

Nervy dolní končetiny topografie(2)

PLEXUS LUMBALIS

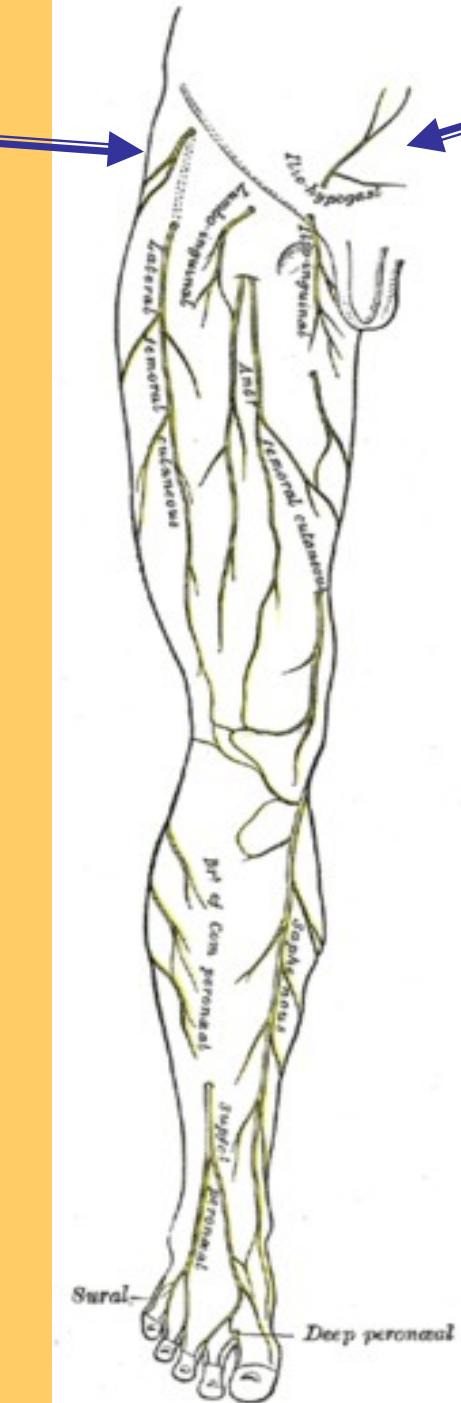

TOPO: psoas, quadratus

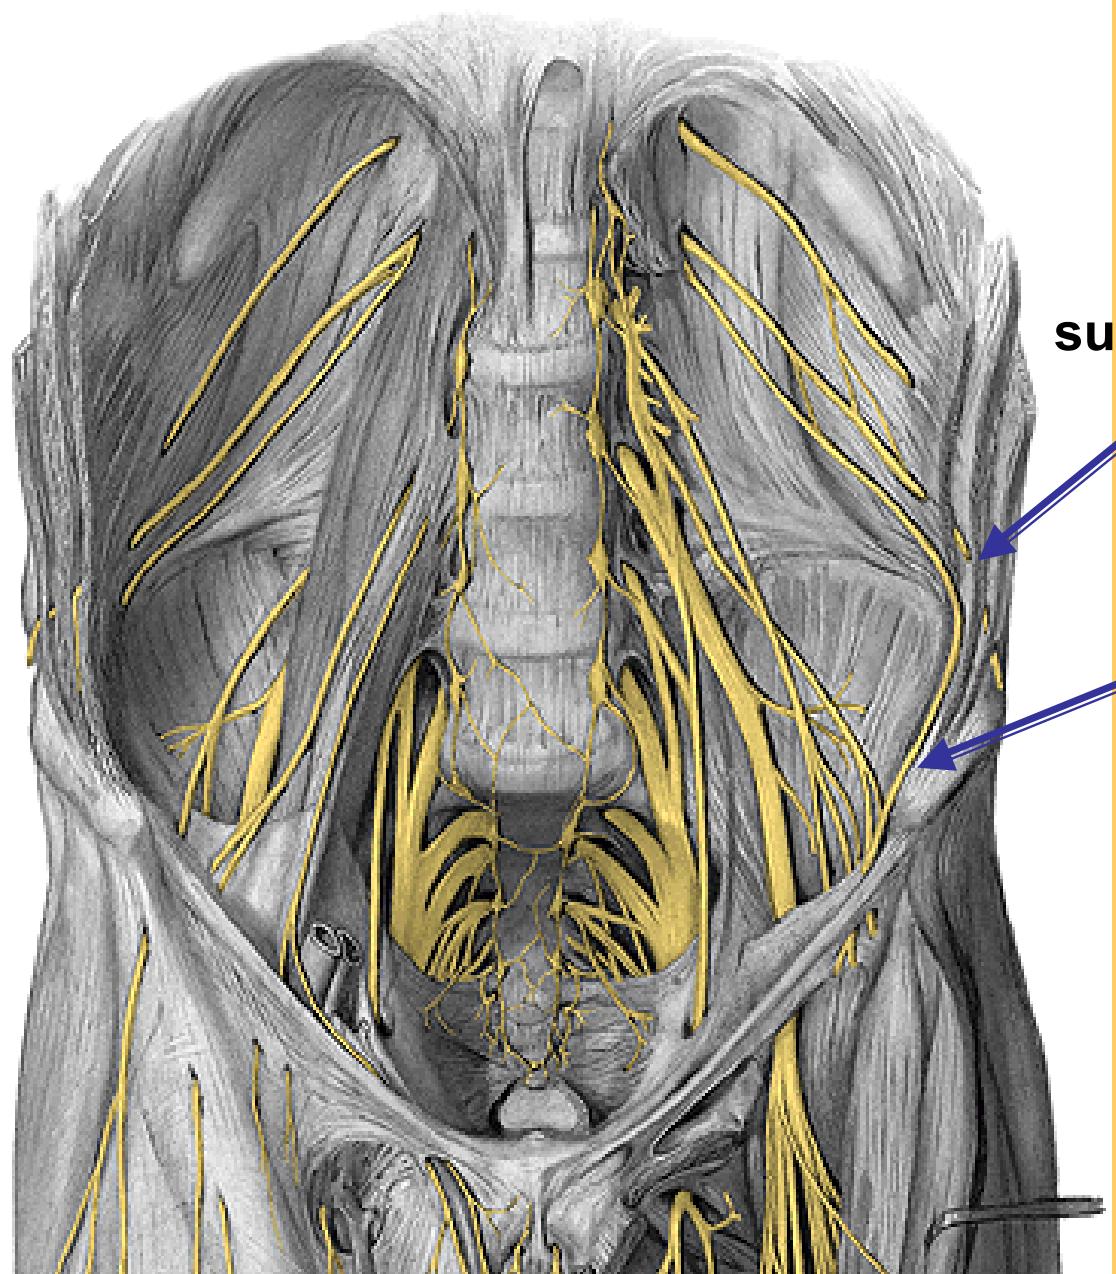

Větve :

A) n. iliohypogastricus – mezi svaly k zevnímu anulu
rr. musculares -

= kožně u spiny a anulu

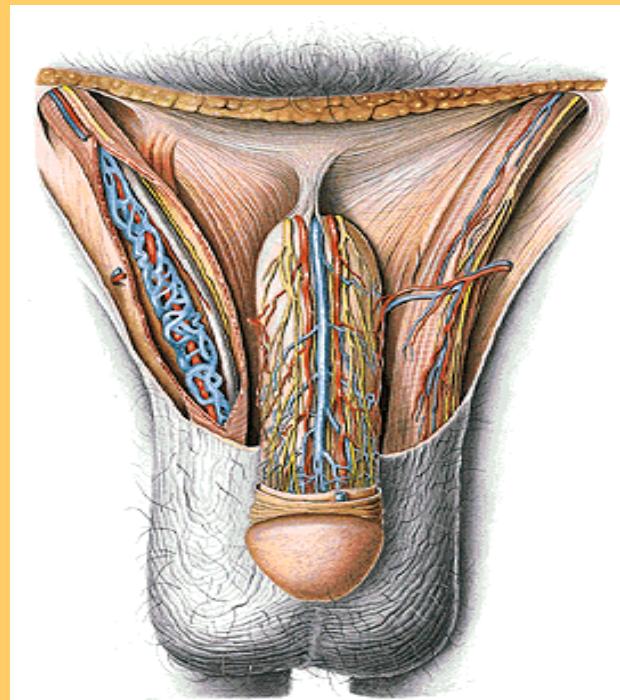

n. iliohypogastricus

sub.cost.

iliohypogastr.

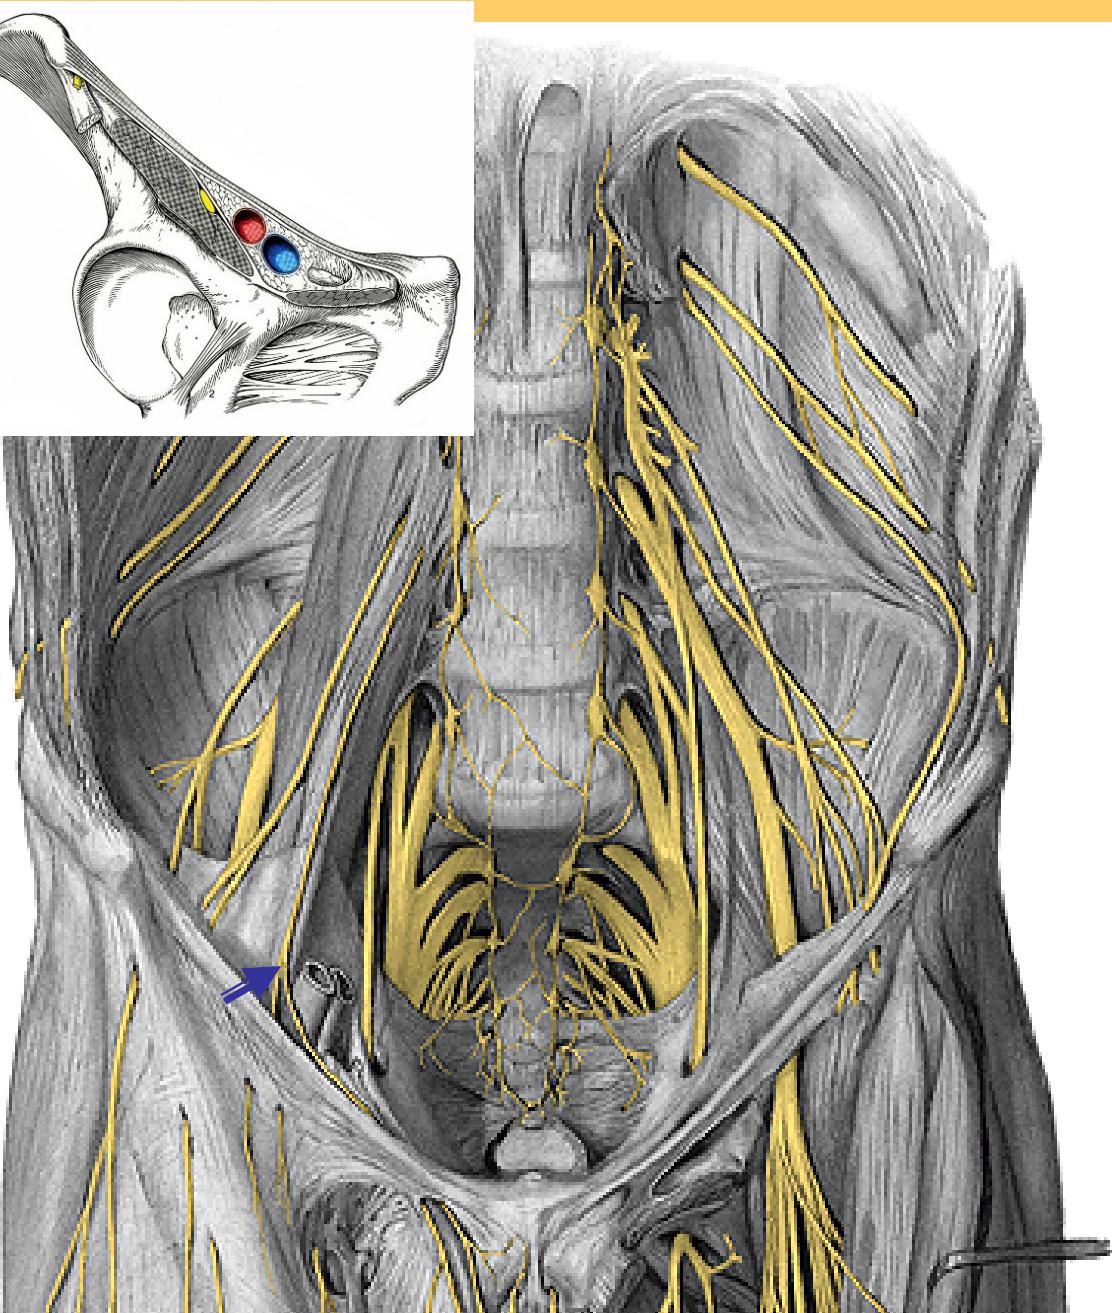

B) n. ilioinguinalis
do zevního anulu- lat.:
cremaster, scrotum, labia

TOPO:
psoas

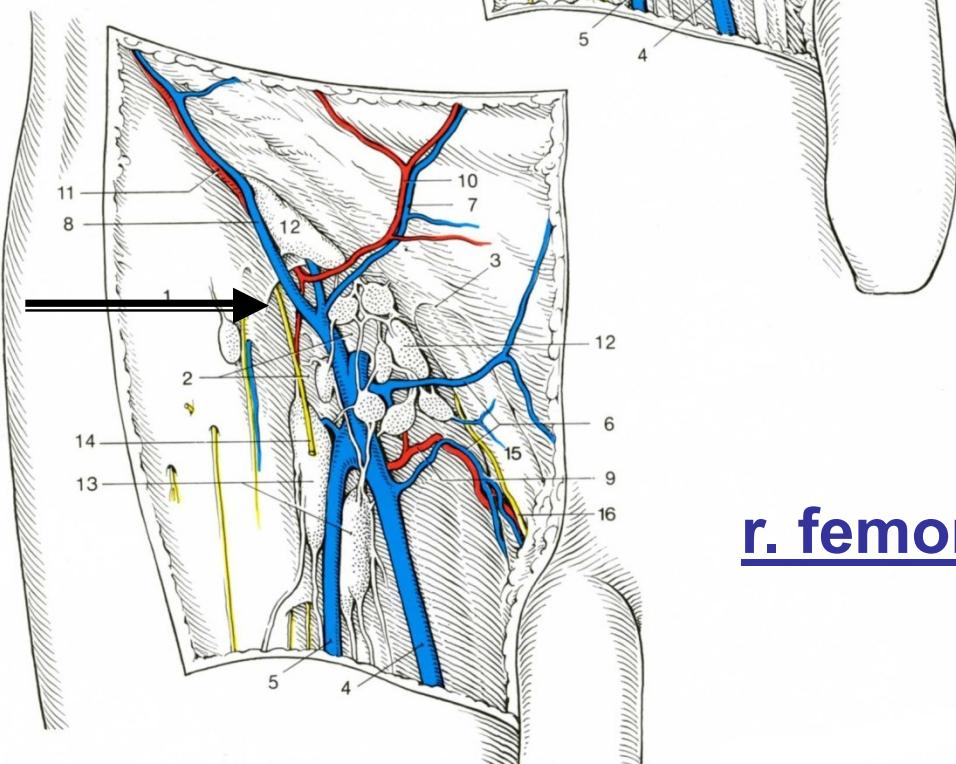

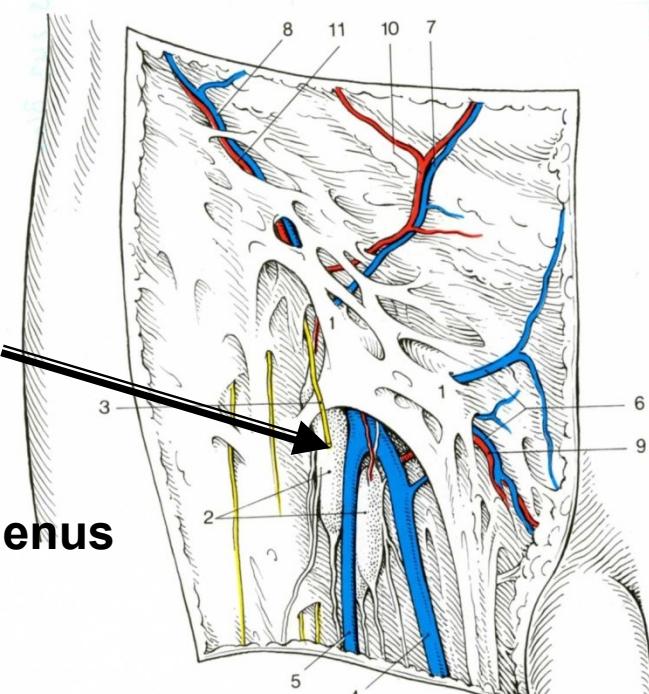

Větve :

r. **genitalis** - med.ve funic.-
cremaster, dartos, scrotum
r. **femoralis** – v lacun. vasor.-
k hiatus saph.

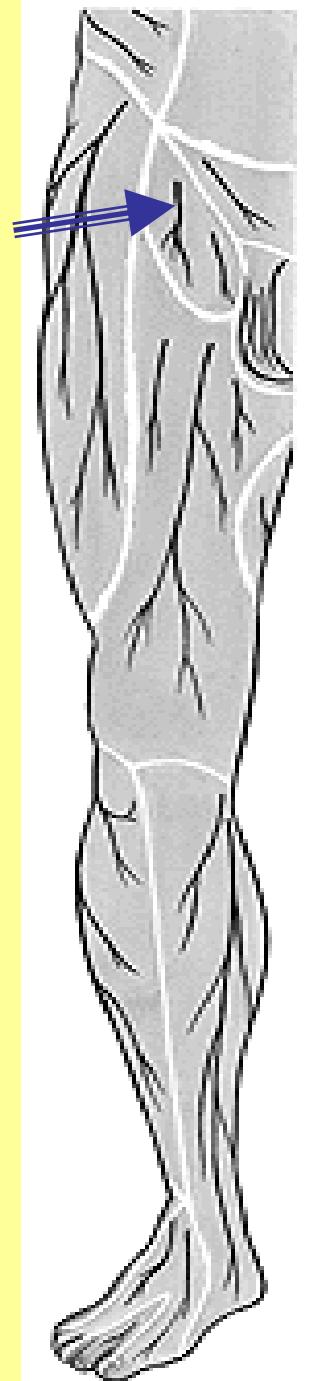

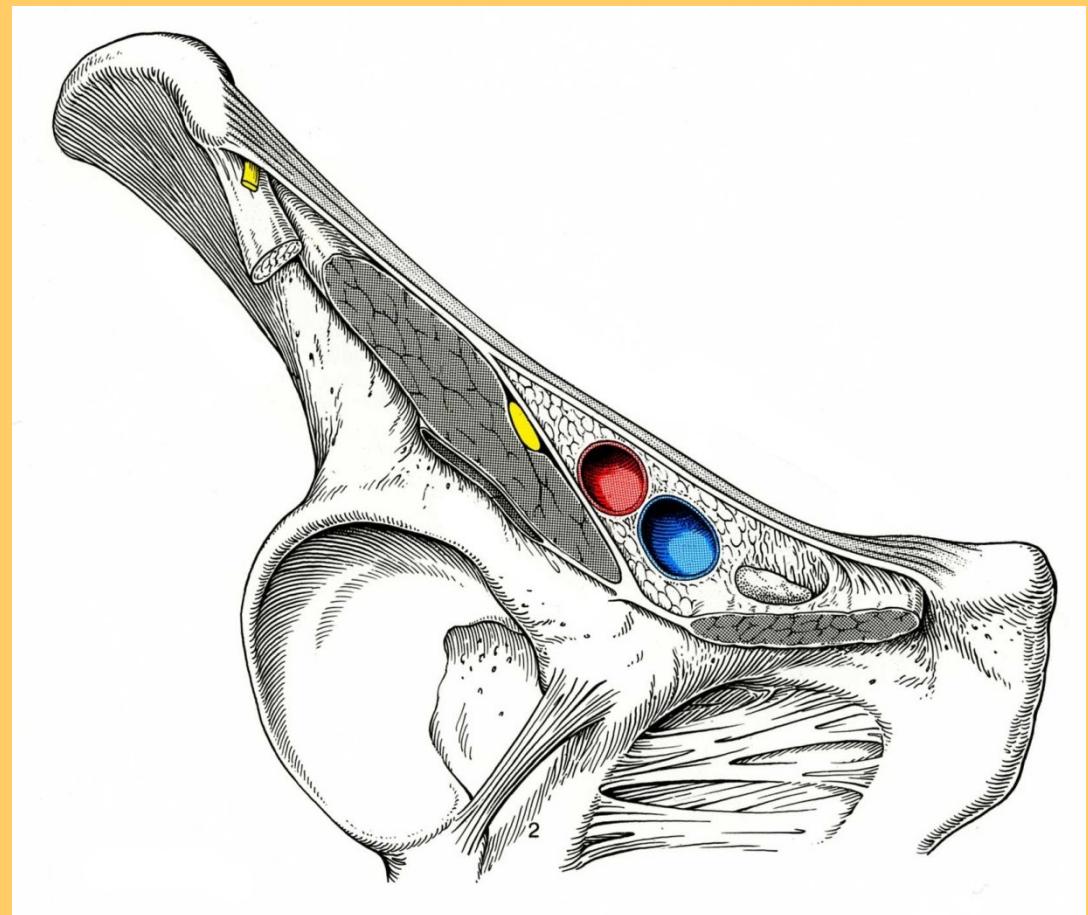

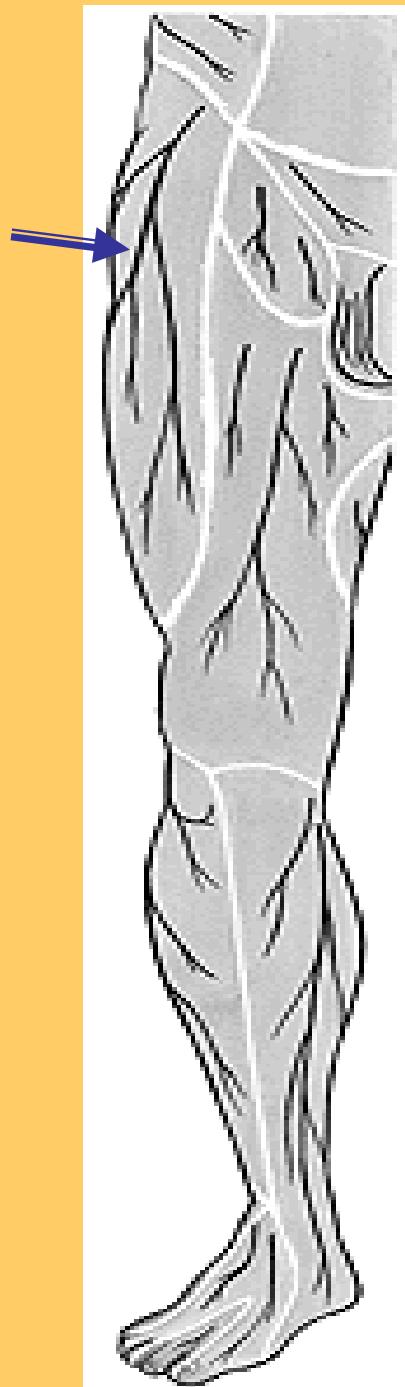

C) n. genitofemoralis

Hiatus saphenus

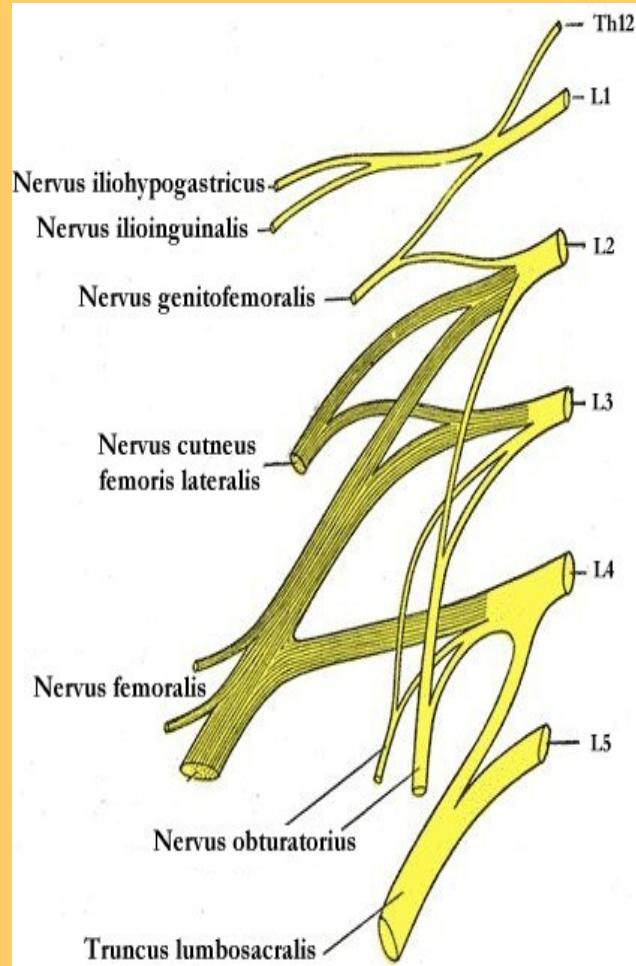

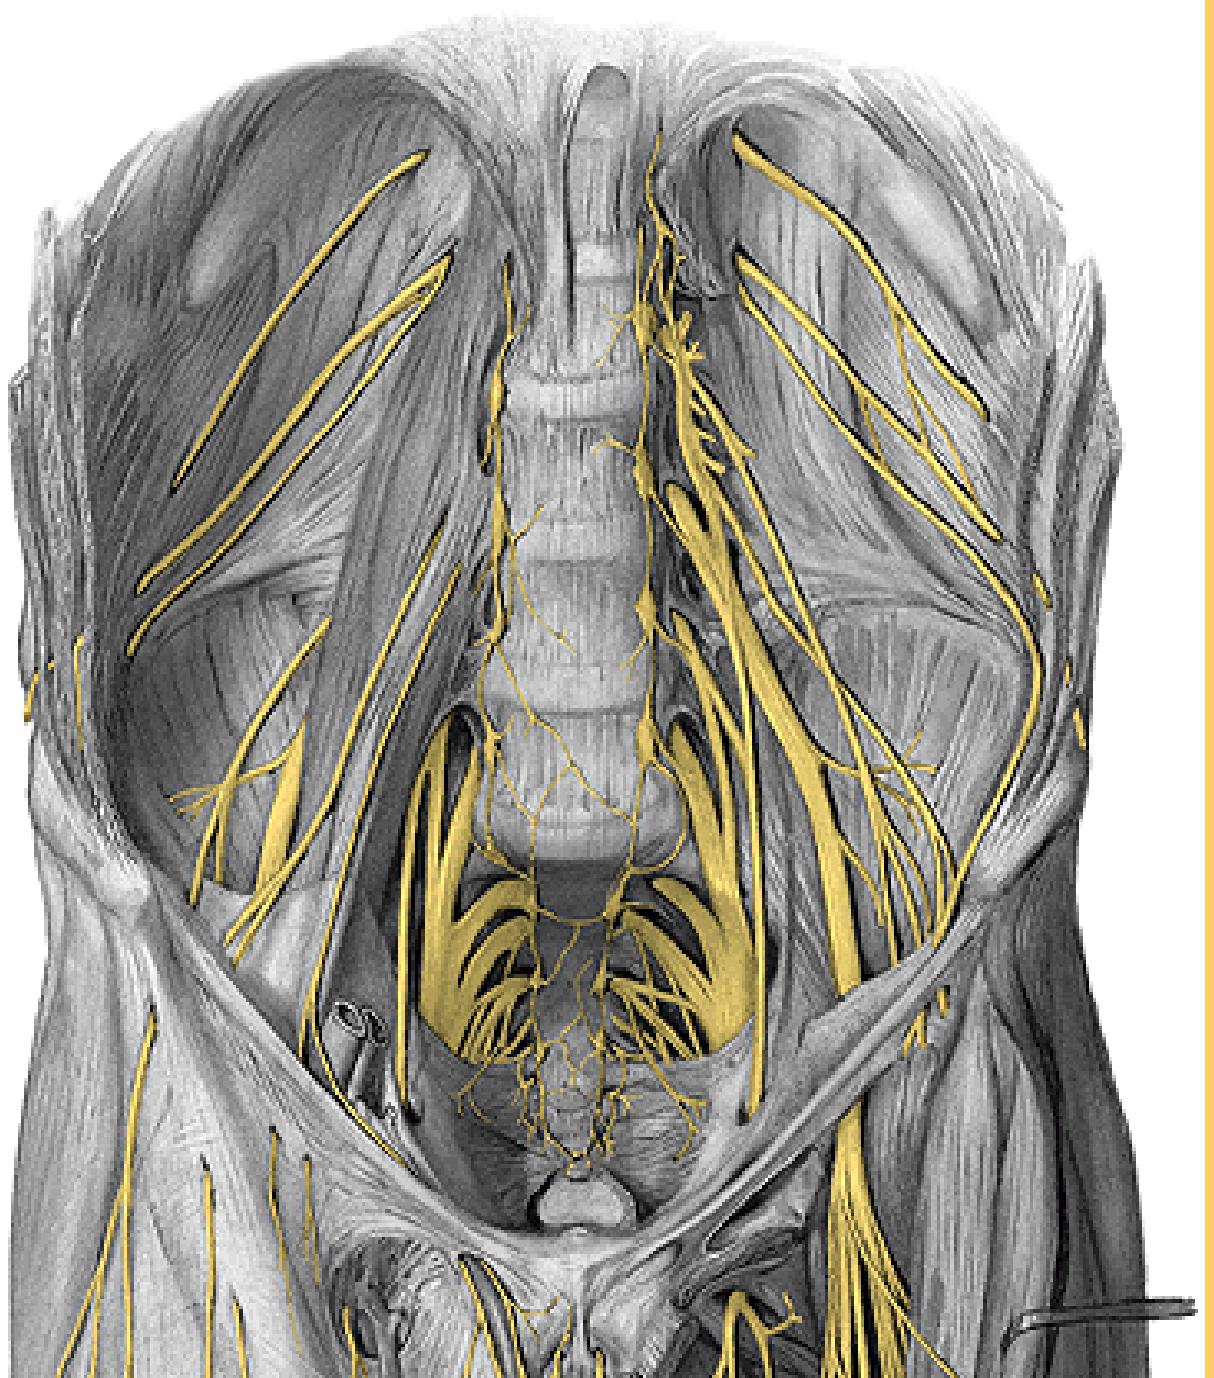

r. femoralis

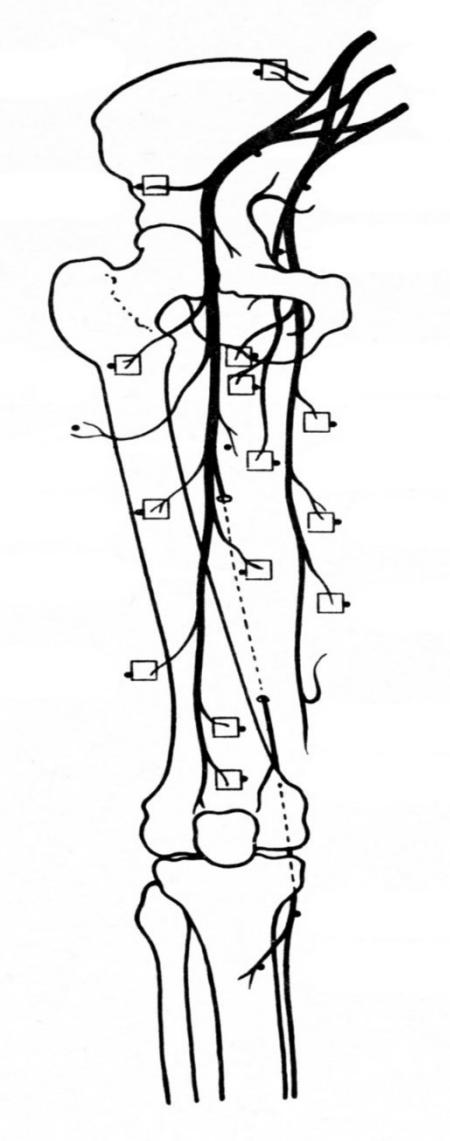

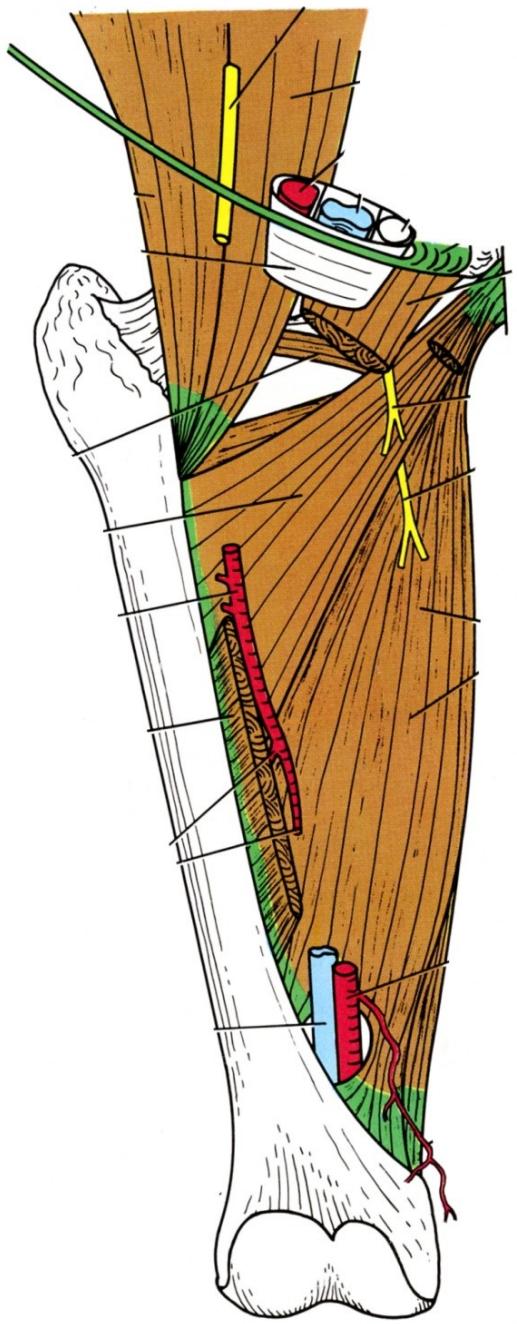

d) n. cutaneus femoris lat.

TOPO:

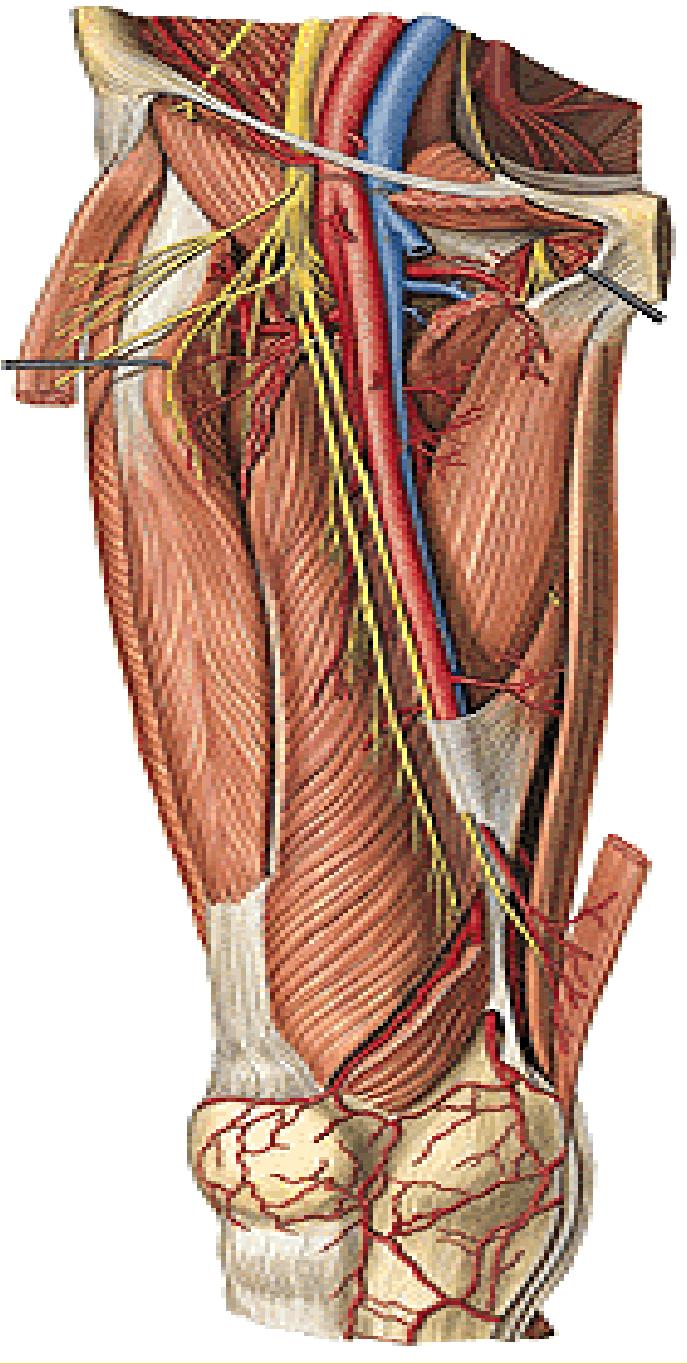

e) n. obturatorius

n. obturatorius

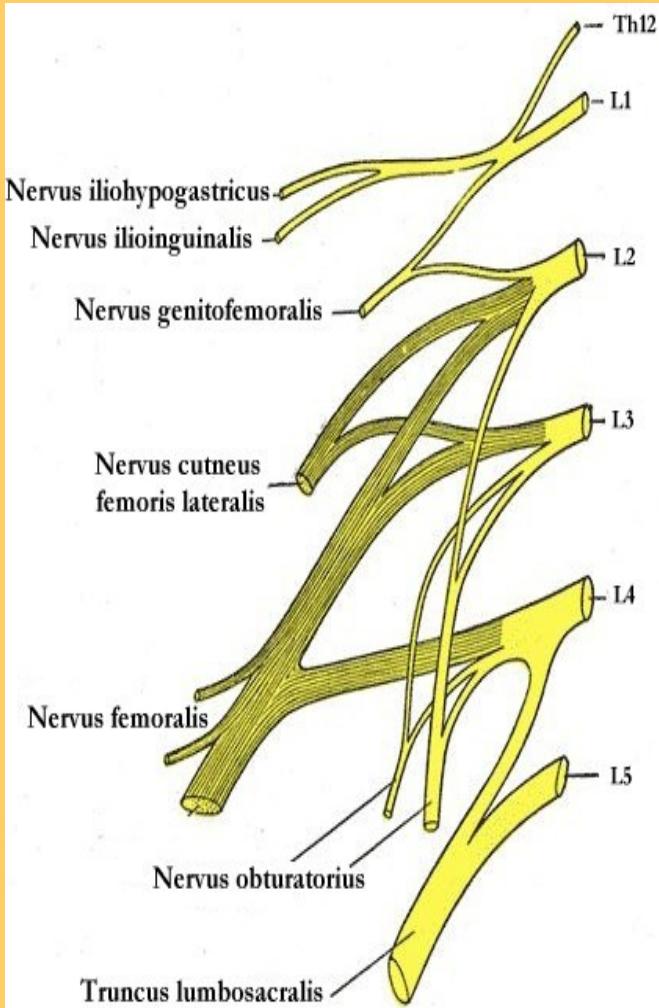

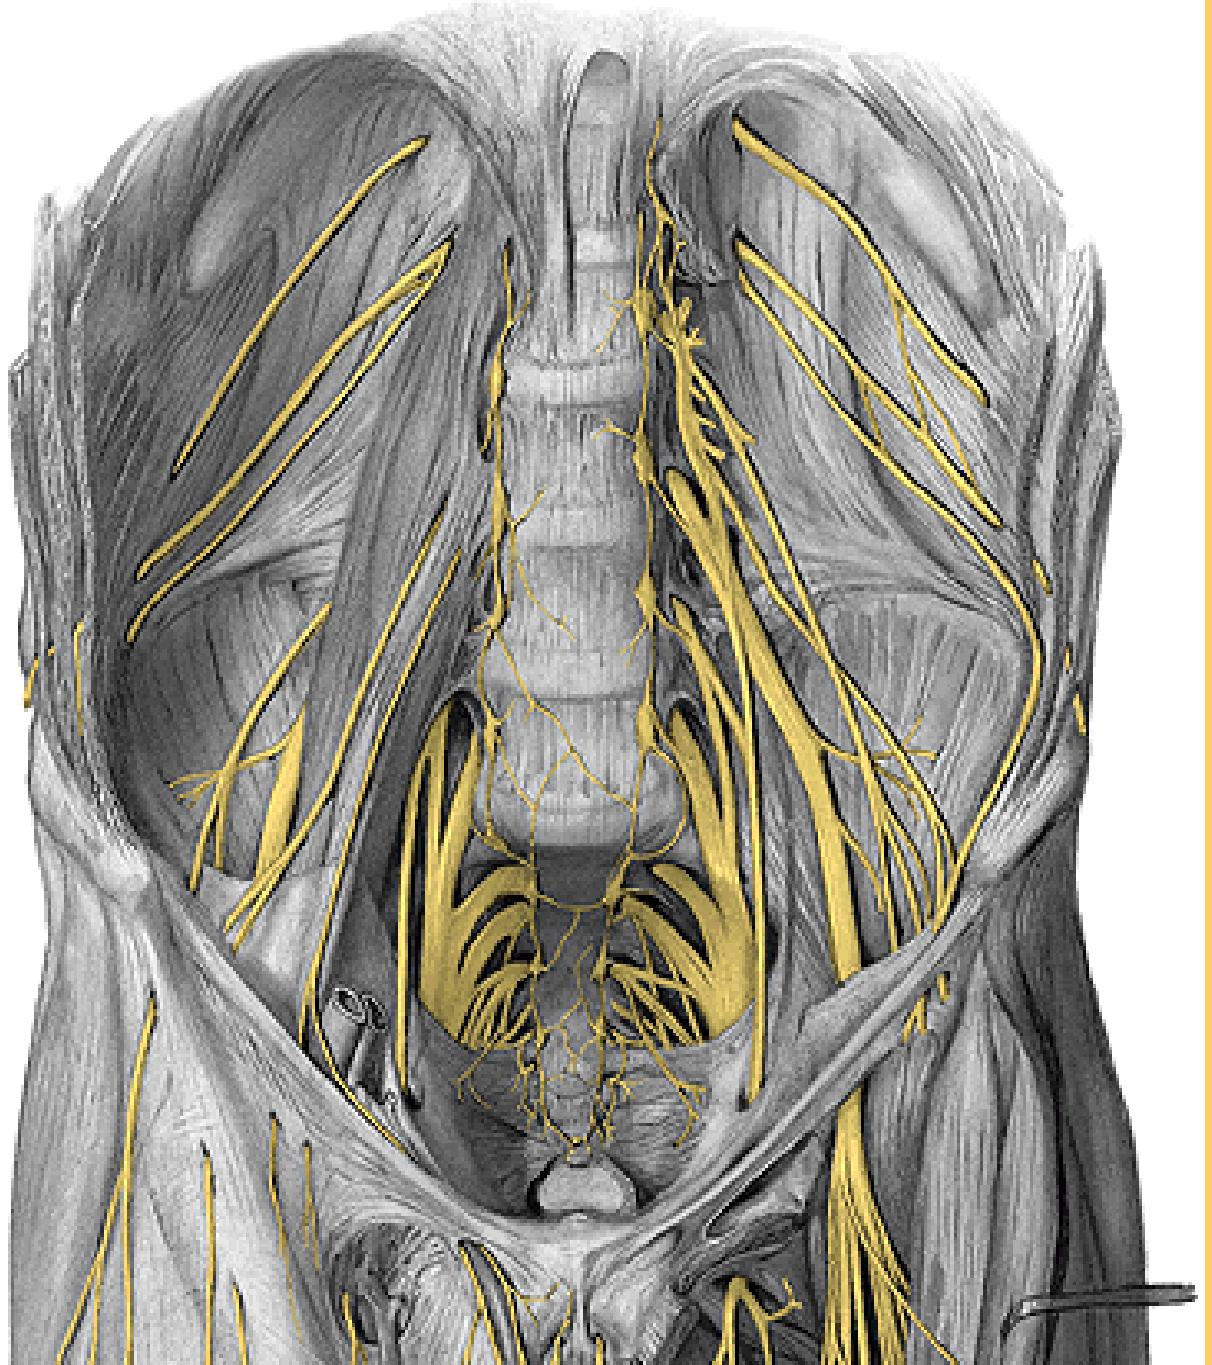

- a) r. anterior – mezi adduktory
long., brev., pect.
- b) r. posterior – add. magnus

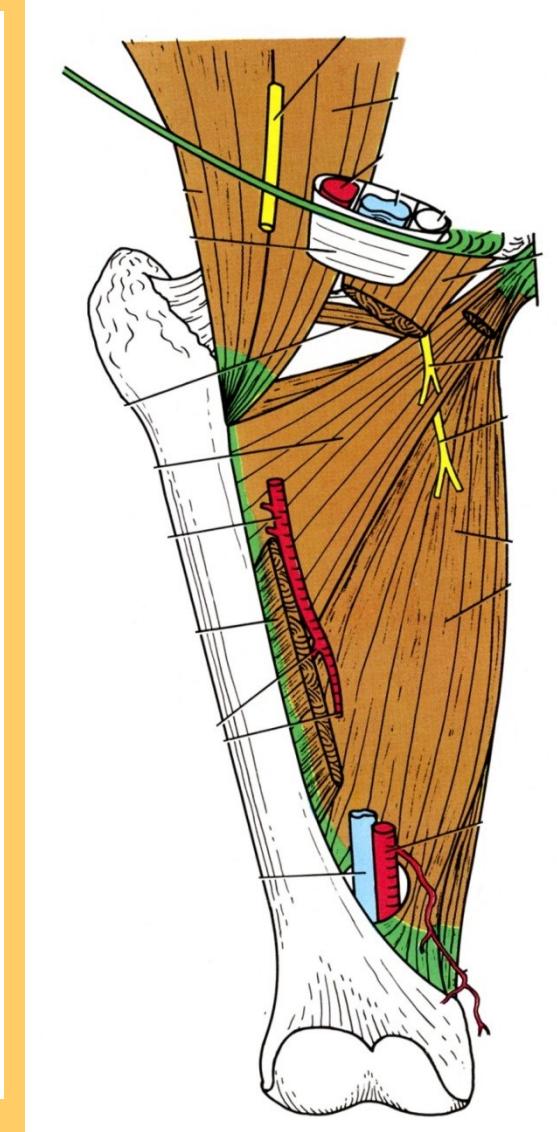

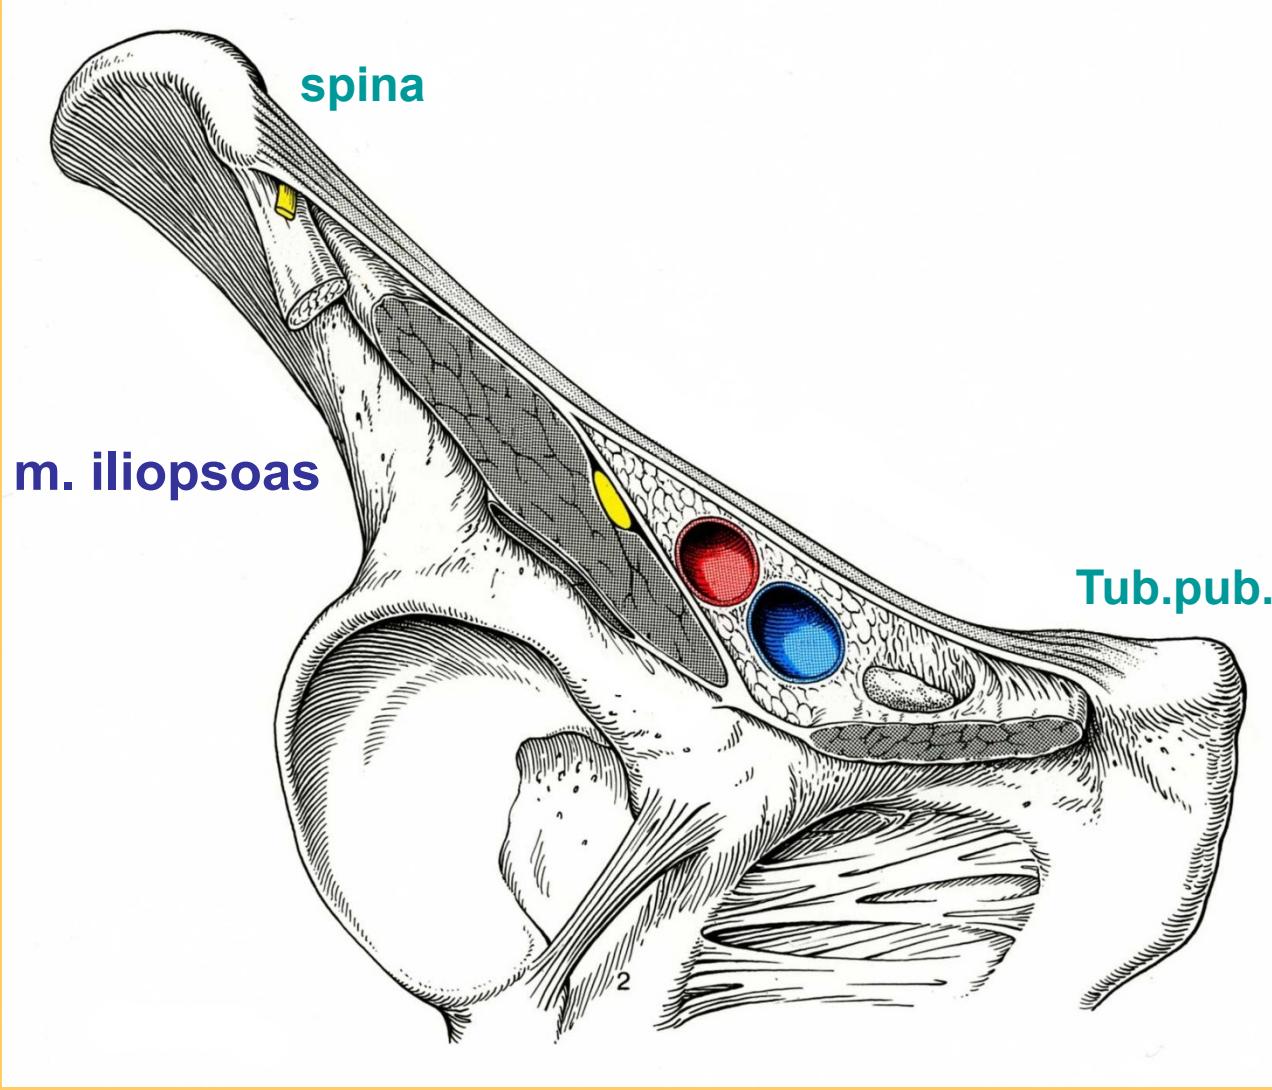

r. anterior

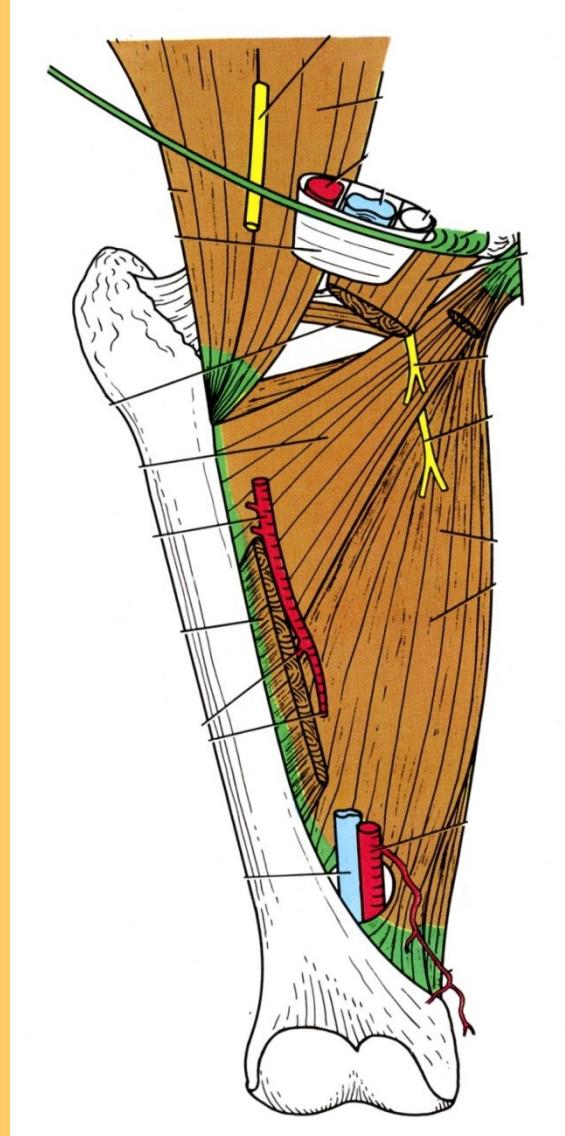

n. obturatorius

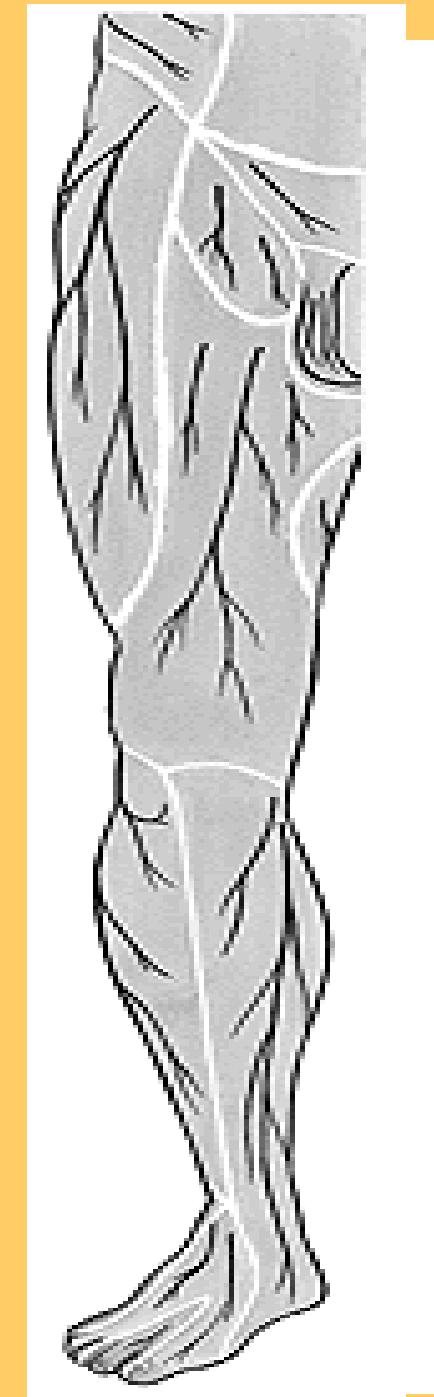

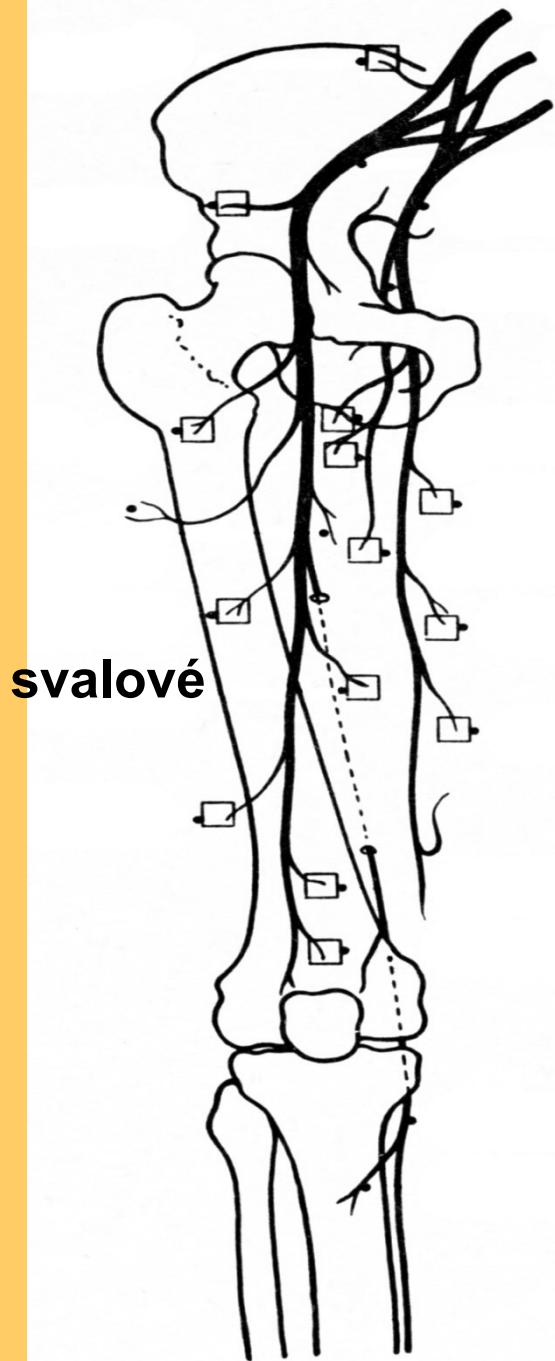

f) n. femoralis

LACUNA MUSCULORUM – N. FEMORALIS

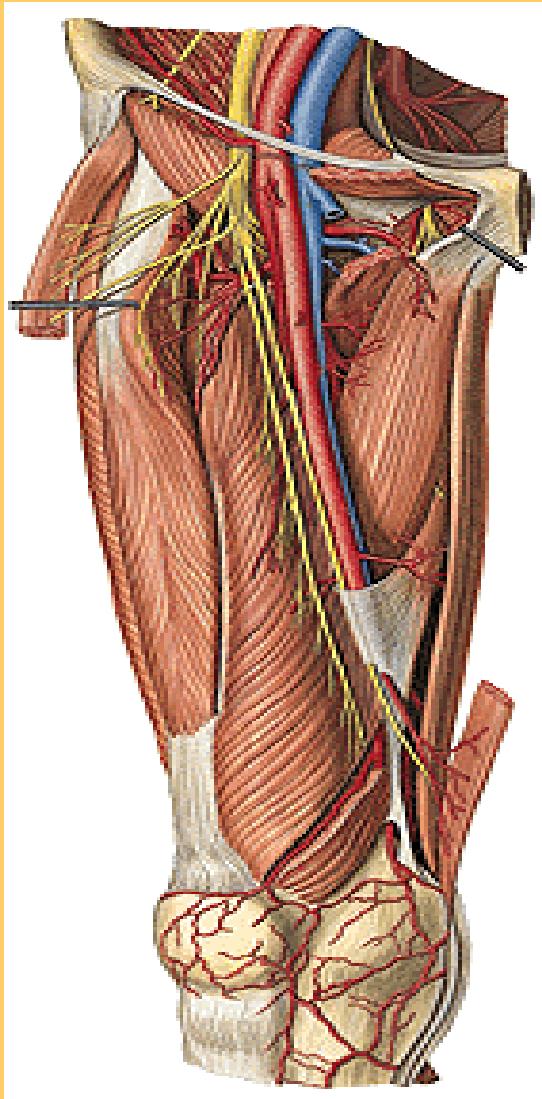

n. femoralis : 5 – m. iliopsoas, 7- adductor longus., 8 - pectineus

rr. cutanei ant.

n. cutaneus cruris med.
při v. saphena,
(štěpy na by pass)

n. femoralis

1 – nervus femoralis 2 – n. saphenus
3 - rr. musculares

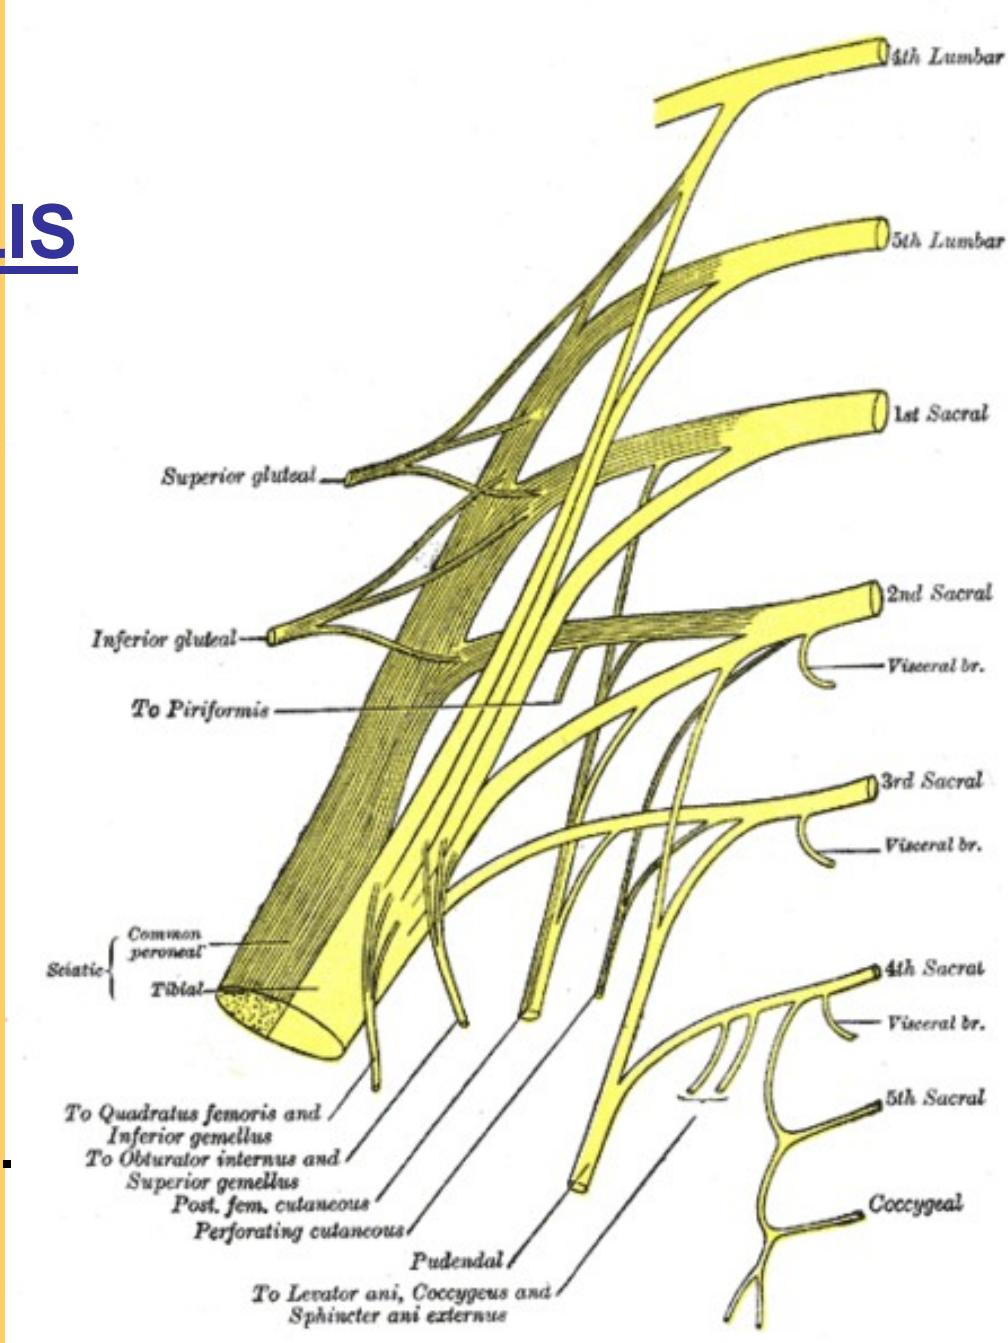

PLEXUS SACRALIS

n. gluteus sup.

- inf.

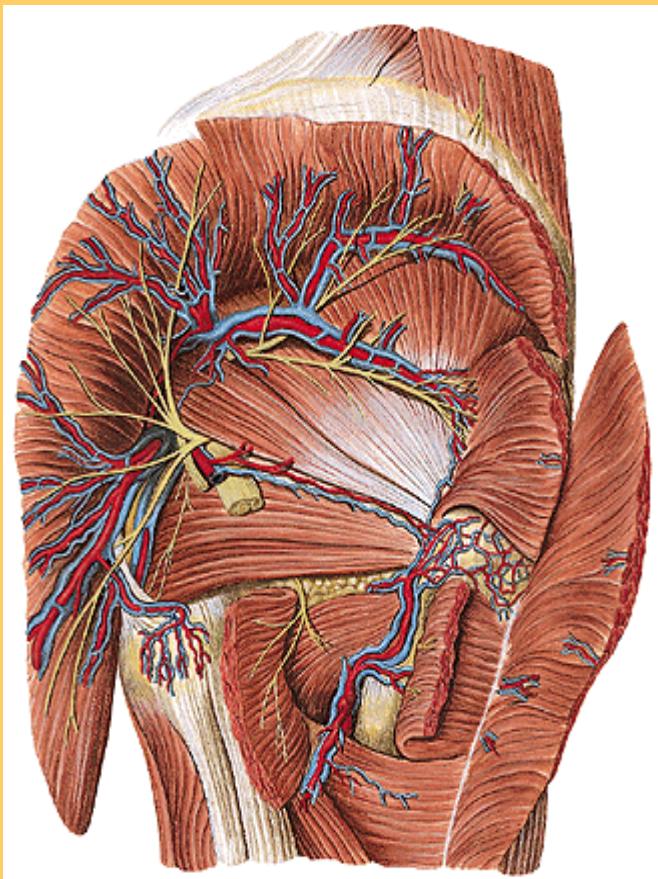

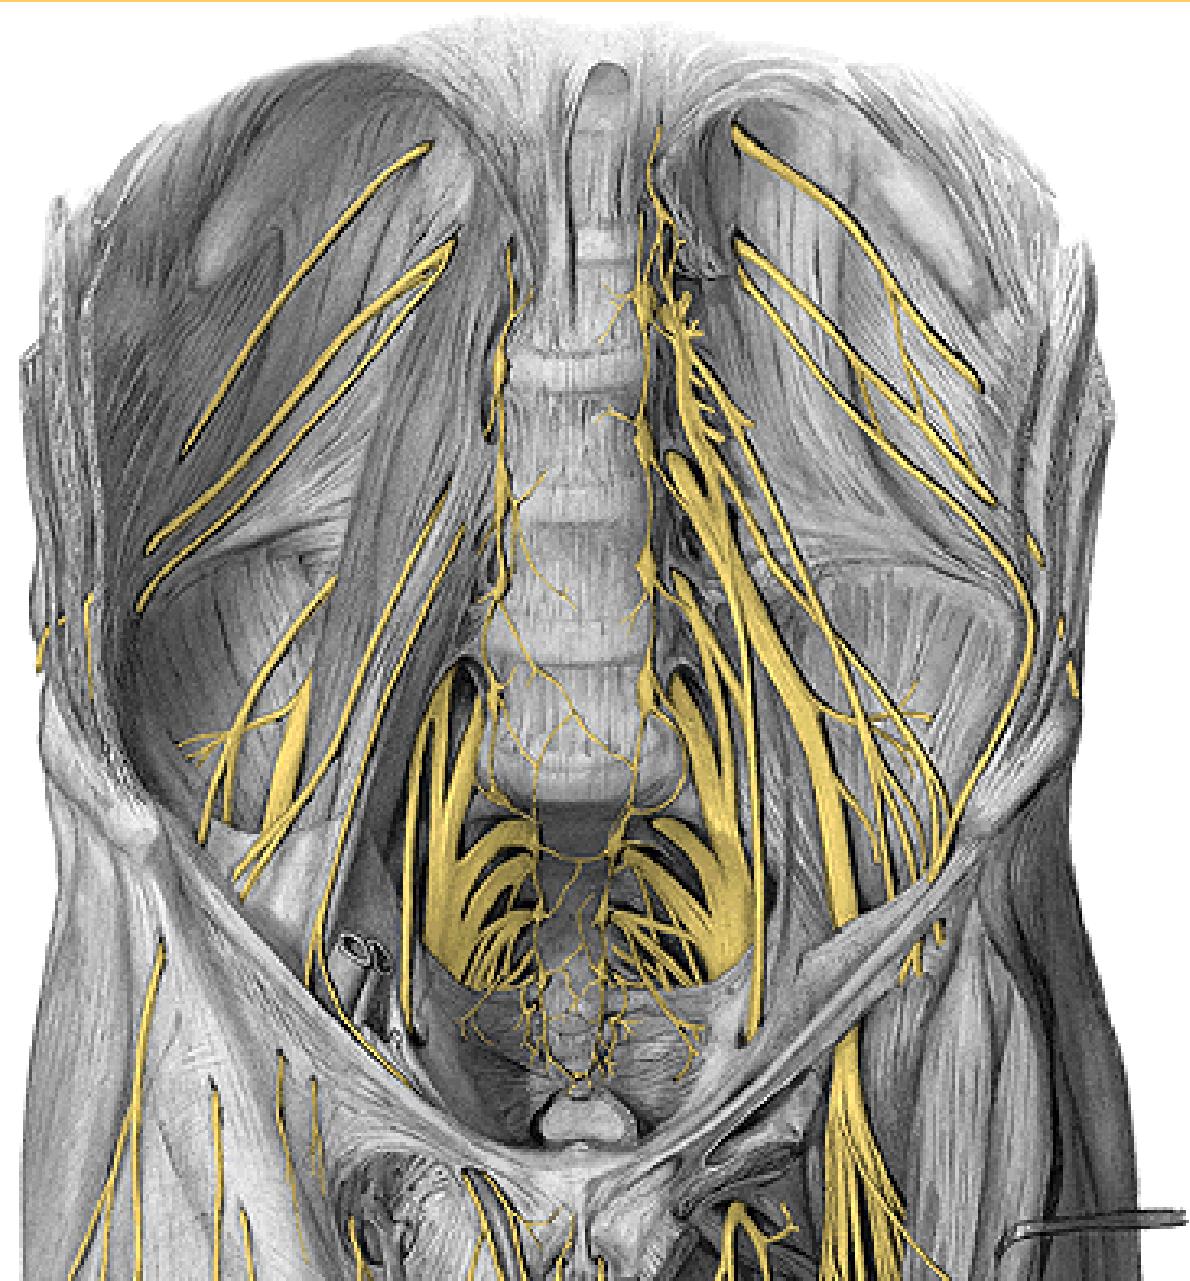

n. ischiadicus

rr. muscul.
cutan. fem. post.
pudendus
coccygeus

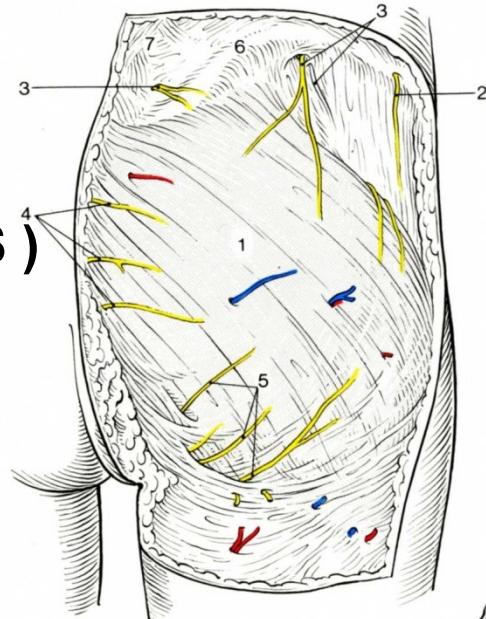

TOPO: sacrum, piriform.

a) N. GLUTEUS

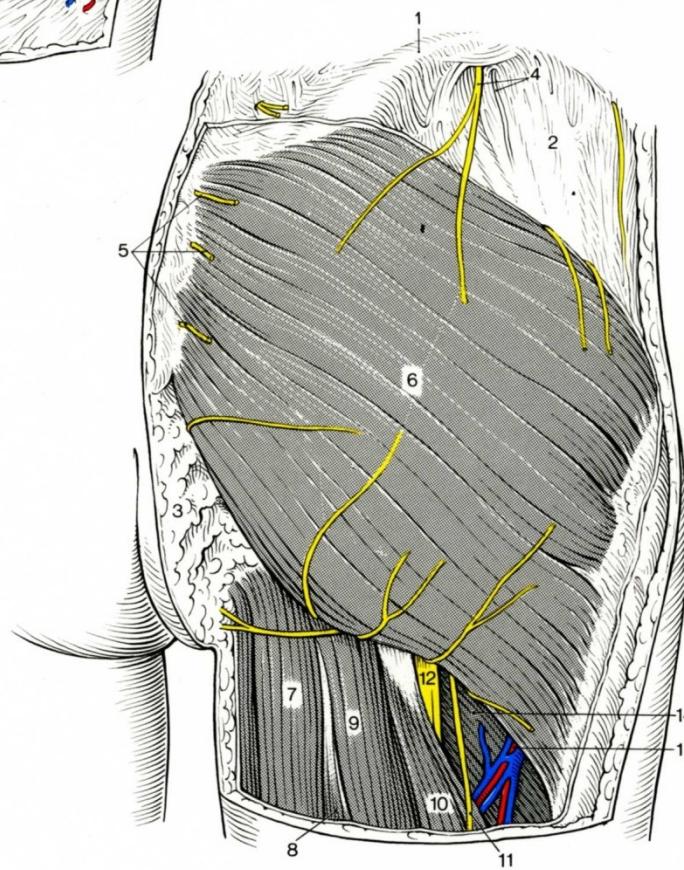

nn. clunium (clunii)

med.(S)

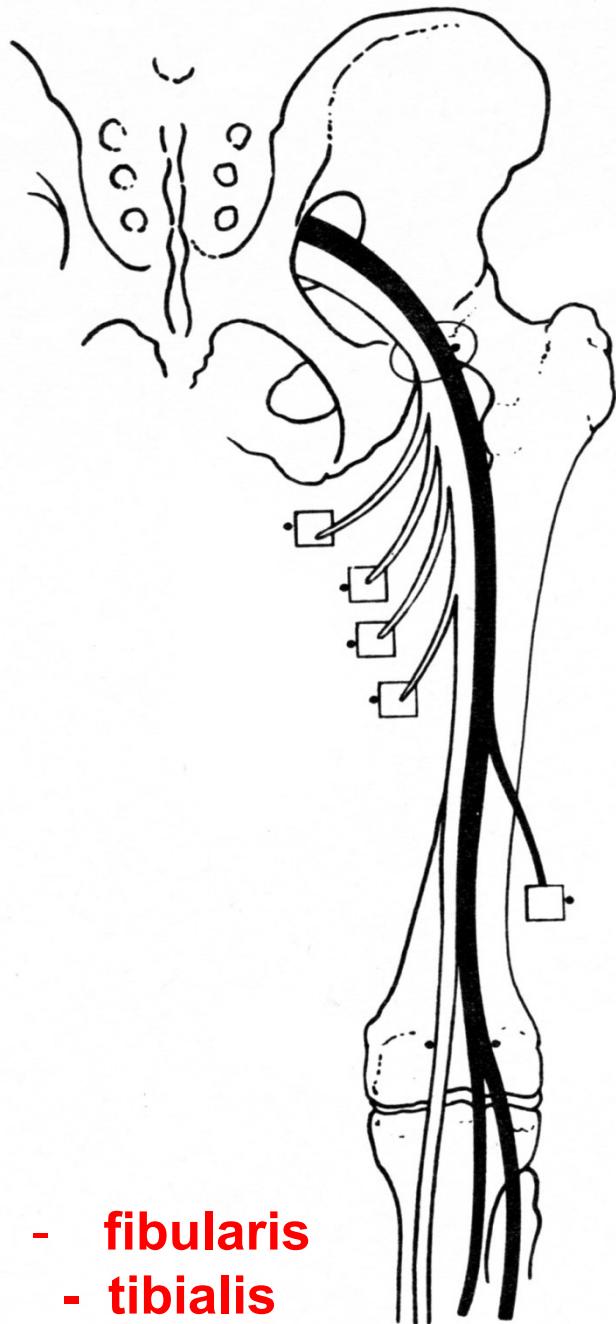

sup. (L)

inf.

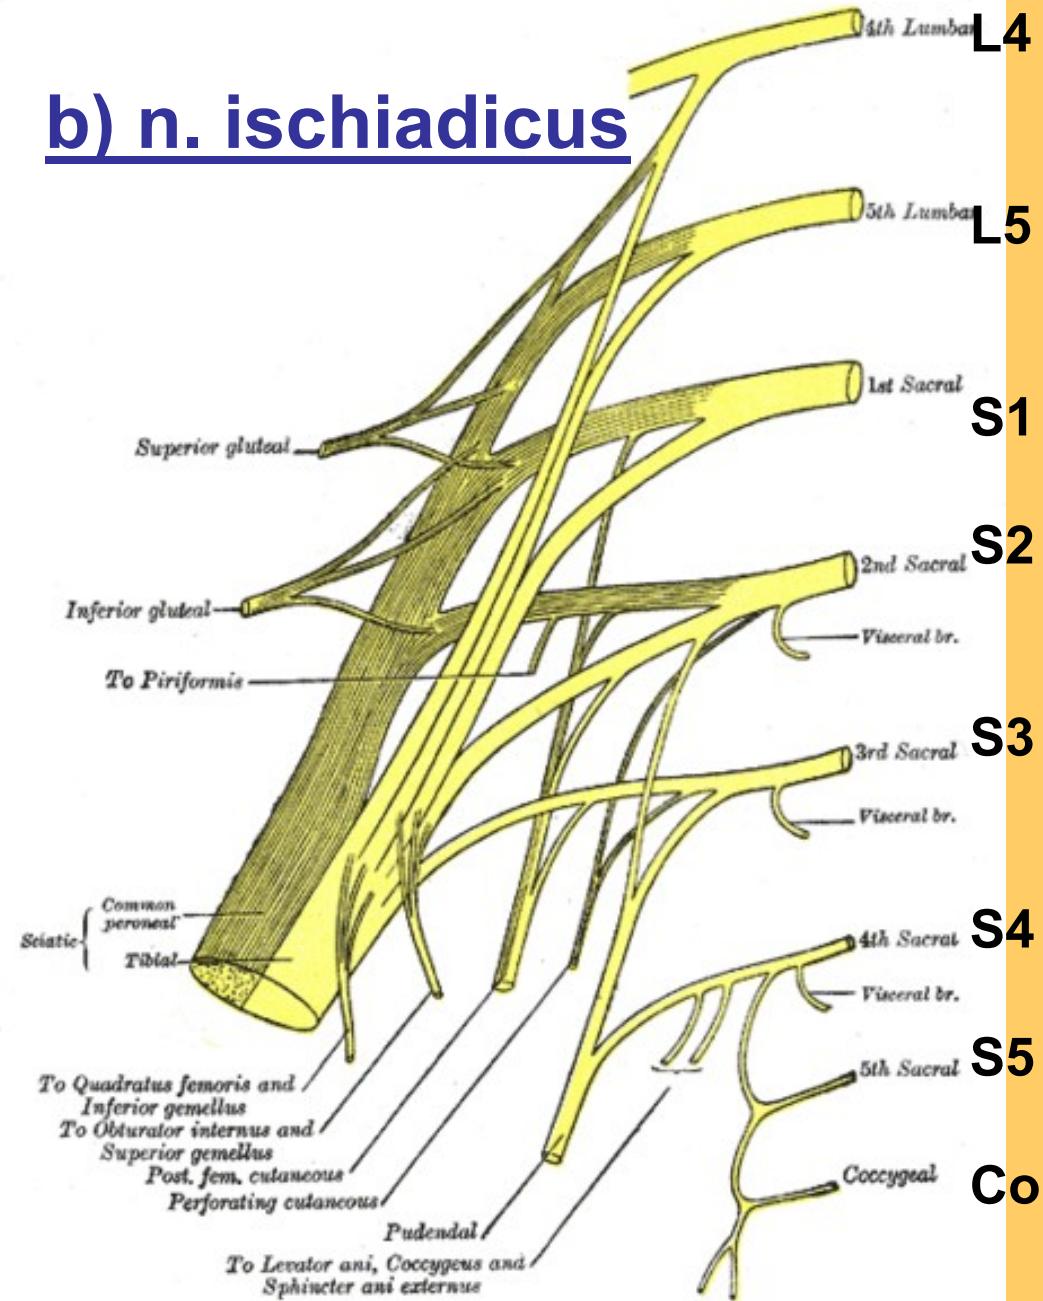

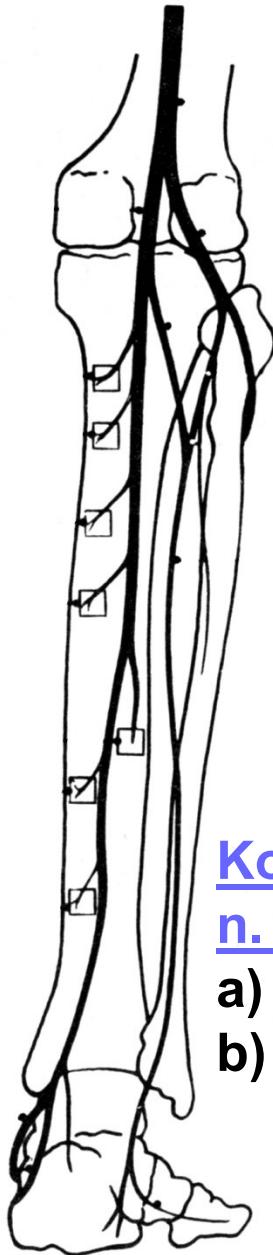

r. perinealis
= cut. fem.

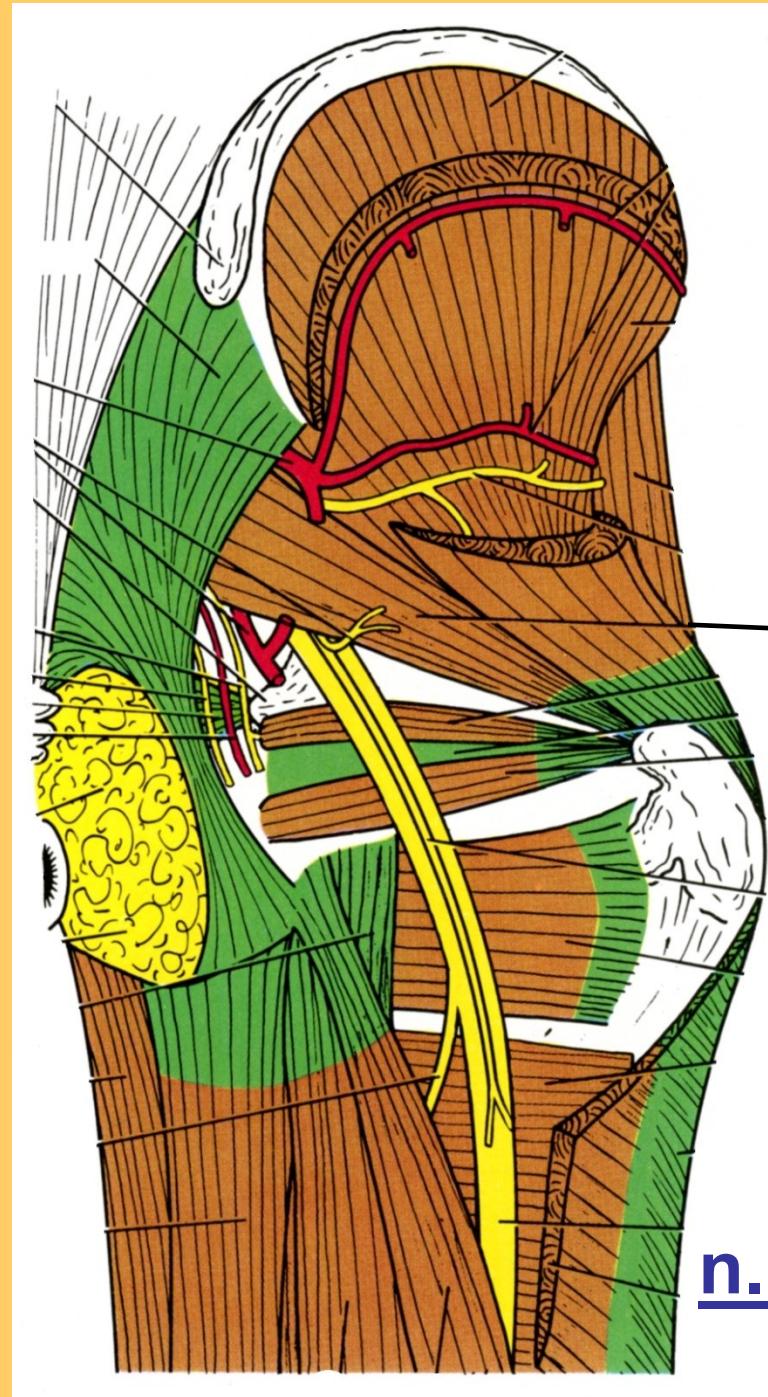

- **fibularis**
- **tibialis**

b) n. ischiadicus

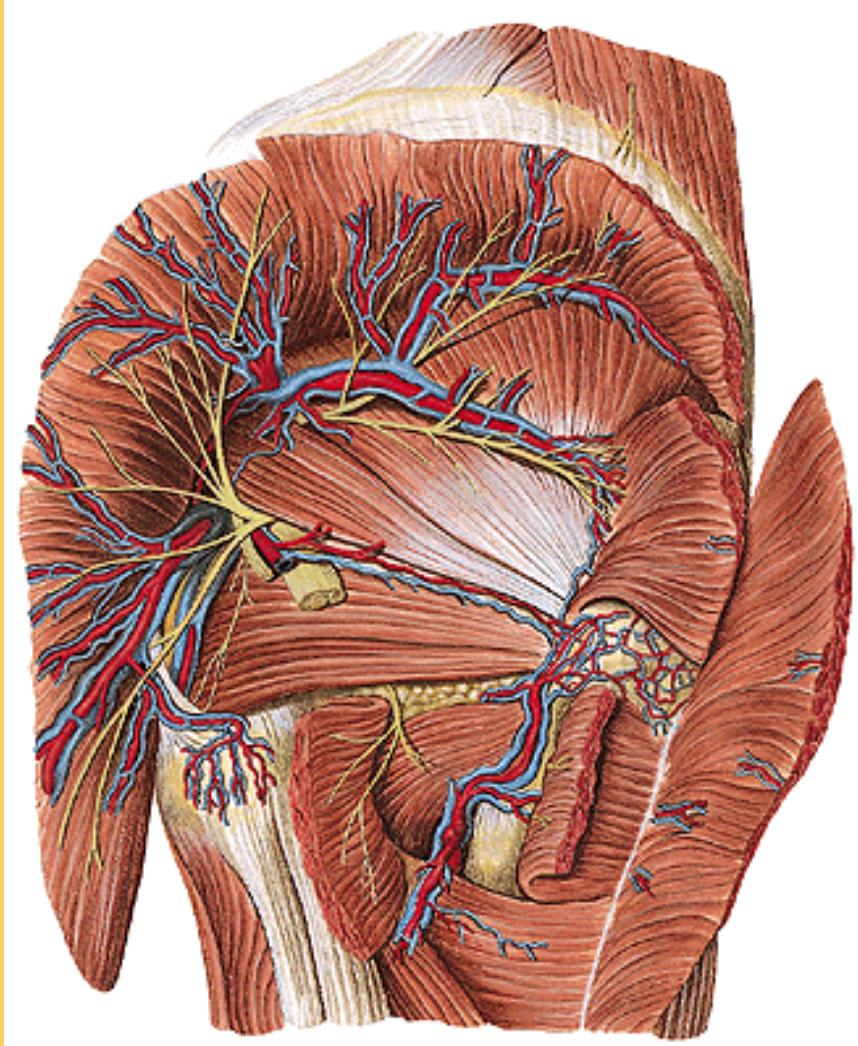

Konečné větve
n. ischiadicus:
a) n. fibularis
b) n. tibialis

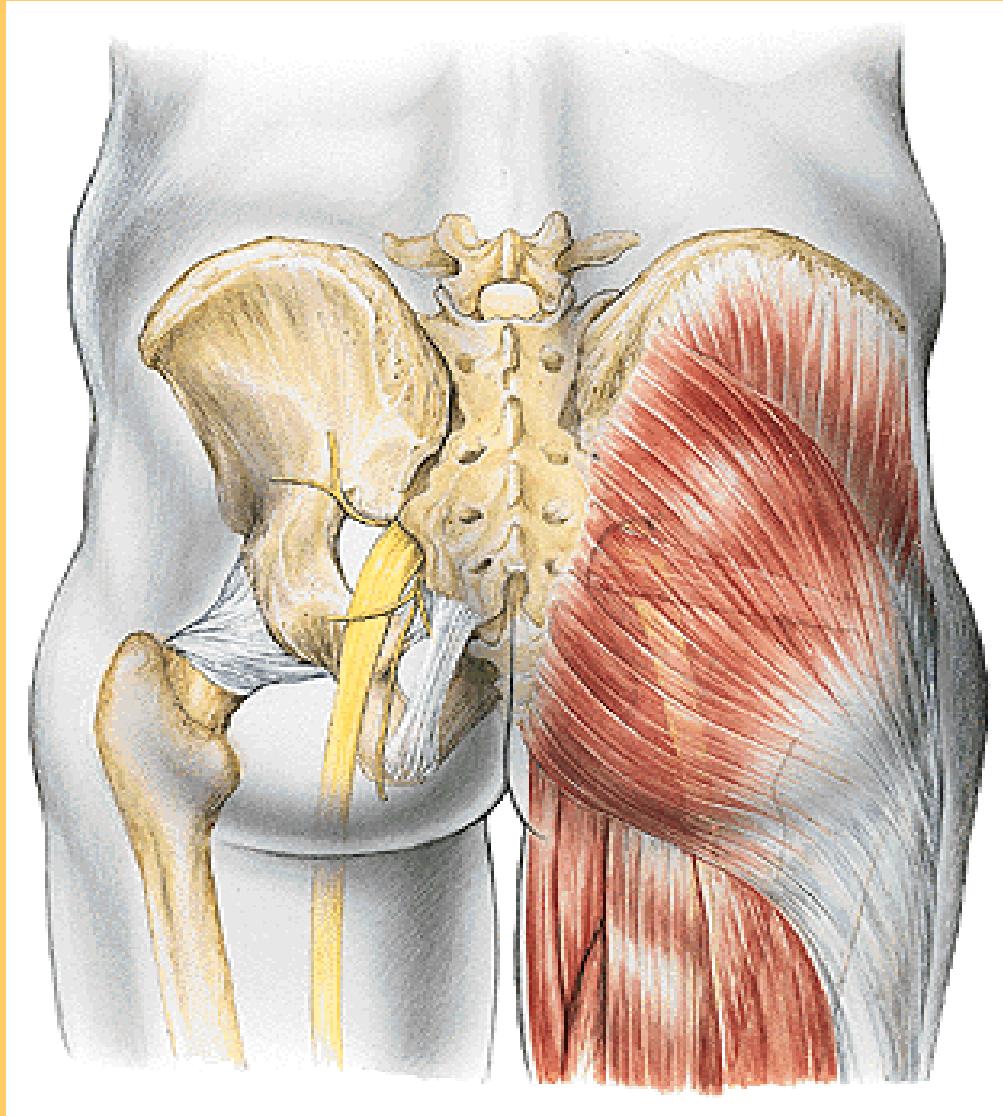

n. ischiadicus

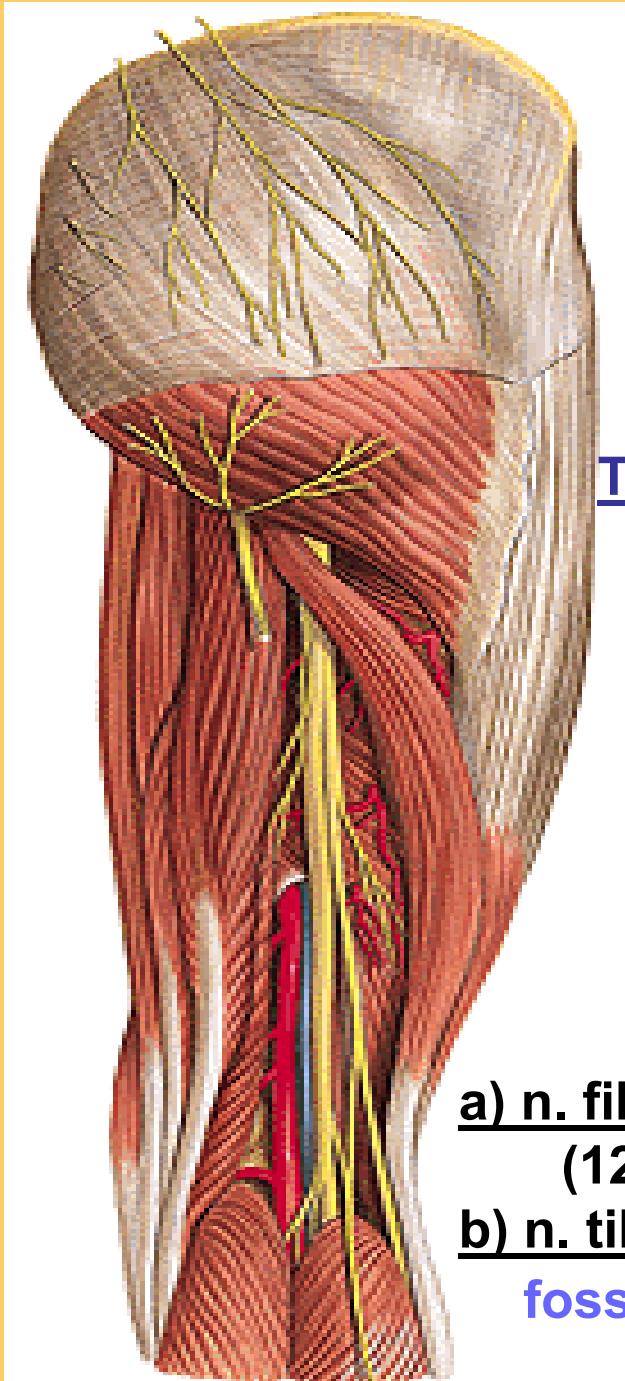

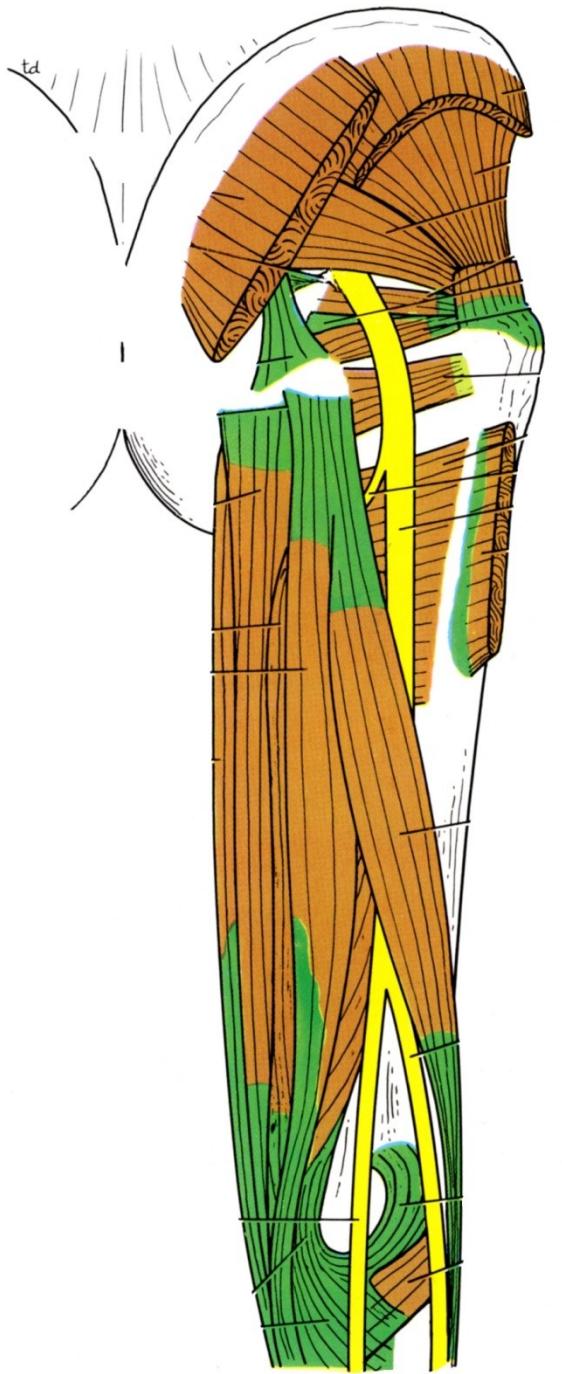

1 – m. gluteus max., 2- medius 3- minimus, 13- m. pirif., 7- n. ischiad.
5 - vasa glutaea.
gemelli, obtur., quadratus

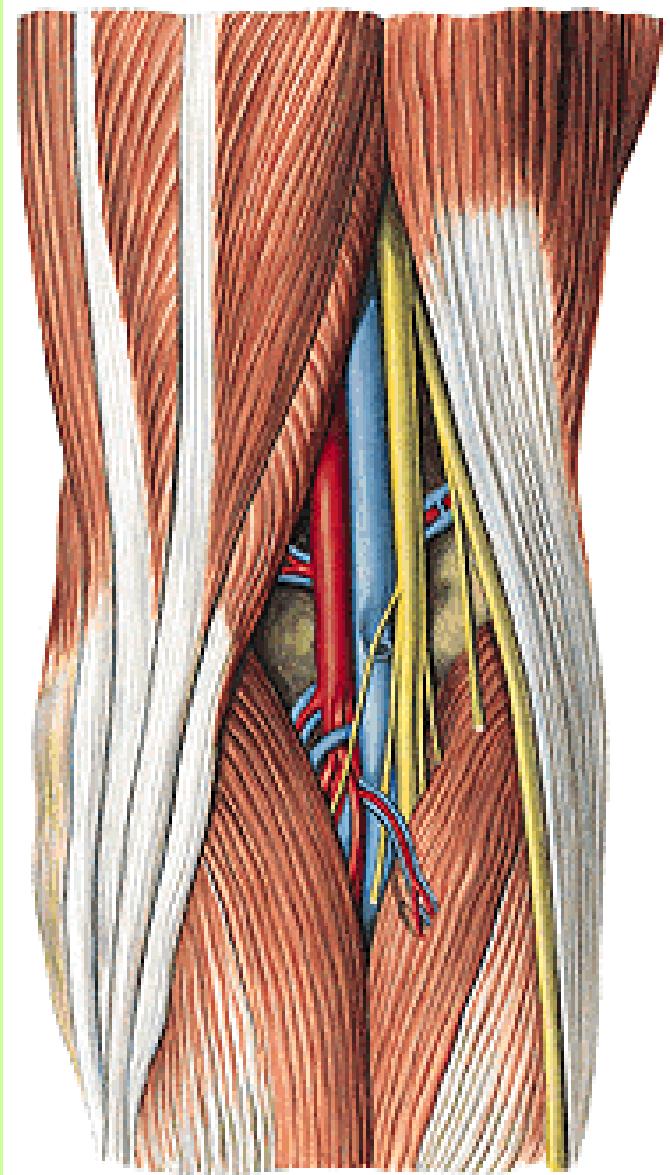

Projekce na provrch – i.m. aplikace

TOPO: mezi flexory
biceps
semitend.
semimembr.

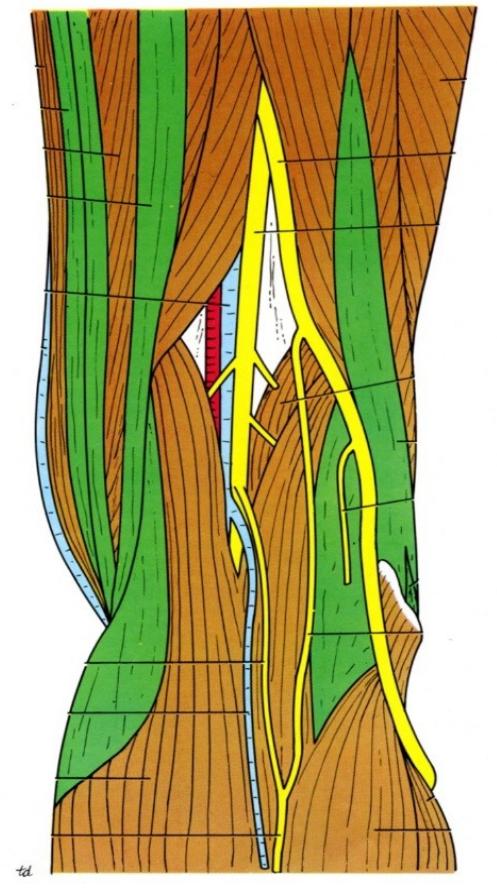

a) n. fibularis
(12% vysoké štěpení)
b) n. tibialis
fossa poplitea

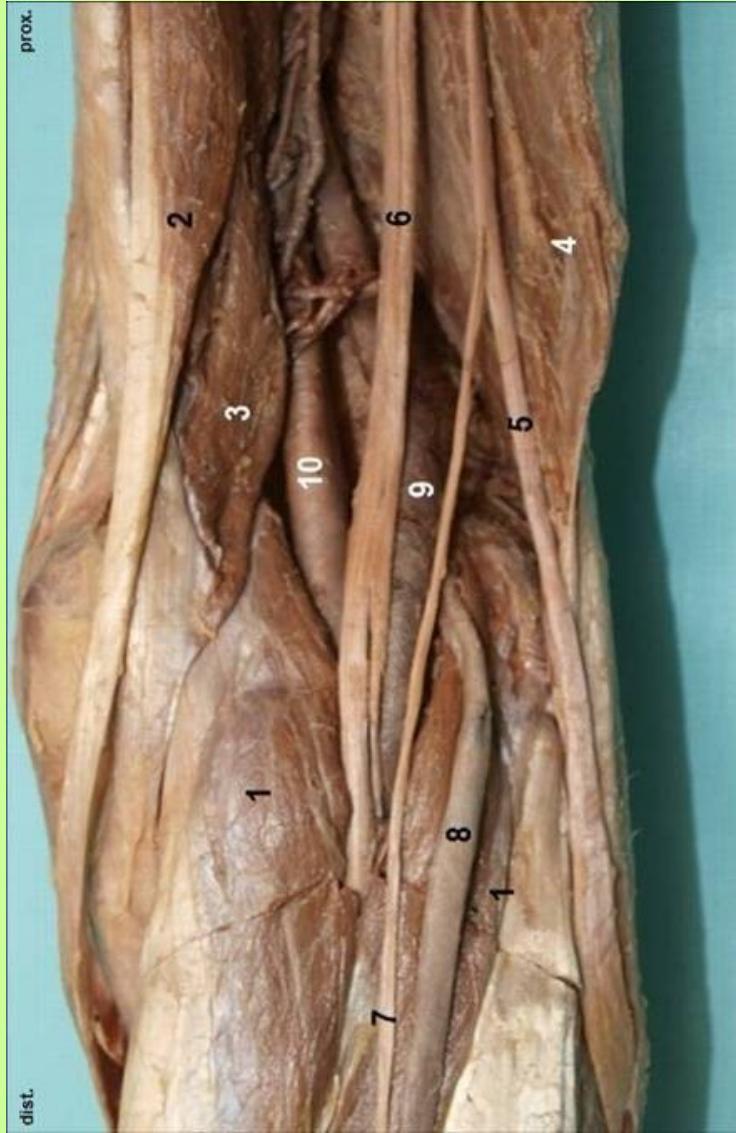

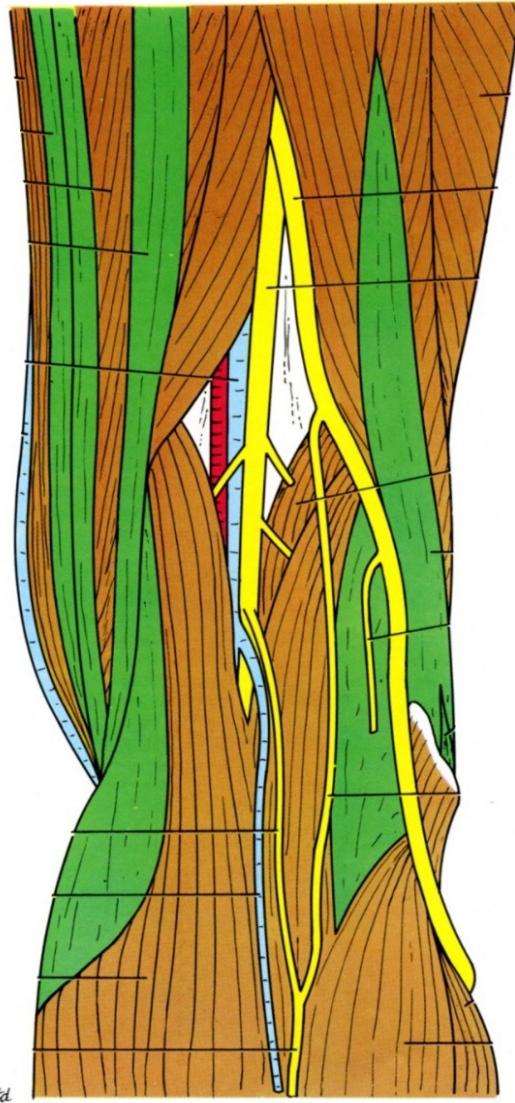

semitendin.
PES ANSERINUS
gastrocnem.
gracilis

Fossa poplitea

biceps
n. fibul. comm.
n. tibialis

1 – gastrocnem. 2 – semitendin. 3 - semimembran. 5 – n.fibularis comm.
6 – n. tibialis 7 – n. suralis (z obou cutanei) 8 – v. saphena parva

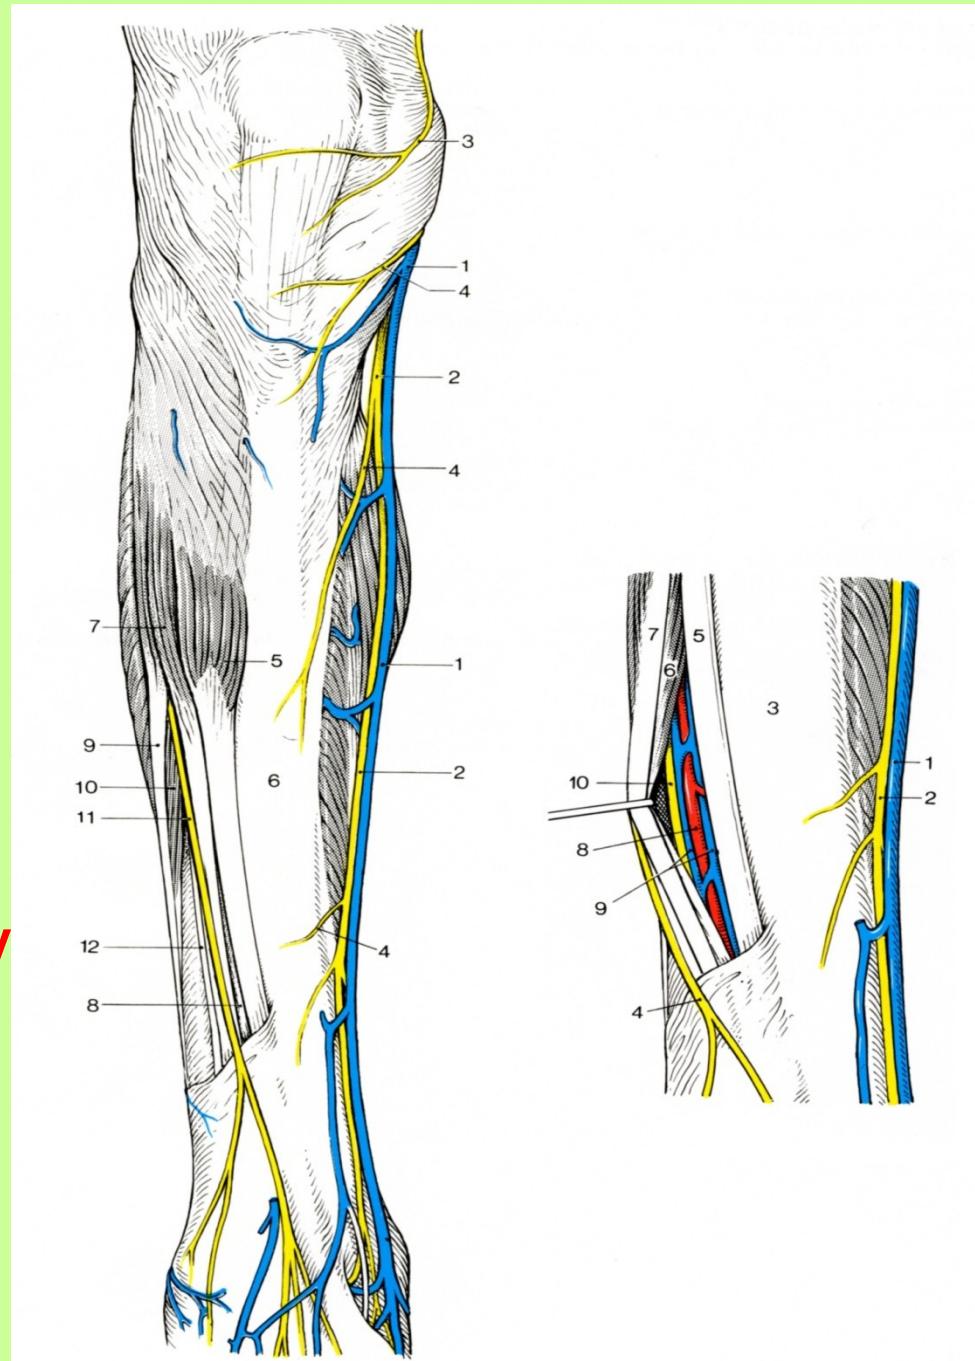

FOSSA POPLITEA

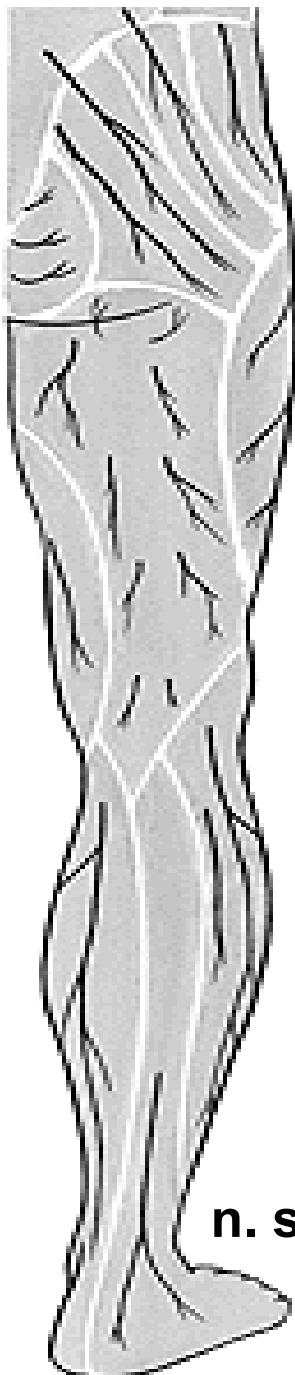

n.peroneus superf.

(mezi svaly peron.
+ extenzor digit.)

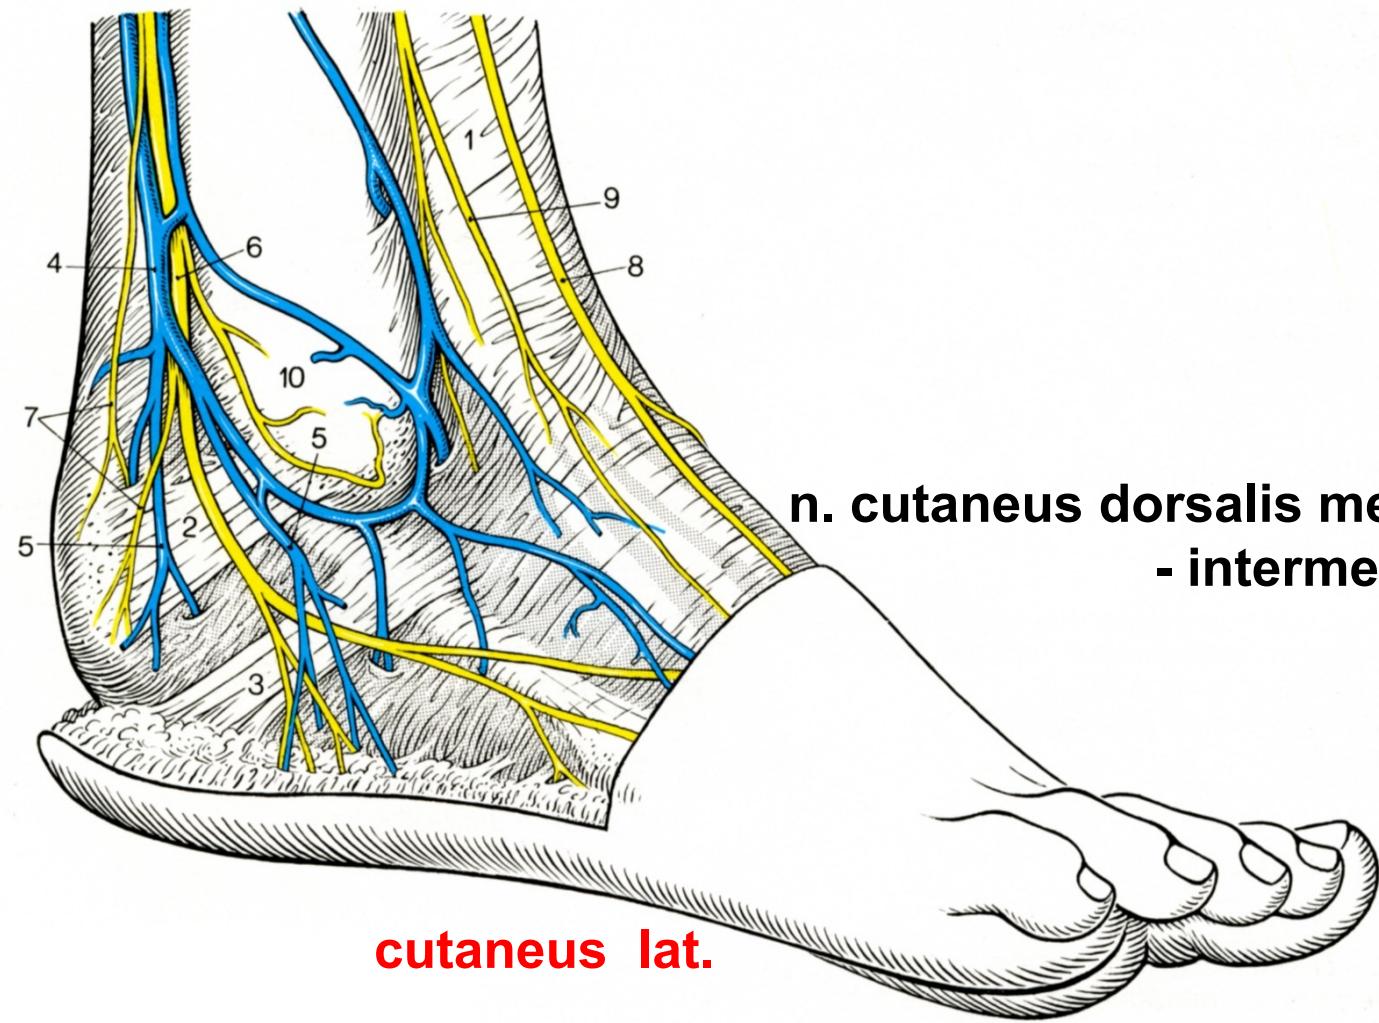

svalové větve pro fibul. svaly

**n. cutaneus dorsalis med.
- intermed.**

n. suralis

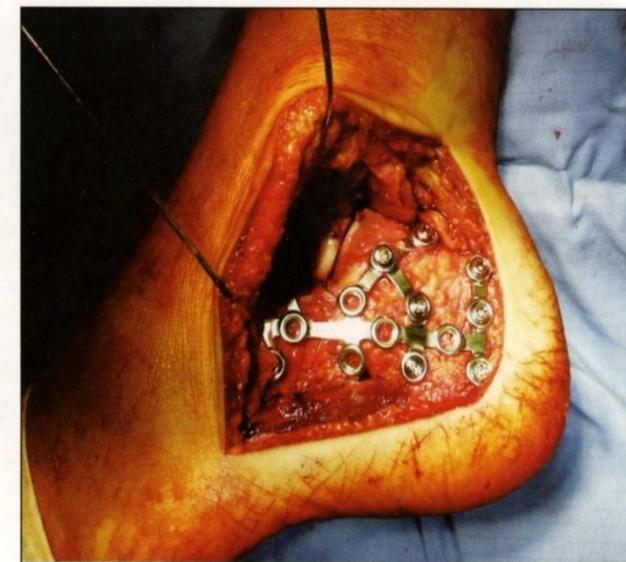

cutaneus lat.

**n. cutaneus dorsalis med.
- intermed.**

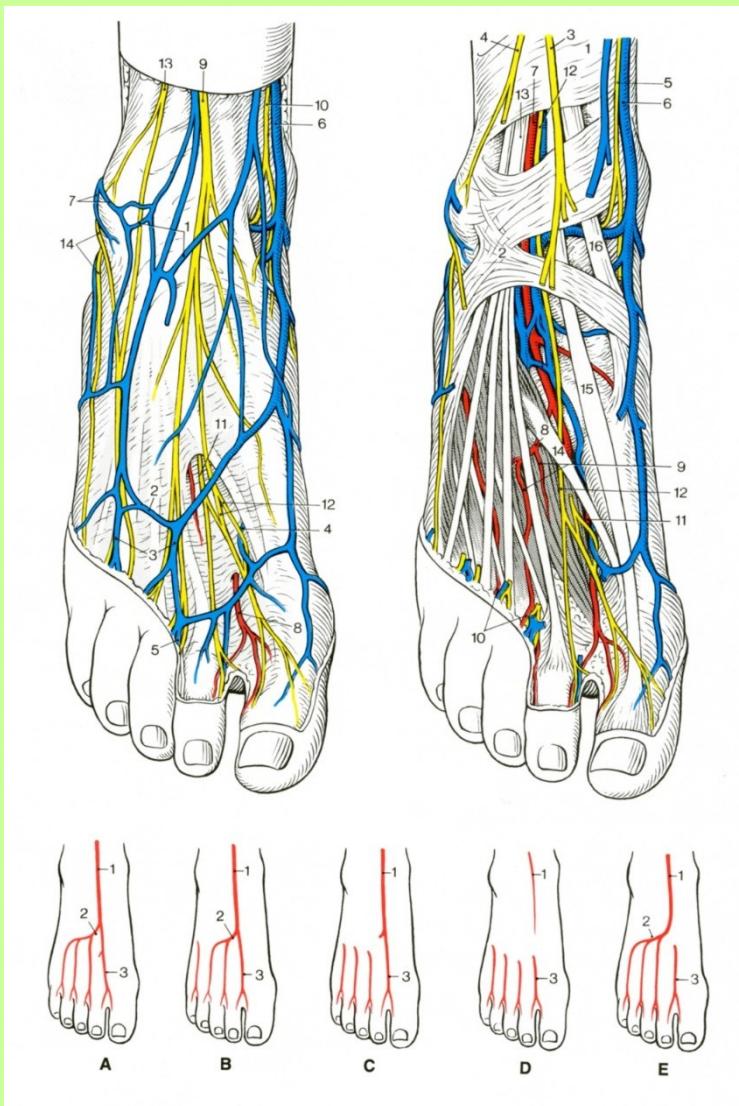

rr. malleolares, calcan.

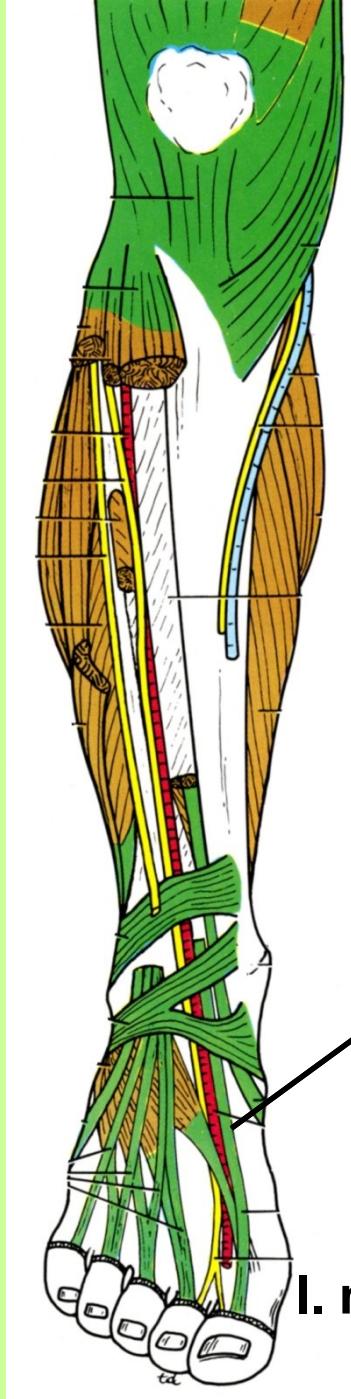

Obr. 1a. Extenzivní laterální řez
Fig. 1a. Extensive lateral incision

Obr. 1b. Stav po repozici a osteosyntéze patní dláhou LCP Synthes
Fig. 1b. Situation following repositioning and completion of calcaneal osteosynthesis using the LCP Synthes plate

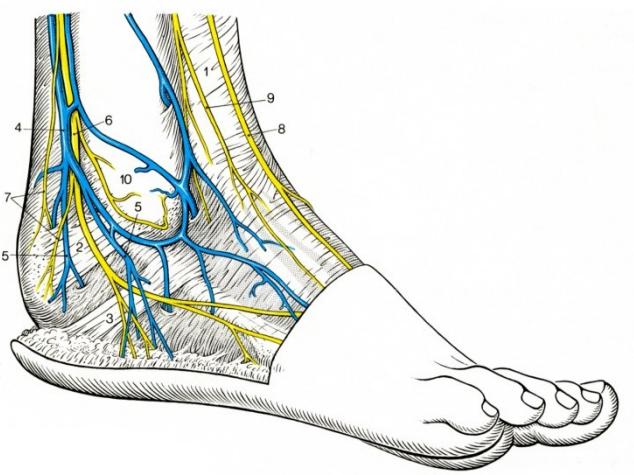

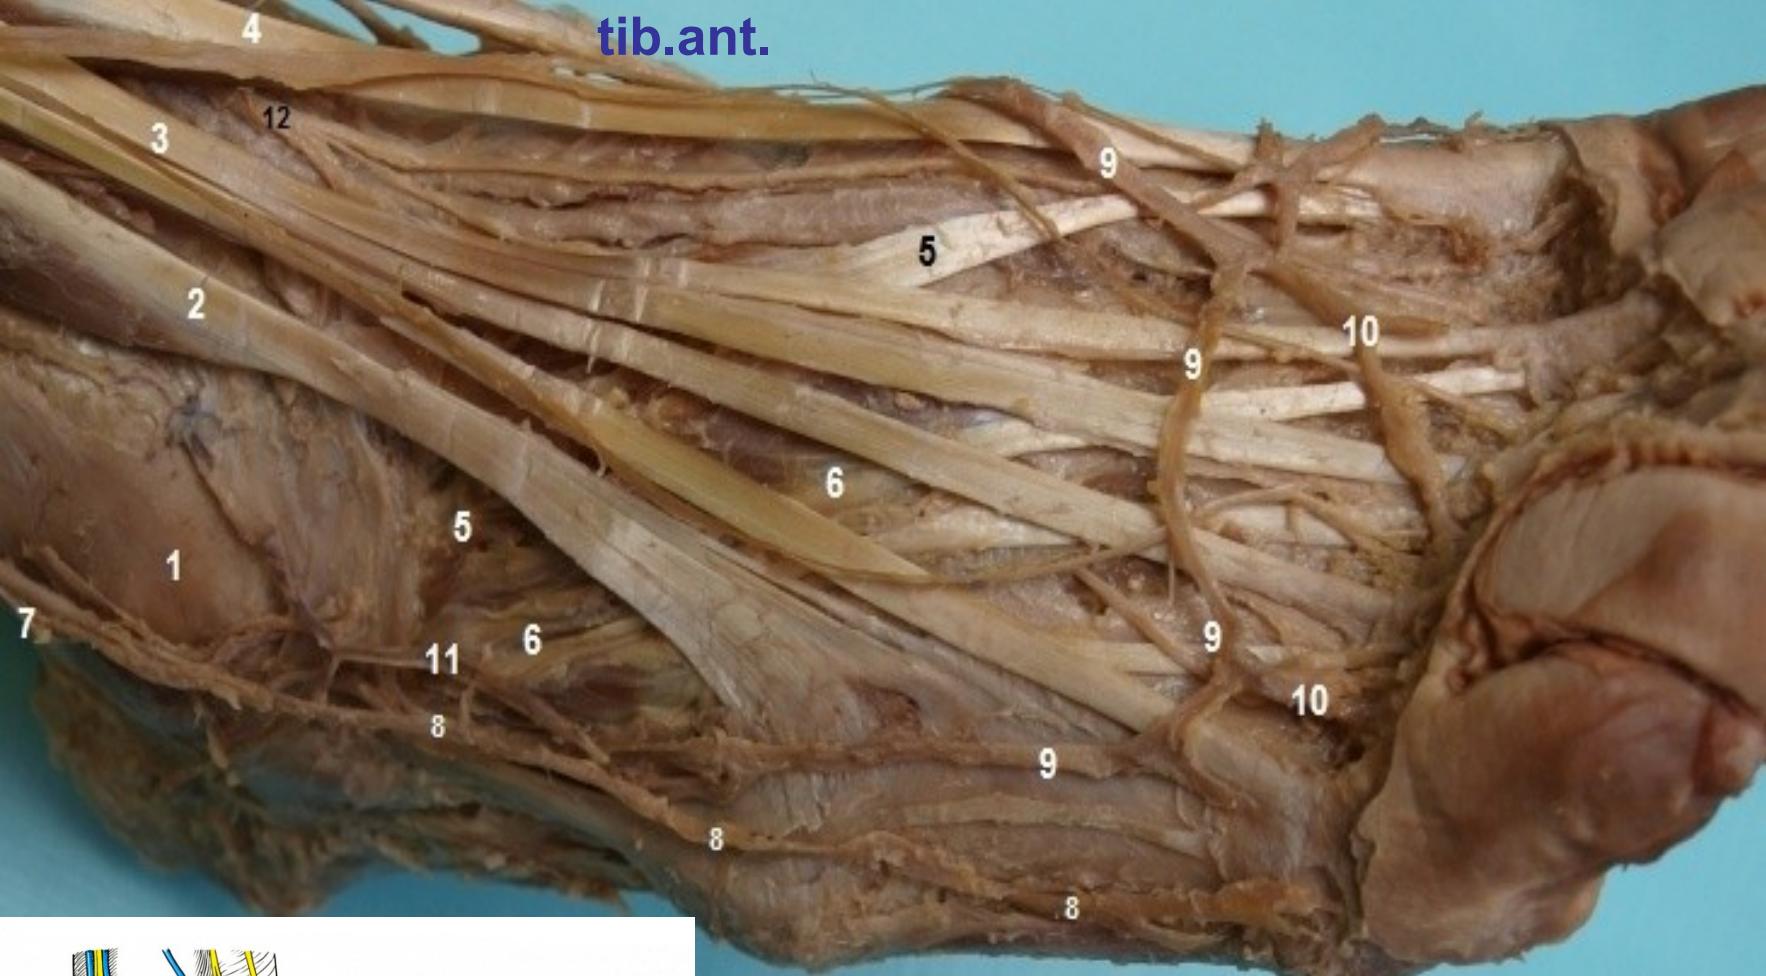

n. fibularis
- profundus

I. meziprstní prostor

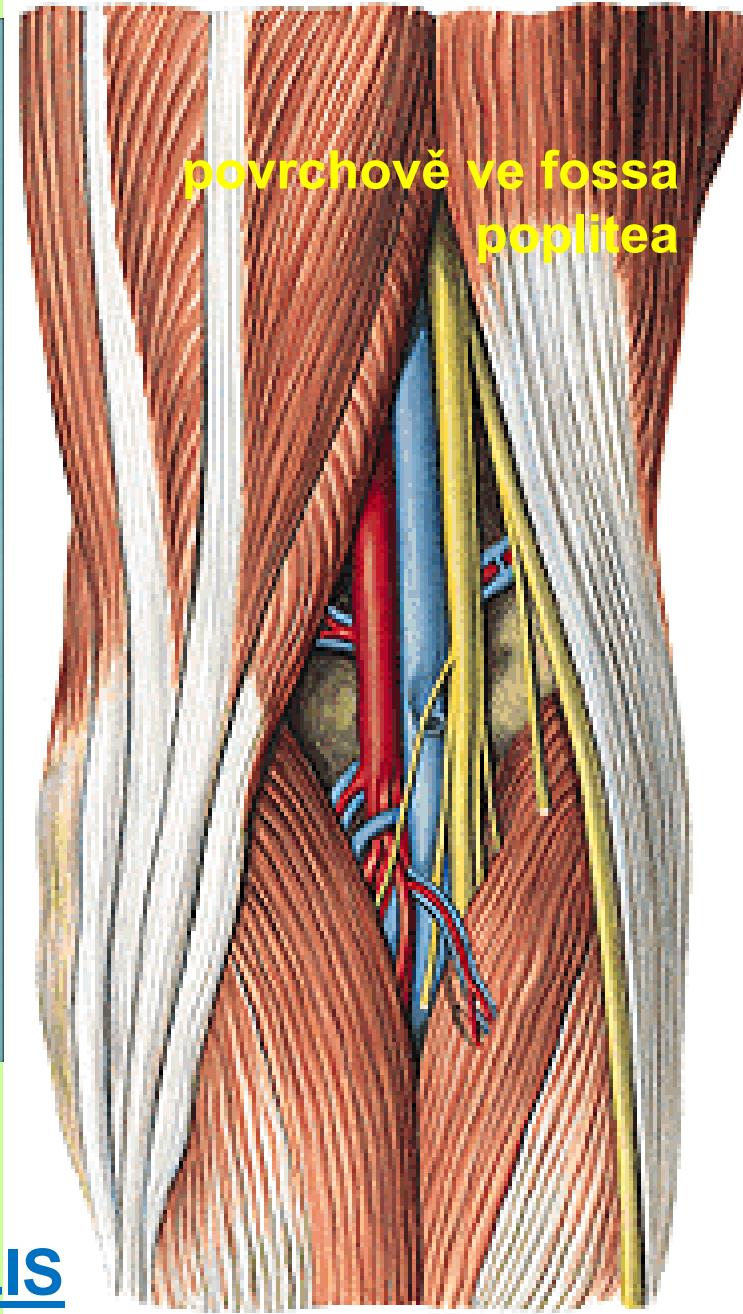

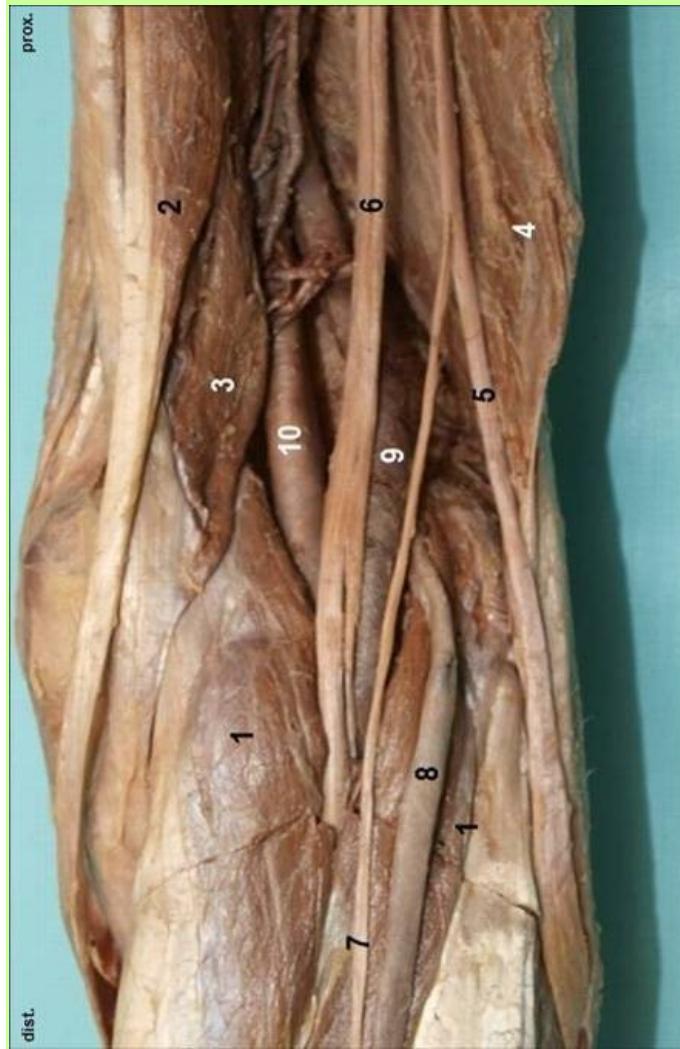

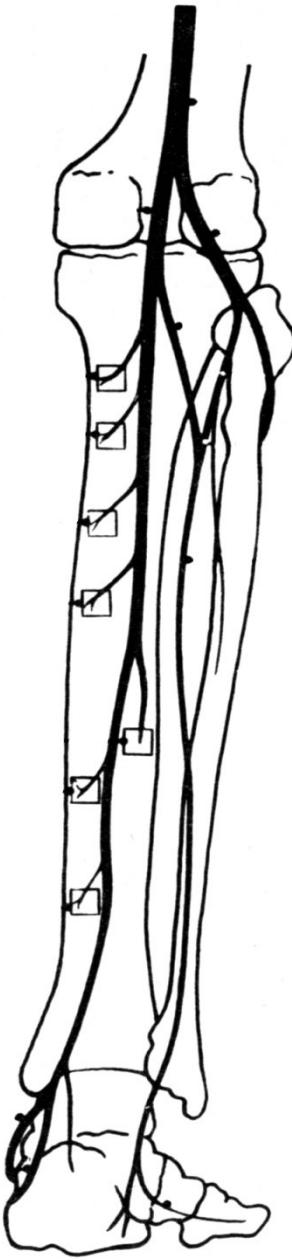

TOPO: křížení s arterií,
extensor hallucis
extenzor. prstů

tib.ant.

4 – m. extens. hallucis 3 – extens.- digit.

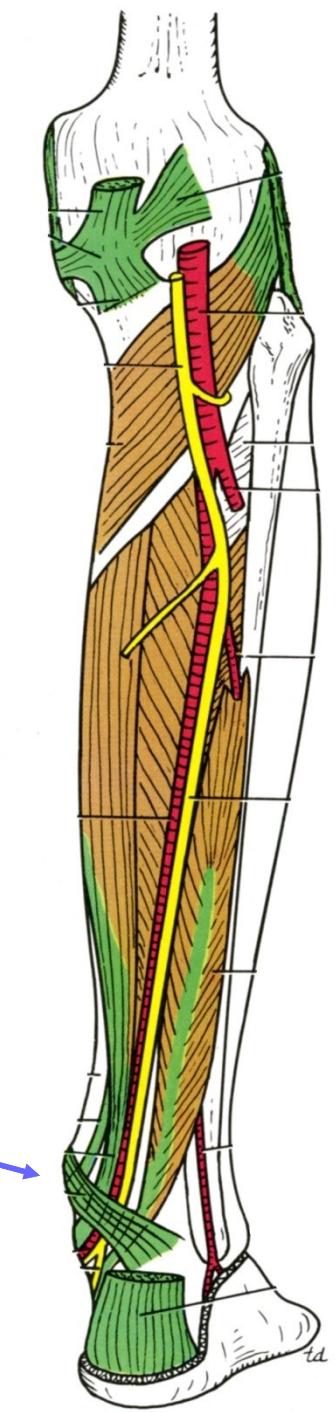

12 – n. peroneus prof. (superfic.)

N. TIBIALIS

-

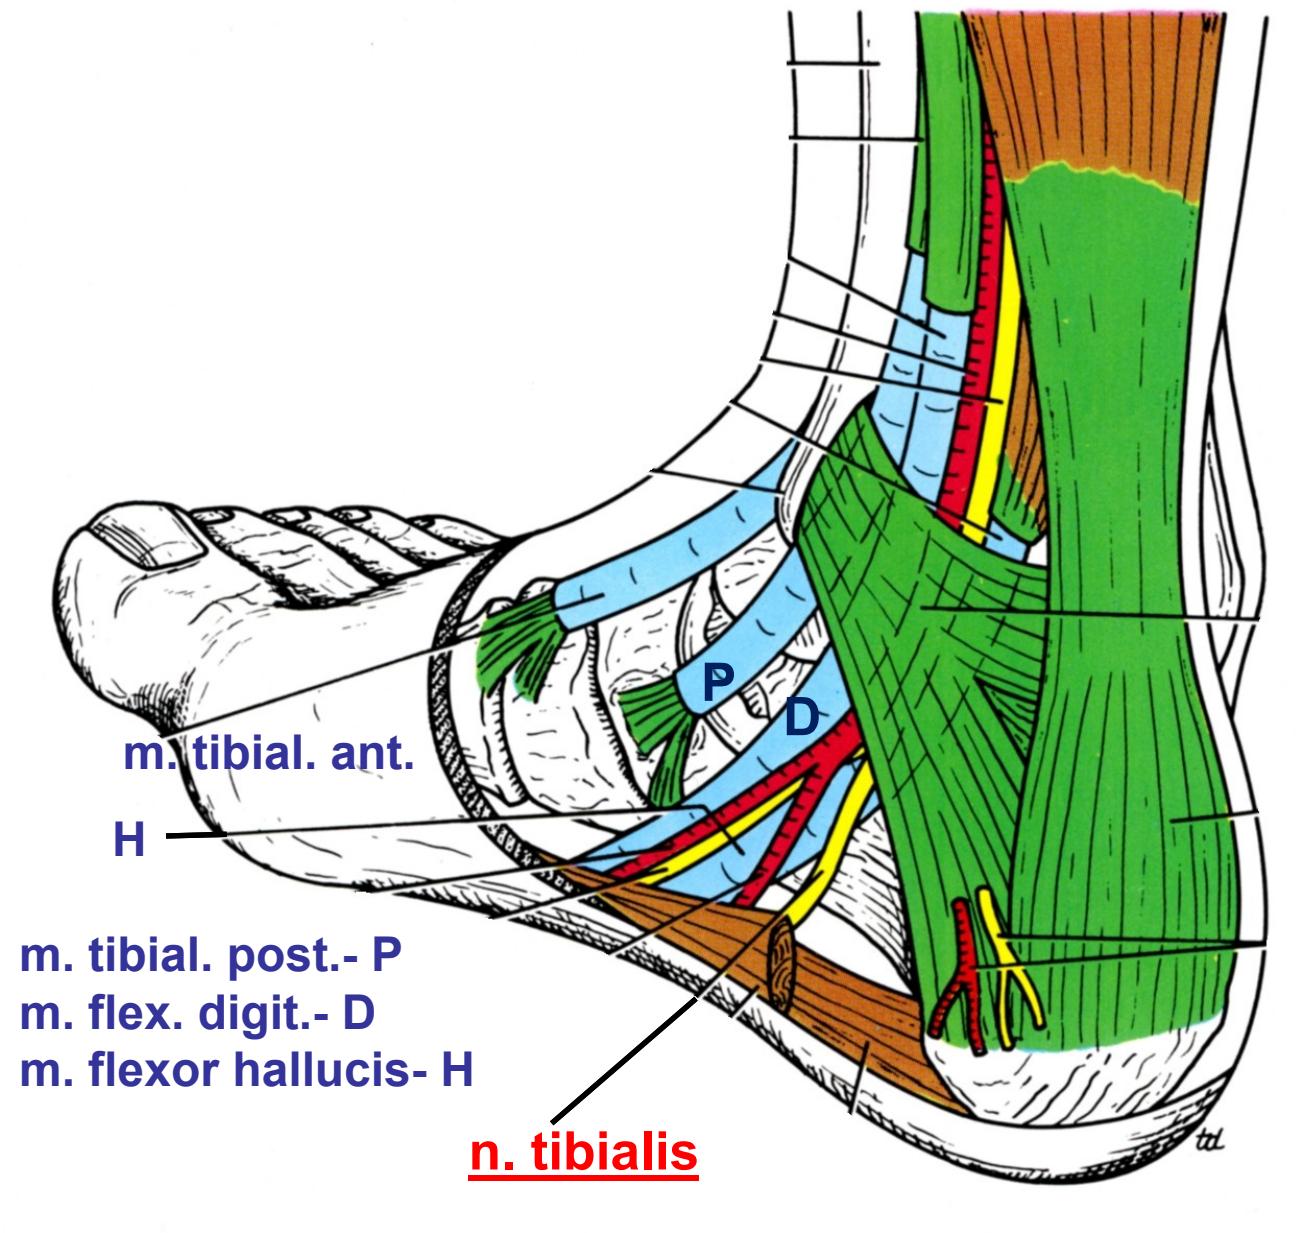

Další obr.

N. TIBIALIS:

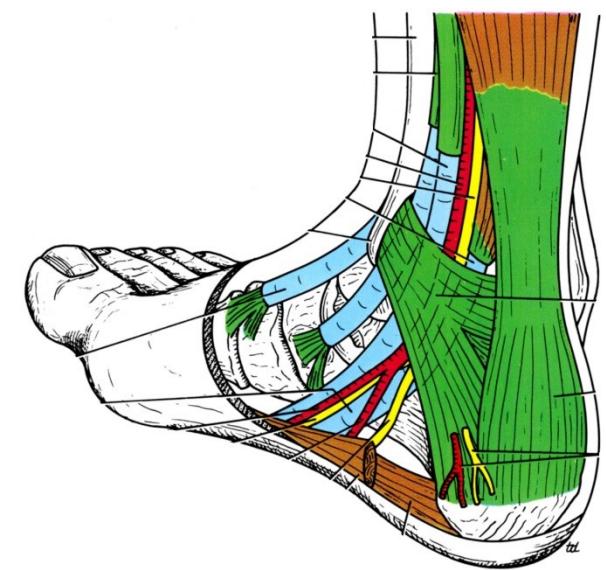

sleduje zadní tepnu
mezi hlubokými svaly
pod tricepsem

Za mediální kotník

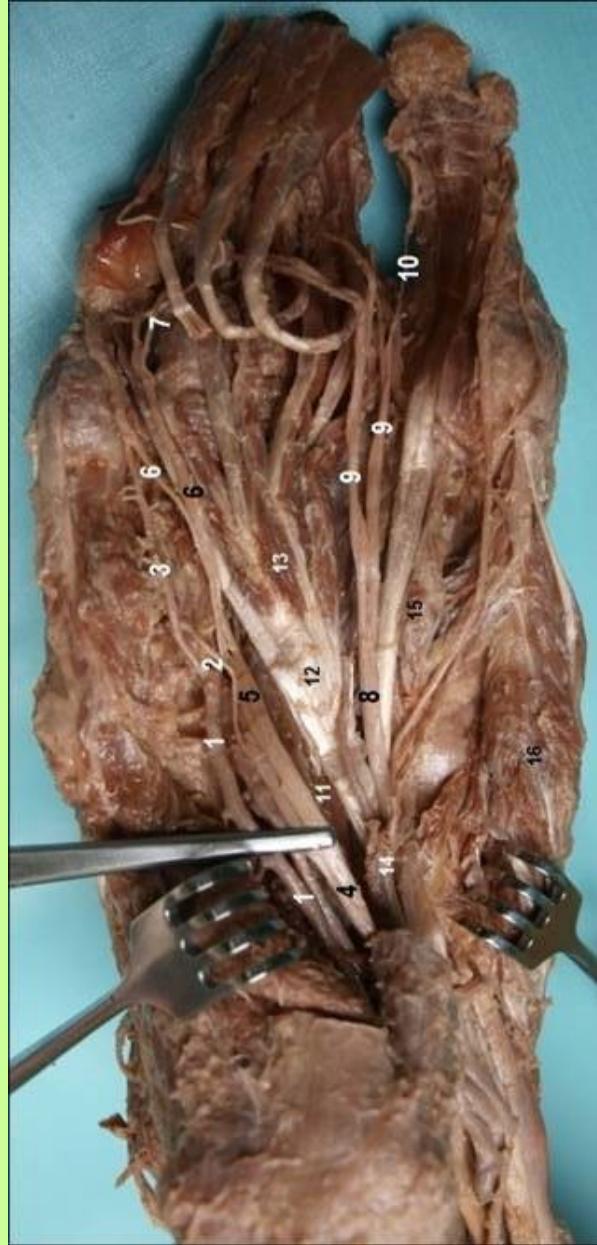

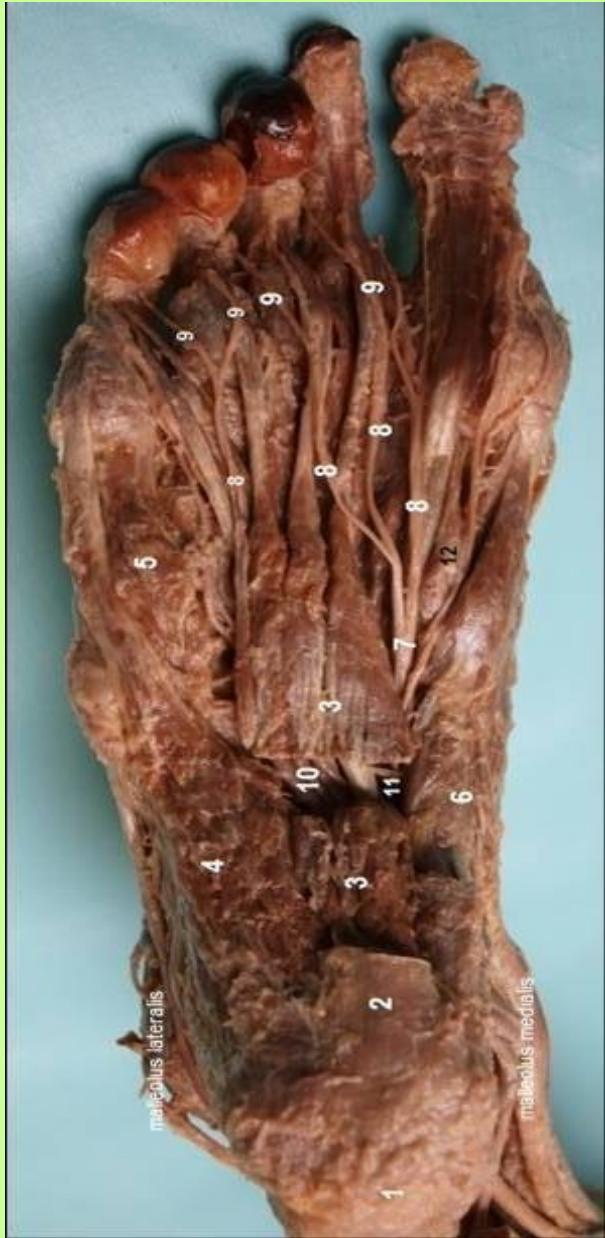

Topo mediálního kotníku

preparát →

1 – m. tibialis post., 2 - m. flexor digitorum, 5- m.flexor hallucis, 6 – n. tibialis

n. plantaris lateralis, med.

FINE

děkuji za pozornost
