

Lesson Plan_3 sample

Name of the teacher: Dr. Judy

Title of the lesson: Planets in the solar system

Objectives: The learners will:

1. recognize each planet
2. write 5 facts about their planet
3. select and design one of the planets in the solar system
4. demonstrate the configuration of planets around the sun

My Very Elegant Mother Just Served Us Noodles

Teaching procedure: explain lesson objective, students select and research favorite planet, students use materials to design their planet, students will receive instructions to arrange the planets in order of their distance from the sun and rotate around the sun.

Assessment of learning:

Formative assessment- use observation to see if students understand what to do and correctly design a planet with all of its attributes.

Summative assessment-homework worksheet with questions about each planet and test at the end of the instruction on the solar system.
