BrainPOP ABOUT US

BrainPOP Jr. k-3

Who We Are Quick Links

Founded in 1999, BrainPOP creates animated, curriculum-based content that engages students, supports educators, and bolsters achievement. Our award-winning online educational resources include [BrainPOP Jr. \(K-3\)](#), [BrainPOP](#), [BrainPOP Español](#), and [BrainPOP ESL](#). All are supported by [BrainPOP Educators](#), our teacher community now more than 110,000 members strong and featuring free lesson plans, video tutorials, professional development tools, graphic organizers, best practices, and much more.

Ideal for both group and one-on-one settings, BrainPOP is used in numerous ways, from introducing a new lesson or topic to illustrating complex subject matter to reviewing before a test. Content is aligned to academic standards and easily searchable with our online [Standards Tool](#). Uniquely suited for 21st-century learning, all products are fully compatible with interactive whiteboards, learner response systems, projectors, Macs, and PCs. No downloading, installation, or special hardware is required.

BrainPOP was conceived by Dr. Avraham Kadar, M.D., an immunologist and pediatrician, as a creative way to explain difficult concepts to his young patients. Today, we host more than 8 million visits to our web sites each month, from thousands of schools worldwide. We take pride in our in-house team of educators, animators, and writers, who produce and continually improve BrainPOP, incorporating valuable teacher and parent input. We are aided by diverse group of educators who serve as our [Academic Advisors](#).

To start exploring [BrainPOP Jr.](#), [BrainPOP](#), [BrainPOP Español](#), and [BrainPOP ESL](#), register for our [Free Trial](#).

Read the scientifically based [research](#) that demonstrates BrainPOP's impact and effectiveness.

Ready to subscribe? Visit the [BrainPOP Store](#) or our [Funding](#) section.

EARTH SYSTEM

PLATE TECTONICS

Plate Tectonics

There's a continent called Pangea?! Well, there was! In this BrainPOP movie, Tim and Moby will explain how a continent can disappear. You'll learn about the very first continent on Earth, how long ago it existed, and what happened to it. Discover why the earth isn't as stable as you think it is, as well as just how much the continents can shift in a year! Also, find out about the three different kinds of plate boundaries, and what can happen at each one. Whatever happens, you probably don't want to be there when it does!
