

GLASGOW PATTERN / GLASWEGIAN

EE Varieties 2020/2021

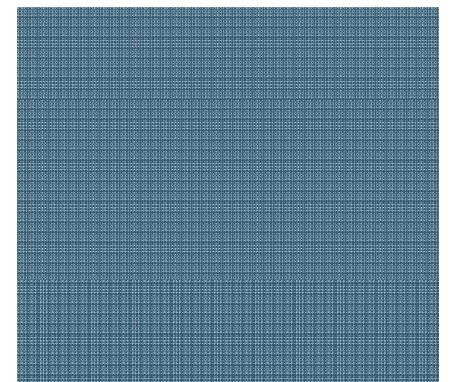

Ema Bícová

INFLUENCES

> Influenced by Highlander (traditional Gaelic-speakers) and Irish migrants from 19-20th century

> Scots is replaced by standard and colloquial English vocabulary

- > Modern Scots = sister language of Modern English, recognized as a regional indigenous language of UNESCO
- > Both independently diverged and developed from Early Middle English
- > Considered a variety of English by some

COCKNEY INFLUENCE?

Some studies suggest that working-class adolescents have started to adopt certain aspects of Cockney and SE England accents due to their prominence on TV:

- TH-fronting
- Reduced (typical Scottish) post-vocalic /r/

J.C. Wells notably disagrees with this:

- Journalists misrepresented TH-fronting prominence
- No evidence TH-fronting originated in London
- Dialects change over time
