| | SMODCH | | | | | | |

V rámci cvičení budete rovněž stanovovat některé odvozené znaky, používané v metodě nazývané SMODCH.

| Zkratka | Název veličiny |
|---------|--|
| LAR | poměrná olistěnost (leaf area ratio) |
| SLA | specifická listová plocha (specific leaf area) |
| SRL | specifická kořenová délka (specific root length) |
| LMR | poměrná hmotnost listů (leaves mass ratio) |
| SMR | poměrná hmotnost stonku (stem mass ratio) |
| RMR | poměrná hmotnost kořenů (roots mass ratio) |

| 5 | 83 | | | | | | | |
|---|----|--|--|--|--|--|--|--|

| | | | | | | | | |
| | | | | | | | | |

ané růstová analýza. Jejich přehled, včetně výpočetních vzorců, udává následující tabulka:

| Výpočetní vzorec | Jednotky |
|------------------------------|---------------------|
| $LAR=LA/DM_{plant}$ | $m^2 \cdot kg^{-1}$ |
| $SLA=LA/DM_{leaves}$ | $m^2 \cdot kg^{-1}$ |
| $SRL=RL/DM_{roots}$ | $m \cdot kg^{-1}$ |
| $LMR=DM_{leaves}/DM_{total}$ | bez rozměru |
| $SMR=DM_{stem}/DM_{total}$ | bez rozměru |
| $RMR=DM_{roots}/DM_{total}$ | bez rozměru |
