

SUSTAINABILITY IN PRACTICE: educational project, Czech Republic

Alois Hynek Bretislav Svozil Jan Travnicek Jakub Trojan Tomas Vagai Name of the Project

Category

Theme

Target Group

Area of Implementation

Sustainability in practice Multi-stakeholder involvement Rural development, environment education, project training, sustainability and security School children, university students, rural community, general public, policymakers, administrators, researchers Rural area in Moravia/Czech Republic Deblin primary school

Project aims

The main goal is empowering the local community

"pupils/students and schools as mediators"

Other goals:

- social study of the town (talking to people, observing, participating, ethnography)
- ☑ identification of community actors/actants, processes and desires
- knowledge of social actions
- problem solving issues (see further)

the politics of practising sustainability

Location the area

Introduction: local primary school as an equal partner for University?

- For universities involved in research
 - Primary school as a key clue into local community and source of specific local knowledge
- For municipalities and public administration
 - Primary schools as valid partner for governance and decision making
- For local community

00000000

Primary schools as important endegeneous actor and actant of local community life and development

B. Bloom (1956), revised 2001

Levels of intelectual behaviour in learning – a taxonomy with overlapping domains:

Cognitive

0000000

- Psychomotor
- Affective

Project educational objectives

00000000

- Connected with key "sustainability" UN agenda + Millennium Ecosystem Assessment documents
- Improvement and reorientation of educational curricula documents towards sustainable development
- Cooperation of primary, tertirary education institutions with local community and government/authority
- Analysis of environment, knowledge-power relations and various spatialities of the cultural landscape of the Deblin area
- Evaluation the living conditions/livelihood in the Deblin area
- Empowerment of local communities in good governance and opening debate on the state of the environment is a starting point in searching for sustainable development

RIGUEN

Methodology

- inter/transdisciplinary cooperation of geographical and non-geographical approaches
- ➡ using both surface and deep data (Cloke, P. et al. 2004)
- using triangulation (Denzin, N. 1994), multiple methods
- Key-quality oriented ethnographical fieldwork/participatory approach: in the sense of "thick description" (Geertz, C. 2000)do not study in villages, study villages

1) Roles change

- foreigner/true observer x true participant (participation in the community life)
- 2) Insight into the role of power permeanting power/resistance
- 3) Revealing the internal networks actors in networking
 - formal and informal powers over a particular site

Development of project activities

- Mental mapping as unique personal interpretation/presentation of the reality, used on a daily basis for spatial mobility and orientation, evaluated and improved continually
- Definition of <u>the area</u> linked to the results of mental mapping
- Collecting available <u>data</u> and participative/understanding interviews with major actors
- The profile of the Deblin area
- List of <u>major problem issues</u> connected to SLE (significant landscape elements)
- Students' and pupils' <u>public meetings</u> in the Deblin primary school premises and joint field work, empowering the people
- Creating outputs and <u>public presentation</u> of the results
- Joint <u>field</u> excursions/expeditions and identification of themes expected by the public/local community or government /authority – governance

Community learning as significant part of the case study project

- identification of key actors/actants in community
- community networks
- power inside and outside of community
 - Iand use

00000000

- owners, users, labourers, visitors.....percepts and affects
- sustainability/security x priority for the community
- debate with representatives of the local community and local authorities
- main development problem areas and proposed solutions
 - analysis, interpretation, synthesis, evaluation, proposition (LANDEP)

MASARYK UNIVERSITY

Figure 6.6 Cognitive image of Boston This map was compiled by Kevin Lynch, one of the pioneer researchers into cognitive images, from interviews with a sample of Boston residents. Lynch found that the residents of Boston tended to structure their cognitive images of the city with the same elements. He produced ingenious maps, such as this one, to demonstrate the collective "mental map" of the city, using symbols of different boldness or color to indicate the proportion of respondents who had mentioned each element. (After K. Lynch, The Image of the City. Cambridge, MA: M.I.T. Press, 1960, p. 146.)

Mental mapping – perspective from university students

Primary school pupils Deblin x university students MU Brno detailed maps x using generalization real x mediated reality stereotypes x "objective" perception not linked with greater area x patterns and connections

Deblin community

"Deblin area becomes a popular location ..."

rodinné domy Deblín

Are there enought water for citizens?..."

View of new residents

- Basic services,
- Good land parcel prices. obsolote building

Conservatives

- Clean environment, 'new peasants', strong identity
 Good location, X city services,

 - building new houses in the family,

Land use parcels in Deblin cadastre

A.Hynek, Svozil, B., Trávníček, J., Trojan, J.: Trvalá udržitelnost 'Deblínska', 2009

Significant landscape elements (SLE) in the frame of territorial system of ecological stability (Buček,Lacina)

- "Ecological, geomorphological or aesthetic value of landscape shaping its appearance and / or contributing to its stability" (Act 114/1992)
- Decision maker of SLE is legislatively ambivalent
 - Which gives the chance for creativity and participation
- Potential/capital of SLE as actant (in the sense of Latour, 2005)
 - ecological stability, biodiversity, aesthetic value (the "biological" function)
 - reducing water and wind erosion (the "protective" function)
 - relicts of historical landscape structures (the "historical" function)
- Creating the relationship between pupils and the town landscape
 - examination of the SLE (cognitive level)
 - management of the SLE (landscape and community actors/actants)
 - SLE usage (eg for sustainable tourism)

CURRENT RISKS IN RELATION TO SUSTAINABLE PERSPECTIVE ON WATER

POTENCIÁLNÍ RIZIKOVOST DEBLÍNSKA VE VZTAHU K TRVALE UDRŽITELNÉMU POHLEDU NA VODU K ROKU 2008

Blahoňůvka: reduce the proportion of spruce monocultures in otherwise appropriate composition of riverside vegetation (alder, ash, maple).

Deblin cadastre

water stream

significant landscape component

Úsušský remízek: general clean up, remove the brambles.

Strejčkov: strengthen the dam pond bottom, remove the remnants of wire fence and increase the proportion of oak and fir.

Suchá loučka: cut a meadow, improve the condition of the bush line vegetation,

Jan TRÁVNÍČEK Barbora KREJČÍKOVÁ Martin BRAUN Ondřej ŠERÝ Masaryk University Brno, 2010 Mokřad: cut an adjacent meadow species composition and improve 2 km Source of Orthophoto: extend SLC. VÚKOZ, v.v.i. wetland

SLE deployment in the land of Deblín, graphical solution suitable for popularization through lectures and instructional signs

Financing the future

- Activities supported through projects financed by structural funds (EU – Operational Programme Education for Competitiveness)
- 2 key projects

00000000

Sustainability as part of school educational programme

Atlas and local geographical textbooks

Supports for students (ICT, e-learning)

- Empowering language skills through environmental education
- Other projects where Primary school Deblin

plays the "partner role"

SUMMARY of current results

The activity helped pupils to interest local residents about their neighborhood resident and encourages them to actively engage in the project.

PUBLIC PRESENTATION OF RESULTS

Results discussed with representatives of public administration and local authorities to take account of them in practice.

Cooperation still continues...

- Vohančice (water management issues)
- SLE excursion
- Grants and funds support
- Informational boards in woods
- SLE management in cooperation with Municipality of Tišnov
- Implementation into curricular documents at Primary school Deblin
- Best practice preparation with participation of Ch. Schrefel 17&4 Organisationsberatung GmbH

2010: Actors meeting – local Agenda creation?

VAZBY NA DEBLÍN

TRVALÁ UDRŽITELNOST 'DEBLÍNSKA' 🎬 Alois Hynek, Břetislav Svozil, Jan Trávníček, Jakub Trojan

ve spolupráci s žáky Základní školy Deblín, studenty Geografického ústavu Přírodovědecké fakulty Masarykovy univerzity v Brně, městysem Deblín a městem Tišnov

Zákon č. 17/1992 Sb. o životním prostředí České republiky uvádí: "Udržitelný rozvoj společnosti je takový rozvoj, který současnýn budoucím generacím zachovává možnost uspokojovat jejich základní životní potřeby a přitom nesnižuje rozmanitost pří a zachovává přirozené funkce ekosystémů. Z této definice vychází projektová spolupráce mezi Základní

olou Deblín a Geografickým ústavem Přírodovědecké fakulty Masarykovy univerzity v Brně. Usiluje o aktivaci a participací všech subjektů, které žijí a nebo nějakým způsobem ovlivňují Deblínsko' a mají snahu se svými podnětnými návrhy podílet na doucí podobě rozvoje územi
