Professor Lone Gram
DTU Aqua,
Jaegersborg Allé 1,
2920 Charlottenlund

Dear professor Gram,

My name is Altantuya Baatartsogt and I am writing this letter to apply for the PhD scholarship in marine bacterial biotechnology at your institute.

In May 2009, I will be graduated from Masaryk university with a Master's degree in microbiology. I plan to pursue a career as a environmental **microbiology** after graduation. During my studying, I have developed and improved valuable laboratory skills. I am currently working with **Diplom** thesis named Identification of Salmonell protein by antigen character.

From 2001-2007, I worked at Natural History Museum of Mongolia, and my work responsibilities were to collect specimens, to identify species. When I work, I was participating and organising several scientific conferences and meetings. Example; in 2006, I organised joint scientific conference named „*Orthopteras in Mongolia*“ and published the research paper.

I look forward to the opportunity **to** interview for a position with DTU Aqua and will call you next week to confirm receipt of my resume. Thank you for your time and consideration.

Sincerely,

ALTANTUYA Baatartsogt
