The Structure of a Presentation

A quote about public speaking says:

"Tell them what you're going to tell them, then tell them and finally tell them what you've told them"

Follow the advice and remember to include an **introduction**, **main body** and an **ending** in your talks.

I. Introduction

Complete this introduction with the words from the list.

talk about	hear	go along	brief	thank you	finally	points of view	
Good morni	ng and _	for be	eing here t	oday. My nan	ne's Jane B	rown and I'm respons	sible for
student lang	uage pro	grammes. Wha	t I'd like	to do today is	S	the new system of lan	nguages
taught at thi	s univers	ity. I'm going	to be	, about ten	minutes, n	ot more. I'm going to	look at
the languag	e prograi	mmes from th	ree	: firstly, v	what langua	ages we offer; second	dly, the
system of co	ourses; an	d	the exam	requirements.	I will also	show you a few bits f	rom the
videoconfere	ence we h	ad three days a	ago. If you	have any que	stions, just	interrupt me as I	·
Your point of	of view m	ay well be diffe	erent, and v	we'd like to	fron	ı you.	

II. Main Body

Transitions, also called signposting phrases or signposts are an integral part of a smooth presentation, yet many speakers forget to plan them. The primary purpose of a transition is to lead your listener from one idea to another. These words are not difficult to learn but it is essential that you memorize some of them and can use them when you are under pressure giving a presentation.

III. Ending

Ending

The ending comprises 5 things and you should not forget about any of them. So, when ending your talk, remember to

- **Sum up** (give the main points in a short and clear form)
- **Conclude** (give an original thought which implies from your speech, for more see the paragraph below)
- **Sources** (state the sources for your presentation on one slide, if not possible, give at least the main ones)
- **Questions** (encourage the audience to ask questions)
- Close (thank the audience for listening)

Task: Write a conclusion to the presentation.

That brings me to the end of my presentation. Let me just run over the key points again. Very briefly, there are three. First, water-related problems continue to affect millions of people and, contrary to what most people believe, future water supplies will not last forever. Second, the growing number of projects trying to provide ever-increasing supplies of water indicate that a growing number of countries are aware of the present problems and of those to come. Third, current solutions are mostly highly expensive, not very practical and also very time-consuming. From what you have heard, there are some very good reasons to believe that the eventual solution would definitely be to conserve water worldwide and control pollution. In other words, we need to respect our most valuable natural resource much more than we do.

At this point, I'd like to leave you with the following thought:

Thank you for your attention and now, if you have any questions, I'd be pleased to answer them.
