#### Task 4 – Reading – Globalisation: What on Earth is it About?

- 1 Globalisation is a reality that touches our lives in many ways. Many say it is a good thing: increased international trade has made us wealthier and allowed us to lead more diverse lifestyles. But the crowds that demonstrated in Prague for the annual meetings of the International Monetary Fund and the World Bank disagree. The coalition of environmentalists, anti-poverty campaigners, trade unionists<sup>11</sup>, and anti-capitalist groups see the growth of global companies as raising more problems than it solves.
- 2 The term "globalisation" was first coined in the 1980s, but the concept goes back centuries. Some say the world was as globalised 100 years ago as it is today, with international trade and migration; however, the 1930s Great Depression put an end to that. Nation states realised that international markets could cause much misery in the form of poverty and unemployment. After World War II, the Western states reduced protectionist barriers<sup>12</sup> around the world, stimulating the free movement of capital and allowing companies to set up bases abroad.
- 3 For consumers and capitalists, increased trade is good in that it has made for more choice in the market place, greater spending, rising living standards, and a growth in international travel. Globalisation supporters say it has promoted information exchange, led to a greater understanding of other cultures, and allowed democracy to triumph over autocracy.
- 4 But as numerous protests against World Trade Organisation conferences around the world have proved, there is a growing opposition to the forces of corporate globalisation. Critics say that what the West has gained 13 has been at the expense of developing countries. The already small share of the global income of the poorest people in the world has dropped from 2.3% to 1.4% in the last decade.

**5** But even in the developed world, not everyone benefits. The freedoms gained from globalisation are leading to increased insecurity in the workplace. Workers are under threat<sup>14</sup> as companies move their production overseas to low-wage economies, where employees have little protection. People in small and medium-sized firms worry that large scale global economies will put them out of work. Another concern<sup>15</sup> is that huge transnational companies are becoming more powerful and influential than democratically-elected governments, putting shareholder interests<sup>16</sup> above those of communities and even customers.

**6** Ecologists say corporations are disregarding<sup>17</sup> the environment in their search for mega-profits and operating where environmental laws are weaker. Human rights groups say corporate power is restricting individual freedom. But does the fact that communications have improved so much that this debate can take place simultaneously across continents prove that the global village is already here?

#### **Discussion questions**

- 1 What are some of the benefits and drawbacks<sup>18</sup> of corporate globalisation?
- 2 Who benefits most from globalisation? Who suffers the most from it?
- 3 What issues related to globalisation are of concern to you?

#### Statistics related to globalization and trade liberalization – Read and discuss

1. In 1960, the 20% of the world's people in the richest countries had 30 times the income of the poorest 20% -- in 1997, 74 times as much.

An analysis of long-term trends shows the distance between the richest and poorest countries:

- o 3 to 1 in 1820
- o 11 to 1 in 1913
- o 44 to 1 in 1973
- 2. Half the world today -- nearly three billion people -- live on less than two dollars a day.
- 3. The GDP (Gross Domestic Product) of the poorest 48 nations (i.e. a quarter of the world's countries) is less than the wealth of the world's three richest people.
- 4. Nearly a billion people entered the 21st century unable to read a book or sign their names.
- 5. Less than 1% of what the world spent every year on weapons was needed to put every child into school by the year 2000 and yet it didn't happen.
- 6. The developing world now spends \$13 on debt repayment for every \$1 it receives in grants. The poorer the country, the more likely it is that debt repayments are being taken directly from people who neither made the loans nor received any of the money.
- 7. 20% of the population in the developed nations, consume 86% of the world's goods; 12% of the world's population use 85% of its fresh water.
- 8. The top fifth of the world's people in the richest countries enjoy 82% of the expanding export trade and 68% of foreign direct investment -- the bottom fifth, around 1%.
- 9. 51% of the world's 100 hundred wealthiest bodies are corporations, rather than nations.
- 10. The main beneficiaries of the market-opening policies of the past decade are these large corporations, especially the top 200. Seven of them (Texaco, Chevron, PepsiCo, Enron, Worldcom,

McKesson and the world's biggest corporation—General Motors) actually paid less than zero in federal income taxes in 1998, because they received rebates of more than they paid in taxes.

- 11. 45% of the \$25 billion that the **World Bank** lends each year is dispensed directly to Western transnational corporations.
- 12. In 2000, the Joint Economic Committee of the US Congress found a failure rate of 55-60% for all **World Bank**-sponsored projects. In Africa, the failure rate reached 73%.

indulged in that familiar delight, a cup of sweet coffee, the probability was that the coffee came from Java or South America and the sugar from the West Indies. Only the hot water was local. And in the 19th century even that ceased to be true as European companies took over most of the public utilities.

London for example are much more interesting than 20	newspapers published in the Arab world. And they do
circulate in the Arab world quite extensively so the debate is goi	ing on, but it's not by any means a free and open debate
