential diagnostics of gait disorders. Synkinesia, postural instability.

4.12.2018 Jan Vinklárek, MD

13. Examination algorithm in neurology, repetition of neurological examination

11.12.2018 Ivona Morávková, MD

14. Credit test. (IS MU)

18.12.2018

Irena Doležalová, MD

The lectures take place in the Lecture room, building  $B1 - 5^{th}$  floor in St. Anne's Faculty hospital, every Tuesday at 9:00 - 9:50.
