

LYMPHATIC SYSTEM

- Lymphoid tissue, lymphoid nodule (follicle)

- Lymphoid organs:

Central → thymus, (red bone marrow)

Peripheral → lymph node

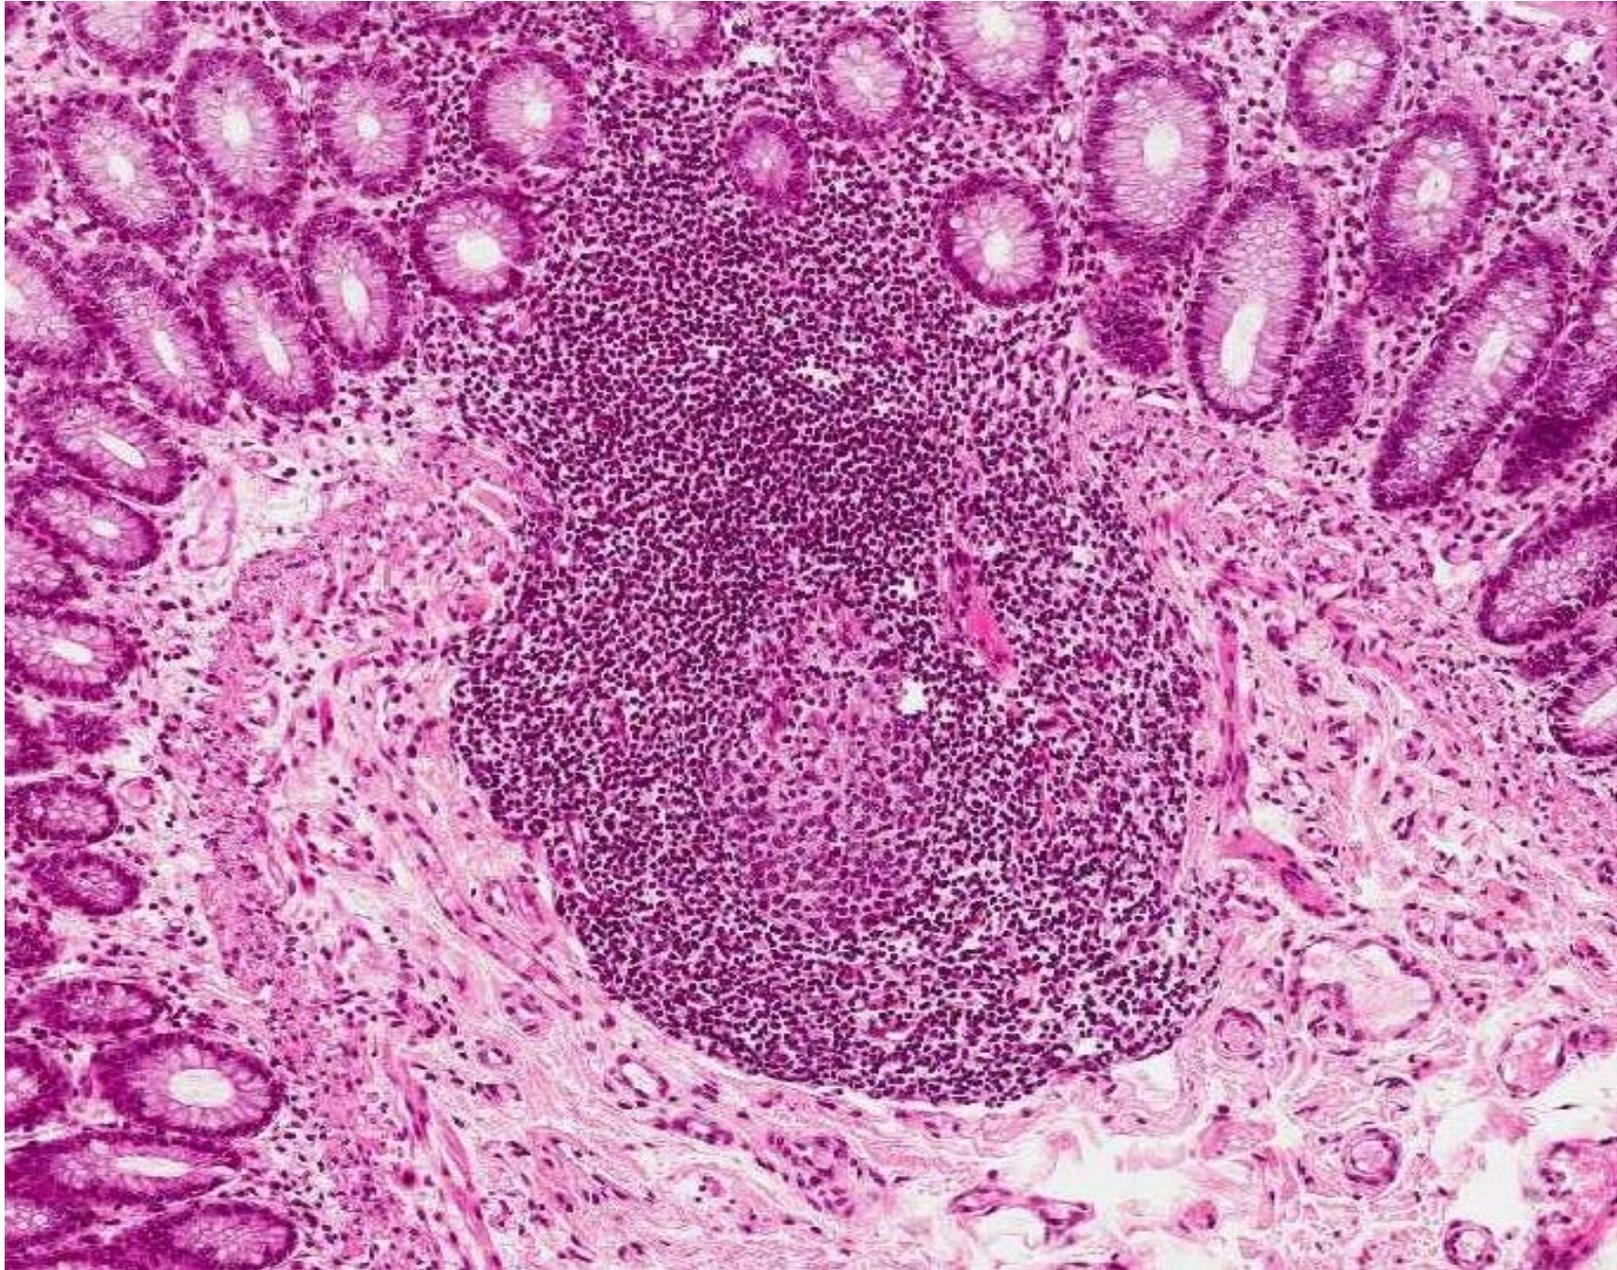

spleen

tonsils

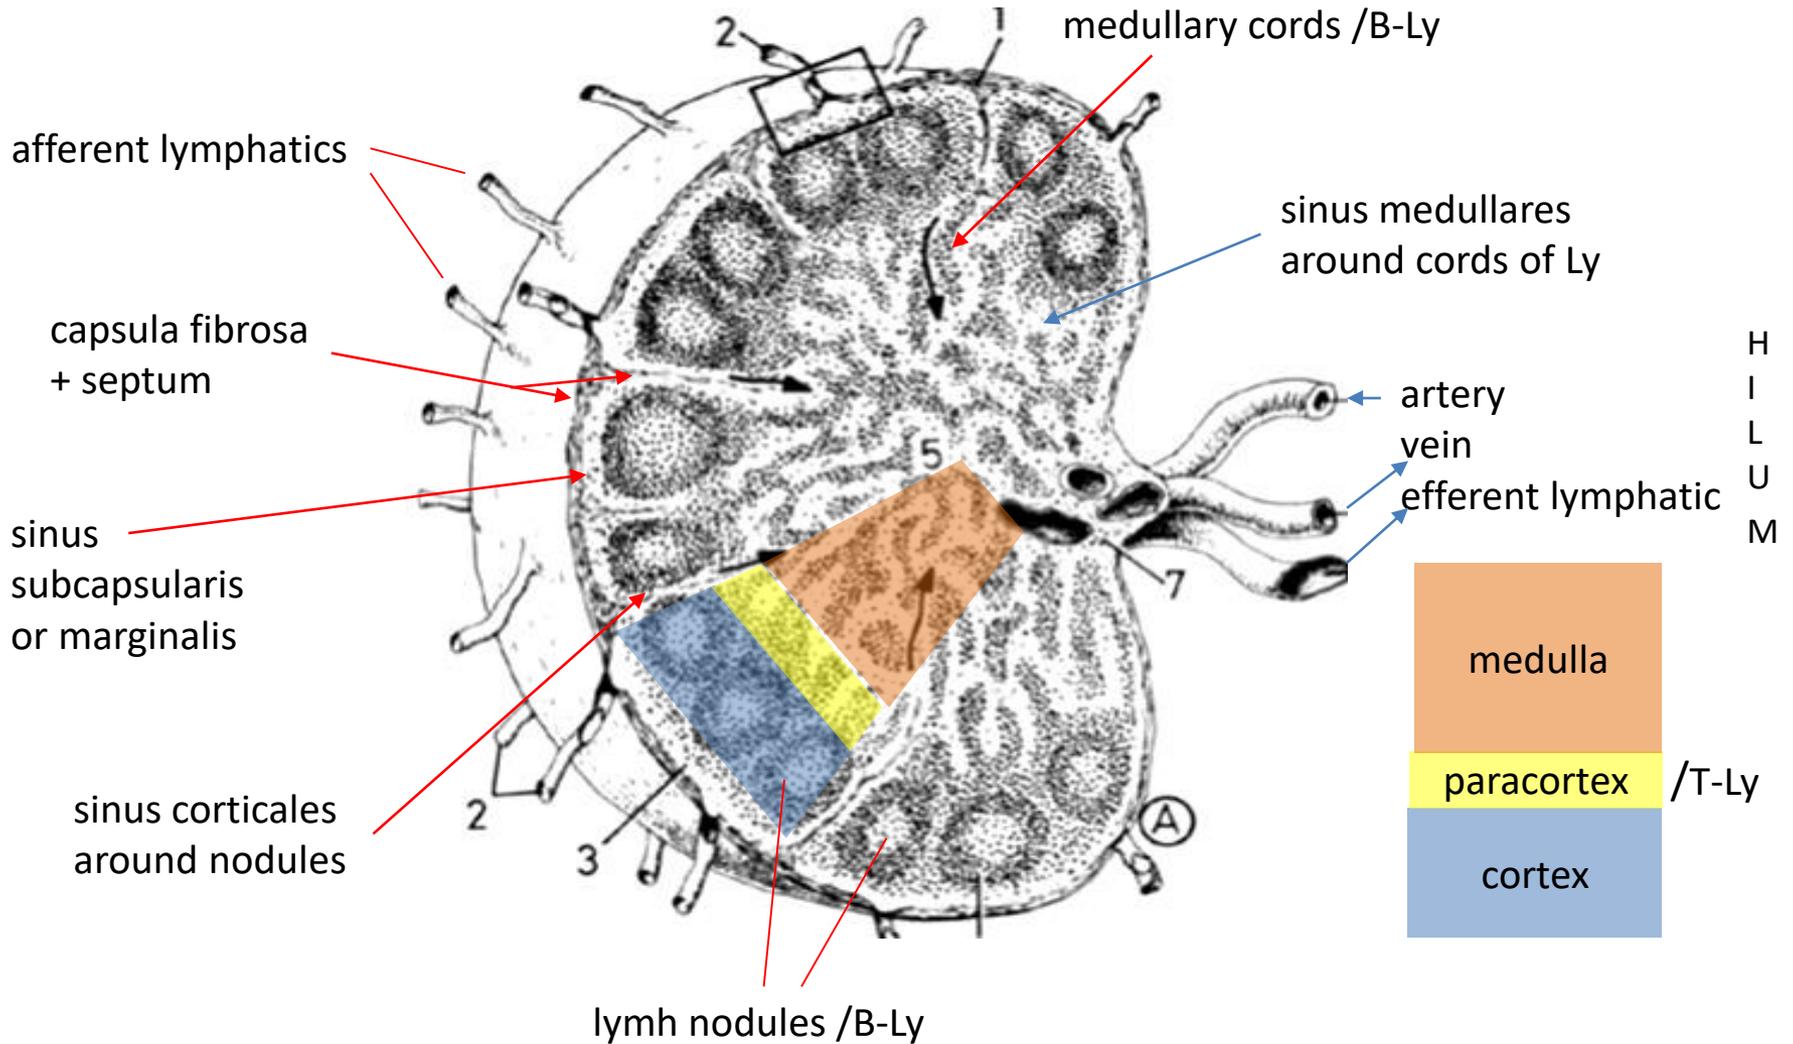

mucosa-associated lymphoid
tissue /MALT)

- Lymphatic vessels

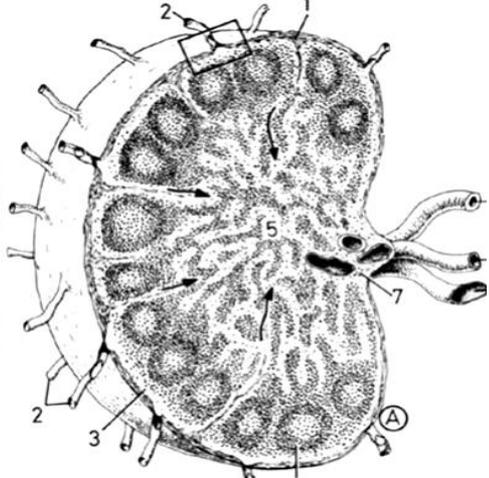

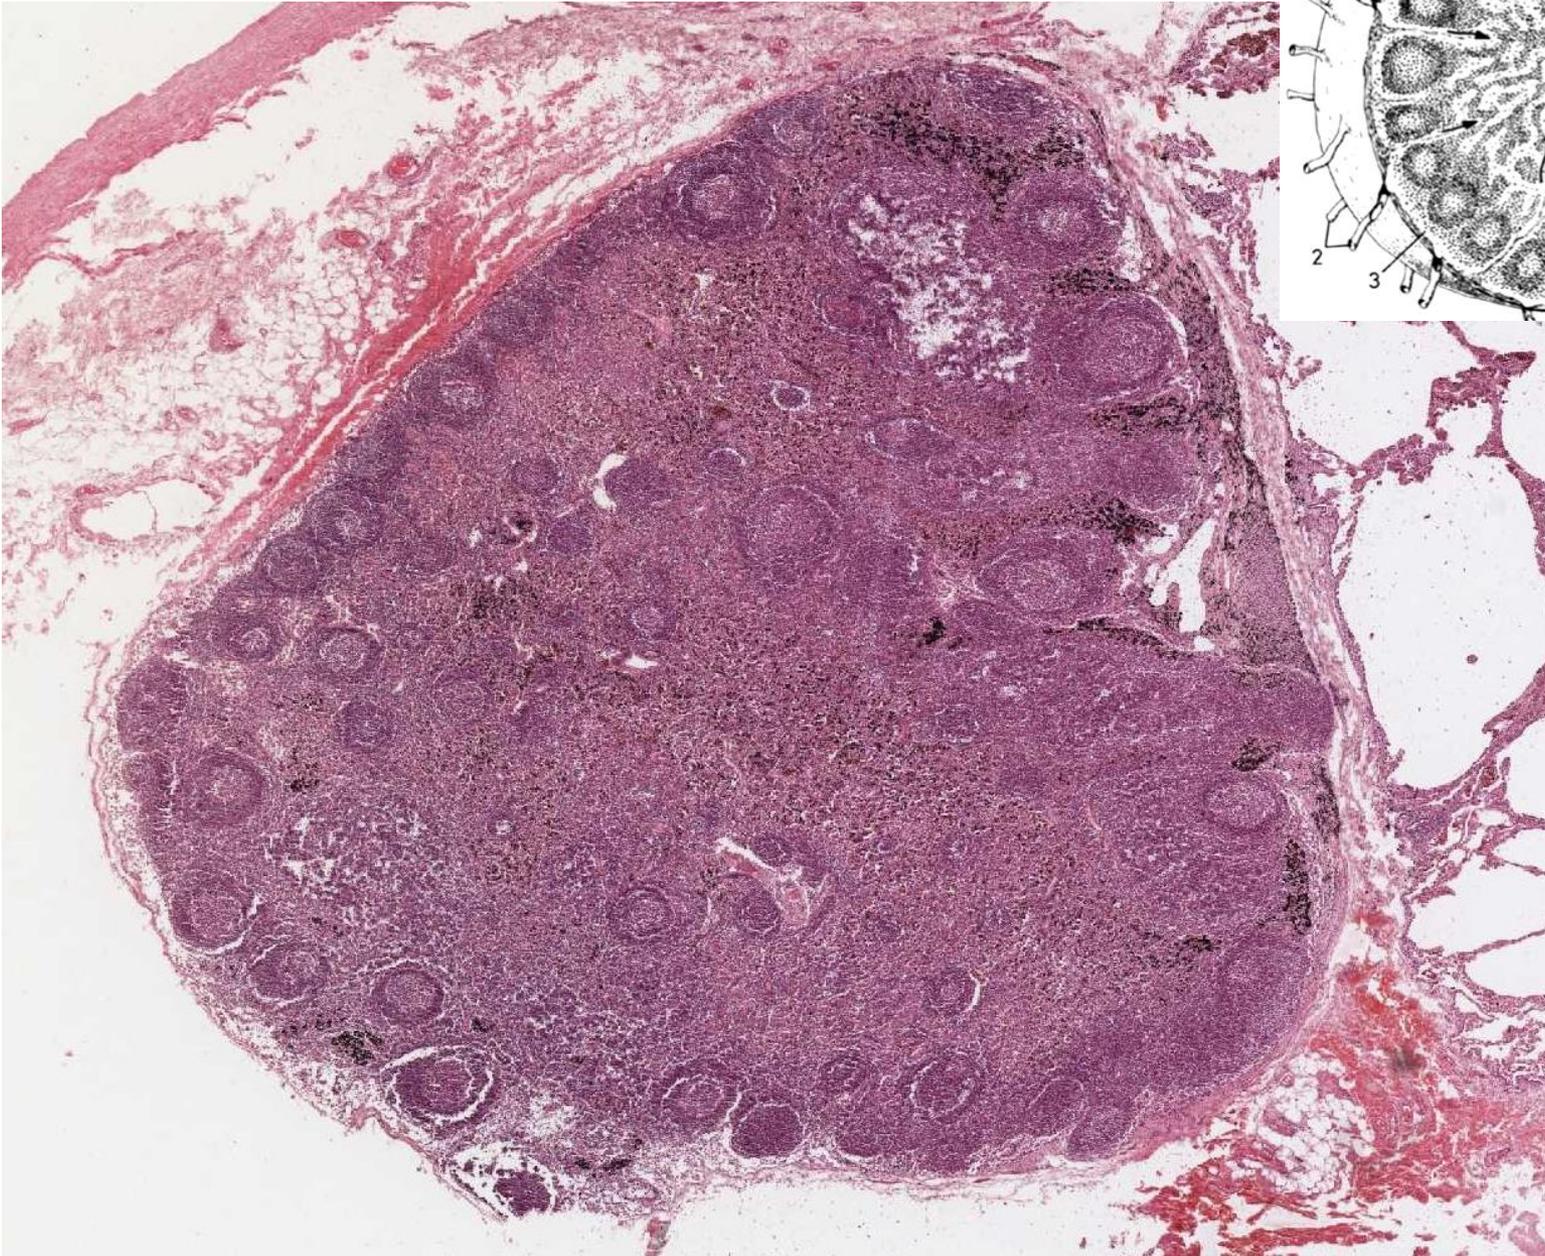

lymphoid nodule (follicle) in the intestinal mucosa

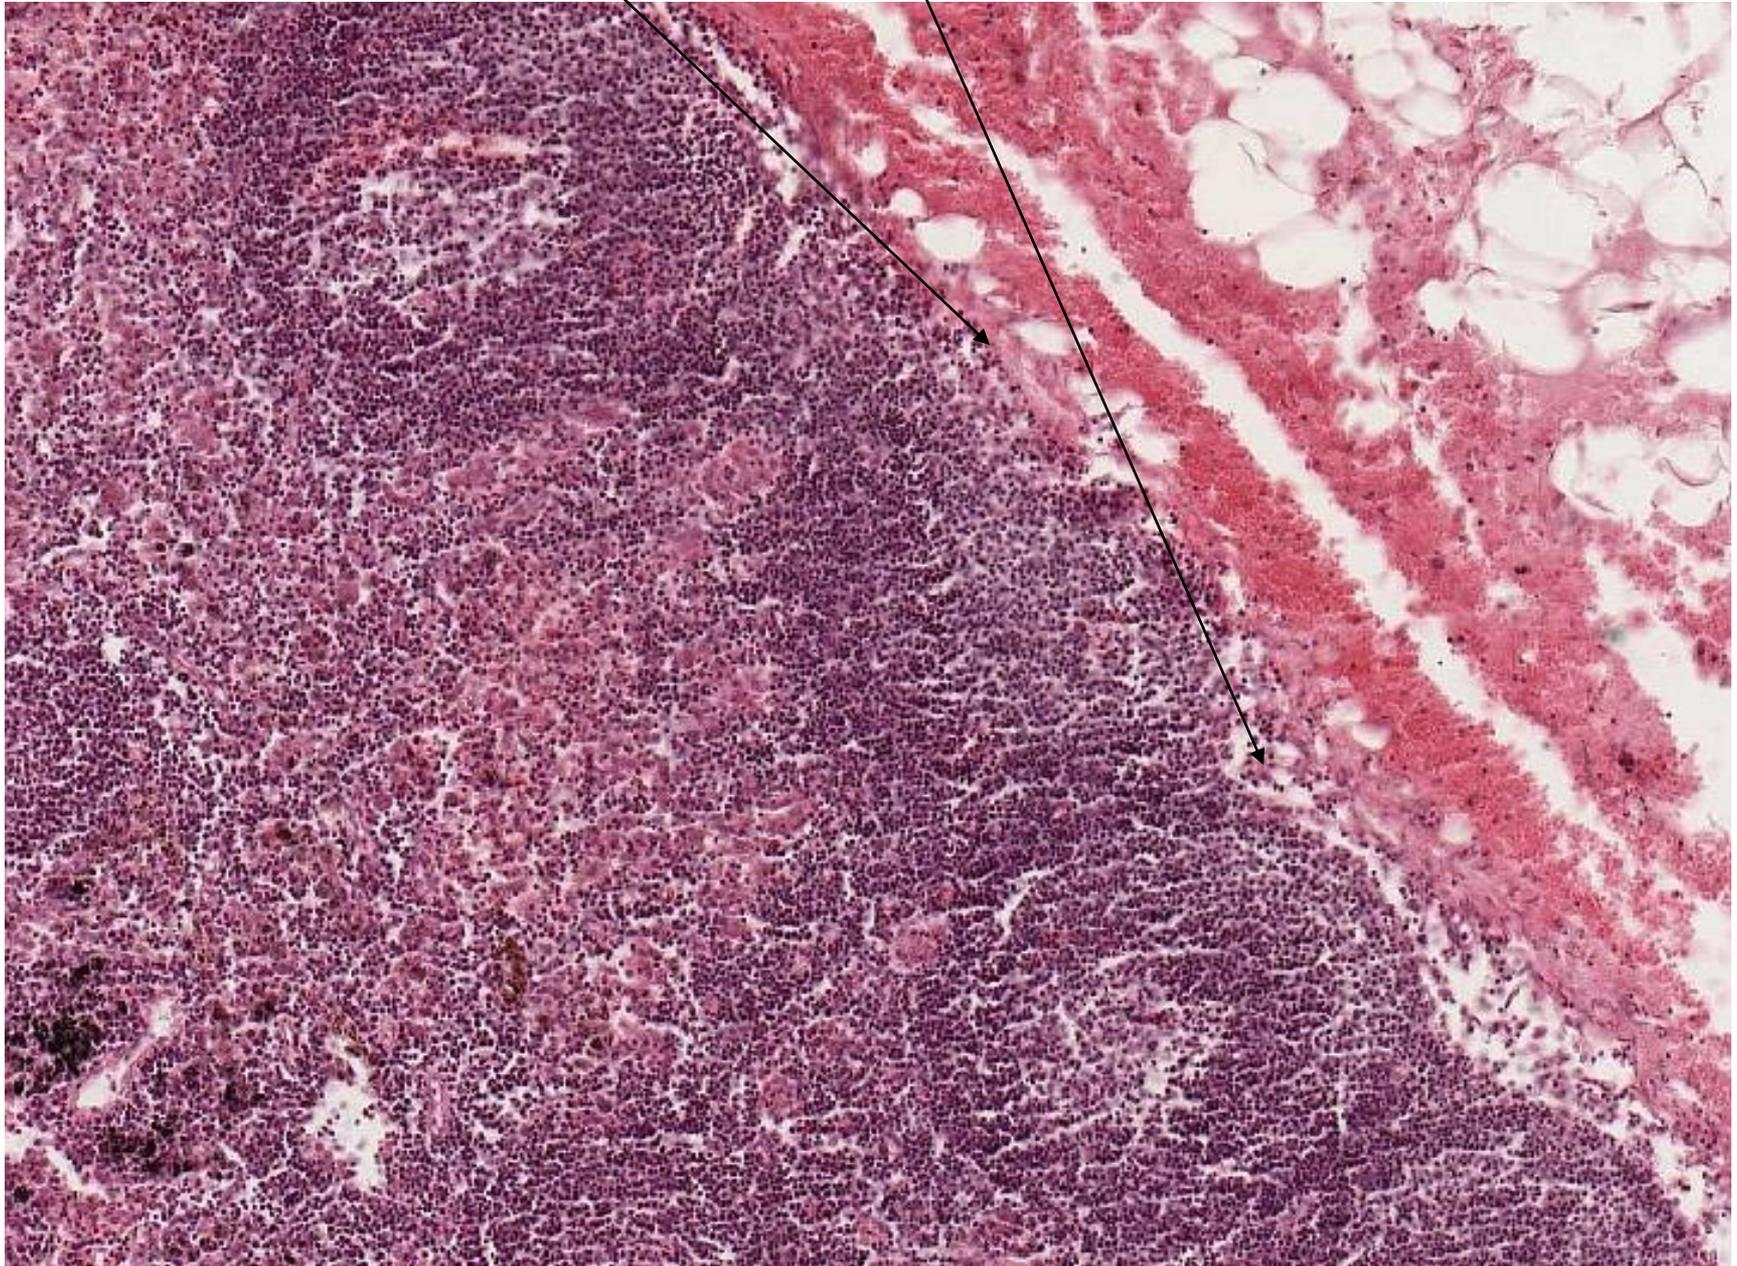

LYMPH NODE

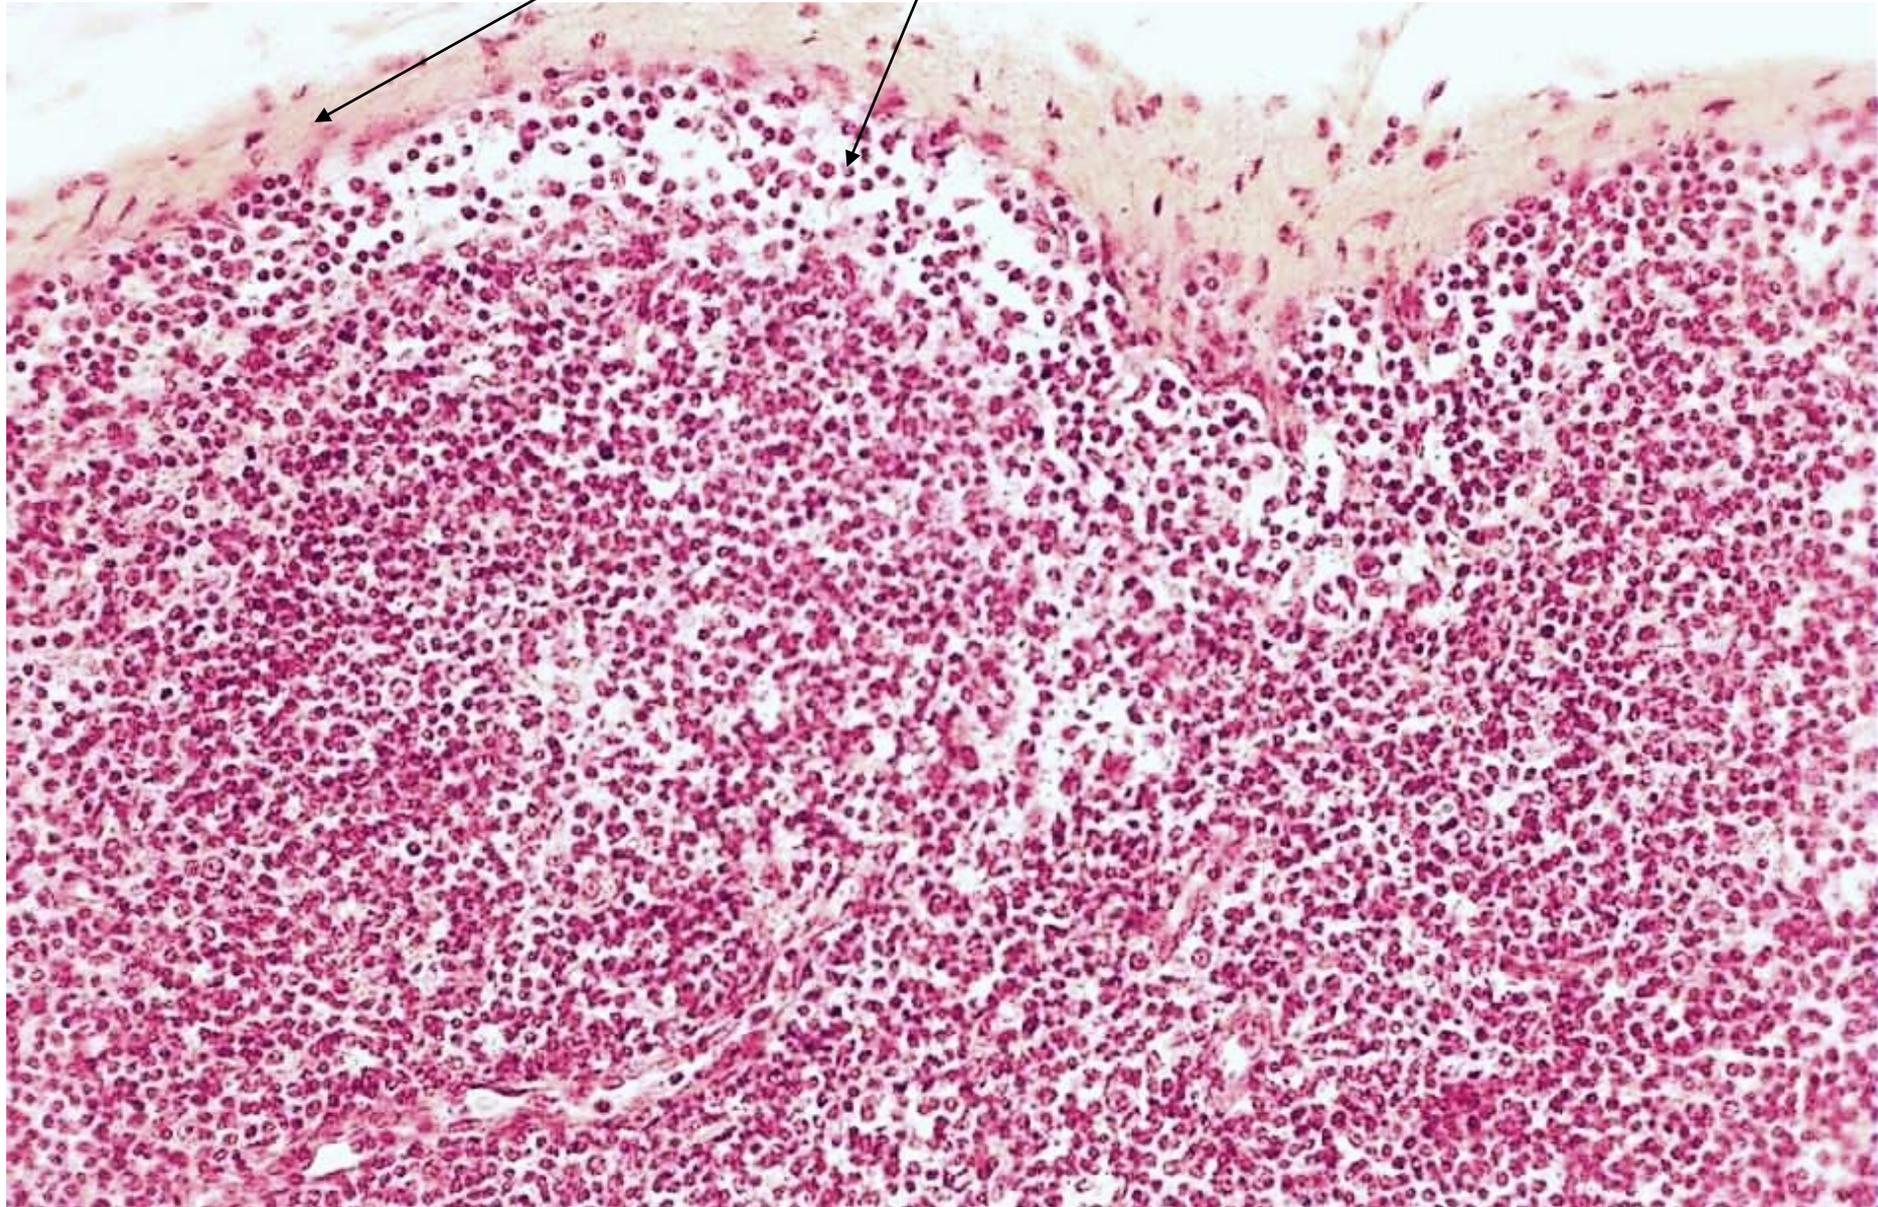

Lymph node

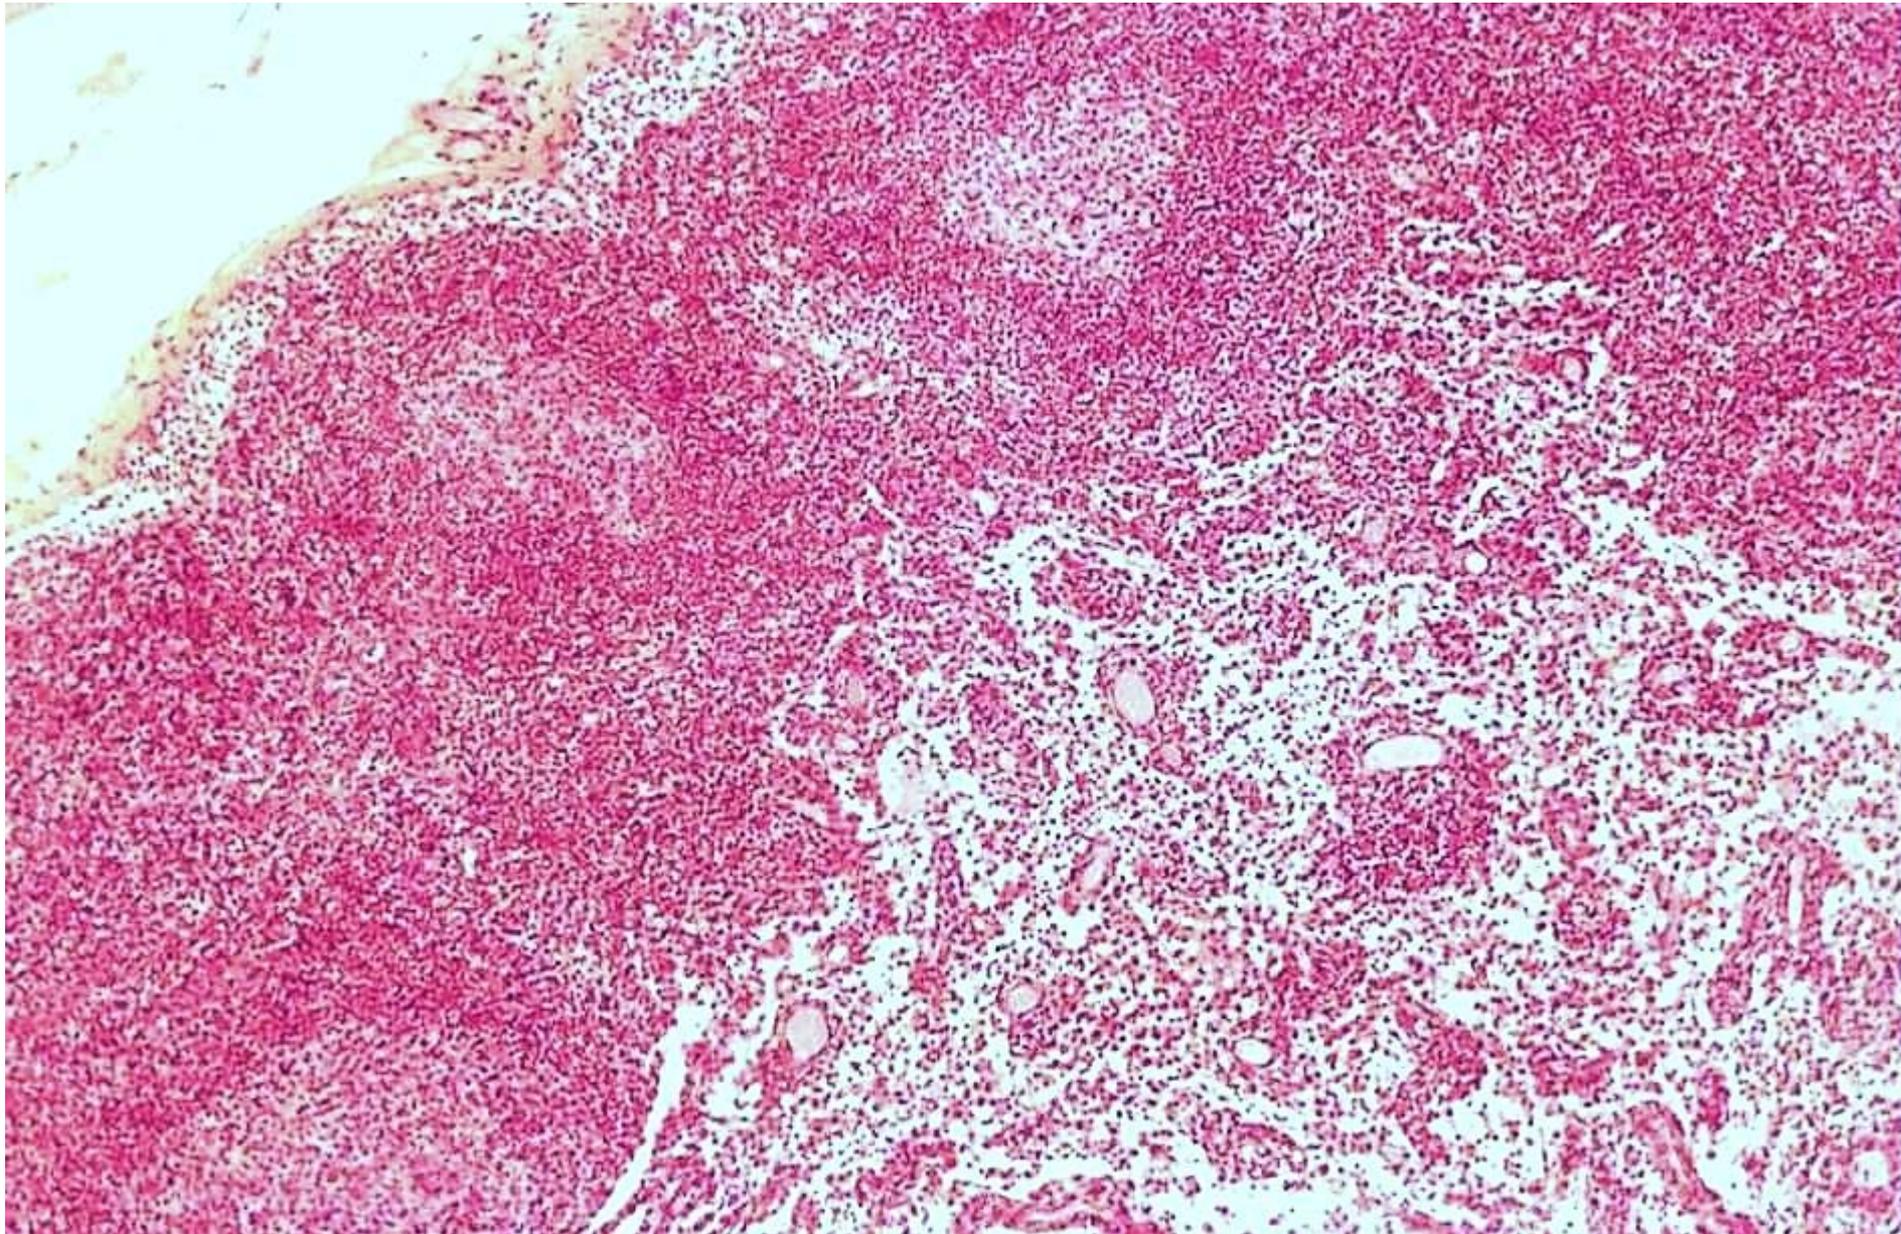

Lymph node – capsule, subcapsular (marginal) sinus, cortex

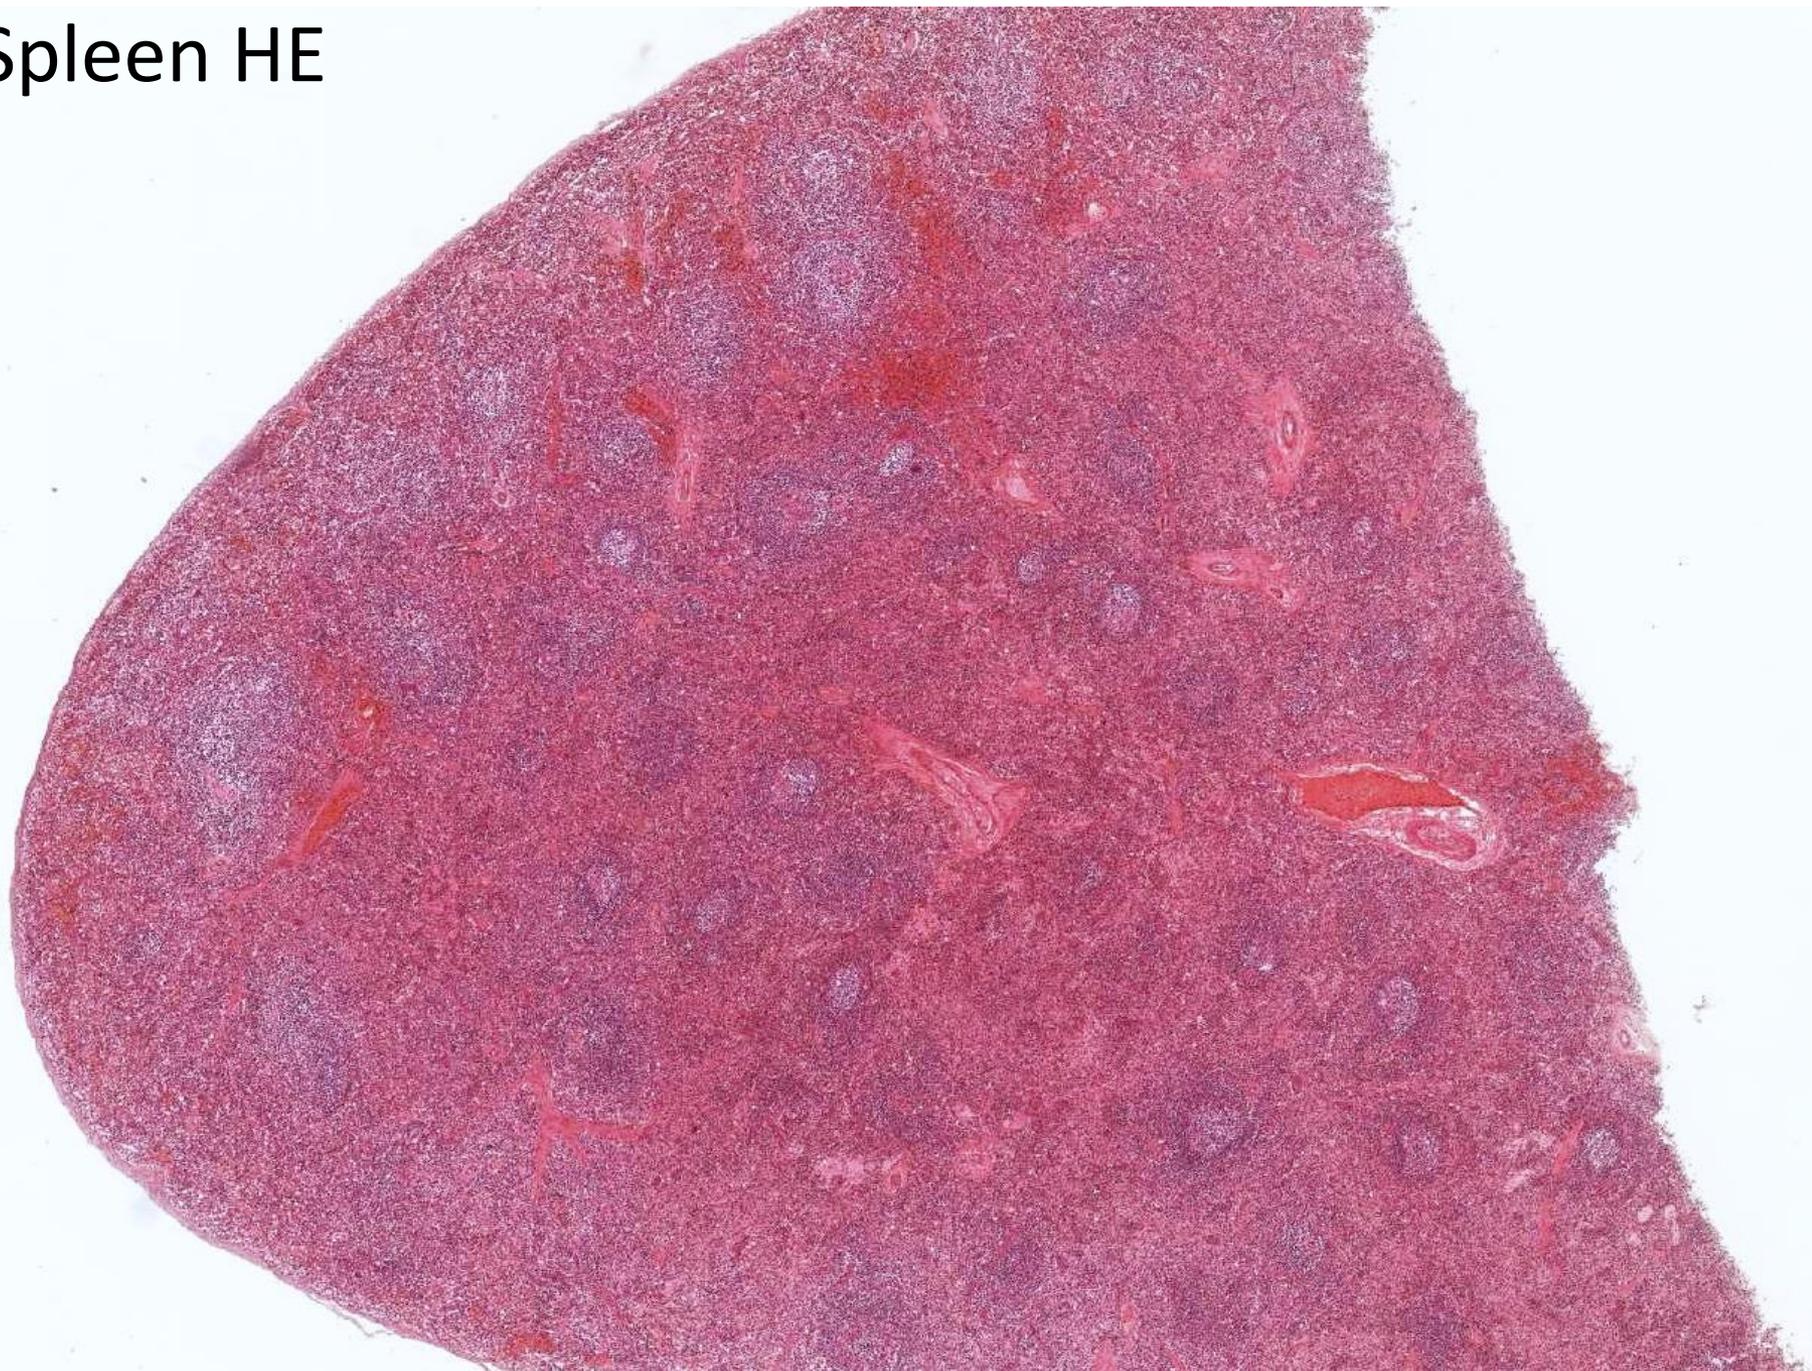

Lymph node – capsule, subcapsular (marginal) sinus, cortex

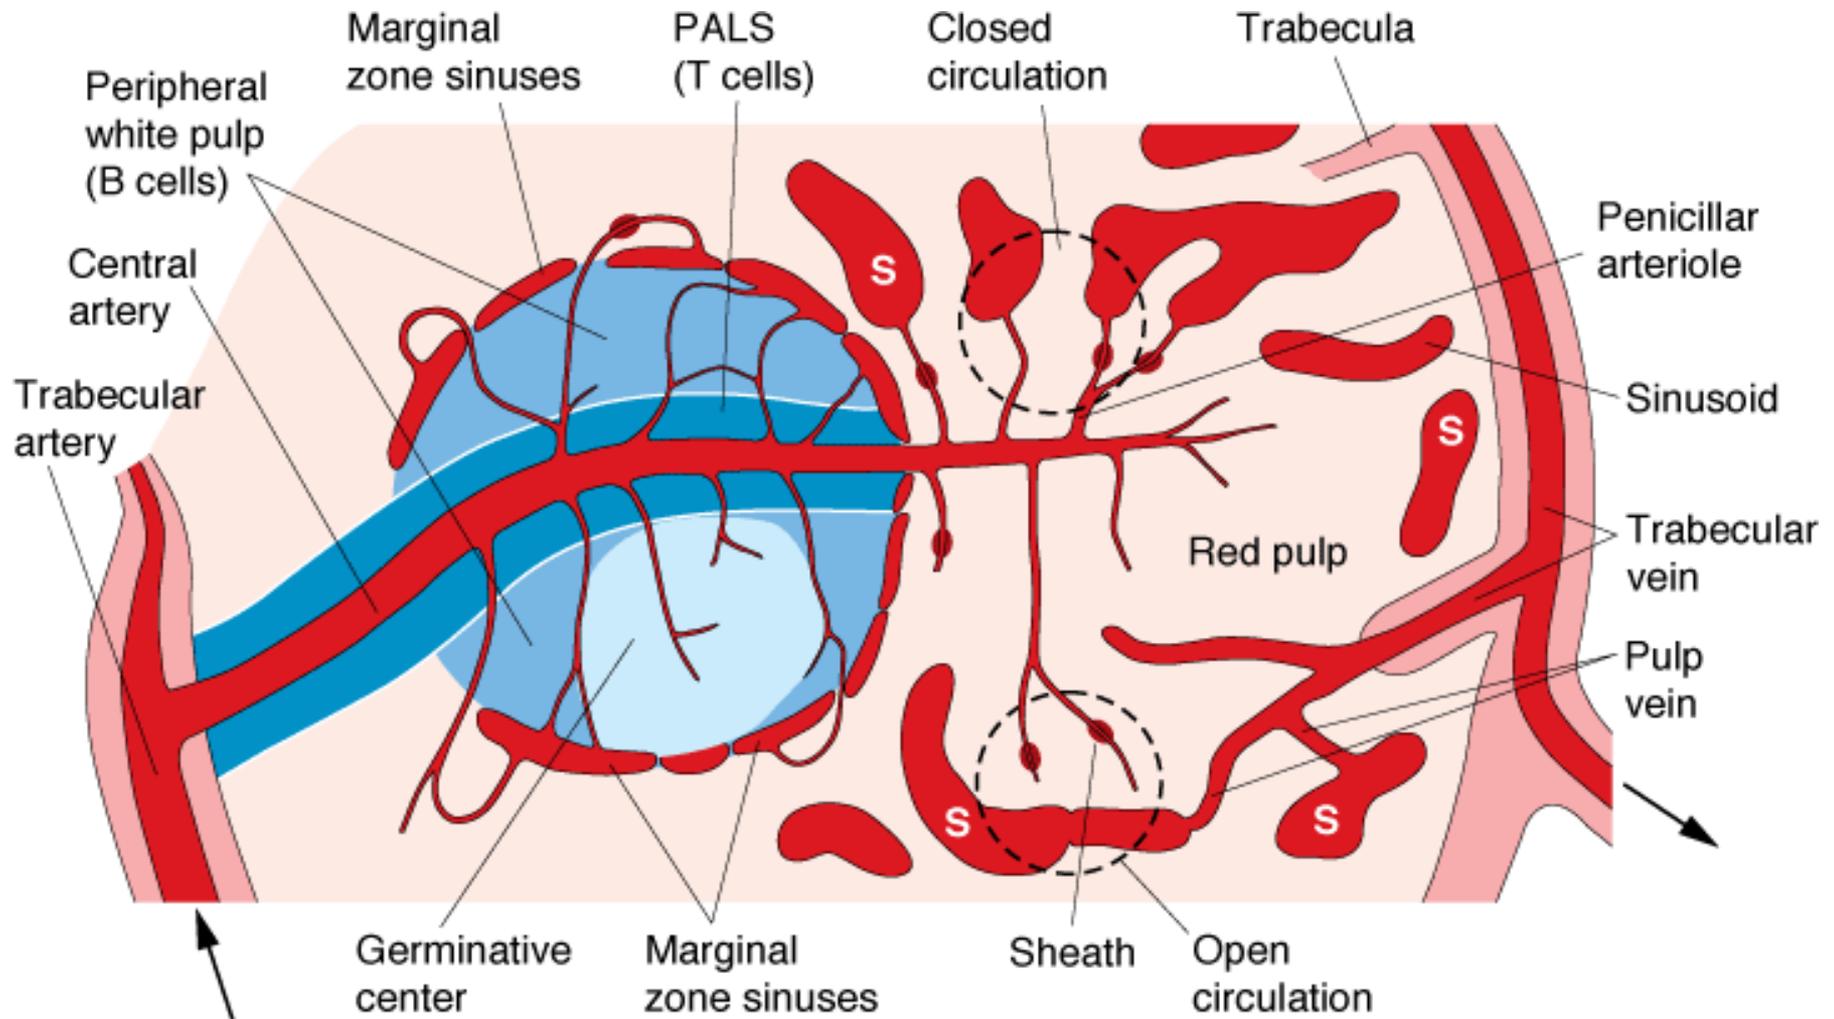

Lymph node – cortex, medulla

Spleen HE

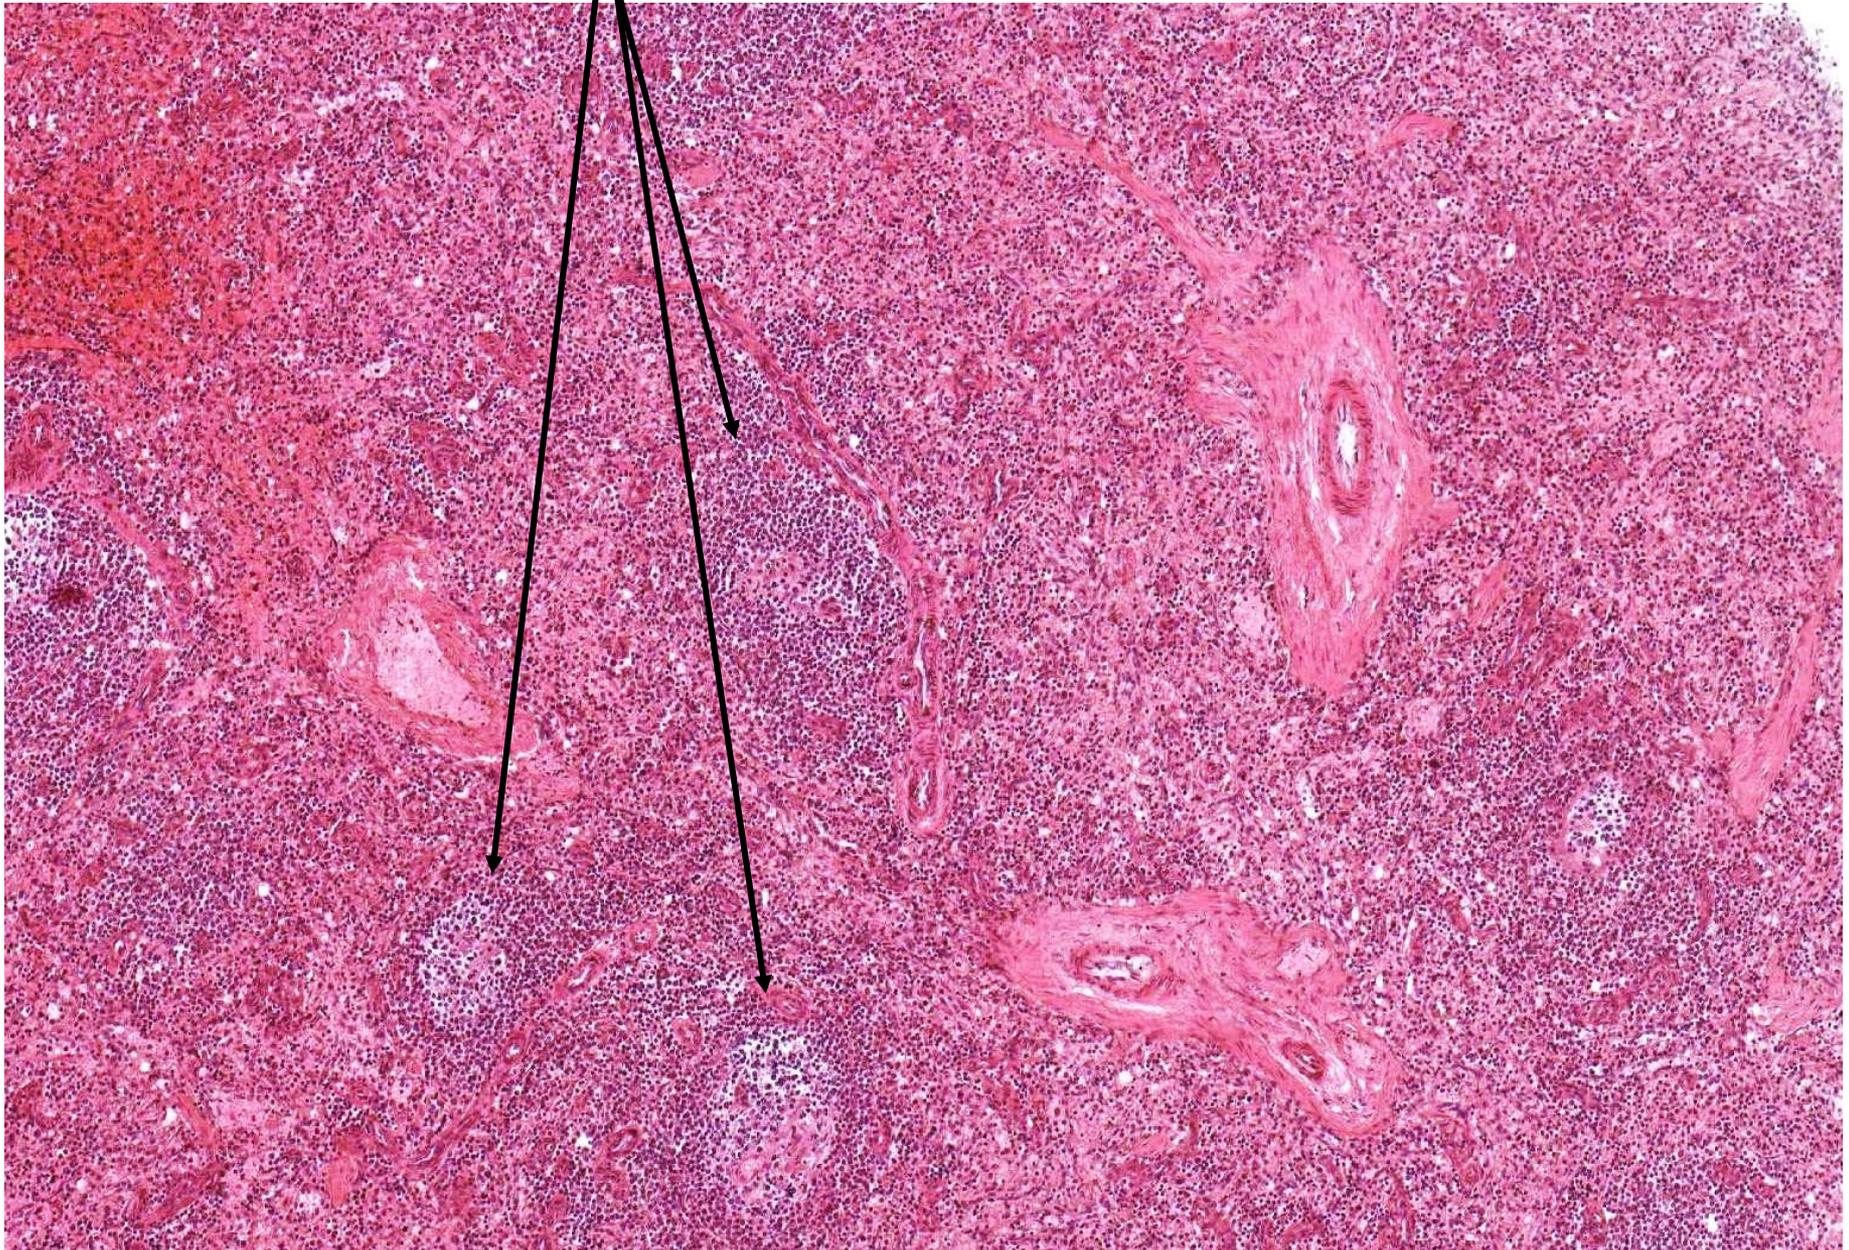

Blood circulation in the spleen

Spleen (HE) – white and red pulp, trabeculae

Spleen (HE) – white and red pulp, central artery

Spleen (impregnation)

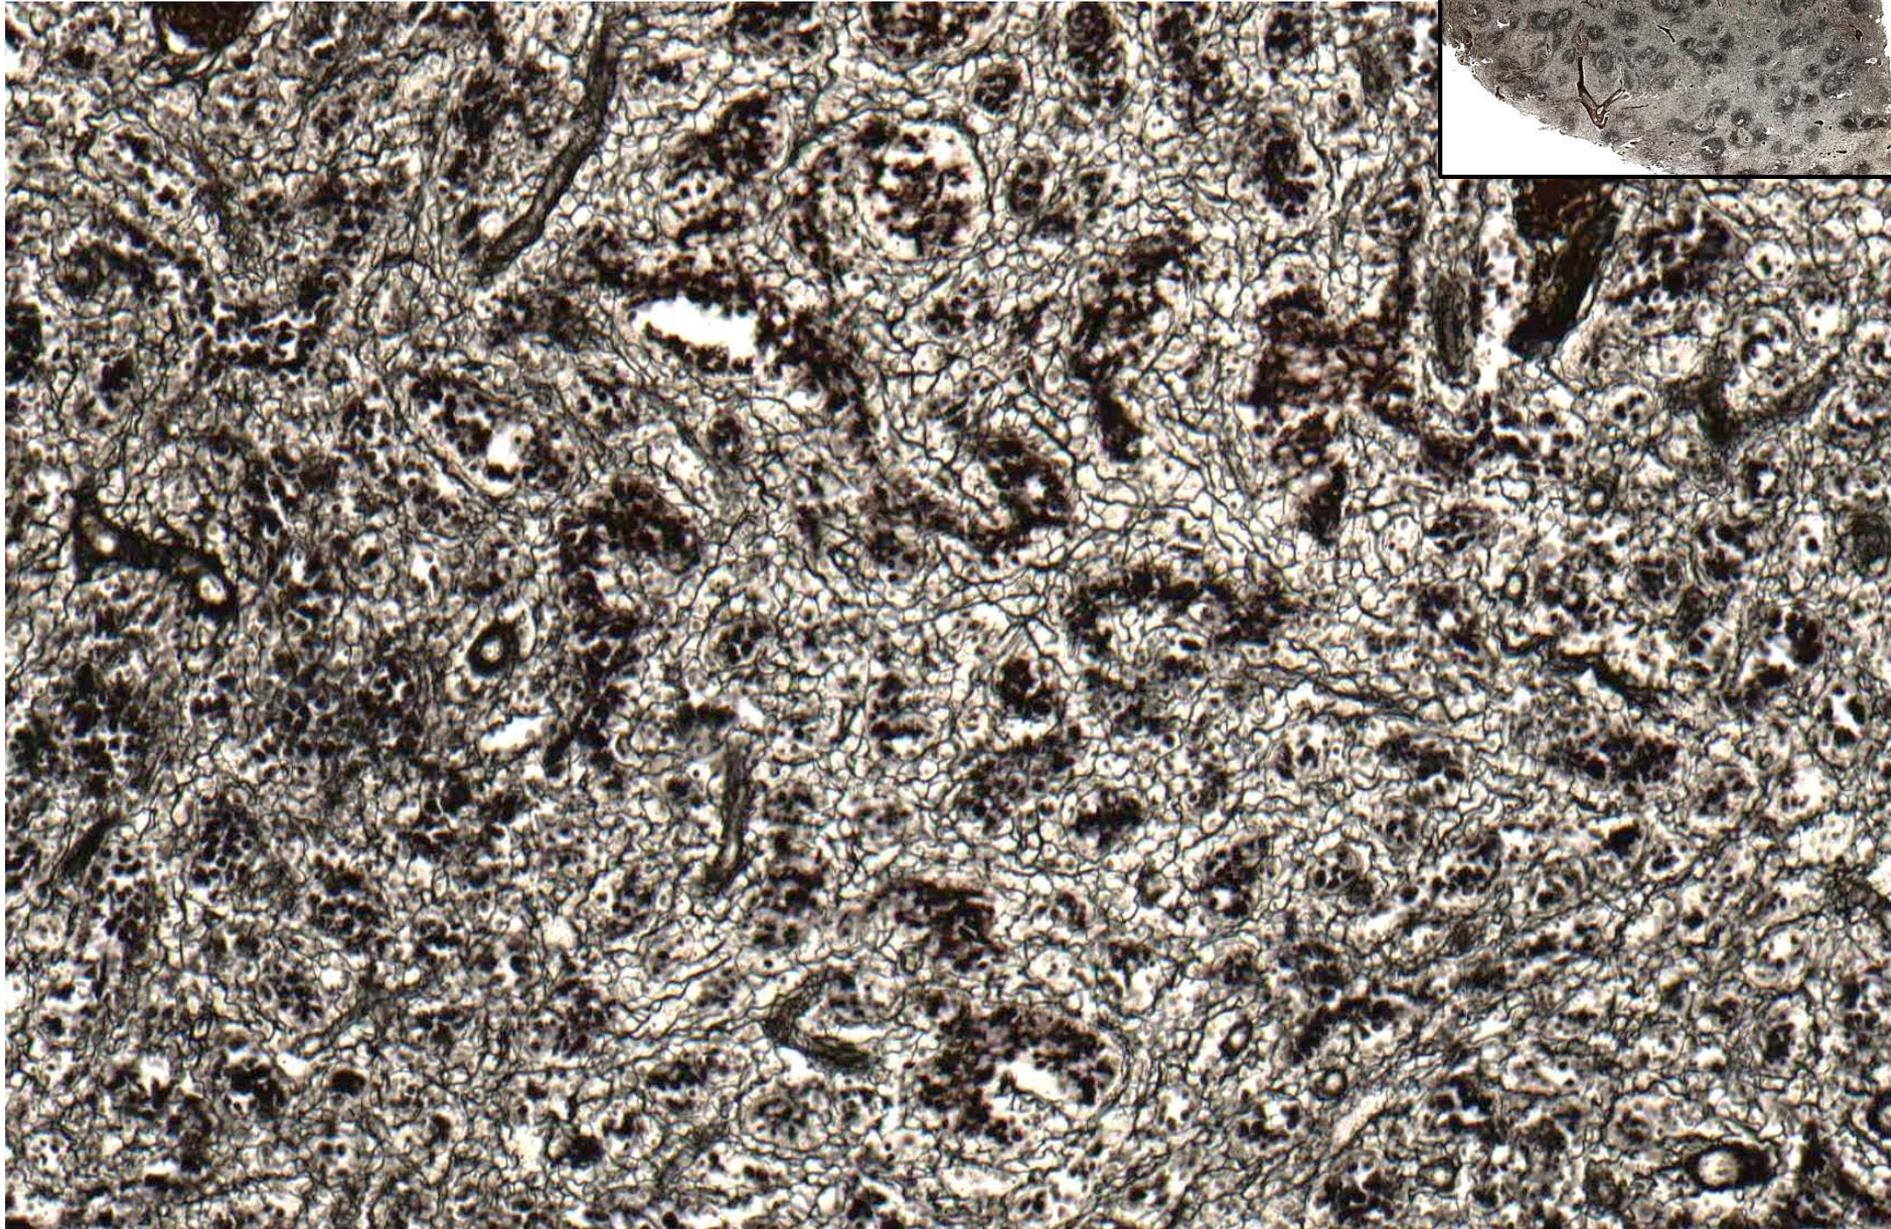

red pulp

white pulp

white pulp

Spleen (impregnation) – red pulp

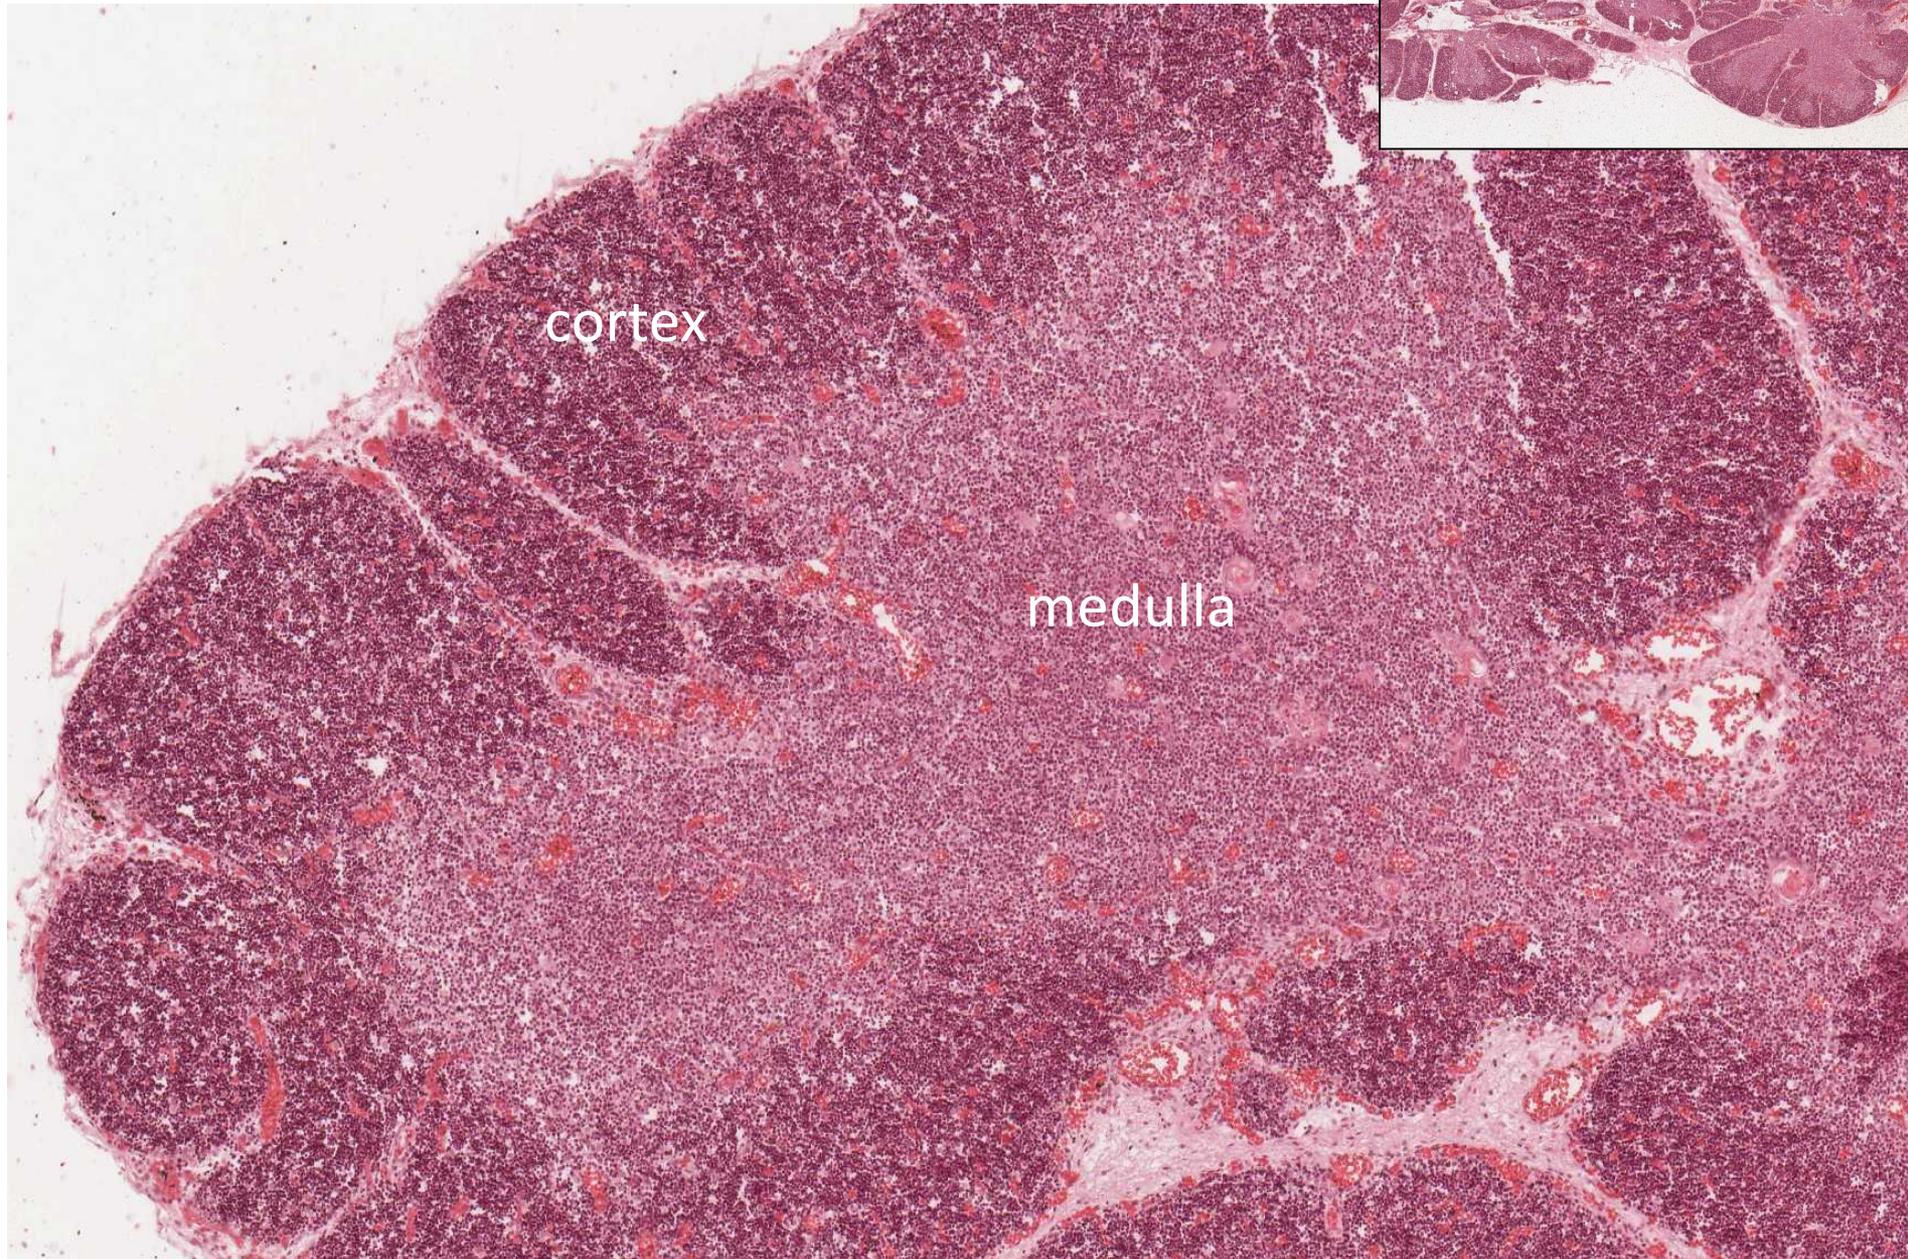

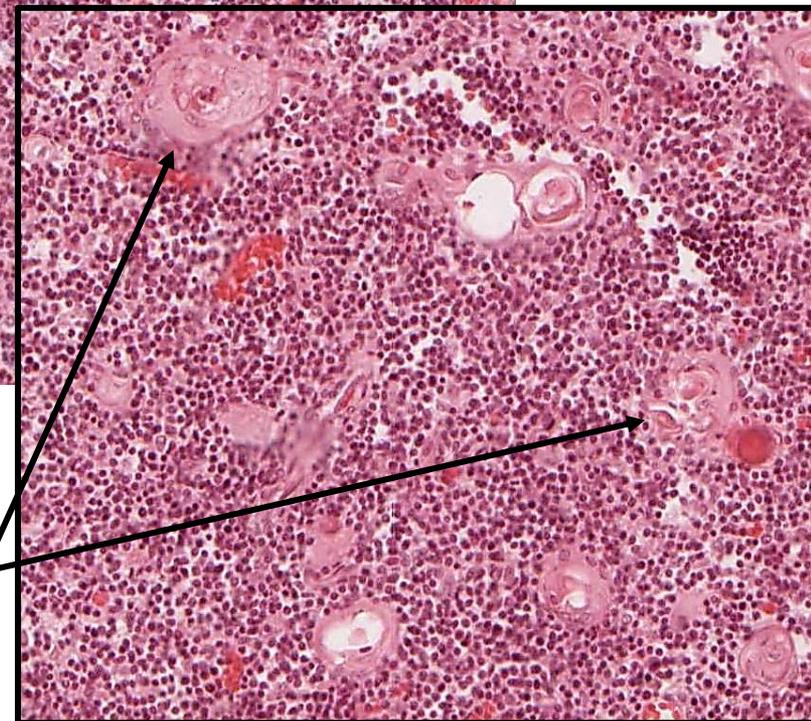

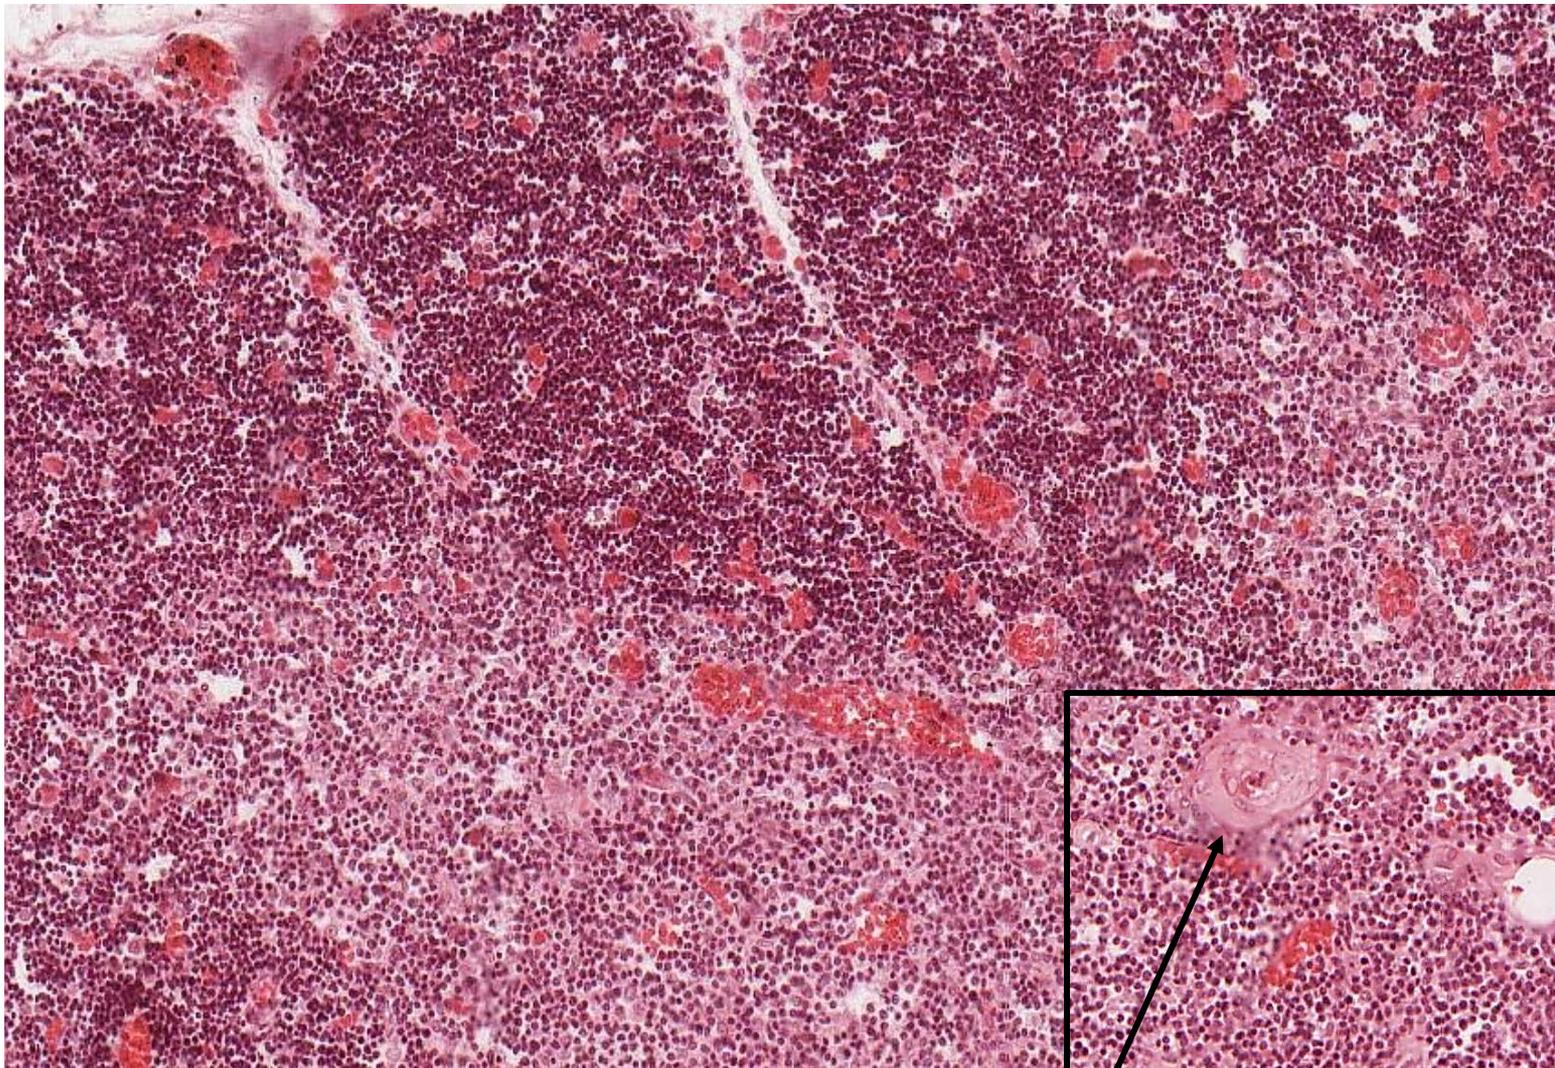

Thymus - young (HE)

cortex

medulla

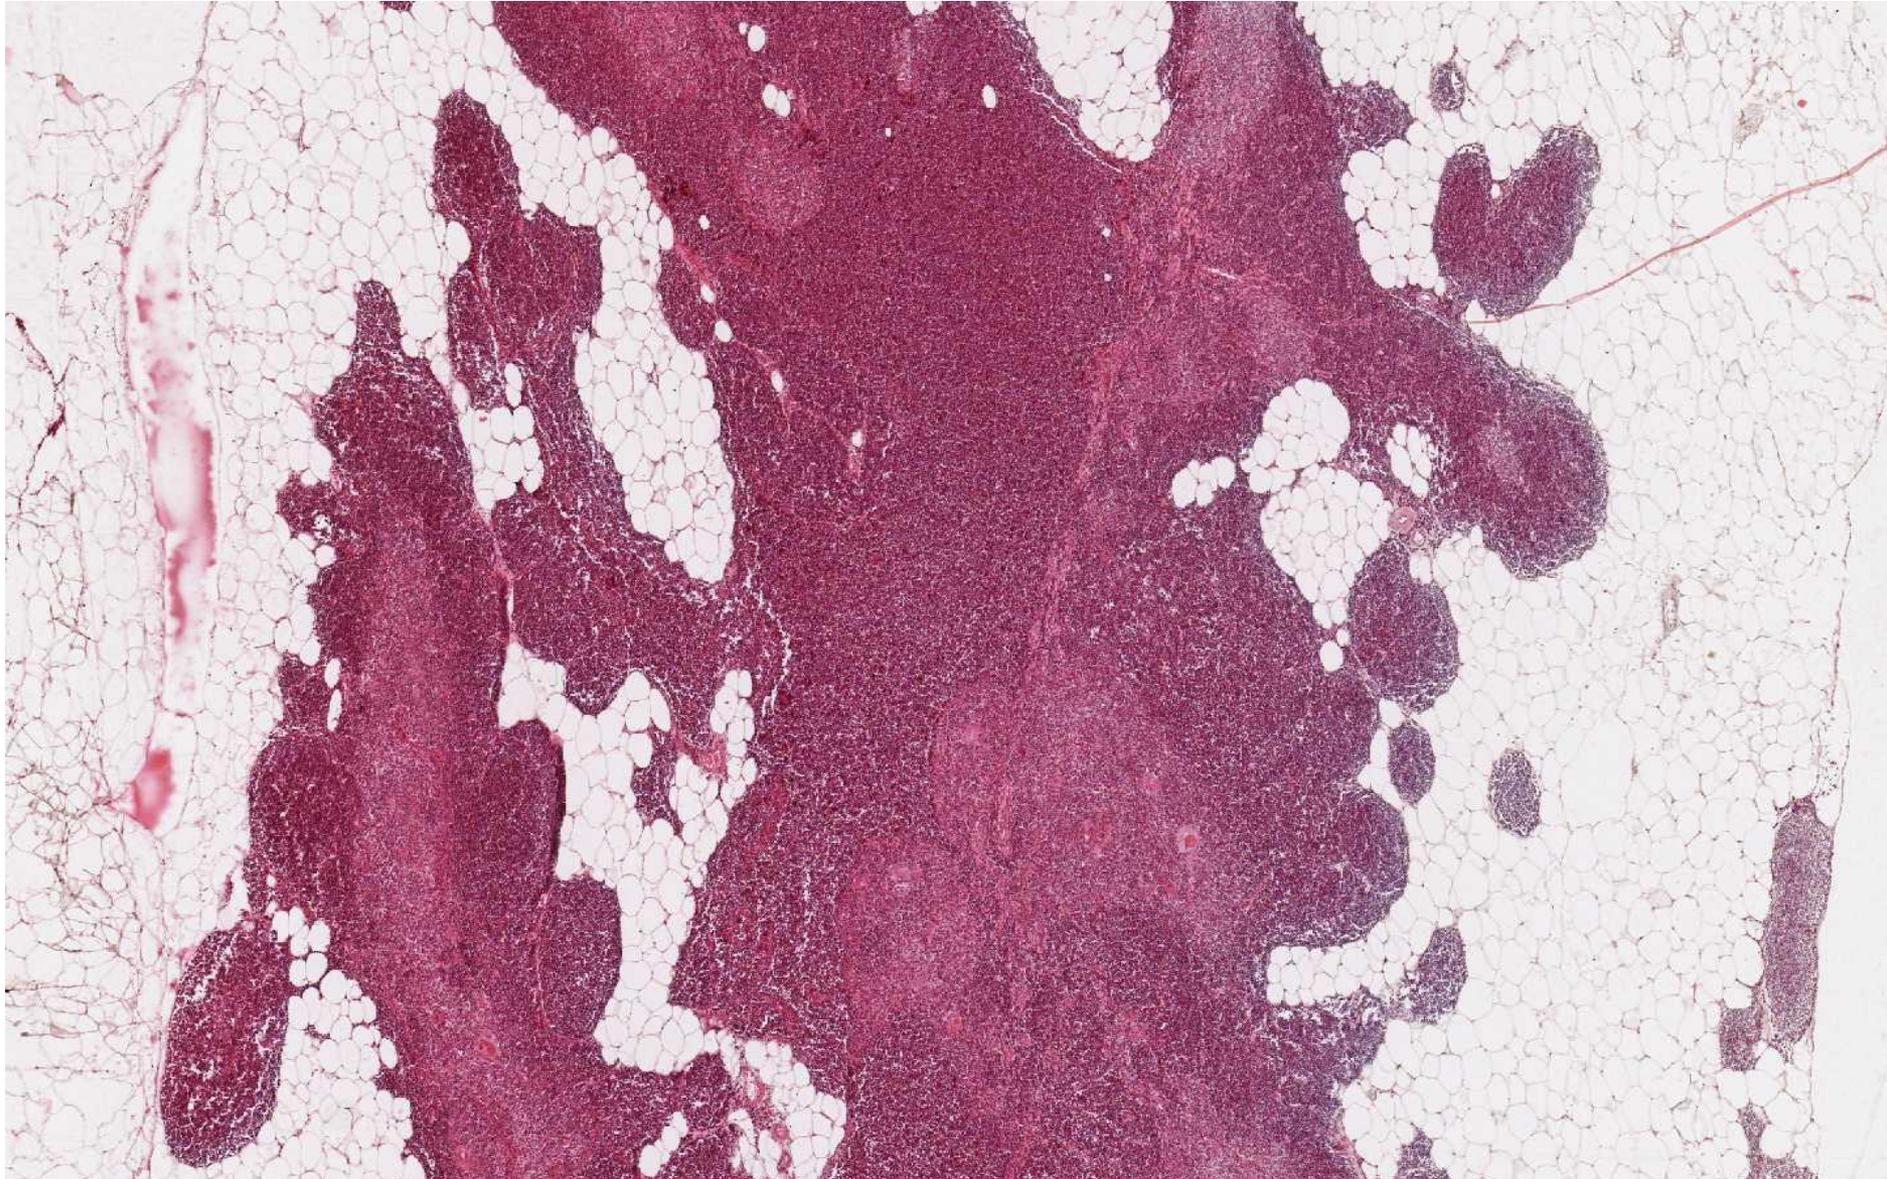

Thymus young – cortex and medulla, Hassal's corpuscles

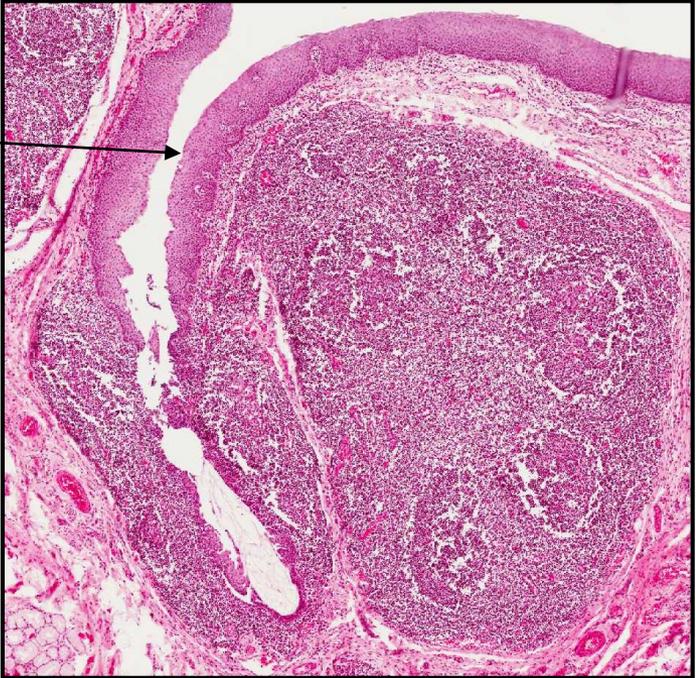

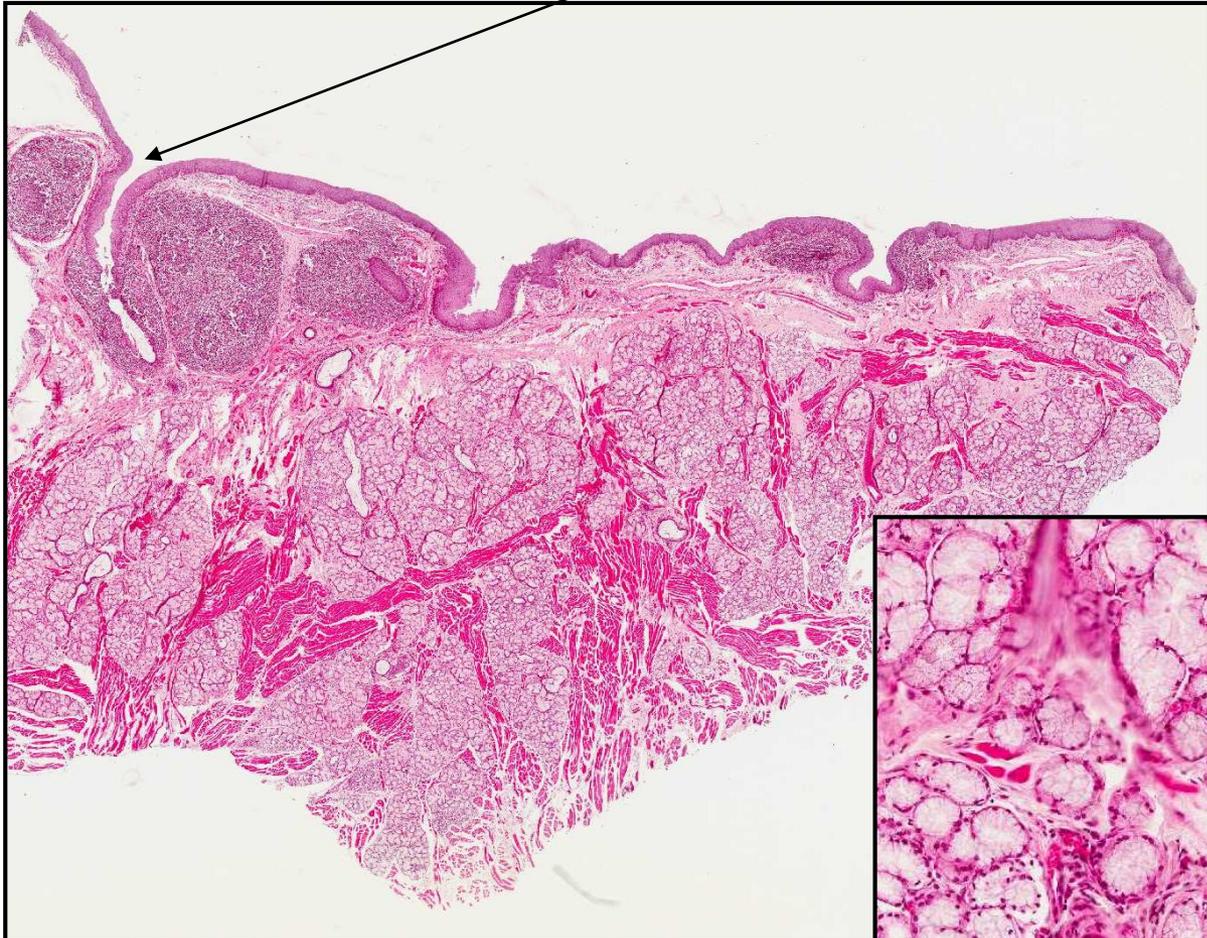

Thymus in involution

- missing cortex/medulla border
- lymph tissue replacement with CT + fat)
- Hassal's corpuscles

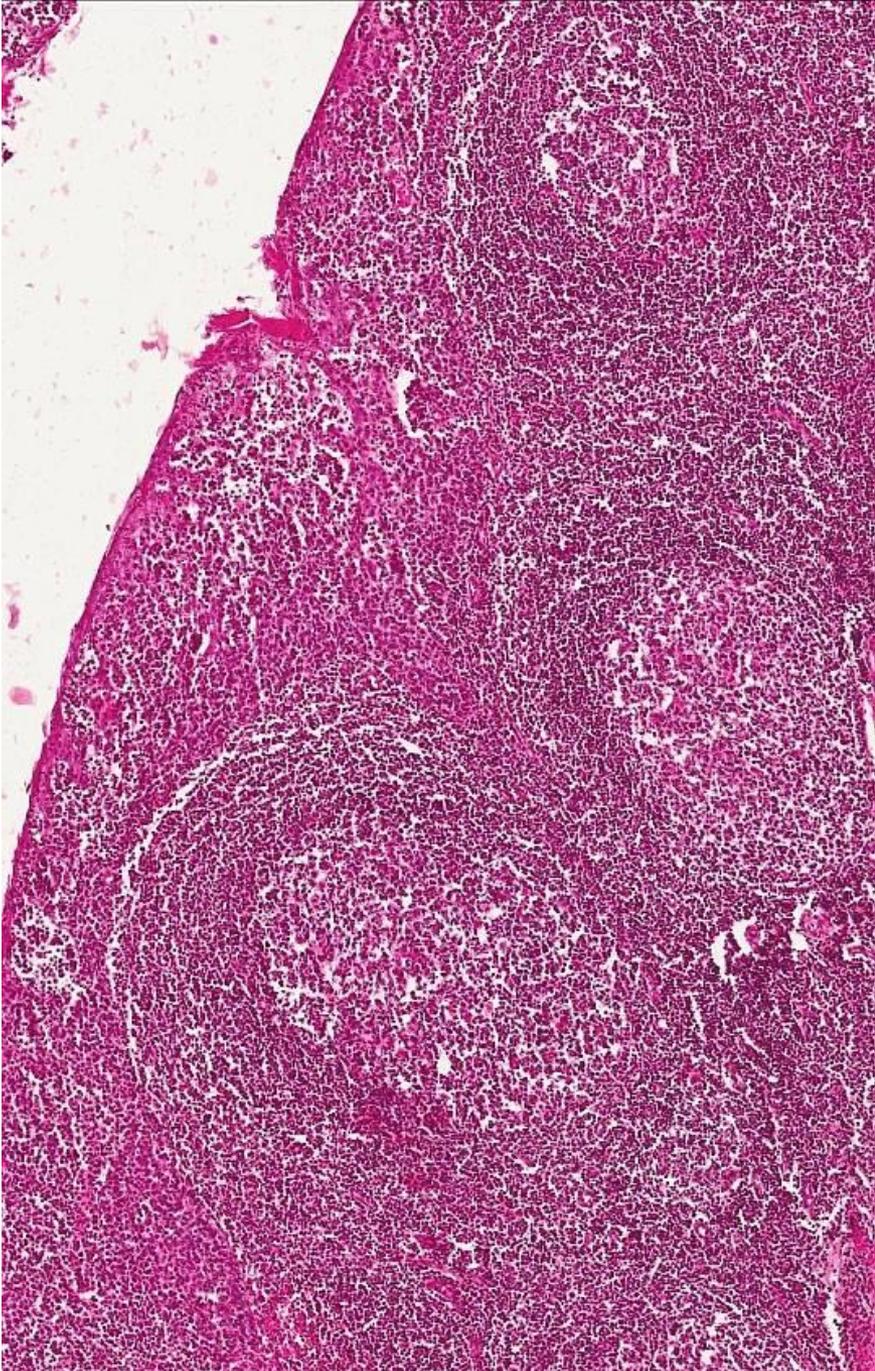

Lingual tonsil

crypt

Palatine tonsil

crypts
